JULY REINVESTMENT IMPORTANT

July is one of the greatest months of the year from the standpoint of the investor.

During the month many of Canada's most representative institutions including governments, municipalities, railroads, banks, insurance companies, power companies and all manner of industrial enterprises make distributions in dividends or interest to those who have had the good fortune and foresight to invest in the enduring enterprises of Canada and to those who have thus shown their faith in these enterprises and the future growth of Canada.

The conserving and reinvesting of the incoming funds is important, both from the individual and from the national standpoints. Canada and Canada's enterprises are bound to grow in the future and funds are needed for their growth. It is for the investor to participate in the growth of Canadian institutions with Canada's growth.

Choice investments in wide range are now available. We shall be glad to consult with those having investment or reinvestment problems.

## *The Canadian Appraisal Company, Limited*

The Pioneer Appraisal Organization of Canada

ESTABLISHED 1905

In view of recent happenings in financial circles, it is altogether likely that greater scrunity will be exercised by Banks and other financial institutions in respect of the affairs of their customers, as well as of the securities offered to them for Loans.

An appraisal affords just such evidence of financial standing and of values as is required for these purposes. Being independent and disinterested it commands confidence, particularly when accompanied by the certificate of an experienced and reputable firm.

BANKING INVESTMENT INSURANCE INDUSTRY

# Merits of Partial and Complete Audits

### Partial Audits Are Uncommon But Not Unknown in Canada —Special Circumstances Which Might Justify Them—What Accountants Regard as Proper Scope of an Audit

The financial statement for 1921, of a Canadian insurance company, is accompanied by the following auditor's certificate:

"I have not audited the accounts of the above company for the year ending 31st December, 1921, nor have I examined the reserve for unexpired premiums, but I have checked the different items in the balance sheet and compared them with the books of the company.

"Subject to the reserve for unexpired premiums being correct and the reserve against depreciation of securities being sufficient, I certify that the above balance sheet is, in my opinion, properly drawn up so as to exhibit a true and correct view of the company's affairs as at 31st December, 1921.

"I have received all explanations and information I have required."

The auditor is a member of one of the most reputable firms in the Dominion. If he were not perhaps he would not have put so bluntly a statement, which emphasizes the fact that the audit is not one as generally understood. The insurance company itself is one of good standing.

## A Partial Audit

The explanation of this certificate, which would appear to be rather a criticism than a commendation of the balance sheet, is that the insurance company is a subsidiary one, being owned by a British insurance company. Only a partial audit was made, as is evident from the certificate. Doubtless the auditor would have preferred to make a complete audit, not only for the higher fee, but also as to conform to the general practice. It is also explained that the principal company preferred to save the extra fee, being satisfied with the management. In fact, its own affairs in Canada are looked after by the same management.

In this connection it must also be noted that there were no profits taken into the accounts of the principal company from the subsidiary. What profit was realized was added to the Canadian company's surplus. The only effect on the principal company is as regards the stock which it holds. Since a complete audit of the subsidiary's accounts was not made, there is a greater element of uncertainty in whatever value is placed on these holdings.

This case is, therefore, no reflection on the auditor, who only carried out his instructions as to the extent of the audit to be made. Nor is it a reflection on the company itself, which is not required by law to have an audit made; it is entirely a question of policy, to be determined in the last analysis by the shareholders of the principal company, who are the only ones interested as owners. The Canadian company has a Dominion license, and though the Dominion law does not require an audit it does require an examination by the Insurance Department. In this way the interests of the assured are protected.

## Accountants' Views

Such a partial audit as was made in this case is not the usual practice in Canada, nor do chartered accountants regard it with favor. One prominent accountant to whom the certificate was shown, without explanation of the circumstances or identification of the company or auditor, said:

"I can only conclude that the regular auditors were precluded, for some reason not disclosed, such as illness or absence from town, from acting and making the usual detailed audit, embracing the examination of all vouchers, securities, re-insurance, reserve, outstanding accounts and other essentials, and that the auditor who has given the certificate as outlined did so because the time at his disposal permitted but a cursory examination of the company's affairs.

'It is not a certificate which is either recommended nor found in the practice of reputable auditors for Canadian insurance companies, and it would appear that while it has been given in the report to the shareholders, that its only possible justification would be in a special report to the directors, who might ask for an interim balance sheet for a special directors' meeting.

"As remarked before, the usual practice amongst accountants is to make a detailed examination of all vouchers and requisite reserves, etc., and not to qualify a certificate unless some of the constituent items do not meet with approval on their part."

As previously stated, the special circumstances of the case were not explained to this accountant, but the opinion he expresses makes clear the fact that the practice is unusual, and not favored by chartered accountants. The circumstances very nearly meet the exception he makes, of a "special report to the directors, who might ask for an interim balance sheet for a special directors' meeting."

Another accountant, to whom the circumstances were explained, stated that the certificate and the audit itself were unusual, but not unknown. The inspection made by the Dominion Insurance Department, he pointed out, was thorough, and the return to the government consequently was a reliable statement of the company's affairs.

---

## DATE OF MACAROW TRIAL FIXED

### Will Commence July 18, According to Decision of Judge Decarie

July 18 is the date fixed for the trial of D. C. Macarow, former general manager of the Merchants Bank of Canada, who is charged with having wilfully signed a false bank return. The trial will be a speedy one, before one of the judges of the Court of Special Sessions, probably Chief Judge Decarie, before whom the case was to have been heard last week.

After argument between opposing counsel, C. A. Wilson, K.C., for the Crown, and George Montgomery, K.C., for the defence, the date as above was agreed upon, and Judge Decarie promised that a special room in the Superior Court would be reserved in order to do away with any postponements on account of lack of room in the lower courts.

Mr. Montgomery said that the position of his having the trial start earlier, and asked that July 11 be fixed for the first hearing. Mr. Wilson said it would be impossible to proceed as early as that, first on account of the heavy roll waiting to be disposed of, and secondly, on account of the vacation season. He was in need of a rest, he said, having had a particularly strenuous term, and if the Macarow case were to be heard so early, it would virtually mean that the holidays would be entirely spoilt.

Mr. Montgomery said thtat the position of his client was such as to demand that the trial be held as early as possible, the circumstances being not only peculiar, but distressing. "Mr. Macarow," he said, "has been resting under this charge from the time the first summons was issued, and naturally it is causing him considerable inconvenience, as he is unable to resume his occupation until his case is disposed of."

---

## PRELIMINARY ESTIMATES TABLED

### Thirteen Million Required, According to Finance Minister's Statement Before Close of Session.

Supplementary estimates totalling $13,298,015 were tabled in the House on June 23 by Hon. W. S. Fielding, Minister of Finance. Of the total amount $12,094,765 is chargeable to consolidated revenue fund, and $1,203,250 to capital account. The largest single item is one of $5,500,000 to provide for provisional bonus allowance for inside and outside civil service. This is to be paid to such persons and classes of persons, in scch amounts and at at such times as the Governor-in-Council may determine." The sum of $470,000 to provide for expenditures not otherwise authorized, arising out of the recommendations of the special Parliamentary Committee on Pensions, Insurance, and Re-Establishment, is also placed in the estimates. For the purpose of providing further assistance to unemployed pensioners and vocationally trained disabled men and their dependents, an amount of $150,000 is provided.

## Miscellaneous Items

A sum of $130,000 to settle on the basis of 50 cents on the dollar, the claims of the creditors of the Prince Rupert Drydock and Engineering Company, Limited, for services rendered and material supplied in connection with the construction of the "Canadian Scottish" and "Canadian Britisher" appears under the miscellaneous appropriations.

This appropiation totals $6,114,000 and contains also an item of $150,000 to provide for the application of the reclassification of inside civil service. The sum of $20,000 to provide for railway and steamship charges for freight on goods for the "save the children fund" is included in this amount. An amount of $175,000 for the purchase of British Columbia House, London, England, is provided.

As stated by the Minister of Marine, the sum of $30,500 to provide for compassionate allowances to relatives of officers, crew and lightkeepers on board the steamship "Lambton," which foundered in Lake Superior last April, is placed in the estimates.

Under the heading "harbors and rivers" appears a vote of $1,000,000 for the Esquimault Drydock, $85,000 for Port Arthur and Fort William harbor improvements, and $100,000 for Toronto harbor improvements.

The sum of $15,000 for expenses of the Canadian delegation to the League of Nations, and $8,852 for expenses of the Canadian delegation to the Genoa conference are also listed.

---

## CANADIAN FIRE UNDERWRITERS' ASS'N

### Alfred Wright, of Toronto, Elected President at Annual Meeting Held Last Week.

The 39th annual convention of the Canadian Fire Underwriters' Association opened at Pointe a Pic, Quebec, on June 28. Representatives from British, American and Canadian companies were in attendance. The following officers were elected for the ensuing year:—President, Alfred Wright, London and Lancashire Fire Insurance Co.; vice-presidents, Province of Quebec, W. E. Baldwin, Continental Insurance Co.; Province of Ontario, J. R. Stewart, Aetna Insurance Co. New members of the Executive Committee, W. E. Findlay, Niagara Insurance Co.; J. B. Peterson, Phoenix Insurance Co.; A. M. Kirkpatrick, Home Insurance; W. T. Perry, Ocean Insurance Co.

During the convention the golf trophy donated by J. B. Laidlaw, of the Norwich Union Insurance Co., Toronto, was played for on Murray Bay golf links. The convention closed on Saturday.

## RAILWAY MATTERS STILL DOMINANT

### Question of Rates Settled by Board—Co-ordination of Grand Trunk and Canadian National

(Special to The Monetary Times)

Ottawa, July, 5.—The railway rates question having been settled for the time being, interest now centres in the personnel of the new board for the Government railways, that will take charge of the co-ordinating of the Grand Trunk with the Canadian National and operate the whole 22,000 miles of road owned by the Government.

It is difficult to get accurate information on this subject, but it is understood that Sir Joseph Flavelle would be continued in the chairmanship, if he would act. The fact is that during the last eighteen months he has secured an almost unrivalled knowledge of the affairs of the Government Railways, that, in a sense, he has become invaluable. For this reason it is not unnatural that the Government being desirous or dealing with this problem in the best way possible, should desire to avail itself of his services. But it is not thought that Sir Joseph wants the job. Then again the political atmosphere may not be congenial.

### The Rate Reduction

The Railway Commission's order reducing rates fulfilled expectations to the extent that the Crow's Nest Pass rate on grain and flour having been restored, the rest of the Dominion has not received as important reductions on basic commodities, as would have been the case had the offers of the railway been accepted. Alberta and Saskatchewan gain much through the new grain rate, but Manitoba gains very little. On the other hand there is a very great deal of difference between the 7½ per cent reduction on basic commodities, and the 20 per cent offered by the roads. British Columbia will profit the reduction in the mountain scale, but it can hardly be said that this is not at the expense of the rest of the Dominion.

While there is disappointment that greater reductions have not been made in the rates on basic commodities, there is a conviction that the Commission has done the best possible under the circumstances. After all, it is the only body at all qualified to deal with rates. Parliament knew this all the while. It is also to be noted that it has paid a very great deal of attention to the estimates of the railways. These were much questioned in committee; but the commission, through careful investigation and long experience, knew that, in the main, these figures could not be gainsaid. It is also to be noted its conclusion is that the reductions will cost the railways $22,000,000, that is on a basis of 1921 business, from which, of course, must be deducted whatever they save through wage reductions and cheaper supplies.

### Railway Deficit

From present indications, the country is up against as large a deficit on the Government railways this year, as it was in 1921. During the fivemonths ending May, the operating loss on the mileage, outside of the Grand Trunk, was apparently $7,000,000. On this portion of the milegae it is impossible that from now until the end of the year, the operating loss will be cut deeply below that for the same months last year, so that a total operating deficit of $9,000,000 would not seem to be out of the way.

Against this, however, is to be set the improved showing made by the Grand Trunk, which for the first five months showed a gain in earnings of $2,591,000 as compared with the figures for last year, due probably to the betterment in business in the United States. Allowance must also be made for savings that should be made through co-ordination but of which no estimate can be made. But against this is the Commission's view that the loss in revenue will be about $11,000,000. So if the Government system cuts its operating deficit by $7,000,000 or $8,000,000, it would hardly be in a better position than it was last year, unless unexpected savings are made through co-ordination. On the other hand there is the increase in fixed charges, which, on the Canadian Nationals and Grand Trunk, will probably amount to $6,000,000.

### The Intercolonial

As the Railway Commission does not control rates on the Intercolonial, these being subject to the Minister of Railways, no doubt reductions applicable to that mileage will also be announced, and it is quite probable that there will be an approximation to something like the old differentials, enjoying by these provinces for 40 years up until 1918. This would make a further cut into the earnings of the Government reods. If reductions are not made along the lines indicated, there will be great disappointment in the Maritime Provinces, complaints from which over rates, have been quite as strong as from the West. Their political influence is sure to force reductions.

It is interesting to note that in the United States, where the railways are privately owned, any reductions in rates are a gain to the public, for if the railways earn less, the loss primarily falls on those who have invested their money in them. But in this country fully one-half of the drop in railway earnings through rate reductions must be made up for through increased taxation required to provide for the larger deficit on the Government roads. This is an important difference that is not clearly realized by many.

As the alleged discrimination in railway rates in favor of the east against the west has occupied a very great deal of the time both of Parliament and the Railway Commission, it is of interest to note the reasons on which the latter reached its decision that no such "unjust discrimination or undue preference" exists. Importance is attached to the admission of H. J. Symington, counsel for Manitoba and Saskatchewan before the Commission, that mileage is not the only factor to be taken into account in the determining of rates.

The Board says, and it quotes the opinion of other chief Commissioners in support of its view; "It appears that commercial conditions in the West exercise a preponderating movement of traffic in car-load lots and, consequently, any standardization that would effect an increase on the distinctly car-loard classes would bring about a serious dislocation of business. Here, again, the situation is that differing conditions have brought about different practices and rules and the rule or practice existing in one section and giving a different treatment is not a necessary measure of discrimination in another section."

"Counsel for the provinces of Manitoba and Saskatchewan stated that there was a difference in average hauls east and west, and while stating that in various cases the shorter hauls were at much lower rates in the west than in the east, he contended that the important matter in the west was the long haul. It is a legitimate deduction from this to say that the level of the rate in the east being, according to the counsel's submission, concerned with an average short haul, affords no necessary criterion of what the rate should be on longer haul traffic in the west."

---

## DECISIONS ON BANKRUPTCY LAW

### Number of Cases Indicate Doubt as to Meaning of Sections of Act.

Since 1920 decisions of Bankruptcy Courts in Canada have been appearing with increasing frequency in the Law Reports, and although many of the decisions are concerned with matters of practice, many others are of interest because of the construction placed by them on various sections of the Bankruptcy Act.

In this review seven cases are considered—three from Ontario, two from Quebec, and one each from Saskatchewan and Alberta.

### The Ontario Cases

One Ontario decision deals with the first three subsections of Section 31 of the Act and is in substance as follows: "A chattel mortgage upon all the goods and chattels in the tailoring shop of the mortgagor to secure what purported to be a present advance of $2,500, the only money advanced at the time the mortgage was given being $300.50, the balance representing an existing indebtedness for moneys previously borrowed, and for goods purchased, has the effect of giving the mortgagee a preference over the other creditors and will be presumed prima facie to have been made with a view of giving such preference under Sec. 31 (2) of the Bankruptcy Act and unless the presumption is met, must be deemed fraudulent and void as against the trustees under Sec. 31 (1) of the Act and therefore constitutes an act of bankruptcy under Sec. 3 (c) of the Act."

The next Ontario decision briefly states the effect of Section 13 in these words: "Section 13 of the Bankruptcy Act requires the debtor when seeking a composition and extension to lodge a statement of affairs, and whenever the Act requires this to be done, Rule 97 applies and it must be prepared and filed as therein mentioned."

The third Ontario decision deals with the case where a lease contained a proviso for three months' accelerated rent in case of bankruptcy and as stated at page 125 of volume 61, D.L.R.: "Where an indenture of lease for a term of years contains a proviso that if the lessees should take the benefit of any Act that might be in force for bankruptcy or insolvent debtors 'the then current succeeding three months' rent' should immediately become due and payable and the term become forfeited and void, and the acts of the trustee amount to a disclaimer of the lease, the landlord is entitled to rank as a general creditor in respect of the three months' accelerated rent, but any dividend payable in respect thereof should be reduced by the amount paid by the trustee for occupation. The claim of the landlord is not affected by the fact that he has rented a portion of the premises to a third party before the expiration of the three months, and so collects rent from two persons for a portion of that period."

The first Quebec case was a decision on a petition by a vendor under a conditional sale contract for possession of goods from the authorized trustee under the Bankruptcy Act. The facts and decision in substance are as follows: "By a contract in writing, the petitioner sold to the purchaser certain machinery, a portion only of the purchase price being paid at the time of sale and promissory notes being taken for the balance. It was agreed between the parties that in case of default in making the deferred payments according to the terms of the agreement, the notes would become due and payable and the petitioner be entitled to take possession of the machinery and terminate the contract, the title to and right of property in the said machinery to remain in the petitioner until the purchase price was fully paid. The notes were unpaid, and the machinery went into the possession of an authorized trustee as forming part of the estate of the assignor, under the Bankruptcy Act. The Court held that the petitioner was entitled under the provisions of the deed to take back possession of and remove the machinery as its own property and to terminate the agreement, and ordered the authorized trustee to hand over the machinery to the petitioner."

The second Quebec decision is briefly: "Under article 1543 of the Quebec Civil Code, the sale of movable property is liable to be rescinded within 30 days of the delivery for non-payment of the price, without it being stipulated in the sale, and such right of rescission cannot under any circumstances be destroyed by the insolvency of the debtor, the trustee having no more proprietary rights in the movable than the insolvent. This right is also given under the Bankruptcy Act when the goods are in the possession of the trustee and the petition is served within 30 days from the delivery of the goods to the insolvent."

The Saskatchewan case was a decision of the Court of King's Bench in Houlding v. Canadian Credit Men's Trust Association and dealt with the Bills of Sale and Chattel Mortgage Act and the Bankruptcy Act. The facts and decision in brief (60 D.L.R. 533) are: "The authorized assignee or trustee in bankruptcy can maintain an action to set aside a transaction for want of compliance with the provisions of the Bills of Sale and Chattel Mortgage Act (Saskatchewan), even although the transaction was complete before the Bankruptcy Act came into force. There being under the provincial legislation an existing cause of action in which the transaction was liable to be impeached, it was open to the Dominion Parliament to enact that this cause of action be vested in authorized trustee and prohibit any creditor from thereafter bringing action for his own benefit to impeach the transaction and this is what was done in the Bankruptcy Act, Secs. 6 (3) and 18, the only exception being under Sec. 35, where the trustee refuses to act."

The Alberta case concerned a petition by creditors of Progressive Farmers Limited. Five creditors presented a petition in bankruptcy and asked for the appointment of the Canadian Credit Men's Trust Association, Limited, as trustee, and the Judge in Bankruptcy later the same morning made an order appointing the Canadian Credit Men's Trust Association, Limited, interim receivers of the estate. Later the same day the debtor made an assignment for the general benefit of its creditors, under the Bankruptcy Act, to Jas. A. McKinnon, an authorized trustee. The petition, interim order and notice of hearing were served the same evening, shortly after the making of the authorized assignment. Upon the hearing of the petition the Judge in Bankruptcy held that the petition ought to be granted and made a receiving order appointing the Canadian Credit Men's Trust Association, Limited, trustees of the estate, and ordered the assignment to Jas. A. McKinnon withdrawn.

# Rains Benefit Western Crops

### Report States That Alberta Situation is Relieved for Some Weeks, to Come—Rye Being Cut and Wheat Heading Out Near Saskatoon

The Dominion Bureau of Statistics reports the receipt of the following telegrams on the condition of crops in Canada at the end of June:—

**Prince Edward Island.**—From the Dominion Experimental Farm at Charlottetown, June 30: "Beneficial showers fell frequently throughout June, totalling four and three-quarter inches. Cereals, turnips and potatoes very promising; mangolds below average; cutworms and potato beetles numerous. Hay crop good. Strawberries plentiful, with good prices. Large fruits have set well. Pastures are good."

**New Brunswick.**—From the Dominion Experimental Farm at Fredericton, June 30: "All crops doing well. Hay good, although little thin on last year's seeding. Floods damaged hay on interval. Pastures excellent, stock thrifty, grain promising, roots good, considerable damage from cutworms. Potatoes good, but damaged by floods. Apple set only average; strawberry only fair crop."

**Nova Scotia.**—From the Dominion Experimental Farms at Kentville, June 30: "Seasonable rains in most sections have resulted in vigorous growth of hay and cereal crops. Hay on last year's seeding light because of poor stand due to dry weather following seeding. Root crops generally showing many misses, but growth otherwise good. Potatoes good. Fruit set fair. Apples probably 65 per cent. of last year. Pastures average." Amherst, July 1: "Ideal growing weather throughout June. Mean temperature 62.03, precipitation 3.01 inches. Total sunshine 190.1. Most crops were seeded early and new seeded ground much better than anticipated. Sunflowers, potatoes, turnips and grains of all kinds have made excellent growth, corn fair, small fruit gives evidence of fair crop. Strawberries ripening well. Pastures excellent."

**Ontario.**—From the Ontario Department of Agriculture, June 30: "Crop prospects generally encouraging; fall wheat well headed; barley, oats and spring wheat promise well, but all grains somewhat short in straw. Potatoes, roots and corn have started well; early apples abundant, late varieties scarcer. Other orchard fruits good. Small fruits plentiful except raspberries, some having been winter killed."

**Manitoba.**—From the Manitoba Department of Agriculture, June 30: "Crops well advanced; fall rye soon ready to cut. Rain needed in places, but no severe drought. Outlook for fair crop. Much damage to crops and buildings by very violent hail and wind storm night of June 23rd. Recovery of wheat in hailed area doubtful, but late crops will probably rally. Pastures good."

**Saskatchewan.**—From the Saskatchewan Department of Agriculture, June 27: "Wheat seeding was practically completed by the end of May, with the exception of the low spots which had been flooded by the spring rains. The weather of the first three weeks of June was hot and dry, thus enabling farmers to complete seeding operations in practically record time. The weather continued dry until the 17th, and some crops were beginning to feel the want of moisture; when, however, the weather broke and heavy rains accompanied with high winds, and in some cases hail, became general over the province. No great damage was reported from hail and altogether the rainy weather was welcomed. All grains are making excellent growth and some early wheat is in the slot blade. Fall rye is an excellent stand and is filling well. Cutting of rye is expected by middle of July. Summer fallowing is well under way."

**Alberta.**—From the Alberta Department of Agriculture, July 1: "Recent rains, fairly general over the province, have greatly improved crop conditions in general, although moisture came too late in a few districts. Owing to prospect of very light hay crop, from 20 to 50 per cent. of rye is being cut for feed. General prospects are for an average crop of wheat and oats over the province. Grasshopper menace practically over. Hail has done damage to 30,000 acres all told."

## FIRE LOSSES SET FAST PACE

### June Total Brings Six Months' Loss Up to Twenty Million

Fire losses in Canada for the first six months of 1922 were $20,092,750, compared with $15,711,050 last year, according to Monetary Times' records. The June total was $2,612,550, against $2,956,450 in May, and was made up as follows:

| | |
|---|---|
| Large fires reported | $2,011,500 |
| Small fires reported | 101,050 |
| Estimate of unreported fires | 500,000 |
| | $2,612,550 |

The Monetary Times' record for the past two years shows the following monthly losses:—

| Month | 1921 | 1922 |
|---|---|---|
| January | $2,237,900 | $3,597,500 |
| February | 2,735,500 | 4,062,400 |
| March | 2,112,200 | 4,331,750 |
| April | 2,510,700 | 2,532,100 |
| May | 3,811,350 | 2,956,450 |
| June | 2,303,400 | 2,612,550 |
| July | 2,880,250 | |
| August | 3,014,860 | |
| September | 2,410,300 | |
| October | 2,199,700 | |
| November | 1,818,750 | |
| December | 2,897,200 | |
| Totals | $30,932,110 | $20,092,750 |

The following are the June fires with a loss of $10,000 and over:

Bonne Bay, Nfld. June 1th. Business section. $250,000.

Doaktown, N. B. June 5th. Buildings. $20,000.

Edmonton, Alta. June 5th. Mercer Block. $100,000.

Hamilton, Ont. June 2nd. Garage. $10,000.

Ottawa, Ont. June 1st. Building. $30,000.

Ottawa, Ont. June 5th. Building. $20,000.

Ste. Margaret Du Lac Masson, Que. June 1th. Stores. $20,000.

Sherbrooke Que. June 4th. Mill. $35,000.

Two Rivers, N. S. May 28th. Mill. $20,000.

Dumas, Sask. June 8th. Church. $25,000.

Georgetown, Ont. June 10th. Business section. $80,000.

Listowel, Ont. June 9th. Plant. $85,000.

Montreal, Que. June 10th. Stock yards. $20,000.

Ottawa, Ont. June 7th. Building. $10,000.

Regina, Sask. June 5th. Building. $40,000.

St. George, N. B. June 7th. Mill. $10,000.

Elma, Man. June 14th. Business section. $50,000.

Niagara Falls, Ont. June 16th. Station. $20,000.

Quebec, Que. June 12th. Store. $15,000.

Rocky Mountain House, Alta. June 11th. Wilson Block. $10,000.

Brantford, Ont. June 24th. Mill. $19,000.

Chatham, Ont. June 24th. Alexandria Block. $10,000.

Chilliwack, B. C. June 17th. Sawmill. $10,000.

Moncton, N. B. June 25th. Lumber. $400,000.

Montreal, Que. June 22nd. Lumber yards. $50,000.

Montreal, Que. June 25th. Stables and sheds. $17,500.

Steveston, B. C. June 25th. Village. $150,000.

Sudbury, Ont. June 22nd. Dorbridge Block. $35,000.

Toronto, Ont. June 25th. Stockroom. $10,000.

Vantage, Sask. June 23rd. Store and building. $20,000.

Armstrong, B. C. June 29th. Section of Chinatown. $50,000.

Portage la Prairie, Man. June 26th. Elevator. $160,000.

Portage la Prairie, Man. June 26th. Mill and elevator. $200,000.

### Buildings Burned

The following is the class of structure destroyed or damaged: Residences, 38; barns, 26; buildings, 12; stores, 8; mills, 8; business sections, 4; plants, 4; business blocks, 4; warehouses, 3; stations, 3; hotels, 3; farm buildings, 2; garages, 2; churches, 2; stock yards, 2; lumber yards, 2; elevators, 2; hospital, 1; studio, 1; timber, 1; brickyard, 1; apartments, 1; foundry, 1; granary, 1; orphanage, 1; hall, 1; cafe, 1; camp equipment, 1; school, 1; village, 1; coal chute, 1; and stockroom, 1.

The following were the causes reported:—Lightning, 9; explosions, 3; forest fires, 2; overheated stovepipes, 2; incendiarism, 2; defective pipes, 1; defective flue, 1; defective chimney, 1; sparks, 1; short circuit, 1; and overheated smokestack, 1.

### Deaths from Fire

During the month of June there were eighteen fatalities.

| | |
|---|---|
| Hazelbridge, Man. June 5th. Clothing caught fire | 1 |
| Montreal, Que. June 6th. Clothing set on fire | 1 |
| St. Thomas, Ont. June -10th. Fell in burning pit | 1 |
| Wetaskiwin, Alta. June 10th. Burnt in building | 2 |
| Sherbrooke, Que. June 14th. Burnt in building | 1 |
| Halifax, N. S. June 18th. Burnt in building | 5 |
| Broad Cove, N. S. June 18th. Burnt in building | 1 |
| Makamik, Que. June 19th. Clothing caught fire | 2 |
| Niagara Falls, Ont. June 21st. Burnt in automobile | 1 |
| Galt, Ont. June 22nd. Playink with matches | 1 |
| Charlottetown, P.E.I. June 24th. Clothing caught fire | 1 |
| Brantford, Ont. June 28th. Explosion | 1 |
| | 18 |

The record of deaths from fires has been as follows:—

| Month | 1919 | 1920 | 1921 | 1922 |
|---|---|---|---|---|
| January | 13 | 22 | 17 | 25 |
| February | 26 | 30 | 18 | 21 |
| March | 9 | 35 | 11 | 16 |
| April | 27 | 8 | 7 | 10 |
| May | 15 | 13 | 13 | 14 |
| June | 28 | 15 | 10 | 18 |
| July | 11 | 15 | 10 | |
| August | 24 | 14 | 11 | |
| August | 24 | 14 | 11 | |
| September | 23 | 13 | 4 | |
| October | 16 | 15 | 20 | |
| November | 14 | 31 | 23 | |
| December | 19 | 18 | 18 | |
| Totals | 225 | 227 | 162 | 104 |

## INTEREST PAYMENT IN NEW YORK

### "Expenses Attending Payment" Held by Court to Include Premium on Exchange.

La Corporation des Obligationes Municipales sued la Ville de Montreal Nord to recover the amount due in American currency on a coupon which had been detached from bonds issued by the municipality, the coupons being in this form: "On the first day of May, 1920, the Town of Montreal North, in the Province of Quebec, Canada, will pay to the bearer thirty dollars in gold coin at the holder's option at the chief office of the Bank of Hochelaga, in the City of Montreal, Canada, or at the office of the National Park Bank, in the City of New York, State of New York, U.S.A., or at the office of the Clydesdale Bank, Ltd., in the City of London, England, to be made at a fixed rate of exchange of $4.86 2-3 to the pound sterling, being six months' interest due on the debenture No. 1194 dated the first day of May, 1918."

Payment was refused on presentment in New York, whereupon an action was brought in the Quebec Superior Court, the decision of Justice Maclennan being: "The question arose in 1831 in the case of Scott v. Bevan, which was an action brought in England to recover the value of a given sum of Jamaica currency upon a judgment obtained in that island and it was held that the value is that sum in sterling money which the currency would have purchased according to the actual rate of exchange between Jamaica and England at the date of the judgment.

"By the Civil Code (1152 and 1153) payment must be made at the place indicated in the contract and the debtor must pay the expenses attending payment. The words 'expenses attending payment' are broad enough to include the cost of exchange in the conversion of Canadian into American currency when a Canadian debtor has to make payment of his debt in the United States. In the absence of any provision in the contract providing for a fixed rate of exchange (there is none here regarding payments in New York, although there is as to England), the rate which prevailed when the debt became payable must be applied.

"In the present case it is admitted that it would take $212.82 in Canadian currency on May 1, 1920, to produce $213 in American currency in New York, and it follows therefore that the plaintiff's claim for $212.82 Canadian currency, the only currency in which this Court can give judgment, should be maintained."

# The Coming Revision of the Bank Act

## Influence of Past Ten Years' Developments on Banking Situation—The Western Viewpoint Reflected by Progressive Party—Rural Credit Systems—Several Banks Have Disappeared in Decade

By ROBERT P. WEBBER

At the next session of parliament, the Canadian Bank Act will be due for its decennial revision. It is of interest to note that, providing a change of government does not take place in the meantime, the new banking bill will be introduced by the Honorable W. S. Fielding, the same minister who introduced the act of 1900, superseded by the bill brought into parliament in 1912 by the Honorable W. T. White.

The Bill of 1923 will be introduced under quite different economic and political conditions than the Bill passed in 1912, and these conditions may have an important effect on any innovations that are made in the revision of 1923. The Bill of 1912 was introduced at the close of a period of rapid development characterized by certain inherent weaknesses such as inflation and speculation resulting from the "boom times," and illustrated by such failures as the disaster of the Sovereign Bank in 1903, the Ontario Bank in 1906, and the Farmers' Bank in 1910. The next revision of the Bill will be at the close of the period in which the Great War occurred, stretching the credit resources of the country to the limit; followed by two years of economic disturbance and industrial depression. It is a tribute to the Canadian banking system that the banks have come through the period so well. The Merchants' Bank is the only one that got into serious difficulties; and although bank deposits and loans have decreased, the banks have been able to render the necessary assistance to deserving enterprises. In the future their is little hope for the return of such prosperous times as marked the period from 1903 to 1912; instead a period of more steady development can reasonably be expected, and any changes in our banking legislation will probably be influenced by the expectation of such economic conditions.

### Farmers' Views

The presence of an agrarian party in the House will probably bring criticism from a viewpoint upon any proposed legislation. There is a strong feeling among the farmers of both the East and the West, that they are unfairly discriminated against by the banks, in favor of industrial and other enterprises. There is a certain hostilityf eltb ecause a manufacturer or a merchant can readily obtain loans from the banks upon the security of their convertible assets while the farmer cannot obtain loans on security of greater value, but which is not convertible, such as lands and buildings. The last act made provisions for the extension of the bank's authority to grant credit by the authorization of loans upon farm stock and grain in storage as legal security and the policy was criticized because no part of the savings deposits were put aside for the purpose of encouraging buildings and such permanent improvements, and all used so promote business. This contention, in so far as the savings accounts are concerned, deserves consideration. Although all banking history, and especially the lamentable failure of the State Bank of N. Dakota, which was promoted by a farmer government in 1917 and failed in 1920, shows the fallacy of one institution attempting to handle a conglomerate mass of long and short term loans; there are grounds for the belief that Canadian banks could devote their savings deposits to making loans to farmers upon the security of their lands and buildings. Whether the government gives the banks authority to make any further concession to the farmers upon the security of assets that are not easily liquidated or not, that side of the banking question will certainly be brought forward if Mr. Crerar and his followers in the House reflect the feelings of their constituents.

The agrarians' view is that the farmers must be prosperous before prosperity can be enjoyed by the Canadian people as a whole, so the next Bank Act will be rigorously scrutinized as to its effect upon the agricultural communities even more than to its effect upon the stability of the banking system of the country. In the United States, the National banks have the privilege of making a certain percentage of their loans on the security of land, but seldom avail themselves of the privilege, so it is unlikely that legislation is making it easier for the farmers to obtain loans would have much effect on the banking policy of this country.

### Government Inspection

The advisability of instituting a system of government inspection for our banks is a question that will probably receive consideration. Prior to the passing of the last act, a section of the press and at least one prominent banker emphasized the need of external inspection. It was urged that capable examiners working under civil service rules could subject the banks to the same kind of a rigorous inspection that a head office forces its branches to undergo, and it would be only those institutions that were carrying on doubtful transactions that would feel hostile to such an inspection. In 1912, the Finance Minister declared that he did not consider a scheme of government inspection feasible at that time, and adopted, instead, a course midway between government inspection, and internal examintion conducted by the Canadian Bankers' Association. At each annual general meeting, the shareholders were required to appoint an auditor or auditors, who were to decide whether, in their opinion, the statement referred to in the report was properly drawn up according to the information and explanations given to them, and as shown by the books of the bank. If the minister were not satisfied, he could require an auditor to make a special examination and report to him as head of the finance department. For such special services the auditor was to be remunerated out of the federal reserve consolidated fund. Subsequent banking history shows that, on the whole, the legislation has worked well, but there is a large part of the public that believes that government inspection would prove beneficial. There are certain theoretical advantages that would attend such a course, but there are also great difficulties. The whole industrial prosperity of the country depends on the stability of its credit structure and it would seem that the government would be wise in keeping a close watch on all the banks' transactions; on the other hand a government inspection would necessitate a great army of officials, who besides being auditors or chartered accountants would need to be familiar with the business conditions in the locality where their inspection was carried on. If the inspectors were not familiar with the business conditions, they would not be in position to judge the value of the bank's assets and the shareholders would be led to enjoy a false sense of security because of the reliance they would place on the government inspection.

### Amalgamations

Public opinion feels strongly against any further merges or amalgamations between the different banks. By the present Act, banks cannot merge without the Minister consenting to the Board of Directors making such an agreement. Under this provision the Minister is able to prevent the voluntary amalgamation of two strong banks. Often, however, one bank is absorbed by another because of injudicious transactions indulged in by the former. In a case of that kind the Minister's hand is forced. He must consent to the amalgamation in order to prevent greater evils. It is evident, therefor, that if banks are to be prevented from amalgamating by legislation, the legislation must apply to the conditions that make amalgamation necessary. This is another argument brought forward in favor of government inspection, and it will be a question for Mr. Fielding to decide whether any kind of external inspection will prevent a bank becoming involved in difficulties.

### Banks' Reserves

The present Bank Act has no provision regarding the amount of reserve that the banks should keep. Contrary to the United States system, there is no legislation to prevent Canadian banks from extending their credit far in excess of their reserves. Adequate reserve protection is guaranteed by allowing the banks to refuse to pay time deposits if they wish, and by requiring the bank manager by a pledge and a bond to protect his own and his bank's interest, and not permit the bank's reserves to become low enough to endanger its stability. As the tendency is to operate with as low a reserve as safety permits, there is room here for legislative innovations if the Honorable Mr. Fielding should deem it necessary. It is extremely unlikely that a minimum reserve required by law would put the banks on any sounder foundation than they are to-day. There is criticism levied at the banks, from some quarters, because of the practice of investing part of the reserve in call loans in New York. It is declared that, while money is scarce on this side of the boundary, the banks are realizing a large profit on Canadian investments by loaning them in the United States. It is true that large returns may be realized on such American loans under certain conditions, but it is also true that as these loans are held as part of the bank's reserve, if they were not invested in call loans in New York, and as such considered as equivalent to cash on hand, they would be lying in the bank's vaults; being neither productive to the bank, or available to Canadian enterprise in need of funds.

On the whole, Canadian banks operating under the legislation in force at the present time have come through a trying period with flying colors, and it is unlikely that there will be any far-reaching changes made in the Bank Act, at its next revision in 1923.

---

# MAJORITY LIVE ON FARMS

## Final Census Figures Show Total Population of 8,788,483, An Increase of 21.95 Per Cent.

Canada's total population, as of June 1, is 8,788,483. This is the final figure issued on June 29 of the sixth census. The total represents a gain of 1,581,840 over the total population in 1911. The percentage of increase is 21.95.

Claims by agriculturists that farming is the basic industry in Canada are sustained by the census figures which show 4,439,505 of the total population residing in rural districts as compared with 4,348,978 living in urban centres. Ontario leads both as to total population and in the number living in the country, with a total population of 2,933,662, of whom 1,226,292 live in rural districts. Quebec is second with a total population of 2,361,199, of whom 1,038,128 reside in the country.

### Alberta's High Increase

Alberta leads the way as far as provincial increase in population is concerned, with a population of 588,454, an increase over 1911 of 214,159, or a percentage increase of 57.22. The number living in the country is 365,550.

Saskatchewan made the next largest gain with a percentage of 53.80. The total population of Saskatchewan is 757,510, representing a gain of 265,078. Of the Saskatchewan population 538,552 live in the country.

British Columbia has now 524,582 people, compared with 392,480 in 1911, a percentage increase of 36.66. Rural population numbers 277,020.

Manitoba has a total population of 610,118, of whom 348,651 live in the country. The percentage gain over 1911 is 32.23.

Nova Scotia's population numbers 523,837, a gain of 31,499, or less than 7 per cent., while New Brunswick has increased to 387,876, a gain of 35,987, or 10.25 per cent.

In Nova Scotia 298,487 and in New Brunswick 265,648 live in country.

In Prince Edward Island 69,552 of a population of 88,615 live in the country. This province lost 5,113 people in the decade.

In the Yukon the population fell off from 8,512 in 1911 to 4,157, and in the Northwest Territories there was an increase to 7,988 in 1921, compared with 6,507 in 1911.

The Royal Canadian Navy figures in the census total 485.

---

# STRATHCONA FIRE INSURANCE CO.

Appeal from the appointment by Superior Court of liquidators for the Strathcona Fire Insurance Company may be made, according to a procedure started in Practice Court in Montreal on July 3.

Art Vallee, who represents Turcot and Merrill, presented a request for permission to appeal from the judgment of Justice Coderre, rendered on June 29, appointing Lemire and Damphousee as prmanent liquidators. The latter were first named provisional liquidators, then the nominatios was made permanent.

Vallee, in asking to be allowed to go to appeal, contends that Lemire and Damphousse represent only shareholders of the company, while his clients hold proxies for creditors representing claims amounting to $340,000.

# Production, Exchange and Trade

By A. B. BARKER.

One point emphasized by many as an absolute necessity to restore property is production. Grain adequate production it is claimed and the first important step is taken towards a return to normal conditions. This however is only part of the truth. Nothing is said about distribution and consumption or in other words the selling of the goods after they are produced. It will be impossible to continue to produce goods unless they can be sold as it is only by selling the goods and being paid for them that the producer can continue to produce. He must pay for his raw material wages and other expenses of operation and it is only by selling his product that this can be done.

In most cases the payment of wages and the purchaser of raw materials will be made by borrowing from the bank but the advances obtained for this purpose must be paid and this can be done only by the sale of the finished produce. This must be done in the usual course and paid for so that the bank will be able to accommodate other classes of business even in their turn. All business is seasonal on its demands for accommodation and each class borrower is expected to clean up his advances at the end of his season and thus release the bank's resources to assist others in their turn. If for any reason our class does not pay as agreed others must go short of the accommodation to which they are entitled as the bank's loanable funds are restricted by its deposits—its resources.

### Where Buyer Comes In.

Production then depends on sales. These in turn depend on whether the public are willing as well as able to buy. Their ability to buy depends on whether they can sell their wares. Selling in the final analysis depends very largely on price, whether the buyer thinks he is getting the value for his money. When as at present trade is slower than usual it is harder to convince the public that this is the case.

Bank deposits consist of the surplus produced by the public men and above the amounts necessary for their own use and sold to someone who has paid for them. In many cases they are still carried on borrowed money which is to be repaid from sales to the ultimate consumer. This consumer must in general obtain the funds to pay for these by selling his services to someone for money. The exchange of the goods for money is merely a convenient method of arranging the real trade which is the exchange of goods for other goods or services. If this trade is confined to within the borders of our country the volume must be limited but so long as the articles exchanged continue to bear the same relative position to each other the price expressed in terms of local currency means little.

### Exchange Difficulties.

It is when the border is crossed that difficulties begin as the price of exchange between the countries must be taken into consideration as well as the tariff.

Trade between the inhabitants of two countries consists as does that between individuals in the same country in the exchange of goods for other goods or services and not in the exchange of goods for money. No matter how the price is dodged it cannot be evaded; we can sell abroad only as we are prepared to buy. We cannot sell to Great Britain or the United States for money as the money of these countries is no use in Canada. It has no status here and must be returned to the country of issue for redemption. Their only use is to exchange for goods. It is merely a measure of value and a medium of exchange and nothing else. It facilitates the exchange of goods because by its use the exchange of goods may be made in convenient amounts though trade may be carried in without the use of money.

In foreign trade as in domestic the prices are given in terms of money and as different countries have different currencies the value of one must be expressed in terms of the currency of the other according to the current value of exchange. If exchange on one country Great Britain for instance is low in Canada the prices of Canadian wares when translated into terms of sterling will make the prices higher and the point is whether the prices thus found will be low enough to attract buyers over there. If not then it will not pay to produce goods in Canada for that market, and vice versa.

### The Tariff Question.

Then there is the question of tariff which is just now under discussion. Now whether we believe in a high or low tariff it must be admitted that it is a tax which the Government levies for the privilege of importing the goods. In effect the Government takes part of the shipment for the privilege of allowing the balance to be sold in Canada and the point is whether the balance of the shipment will exchange for a sufficient quantity of Canadian goods so that the foreigner who is making the exchange will be able to exchange them in his own country for sufficient to yield him a profit in the transaction. If the charge made is such that no profit is made by the foreigner he will go elsewhere. If trade is to continue both buyer and seller must be able to make a profit otherwise there will be no trade.

---

## RESULTS IN OTHER CASUALTY LINES

### 1921 Experience in Explosion, Steam Boiler, and Sprinkler Leakage Insurance

By RANDOLPH S. MORTLEY.

Explosion Insurance which is comparatively new in Canada covers manufacturers and merchants against loss from explosions other than the bursting of boilers or fly-wheels. There are two forms of policies, one covering natural gas and bomb explosions, and the other affording protection against loss of profits by the destruction of buildings or stoppage of machinery. The last-named is generally called "Use and Occupancy" insurance. There were 17 companies engaged in this branch, whose total premiums was $88,302, with a small loss ratio amounting to only $3,436. Globe and Rutgers headed the list, with premiums $33,918 and losses only $2,250. Insurance Co. of North America had premiums of $11,182 with no losses; Fidelity-Phoenix, premiums, $9,337 and no losses; Continental $6,884 and no losses; Home $5,260, Glens Falls, $5,230, and Providence-Washington $4,011, all without losses.

In the absence of "strikes, riots and civil commotions," business for last year was just fair, with a favorable loss rates.

### Steam Boiler, And Sprinkler Leakage.

"Boiler Insurance" contracts cover a three-years' business, so that yearly comparisons of results are never made. Though only 8 companies occupied the field, evidence is not lacking that the business is growing, as the necessity for this form of protection becomes more generally known. Actual losses are never large, only about 8 per cent. being contemplated when regular faithful inspection is made. "Boiler Inspection" naturally absorbed the greater portion of the business, with premiums of $129,820 and losses only $5,483. Travellers Indemnity followed with premiums, $77,562 and losses $2,405; General Accident of Canada had $42,886 and $8,686; Fidelity and Casualty $37,019 and $3,283; Royal Indemnity, $29,891 and $9,349.

### Sprinkler Leakage

Owing to the heavy damages to valuable stocks of goods and enormous losses sustained nearly every year by falling water tanks and accidental leakages, property owners who instal sprinkler systems find it absolutely necessary to protect themselves by insurance. In the majority of cases contracts are written for three years, hence there is far more business to be written in some years than in others. 1921 was a quiet year, and the premium income showed a falling off as compared with 1920. The total of net premiums reported by 10 companies was $75,838, with losses of $48.727. Hartford Fire did the largest business, with premiums $28,802 and losses only $2,079; Maryland Casualty came next,—premiums $22,425, and big losses amounting to $36,287; Home Insurance had $15,596 and $8,805; American Lloyds, $2,974 and $429; and Scottish Union, $2,641 and $473.

## ONTARIO BANKS

Three new branches of the Ontario Provincial Savings Banks were opened last week, in Pembroke, Seaforth and Walkerton. Within a few days still another branch is expected to be opened in Newmarket. Director M. E. McKenzie says business is fine, and that the deposits are nearing the $2,000,000 mark.

---

## LIABILITY ON BURGLARY POLICY

### Concealment of Previous Burglary Renders Policy With Globe Indemnity Void.

The case of Dworkin v. Globe Indemnity Co. of Canada has recently been decided by Ontario Courts, the action being brought on a mercantile open stock burglary policy issued by the company in favor of the plaintiff firm for $6,000.

The negotiations for the issuance of the policy, followed by an inspection of the risk, resulted in the issuance of the policy to Ireland, an insurance broker and agent of the plaintiffs. The loss occurred on the night of the 18th May 1920. Counsel for the company admitted that a burglary within the meaning of that word as used in the policy, had occurred, but asserted that defendants were not liable by reason thereof for the loss, which was proved at $4,230.

No formal application had been made for the policy herein and during the negotiations a "small" previous burglary was admitted by Ireland, which loss later was shown to have been to the extent of $6,200.

### Policy With Agent.

The learned Judge was convinced that the policy was in Ireland's possession with the assent of the plaintiffs and on their behalf, for such a reasonable time before the loss as would have enabled Ireland to have examined it. Section 155 (1) of the Ontario Insurance Act (a) applied, and the plaintiffs had accepted the policy, through Ireland, as their contract with the defendants.

On conflicting evidence, the learned Judge had come to the conclusion that Edward Dworkin concealed for his own purposes the facts that his firm had been insured in another company, that the firm had suffered a loss by burglary to a substantial amount which practically exhausted the policy, that he knew the amount or probable amount of the first loss when stating that he did not know it, and also when his agent said it was small; and that he made the statements he did for the purpose of inducing the defendants to issue the policy. There were misleading statements, and involved the suppression of information which he was bound to give, and in both respects they had reference to a matter which was material to the risk; and the defendants acted upon these statements and were misled by them.

### Effect of Concealment

The findings were that Ireland, in doing his part concealed material facts from the defendants; that Edward Dworkin concealed material facts from Brett, the agent of the defendants, and made untrue and misleading statements to him on material matters; that it was the common understanding of the parties that a policy should issue as evidence of an insurance contract, and the policy now sued on did issue and was the only contract between the parties; and, that policy having been obtained in the circumstances mentioned, the defendants were entitled successfully to resist liability thereunder.

(a) Ontario Insurance Act, section 155:—

(1): Where the subject matter of a contract of insurance is property or an insurable interest in property within Ontario—the contract of insurance if signed, countersigned issued or delivered—or committed to the Post Office—or handed over to the assured—shall be deemed to evidence a contract made therein and the contract shall be construed according to the law thereof and all moneys payable under the contract shall be paid at the office of the chief officer or agent in Ontario of the insuring corporation in lawful money of Canada.

(2): This section shall have effect notwithstanding any agreement, condition or stipulation to the contrary.

## RUMANIA'S DEBTS

The Rumanian Government realizing the necessity of paying its debts, including those to Canada, according to a London cable dispatch received in Montreal, has agreed with a British financial group to these two proposals:—

The consolidation of various issues of Rumanian bonds, totalling £35,000,000, giving scrip in exchange; a 4 per cent loan, redeemable in forty years, with the interest secured on import and export duties, and also a smaller loan of £2,500,000 to cover the expenses of the conversion and pay the arrears of interest.

**BUSINESS INSURANCE**

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

**Phantom Prosperity**

From his mode of life he was judged to be prosperous. His estate at death was valued at $10,000 mostly property—no life insurance. Enough, said his friends, to tide his widow over until the family were grown.

The times were unfortunate, the revenue from the estate was small and it could not readily be converted into cash. It took nearly three years to wind up and then at a loss of about one third of its value. Three lean years and a decided loss to his widow and children.

An estate in Life Insurance would have provided payment in full of its value in immediate cash or periodical payments. It has many other decided advantages. Let us send you further particulars.

## AUDITORS' CERTIFICATES

Several cases in recent years where an auditor's statement of a company's affairs have later been found not to have revealed the true position of the company have had the effect of raising doubt in the minds of shareholders and of the general public as to the exact value of the audit. Elsewhere in this issue a special case is explained where only a partial audit of an insurance company's books was made, this being presumably satisfactory to the directors and shareholders of the company which controlled it. But in other cases the customary audit was made, resulting in a statement found later to have been not in accordance with the facts. This is far from saying that the work of the auditor is of no value. The fewness of such cases in comparison with the number of audited statements which are found to be reasonably correct proves their value, and in addition there is the moral effect on the management. But the situation is one which should not be ignored by the profession, for if practice can be changed so as to render the auditor's certificates more valuable, both the shareholders and the accountants will benefit thereby.

The books of the Merchants Bank as at April 30, 1921, were audited in accordance with the law, but developments since have shown the bank's position to have been different from that revealed at the time. This indicates the practical difficulties of a bank auditor who may examine all documents but has no way of determining the position of parties to which advances are made; these advances constitute the bulk of a bank's assets. A bank deals in credit, and credit is an intangible thing.

Some years ago the Standard Reliance Mortgage Corporation failed, and the value of properties on the security of which the Corporation had loaned money was found to be less than the advances. Here again the auditors had only documents, and the opinions expressed by the management, to rely upon. An auditor is not an appraiser, the business of appraising being a distinct one, and one which is moreover meeting with increased favor.

The most complete check upon the affairs of a company would therefore seem to be an audit accompanied by an appraisal. The latter would ascertain the value of the assets, such valuation being accepted by the auditor and utilized in the preparation of his statement. The case of a bank would of course still be exceptional, but for other classes of business most of the assets could be appraised. This relation of appraising to auditing is a subject which merits the attention of those engaged in the work.

## ATTITUDE TOWARS PUBLIC UTILITIES

The adoption by municipalities of public ownership of street railways, by provinces of telephone and other services, and by the Dominion of railway ownership, has had an important effect on the attitude of the public towards those systems which have not been acquired. The movement towards public ownership of these services which are linked so closely with the life of the community is not one whit abating, but the experience with those already acquired has brought some realization of the difficulties to be contended with. It has been found easier to suffer a loss than to reap a profit, and the attitude towards those which are succeeding is now one of admiration coupled with envy, not mere envy as before. It is realized that a successful enterprise may be just as beneficial to the community as one which is a losing proposition.

The Winnipeg Electric Railway Company in its "Public Service News", deals with the point as follows:—

"This is entirely due to the fact that the war and subsequent re-adjustment conditions necessitated a new alignment of contractual relations in order that the utilities might continue to serve the public in a way which best served the interests of the community as a whole. To effect this alignment the companies and the authorities have been brought into closer and more frequent contact with each other; there have been frank discussions, the cards have been put on the table, and with a clearer understanding of the mutuality of interest between those who render car service, and those who use it has come a keener appreciation of the dependence, one upon the other, with the result that prejudice has been discarded and co-operation substituted."

The public ownership movement will by all appearances continue. But the existence of private enterprises of the same kind makes possible a comparison which should help in the operation of those publicly owned.

## BANKERS' ACCEPTANCES

Bankers' acceptances, which are not in use in Canada, are meeting with increased favor in the United States. Eight years ago Amerian bankers' acceptances were not yet in existence. At present not only have they become familiar in eastern financial centers, as a medium for investing short-time funds but they are known and purchased in many parts of the country remote from this seaboard. In this way interior banks, business houses, and individuals have assumed an important part in the financing of our foreign trade.

While bankers' acceptances are used to some extent in the domestic movement of goods, their principal use is in the financing of exports and imports. A typical example of the use of a bankers' acceptance in export trade, without describing technical details, as follows:

A Liverpool merchant buys $50,000 worth of cotton from an American exporter in New York. At the same time the Liverpool merchant requests his own bank to make an arrangement with a bank in New York for a "commercial acceptance credit"—that is, a formal agreement to honor at maturity a draft or bill of exchange in a specified amount drawn in accordance with terms laid down in the agreement. The New York bank issues this acceptance credit on the guaranty of the British bank, which in turn has the guaranty of the Liverpool merchant that funds will be available to pay the bill when it matures. Under this credit the American shipper draws a time bill of exchange on the New York bank that issued the credit, due, say, at the end of ninety days. The American shipper then presents to the New York bank the bill with any documents which may be called for under the terms of the acceptance credit, and if found to conform with them in all particulars, it is "accepted"—that is, the bank notes on the face of the bill, the fact of "acceptance," which signifies that the bank will pay the bill upon maturity. The American shipper is then free to hold the bill until maturity, to discount it at his bank, or to sell it in the open discount market, whichever suits him best.

The banks and banking houses which "accept" bills are omparatively few, and the discount houses and dealers are a very much smaller group; but the group which consists of the buyers of bills, both geographically and numerically, is a wide and constantly widening one.

These buyers of acceptances, who are the customers of the dealers or so-called discount houses, include, generally speaking, those who desire an investment practically without risk, the proceeds of which will come due and be paid within a short time, or which may be sold at will in the open discount market. Some investors purchase bills which mature at a time coinciding with a known date when they in turn have obligations to meet or longer investments to make. In this way the acceptance market furnishes a means whereby funds may be employed pending the time when they are required for some definite and previously known use.

This growing demand for bankers' acceptances is a desirable development and indicates the increasing participation of individual business men and investors in the work of financing American foreign trade.

### CANADIAN MORTGAGES

Congress will commit a serious blunder if it passes the Denison "blue-sky" bill, which tries to outlaw Canadian first mortgages. The United States is branching out as a great investing and trading nation, and in both respects it can find no more convenient or profitable field than Canada.

The Mortgage Loans Association of Alberta, Canada, after a full discussion of the bill which has passed the House of Representatives at Washington, adopted the following resolution:

"That the Mortgage Loans Association of Alberta call the attention of the Provincial Government to the Denison Bill presently before the Senate of the United States, in that it provides that the United State mails shall not be used in connection with the sale of Foreign securities with certain exceptions, in which exceptions are not included first mortgages, and as this will probably affect the inflow of capital into this Province, this Association thinks it advisable that the Government be informed of the situation."

This resolution was forwarded to the officials of the Provincial Government at Edmonton with the suggestion that the Provincial Government take the matter up immediately with the Dominion Government at Ottawa with a view to proper representation being made to the authorities at Washington.

The Denison bill, after passing the House of Representatives, was referred to the Senate Committee on Interstate Commerce. That committee has decided to take no action on the bill at this session of Congress. It is expected that it will be taken up for consideration in December.

The Canadian gold stocks have had a pronounced flurry of late. Gold recuperates as trade decays.

In our railway problem we appear to have one of the poor who are always with us. That it was dealt with in the Confederation agreement is an acknowledgement of Canada's dependence on transportation.

Another issue of real estate mortgage bonds is being offered. This is a financial field that offers good prospects. Sooner or later property improvements must be financed like other enterprises.

### A NEW ONE ON THE LAWYER

A story in the April number of "Chamber's Journal" tells how counsel for the prosecution in an arson case, combating the plea of Act of God set up by the defendant, thus addressed the jury:

"It is said, gentlemen, that this was the act of God. It may be, gentlemen. I believe in the Almighty's power to do it, but I never knew of his walking twice round a straw stack to find a dry place to fire it, with double-nailed boots on so exactly fitting the ones worn by the defendant."

## *Personal*

JAMES J. FLYNN, of Niagara Falls, Ont., who has for some time been attached to the Hamilton customs office, has been appointed collector of customs for the port of Niagara Falls in succession to Mr. McKenzie, who will have six months' leave of absence prior to superannuation.

F. W. HUNT, for the past sixteen years advertising manager of the Massey-Harris Co., Limited, has resigned to establish himself as advertising counsel, with offices at 33 Richmond Street West, Toronto.

W. H. WARDROPE, K.C., of Hamilton, has been elected president of the Commonwealth Accident & Life Insurance Co., Ltd.

H. P. BULL has been appointed general manager of the Williams Piano Company, Oshawa.

R. K. McINTOSH, general manager of the Canadian Postum Cereal Co., Limited, Windsor and Toronto, has been elected Vice-President of the Company.

G. Z. REYNOLDS, who for the past twelve years has had the management of the Winnipeg office of Belding-Corticelli, Ltd., has been transferred to the company's Toronto office.

EARL SPAFFORD has been elected to the presidency of the Tobacco Products Corporation of Canada, Limited, succeeding P. M. Ellis, who is now devoting his time to the development of the company's business in China.

W. N. TILLEY, K.C., Toronto, the recently appointed director of the C.P.R. has sailed for England.

D. L. YOUNG has been appointed Quebec Provincial Manager for the Canada Life Assurance Company.

A. H. RODGERS, who for many years has been secretary for Canada of the Norwich Union Fire Insurance Society, has in association with James Brandon, incorporated as Brandon-Rodgers, Ltd.

LOUIS BOUVIER, who has been inspector for the Great West Assurance Co. for the Province of Quebec, has been appointed manager for the Province of Quebec for the Crown Life Insurance Company.

## *Obituary*

ROBERT KELLY, head of Kelly, Douglas & Co., Ltd., wholesale grocers in Vancouver, died at his home in Vancouver on June 22nd. The late Mr. Kelly was born at Russell, Ont., on August 15, 1862. Mr. Kelly was a director of the Dominion Fire Insurance Company of Toronto; a director of the Securities Corporation of British Columbia, and vice-president of William Hickey Co., salmon packers.

### INTEREST ON JOINT BANK ACCOUNT.

#### No General Rule of How Applicable—Special Circumstances Determine Ownership.

A decision has recently been reported from the New Brunswick Supreme Court which may be of interest to bankers. The case was that of Usher v. Barnes, and was an action by a husband to recover certain moneys deposited by him to the joint account of himself and his wife and which were withdrawn from the Bank by a third party on the authority of the wife.

Chief Justice Hazen says:—"I think—that it is my duty, speaking as a Judge of first instance, to determine what the intention of the plaintiff was at the time when he made this deposit in the bank, and that I must come to a conclusion having regard to the special facts and circumstances of the present case and the relations of the parties to one another," and his decision and the principle of law involved, may be summarized as follows:—

"Where moneys have been deposited in a bank by a person to the joint account of himself and another, the question of who is entitled to the money as between the parties is not governed by any general principle applicable to questions of this kind, but in every case it is a question of intention to be gathered from the special facts and circumstances and the family relations or otherwise of the parties, the same as in cases where it is sought to decide who has the right to money so deposited after the death of one of the parties in whose name the joint deposit was made."

## *Letter to the Editor*

Dear Sir:

### Tax Levies in Western Cities

My attention was drawn to a press dispatch from Edmonton which appeared in a number of papers towards the end of April, purporting to give the tax Levies per capita is certain western cities, and as the figures, to my knowledge, were erroneous so far as the three principal cities in Saskatchewan were concerned, I corresponded with the other cities in question and they were good enough to furnish me with the necessary data on which to base the levies per capita. The City of Edmonton, however, refused to furnish the requisite figures and consequently in the undernoted table the Edmonton taxes per capita are for the year 1921.

The Tax Levies given in the press dispatch referred to were very incomplete in that in the case of Winnipeg the levy for waterworks purposes and Business Tax were not shown; in the case of Calgary and Edmonton the taxes levied on business, the service tax and the special water levy, were not given, and in the case of all the cities tabulated the owners' share of the local improvement taxes were not taken into consideration. For the purpose of arriving at a fair comparison of the taxes levied in various cities this was a fatal omission as in many cities these taxes form a large percentage of the total Tax Levy.

On the other hand, in some cases the taxes levied by Provincial Governments were included; these taxes should not be included in any comparison made as they bear no relation to municipal taxes whatever, the various cities merely acting as collecting agencies for the Governments.

The figures set forth in the dispatch were:—Taxes per capita,—Winnipeg $41.10; Calgary $49.40; Edmonton $43.60; Regina $50.90; Saskatoon $50.00 and Moose Jaw $54.00: whereas the correct figures, taking all the taxes levied by the respective cities into consideration, are as follows:—

Civic Tax Levies Per Capita For 1922

| | Municipal | School | Total |
|---|---|---|---|
| Winnipeg | $36.12 | $16.48 | $52.60 |
| Calgary | 42.70 | 18.64 | 61.34 |
| Edmonton | 48.48 | 19.68 | 68.16 |
| Regina | 37.10 | 18.24 | 55.34 |
| Saskatoon | 32.83 | 23.60 | 56.43 |
| Moose Jaw | 38.21 | 18.99 | 57.20 |

Included under "Municipal" are the taxes levied for Public Library purposes.

The population are based on the 1921 census.

It will thus be seen that Winnipeg has the lowest Tax Levy of the six principal cities in the three Prairie Provinces, Regina is the next lowest and Calgary and Edmonton have the largest tax levy.

I shall be glad to furnish to anyone interested the complete tables on which these figures are based.

Yours Truly,

GEO. D. MACKIE, M.E.I.C.,
Moose Jaw, Sask., City Commissioner.
June 20, 1922.

# British Interest in Canada Re-awakened

BY E. L. CHICANOT

One of the most difficult and exasperating phases of Canadian economic life in the post-war period has been the decline of interest in the Dominion evinced by business men and manufacturers of the British Isles, a condition brought about by the lamentable situation prevailing in the British Isles itself. In this state the flow of capital which Canada had come to expect in the pre-war years, and which declined in the years of hostilities, was not resumed. The British Isles were long in getting back to her manufacturing capacity. She continued to import from Canada a greater volume of goods than she exported to that country. This was a powerful factor in depreciating sterling, which again was largely instrumental in holding back money from crossing the Atlantic for Canadian development.

Before the war the capital responsible for Canadian development was overwhelmingly British, and business capital as well as surplus funds for investment flooded the country and entered into every phase of its activity. Even in 1920, when the flow of British capital had been shut off for some time and the United States had keenly followed up its discovery of Canada as a profitable field for investment, whilst American capital in Canada was estimated at between $1,250,000,000 and $1,600,000,- this. Sir Lomer Gouin, speaking in the Fed- 000 British capital was considered to be double eral legislature about the middle of June of this year, stated that England had two and a half billions invested in Canada and the United States two billions of dollars. Whilst imports from the British Isles between 1914 and 1921 increased from $132,070,406 those from the United States increased from $396,302,138 to $856,613,430.

Even casual readers of the public press can hardly have failed to be struck by the evidences of a reawakening of British interest in Canada, and the practical shape it is taking and is likely to take in the future. Improved conditions in England, greater confidence in the future, a more normal sterling, and the belief that British manufacturers are again in a position to deliver goods at competitive prices in any market, are sending out British business men to seek for trade, and the British Dominions are not to be neglected. Speaking on the necessity of expanding the overseas markets of the United Kingdom, Sir Edwin R. Stockton said: "We have not thoroughly realized the potentialities of our colonies and dependencies. We must not neglect these important outlets. They offer great scope for trade expansion if we will only seize the opportunity."

The first resumption of the flow of money Canadawards seems to have been evidenced in the months of the past winter. Promoters of Canadian enterprise met with a response that rather surprised them after the disinclination which had existed for years to send money across the Atlantic. Money particularly was forthcoming for the Northern Manitoba mineral fields and considerably greater development will be effected this summer by reason of these funds being made available. Another indication was the preparation of a surveying expedition into Ungava promoted by British interests, and a party of expert English mining engineers left this spring under the guidance of an Ottawa engineer to be away until fall.

That Canada is not going to be neglected in the resumption of British trade is evident from the hosts of visitors, representatives of British financial and manufacturing interests, Canada has welcomed since the beginning of the year. These visits, as far as the manufacturers are concerned, perhaps culminated in the arrival in Canada of the delegation of the Federation of British Industries who came with the declared object of effecting closer co-ordination between Canadian importers and British manufacturers and exporters. The visitors admitted that there had been a signal failure on the part of British manufacturers in the past to avail themselves of the opportunities in Canada, especially in failing to send out trade representatievs to study the Canadian markets.

In the years since the United Kingdom was a greater factor in Canadian trade the United States has continued to wrench away more and more of that trade which formerly was purely British. She not only declined to relinquish any of that trade secured in the war years but has since gone aggressively after more, aided by England's crippled condition and her inability to offer herself a formidable rival. The huge consumption of United States goods in Canada has been built up in face of a direct, unquestioned, and substantial preference for Britsh goods, the high premium frequently on United States funds, and a non-preferenial tariff on importations from that country. It has been built up in direct opposition to the hundreds of advantages of buying from England and may be wholly ascribed to proximity and aggressive salesmanship.

The United States has, however, proceeded in a more subtle way to secure more Canadian trade and at the same time engage in Canada's export business. Of recent years the principal weapon the United States has wielded in its trade war to secure Canadian trade and overcome the various tariffs in force against its manufactures has been the establishment and operation on Canadian soil of branch factories of the parent plants. To all intents and purposes these are Canadian industries, operating in the heart of the Canadian market, and receiving all the benefits arising from the fact that they are operating in a British country. Not only are they manufacturing for the Canadian market on tre ground and overcoming Canadian tariffs against United States goods, but they obtain all the preferences Canada has in trading with the United Kingdom and other British Dominions. Thus they have become active, equally equipped competitiors in the United Kingdom's export trade within the British Empire.

The movement which had a small experimental beginnig has grown with phenomenal speed with the proven success of the first plants to establih. More industries saw the wisdom of establishing a Canadian plant until today it is estimated that there are more than seven hundred branch plants of American industries in Canada, and new plants are being etsablished every month. Canada has always welcomed this influx of American capital and enterprise, for to all intents and purposes these industries are Canadian, maintaining Canadian industrial progress, but it has long been a matter of regret that manufacturers of the United Kingdom were taking so little part in the industrial devlopment of this country.

Anticipating Great Britain's regaining a position of engaging in the export trade more vigorously the Department of Trade and Commerce prepared a hansome handbook, "Canadian Branch Plants for British Industries," calculated to educate the British manufacturer on the new methods of trade warfare in Canada, and the necessity of his so establishing to make equal combat. Similarly the London Canadian Corporation, asking itself why the United States should be the only country to establish branch industries in Canada, taking all the profits to another country, and why British manufacturers could not launch out on the same line and keep a fair share of the profits within the limits of the Empire, has set out to interest British firms in the Canadain industrial field, bringing to Great Britain expert knowledge of the Canadian situaion, and undertaking when negotiations are completed that half the capital required for the new enture shall be found in Canada.

Whether it be the result of these campaigns, or of the personal visits to Canada, or, as is most likely, a combination of both, indications are that British manufacturers are wise to the new methods of trade warfare and the necessity of meeting American competition on the same ground with the same weapons. Within the past month five important British industrial concerns have given notification of establishing branch plants in Canada. One of these is an English motor car concern, which will first assemble its cars here and later probably enter into the entire manufacture, a line of industry which heretofore has worked with American capital unopposed.

This may appear rather small to crow over, but it is to be taken merely as an indication of the trend of affairs. British manufacturers are by no means yet out of the slough, but they can see the fish of the dawn of brighter conditions and and making preparations accordingly. Canada in looking longingly forward to a time when greater trade might be possible with the British Isles was troubled by the danger of that country not appreciating and becoming acquainted with the new trade methods which prevailed, and not equipping herself in a fitting manner for the fray with the greatest opponent waiting her. This would seem to have been quite needless. British manufacturers are apparently awake to all features of the situation, and new ways of going about business, and Canada may confidently look forward to an extensive establishment of British branch factories on her domain.

---

## OUTLOOK FOR SILVER GOOD

### Canadian Producers Should Benefit By Situation In United States—Report On Credit Insurance

(Special to The Monetary Times.)

New York, July 5—The Federal Reserve Board has just issued a report on credit insurance which should prove interesting to both Canadian business men and underwriters. The report describes most exhaustively the experience of the three leading American companies handling this type of insurance during the past ten years. A copy of this report may be obtained from the Board at Washington.

### Silver Prices.

Silver bullion brokers in New York regard the future of silver prices as being somewhat uncertain. They look for fairly steady prices during the immediate future. Pending the resumption of the coinage of silver in Europe on a large scale, the United S ates Mint is the chief domestic influence is keeping prices up, according to the local silver dealers. Temporarily it is believed the Oriental demand for silver is satisfied. In the long run this will probably decrease, as Oriental exports to this country increase. At the present almost the entire domestic output of silver is being absorbed by the Mint under the provisions of the Pittman Act. Under this Act the Mint was authorized to purchase 208 millions of silver. From 95 to 97 million dollars worth are still to be purchased. When this demand ceases and the production of silver increases as it will with the revival of copper, zinc and lead mining, the prospect will be still more unfavorable.

### Effects On Canada

However from the Canadian point of view the situation in the United States would seem to be one which will in the long run benefit the Canadian producers. As a result of Mint purchases, the United States has almost ceased to be an exporter of silver. In 1915, the United States silver export balance was 191 millions. In 1920 this balance had declined to 25.5 millions. In 1921 the export balance fell to 12 millions.

Domestic production of silver has been falling with the decline of zinc, copper and lead mining and it is now in the neighborhood of 50 million dollars. It seems certain that for at least two years the United States will have little or no silver to export. This one fact the local silver dealers seem to think should help the Canadian producers.

### The Tariff And Prices

The Tariff Commission has issued a report on the effect of the Emergency Tariff on American prices. This report which was prepared at the request of the Senate gives small encouragement to supporters of the Emergency Tariff. While it acknowledges that prices of many of the commodities affected by the tariff have risen in price since the bill became law in May, 1821, it points out that the decline in the prices of many of these commodities have ceased some months before the Emergency Tariff went into effect. And this was also the case with a number of commodities not affected by the Emergency Tariff the report says that it is very difficult to tell exactly what effect the tariff had on the prices.

The report, while on the whole giving expression to similarly cautious views, inclined to attribute the fact that wheat and wool prices were lower in Canada than they were in the United States during the past twelve months to the fact that the Emergency tariff was in existence.

## THE ROUTINE OF A LARGE OFFICE

### Some Suggestions to Overcome the Lack of Uniformity in Existing Methods

By "Reformer"

From the Royal Bank Magazine.:

Many of the special methods of economy that are practised in the small branch are equally applicable in the large office. Such items as attention to minor profits, wise conservation of stationery (both of that used within the Bank and that passed out to the public), distinguishing between necessary repairs and those that can be safely postponed or abandoned—all these, and many similar items, apply equally to all branches regardless of their size.

At the present time, however, a golden opportunity is afforded to the large office—not so much for immediate effect as for ultimate economy—the opportunity to re-organize routine work and accounting systems. Many of the special systems, now in use in the larger offices, undoubtedly are excellent, but it is highly probable that some of them could be made more efficient, and that others could well be replaced by systems fhich would give equally satisfactory results with, at the same time, a substantial reduction in clerical labor. The present era, with its almost unprecedented condition of a surplus staf, and a sufficiency of properly trained offers, offers an opportunity to give this question the consideration and attention it undoubtely deserves—an opportunity that may not occur again in many years.

Accounting in hanks, as in ordinary commercial concerns, consists in recording certain facts, and in assisting to arrive at certain necessary deductions. The systems now in use in branch banks of average size are excellent ones; they are the result of serious study on the part of several generations of branch Managers, branch Accountants, and Inspectors. This combined thought has resulted in a general system that is probably second to none in the world, either in the old or in the new school, for the particular requirements of this particular business. The local branch Manager, too, usually has the leisure to see that these systems are strictly adhered to. One of the most desirable features is the wonderful uniformity of method that prevails in all average-sized offices; so much is this the case that an officer may move freely among the different branches without misgiving as to his familiarity with the work in the new office, and with the assurance that he will not experience undue difficulty in picking up the loose ends of his new position.

In direct contrast, however, is the lack of uniformity in the systems that are in force in the larger offices—in those offices employing fifty, a hundred, or perhaps even more clerks. Here the method of arriving at the same result as the smaller branch is quite different. In scarcely any two of the larger offices are the systems for dealing with the same work identical; such work as the handling of the incoming clearing, the cheque lists, collection items, correspondence, etc., is accomplished in entirely different ways, in the different large offices. An officer from a small branch, or even an officer from another large branch, is considerably at a loss for weeks after arriving at the average large city office. Indeed this very feature has a tendency to keep men in the larger offices longer than is to their ultimate advantage because of their special familiarity with the work; and similarly it prevents many officers in smaller branches from being benefited by a brief sojourn in the larger city offiees.

### Standardization Needed

The various systems in many cases have been installed by a multitude of individuals, frequently without proper consideration of their effect on co-related departments. In many cases, also, the original scheme, when installed, was an excellent one, but in the hey-dey and rush of an ever-increasing volume of business, and a daily decreasing number of properly trained officers, the original scheme may have become so altered and so distorted that whatever little of its original virtue remains may now prove to be only an aggravation. A mongrel system has evolved that its own originator would not recognize

Then, too, in these days of rapid promotion, clerks take over new posts with the sole ambition of doing the day's work only as well as it has been done by their predecessors, knowing that, in a few weeks, some one else will have to worry over the defects in the system, indeed, probably before the clerk has had time to become sufficiently familiar with the routine to suggest improvements, he has been moved to some new post where other difficulties occupy his attention. At other points some antiquated systems are regarded as the laws of the Medes and Persians; no one knows by whom they were originated, or why, yet the old rite is kept up in the fear that in discarding it some unforeseen menace may be uncovered. The tendency, too often perhaps, is to let sleeping dogs lie.

The present, therefore, would appear to be an opportune time to turn our attention to the problem of settling upon the most efficient methods of handling routine work in the larger offices, and of standardizing those methods in so far as the work of the large branch can be standardized.

In a commercial office, employing an equal number of clerks, what do we find? Probably an office manager, who has been highly trained, either by means of some accounting course, or by the school of experience, for just that class of work; a manfi who, in the ordinary law of supply and demand, in all probability, commands a larger salary than the average branch manager. This man will not be tied down with a mill-stone of routine work, but rather he will occupy himself with seeing that the work is properly performed by other hands. In the leisure thus acquired, he is able to see that his staff is properly efficient, and, at the same time, he is enabled to work out, to test, to experiment, and to install the most effective methods of handling the problems of that particular office.

In the Bank, what do we find? The manager is too busy procuring new business and taking care of the old to be able to devote a great deal of time to personal superintendence of the routine work of the office. He turns this over to the Accountant; unfortunately he also turns over so many other items to that much harassed individual that, wiith the special commissions from the Manager, attention to the public, correspondence, and the thousand and one other duties that are connected with this post, the Accountant is usually one of the hardest worked members of the staff. As he is only human, and cannot work twenty-four hours a day, it is impossible for him to have the leisure for the quiet uninterrupter study that is necessary to devolve new systems, nor has he the time that is required to look after their installation. While he may take a deep interest in the problem, it is difficult for him to acquire more than a superficial knowledge of the carrying out of the routine work. He may be able to talk plausibly of the efficiency of the accounting methods in the office, but it is impossible for a man whose time is occupied so fully to put the calm constructive study on the thousand details that go to make up the evolution and installation of efficient systems. He is forced to leave the working out of the rudiments of various ideas on the subject to the sub-heads of various departments; these officers may be excellent for the work for which they are engaged, but at the same time, they may be wholly lacking in organizing ability.

### Picking the Right Man

Accordingly, the following suggestions are addressed to those Managers and Accountants who have no time to devote to this necessary work.

Look over your staff with a view to picking out the most suitable man for it. You may think that your staff does not include such an officer, but you may be mistaken. The man who is best suited for this work must have brains of a certainty, but it is not essential that he should be of the over-brilliant, sensational type. He may be plodding along on some routine job, with his nose so held to the grindstone that he has no opportunity to show any latent organizing ability that he may possess. He must have caution, he must have patience—the patience to study his ideas for days, perhaps for weeks, before attempting to put them into effect; he needs to be level-headed, to refrain from making changes that will not result in material benefit; he must be of the type that realizes that systems must not be over-elaborate—that simplicity is the soul of effectiveness. But to cap all these qualities, he must have the energy and the enthusiasm that are necessary t oput his ideas into effect, to turn his dreams into realities, regardless of the opposition that undoubtedly he will encounter.

When you have satisfied yourself that you have found the man, give him a chance. Realizing that the job is a thankless one, involving a struggle against the almost blank wall of a natural opposition to new systems on the part of the staff in general, encourage him to use his initiative, and give him the benefit of your support so long as he holds that position.

When these special men in the different offices have completed their "survey" of general conditions, when they have become absolutely amiliar with the details of the routine of a large office, let them "get together" and exchange ideas with each other; if possible let them change offices so that they may see how the systems evolved by other men work out in actual practice. Then perhaps they will be in a position to tackle intelligently the problem of standardizing the routine work of the large office. Perhaps, too, it might be advisable for Head Office to appoint one or more men with the necessary ability to travel around consolidating the different ideas in advance, and getting ready the preliminaries of the ultimate standardization of system.

If, as would appear to be quite possible, the staff of the larger offices could be reduced to the extent of, say, ten per cent., would not the result amply justify the expenditure of time and thought on this problem? You may say that at the present time we are not short of staff. True, perhaps, but equally true is it that the day is coming, perhaps it is not far distant, when every man will be needed, when again we may be forced to use untarined men for the senior posts. Let us prepare for that day now. Let us get our offices into such shape that we may know precisely how many men we shall be able to release when the call comes.

Efficiency has been a much-abused term during recent years, but it has a very real significance to the large banking office of today.

## SUCCESSION DUTIES

Succession dues may be collected by Quebec on movable property in the province which belongs to an estate or succession in another province.

This is the substance of a judgment rendered by the Provincial Court of Appeal confirming the finding of the Superior Court, which granted the province $25,680 succession dues on the estate of the late Wiley Smith, who died intestate in Halifax, February 28, 1916.

The estate contested the payment of the dues on the grounds that the owner lived and died in another province, and that the transfer was made to the heirs under the Nova Scotia law.

A majority of the Court of Appeal, however, decided the shares of stock on which the dues were collectable came under the province of the Quebec law, and that therefore succession duties were rightly levied.

## BONDS vs. MORTGAGES

The above is the title of a pamphlet just issued by Canadian Debentures Corporation, Ltd., Toronto, discussing the relative merits of the two classes of investments.

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended June 23, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | June 23 | June 16 | June 9 | June 2 |
|---|---|---|---|---|
| Ontario ......... | 12 | 17 | 13 | 18 |
| Quebec ......... | 13 | 22 | 20 | 24 |
| Manitoba ........ | 15 | 13 | 10 | 13 |
| Alberta .......... | 5 | 3 | 0 | 2 |
| Saskatchewan .... | 4 | 2 | 4 | 2 |
| British Columbia .. | 6 | 1 | 3 | 3 |
| Nova Scotia ..... | 0 | 2 | 1 | 2 |
| New Brunswick .. | 3 | 1 | 1 | 6 |
| Prince Edward Is. | 0 | 0 | 0 | 0 |
| Newfoundland ... | 0 | 0 | 3 | 0 |
| Total .......... | 58 | 61 | 55 | 70 |
| 1921 .......... | 39 | 34 | 32 | 36 |

## STANDARD TRUST PAYS COURT COSTS

### Took Action in British Columbia Courts Under Will of F. R. Roundy.

The British Columbia Supreme Court has condemned the Standard Trust Co. to pay the costs in connection with the will of F. R. Roundy, probate of which was refused on the ground that undue influence over the testator had been exercised by Frank Pulice. The Standard Trust Company, the executors named by the will, brought an action for declaration "in solemn form," that the will was properly made and should be allowed to stand. Frank Pulice, who was a beneficiary under the will in the sum of $15,000, was made a defendant. The other defendants were the natural heirs of the deceased miner, and had challenged the administration of the estate on the grounds that Pulice had influenced Roundy at a time when the latter was of unsound mind.

The judge remarks that the trust company elected to fight on the side of Pulice, and as the company, and not Pulice, launched the suit, the company must pay the penalty for losing the action. The judgment as to costs is as follows:

#### Plaintiffs Must Pay.

"The costs must, I think, follow the usual rule and the successful defendants must have the costs from the plaintiffs. Pulice, however, cannot be called a successful defendant; he was in reality and in interest the plaintiff, but I do not see how I can make any order against him as to costs.

"It appeared at the trial that the plaintiff's and Pulice's counsel were working in harmony and actually in consultation together. I must assume that plaintiff was fully aware of all the facts, and from these facts it must have been apparent that there was at least a very grave suspicion that the deceased at the time of making his will was of unsound mind.

"The fact that he was so found by inquisition a few weeks later was of itself enough to raise a grave suspicion that such was a fact.

"It was urged before me that the Trust Company merely brought out the facts and left it to the court to decide, but I cannot agree to this. It contested the case as determinedly as Pulice himself could have done, and it only offered evidence in support of the will, and apparently carefully refrained from calling the attending physician, the hospital medical superintendent, and nurses, all of whom were the very first persons that should have been consulted.

#### Alliance With Pulice.

"At the outset of the trial I stated that I presumed the executors simply propounded the will, left the contest to Pulice and the heirs, and submitted to any order the court might make, which would entitle them to the costs out of the estate.

"On at least one, and, I think, two occasions during the trial, counsel for the executors stated rather emphatically that he was not going to be influenced in his conduct of the case by the threat of being deprived of costs if unsuccessful in obtaining probate of the will. The company having taken this stand, and having chosen to make an alliance with Pulice to establish the will against the heirs, must submit to the usual penalty and pay the costs of its failure."

## ACTION AGAINST BROKERS DISMISSED

### Decision for P. C. Cowans Against C. B. Thorne Upheld On Appeal in Quebec Courts

The Quebec Court of King's Bench on June 28 dismissed an appeal inscribed by C. B. Thorne against a judgment of the Superior Court maintaining the action of Percy P. Cowans et al., stock brokers, directed against Thorne to recover $76,701.95, for which the respondents tendered to Thorne 1,200 shares of the stock of the Riordon Pulp and Paper Company, bought at his instructions and on his behalf.

Appellant contested the claim with a plea that he instructed respondents to sell this stock, but they failed to do so when they might have disposed of it without loss to himself, but, on the contrary, at a profit.

Judgment of Superior Court held that on April 19, 1921, the apellant when called upon for further margin to support his account, telegraphed: "Understood my Riordon Pulp and Paper common protected from other sources, if not sell; communicate with our office before selling."

Respondents communicated with the managing director of the office referred to in the telegram and received instructions not to sell the said shares.

Appellants contention was to the effect that the judgment of the lower court was erroneous in holding that the instructions to sell, received from appellant, were subject to the approval of the office of the Riordon Pulp and Paper Company, in holding that Carl Riordon, managing director of the Riordon Company, had authority to give instructions contrary to those of appellant; and because respondents should have sold at once after the interview with the appellant, at their office, on April 22, 1921.

The unanimous opinion of the Court of Appeal was that there was no error in the judgment of the lower court, which was accordingly confirmed, with costs.

## MONTREAL AND QUEBEC BANKS

Deposits in the Montreal City and District Savings Bank continue to decline, as compared with previous months. There was a decrease of over seven hundred thousand dollars in deposits during May as compared with April. The only item to show an increase was loans on other securities, which are up by about eighty thousand dollars.

There were not many changes in the May statement of the Caisse d'Economic de Quebec, as compared with the April statement. The only item to show an increase was cash, which is up by about forty-seven thousand dollars. The following are the principal comparisons:

| Montreal City and District | May 1922 | April 1922 |
|---|---|---|
| Dom. Govt. dem. dep. | $ 93,584 | $ 93,584 |
| Other deposits | 46,019,043 | 46,783,851 |
| Total liabilities | 46,531,941 | 47,339,773 |
| Govt. and other sec. | 14,418,229 | 14,450,444 |
| Cash | 7,173,770 | 7,871,449 |
| Can. Mun. sec. | 17,090,154 | 17,128,660 |
| Loans on bk. stocks | 767,220 | 784,385 |
| Loans on other sec. | 7,299,573 | 7,150,948 |
| Total assets | 49,761,628 | 50,337,724 |

| Caisse D'Economie de Quebec | May 1922 | April 1922 |
|---|---|---|
| Deposits | $11,001,464 | $11,069,071 |
| Total liabilities | 11,484,608 | 11,932,190 |
| Govt. and other sec. | 2,437,345 | 2,447,345 |
| Cash | 1,416,057 | 1,369,013 |
| Can. Mun. sec. | 3,921,088 | 3,948,176 |
| Loans on bk. stocks | 313,686 | 346,188 |
| Loans on other sec. | 3,684,631 | 3,856,950 |
| Total assets | 3,493,154 | 13,907,602 |

## BUILDING STILL ON UPGRADE

### June Figures Show Contracts Above May and Above June of Last Year

During June, construction contracts awarded in Canada, according to MacLean Building Reports, Limited, amounted to $35,620,400, compared with $34,827,300 in May and $26,436,800 in June, 1921. This replaces the May total as the second largest monthly figure on record since May, 1914.

Residential building accounted for 36.4 per cent. of the June total, and amounted to $12,985,900. Business building amounted to $10,351,200, or 29.1 per cent. of the total; industrial building, $4,914,300 or 13.8 per cent.; public works and utilities $7,369,000, or 20.7 per cent. The value of contemplated new work reported during June was $26,117,400.

The figures for the different proivnces are as follows:—

| | No. of Projects | Value |
|---|---|---|
| Ontario | 1597 | $15,984,100 |
| Quebec | 655 | 12,070,800 |
| British Columbia | 217 | 1,778,900 |
| Manitoba | 283 | 1,572,000 |
| Alberta | 205 | 1,198,200 |
| Nova Scotia | 136 | 1,104,500 |
| New Brunswick | 79 | 1,007,600 |
| Saskatchewan | 166 | 874,800 |
| Total for Dominion | 3338 | $35,590,900 |

During May the wholesale price index of 48 building materials advanced slightly and is now 79.3 per cent. above 1913, compared with a peak of 183.8 per cent., reached in May, 1920. Prices have now declined 36.8 per cent. from the high. This seasonal upward movement will be marked for June due to a shortage in supplies. The increases are caused principally by builders bidding against each other in order to get prompt deliveries.

## LIABILITY FOR ACCEPTED CHEQUE.

### Bank of Montreal Fails in Action to Recover From Dominion Bank.

In the case of Bank of Montreal v. Dominion Bank, recently reported, the action was brought against the Dominion Bank to recover the amount of a cheque which had been lost and on which payment had been stopped.

The facts as stated by His Honor Judge Widdifield are as follows: "On February 26, 1918, the Hydro-Electric Power Commission of Ontario issued a cheque for $215 on a Toronto branch of the plaintiff bank to the order of 'G. Pace,' marked 'for services.' On March 8, Pace lost this cheque, together with other papers, and the next day he went to the bank and gave notice of the loss. He also notified the drawers and, on June 11 they wrote the bank that cheque H-5675, describing it, had been lost and a duplicate was being issued therefor.

#### Endorsement Was Forgery

"On Sept. 9, 1918, a man representing himself to be Gordon Pace, purchased some clothing from Lessor Bros., a retail firm in Montreal, and tendered the lost cheque in payment. As he was a stranger to Lessor Bros., they refused to accept the cheque, but agreed to send it to Toronto for collection, and, if paid, pay him the balance. On this understanding the man endorsed the cheque 'Gordon Pace,' which, I find, was a forgery. Lessor Bros., without endorsing the cheque, handed it to the branch of the Dominion Bank in Montreal with which they do business, and it was stamped for deposit to their credit. The Dominion Bank endorsed the cheque below the forged endorsement, as follows: 'Pay any bank or order for the Dominion Bank, St. Lauwrence Boulevard branch, Montreal, W. A. Fisher, Manager.'

"On September 12, the Dominion Bank at Toronto sent the cheque to the branch of the plaintiff's bank on which it was drawn and the plaintiffs marked it 'accepted,' and charged it to the account of the drawers, and the next day the cheque passed the Toronto Clearing House.

#### Accepted by Bank

"On the cheque being accepted the Dominion Bank at Montreal was notified by wire and the $215 was credited to Lessor Bros. and by them checked out the following day. On October 10, the Hydro-Electric Commission discovered that the forged cheque had been charged to their account and the same day they returned the cheque to the plaintiffs, calling their attention to the fact that 'Your bank was communicated with asking you to refuse payment of the cheque if presented.' On October 12 plaintiffs wrote the defendants at Toronto, advising defendants of the forgery. No notice of the forgery was sent to the St. Lawrence Branch of the bank at Montreal. There was some further correspondence between the Toronto banks, and on November 16 the defendants repudiated liability."

His Honor continues: "There is a well-known custom among banks in dealing with countermanded cheques. A colored slip containing the particulars of the 'stopped' cheque is attached to the page of the ledger containing the drawer's account. This was not done in this case, although the plaintiffs had verbal notice from Pace and written notice from the drawers. This information was not given to the ledger-keeper, and it is admitted that if the custom had been followed this cheque would not have been paid.

#### Plaintiff's Argument

"The plaintiffs rely on Sec. 50 of the Bills of Exchange Act. This section protects the paying bank only 'if notice of the endorsement being a forged or unauthorized endorsement is given to each subsequent endorser within the time and in the manner in this section mentioned.' Sub-section 3 provides that the notice 'may be given in the same manner and if sent by post may be addressed in the same way as notice of protest or dishonor of a bill may be given or addressed under the act.'"

His Honor's decision may be stated summarily as follows: "The different branches or agencies of a bank are to be regarded as separate and independent endorsers for the purpose of the notice required under Sec. 50 of the Bills of Exchange Act, which protects the paying bank only if notice of an endorsement being a forged or unauthorized endorsement is given to each subsequent endorser within the time and in the manner mentioned in the section.

"The effect of an acceptance of a cheque by the bank, after it has got into the hands of third parties, is to substitute the liability of the bank for that of the drawer and the cheque thereby becomes negotiable as cash."

| Italy .. .. .. .. .. .. .. | 4.75 | 4.65¼ |
| New York .. .. .. .. | 1⅞ | 1 1/16 |

# Business Conditions

Although recovery in Canadian business is more pronounced in some lines than in others, conditions are steadily improving and there is a growing feeling that the complete return to normal cannot be much longer deferred, according to dispatches received by Dunn's Review from branch offices of R. G. Dun & Co. in the principal cities. Responding to the re-employment of a large amount of labor on farms and in various industries in which operations are on a steadily broadening scale, notably building, iron and steel, mining, lumber and paper and pulp, merchants are purchasing with perceptibly increased confidence. Though there is still a wide-spread disposition to undertake new commitments with caution pending harvesting returns, supplies generally have been reduced to an unusually low level, a situation that is reflected in a steady flow of moderate-sized orders including practically all classes of staple commodities. Collections are averaging better.

Montreal reports that, while most purchasers confine their operations to immediate requirements, there is a growing disposition to place orders for Fall and Winter shipment, and in nearly all staple lines there is a perceptible increase in the volume of business. Collections are fairly prompt.

Improvement in various lines, including dry goods, furnishings, wearing apparel, footwear, furniture, hardware and jewelry, is reported by Toronto, responding to broadening activity in many industries, and the prevailing belief is that Fall and Winter trade will be very heavy if present crop prospects are realized. Collections show some improvement.

The crops in the Far West and Northwest are making satisfactory progress in most districts, and, as a result, wholesalers at Winnipeg, Saskatoon, Regina, Calgary and other important centres report that country merchants are operating with increasing confidence. Orders, however, while covering a wide range of commodities, do not as yet extend very far in advance of current requirements and, as a rule, are moderate in amount. Nevertheless, the many requests for prompt shipment that accompany these purchases are regarded as an encouraging augury for the future, inasmuch as they are construed as reflecting generally depleted supplies and urgent necessity for replenishing. Collections continue to drag.

# Insurance Licenses and Agency Notes

The Cornhill Insurance Company, Limited, has been granted a license, authorizing it to transact in Canada the business of fire insurance and insurance against damage to property of any kind caused by the explosion of natural or other gas.

A license has been granted the Occidental Fire Insurance Company authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

A Dominion license has been issued to The Merchants Marine Insurance Company, Limited, authorizing it to transact the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

The Newark Fire Insurance Company has been granted a Dominion license, authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

A license has been issued to the Security Insurance Company of New Haven, authorizing it to transact in Canada the business of Sprinkler Leakage insurance, in addition to the classes for which it is already licensed.

The Dominion Gresham Guarantee & Casualty Company has been granted a license, authorizing it to transact in Canada the business of fire insurance, in addition to the classes for which it is already licensed.

The Vulcan Fire Insurance Company of Oakland, California, has withdrawn from the Province of Manitoba and has re-insured all its business with the North British & Mercantile Insurance Company.

| Totals .... .... ................ | $ 8,873,712 | $ 8,472,461 |

## CASUALTY INSURANCE FIGURES

There were two or three errors in the article on Casualty Insurance published in the Monetary Times last week. Ewart R. Mills, Canadian manager of the Travellers Insurance Company of Hartford, points out the following:

"Regarding Accident insurance, you state that The Travelers Insurance Co. income was $279,042.00 with losses of $188,000.00. You neglected, however, to add into that The Travelers Indemnity Co. figures which, as you are probably aware, is a sister Company under the same control with certain forms of insurance written in the Indemnity Company. The combined figures give The Travelers business of $321,042.00 with losses of $203,000.00.

"In connection with Liability insurance you state that The Travelers Insurance Company was second with an income of $338,599 and losses of $279,000. This is entirely incorrect as the losses according to our reported figures contained in the Government Abstract of Insurance Companies for 1921 were $146,000. What has occurred is that you have quoted the losses of the Employers' Liability as our losses."

The correct figures for the more important companies writing liability insurance were: Employers' Liability, premiums $647,192, losses $279,594; Travelers', premiums, $338,599, losses $146,621; North American Accident, premiums, $244,162 losses, $161,573; Globe Indemnity, premiums, $214,327, losses $166,168; Ocean Accident and Guarantee, premiums, $176,142, losses $63,723; London Guarantee and Accident, premiums, $159,451, losses $44,244.

Montreal, $20,000; Broadway Poolroom Co., Ltd. (Peter Mincoff), Montreal, $20,000.

## NEW MATCH CO. STARTED

### Plant at Bertierville Has Capacity of Six to Seven Million Per Day

Prospects for "The Match Company, Limited," 137 McGill Street, Montreal, were discussed at a meeting in that city on June 27, attended by Paul E. Joubert, vice-chairman of the Canadian Manufacturers' Association, Wm. M. Birks, president of the Board of Trade, E. C. Pratt, general manager of the Molsons Bank, Armand Chaput, president of the Canadian Wholesale Grocers' Association, Alfred Lambert, president of the Chambre de Commerce, F. J. O'Grady, C. L. Allen and others.

Herbert Greer, general manager of The Match Co., Ltd., said that the company had located at Berthier because they had found that the American forests did not produce the right kind of wood they needed. Therefore they had established their factory at Berthierville with a capacity of six to seven million "splints" per day, making the beginning of the largest match factory in the world.

"To start this match factory," said Mr. Greer, "we have been obliged to invent and install machinery that will produce the goods needed. As a result we have the most modern match making machinery in the world, suited to the Canadian woods, with a management and staff that is 100 per cent. Canadian, so that this can be called a really Canadian enterprise."

Louis Allen, executive vice-president of the American Splint Corporation, said he was willing to stake his reputation on the future of Canada, and the future of the Match Company. The company was making square matches by the millions out of Canadian wood, with square dealing, and he felt confident it would have a good future not only for domestic consumption, but for export business. In fact, the company was looking for export trade as a strong feature of its work.

## MANITOBA CHARTERED ACCOUNTANTS

### David Young Elected President at Annual Meeting Held in Winnipeg Last Week.

At the 36th annual meeting of the Chartered Accountants of Manitoba, held last week, Hubert Reade, president, occupying the chair, to fill the vacancies on the council left by the seven retiring members, the following were elected for the two-year term of office: W. Aitken, W. A. Henderson, E. S. Reade, H. T. Reade, W. S. Ronald, F. C. S. Turner, D. Young.

After the adoption of the report and accounts, a vote of thanks was tendered to the president, Mr. Hubert Reade, the vice-president, W. D. Glendenning, and honorary secretary, Keith Drennan, and also to W. G. Sanburn for his services to the Institute while acting as secretary in the early part of the year.

At the luncheon which followed, the Lieutenant-Governor, Sir James Aikins, was the guest of the Institute. Addressing the company, he said an accountant who was worth his salt was one who not only could keep books, but could tell a man how to economically and properly manage his business. While the accountants, he remarked, were organized provincially, their idea was that all the organizations in the Dominion should be united and made into a national body.

At a meeting of the council following the annual meeting, David Young was elected president, E. S. Reade vice-president, and Keith W. Drennan, honorary secretary-treasurer.

The report of the council showed that during the year the membership had increased from 117 to 133.

## FISHERIES COMMISSION

Appointment of the commission to investigate the fisheries situation in British Columbia with regard to the canners' request for an embargo against the export of raw fish, brought before the Parliamentary Committees of Fisheries during the session, will bo made shortly.

The commission is expected to consist of three Eastern memgers of Parliament, with three or four Western members, and will probably be under the chairmanship of William Duff, M.P. for Lunenburg, who is chairman of the standing committee of fisheries.

# Heavy Decline in Trade

### Imports for Twelve Months Reduced About Sixty Per Cent. — Exports Have Kept Up Better, Resulting in Small Favorable Balance

Total imports into Canada for the twelve months ended April 30 were $730,188,939 which is about sixty per cent. of the total for the preceding year, and about sixty-five per cent. of the total for the twelve months ended April, 1920. The effect of this change on the public revenue is a loss of about twenty millions during the past year. There has also been a heavy drop in exports, though here the difference is not quite so great. Below is given a summary of the trade of Canada by groups of commodities and by countries.

There is now a favorable balance of twelve millions, however, compared with an adverse balance of nine millions the previous year. For the period ended 1920 there was a surplus of exports of $167,000,000.

SUMMARY OF THE TRADE OF CANADA

1—Imports and Exports of Canada by Main Groups.

| | Twelve Months Ended April. 1920. | 1921. | 1922. |
|---|---|---|---|
| **Imports for Consumption—** | | | |
| Agricultural and Vegetable Products | $252,794,909 | $258,525,577 | $162,413,122 |
| Animal Products | 97,515,102 | 59,078,376 | 45,911,023 |
| Fibres and Textiles | 248,101,797 | 225,907,263 | 141,205,372 |
| Wood and Paper | 14,367,207 | 56,423,077 | 35,372,779 |
| Iron and its Products | 191,488,809 | 238,550,953 | 107,842,437 |
| Non-ferrous Metals | 54,098,830 | 53,772,289 | 29,275,882 |
| Non-metallic Minerals | 125,065,244 | 206,949,801 | 134,022,922 |
| Chemical Products | 31,329,465 | 36,882,402 | 24,805,701 |
| Miscellaneous | 63,802,266 | 71,089,256 | 49,339,701 |
| Total Imports | $1,108,563,629 | $1,207,178,994 | $730,188,939 |
| Dutiable Goods | $722,932,276 | $830,639,541 | $480,501,164 |
| Free Goods | 385,631,353 | 376,539,453 | 249,687,775 |
| Duty Collected | $193,704,174 | $172,643,684 | $120,300,461 |
| **Exports (Canadian)—** | | | |
| Agricultural and Vegetable Products | $407,577,930 | $485,366,103 | $309,230,035 |
| Animal Products | 306,877,144 | 186,930,527 | 133,559,380 |
| Fibres and Textiles | 34,867,789 | 16,423,817 | 4,133,186 |
| Wood and Paper | 220,597,074 | 280,893,053 | 180,058,356 |
| Iron and its Products | 80,780,008 | 73,659,104 | 28,517,736 |
| Non-ferrous Metals | 54,789,974 | 44,378,941 | 28,332,122 |
| Non-metallic Minerals | 31,085,027 | 39,480,553 | 22,184,739 |
| Chemical Products | 22,162,550 | 19,618,708 | 8,991,038 |
| Miscellaneous | 69,621,829 | 32,337,244 | 13,870,853 |
| Total Exports (Canadian) | $1,228,359,325 | $1,179,088,050 | $728,877,445 |
| Foreign Exports | 46,897,150 | 19,545,280 | 13,625,895 |
| Total Exports | $1,275,256,475 | $1,198,633,330 | $742,503,340 |

2—Imports from and Exports to United Kingdom and United States.

Twelve Months Ended April, 1922.

| Main Groups. | Imports for Conusmption. From U.K. | From U.S. | Exports (Canadian). To U.K. | To U.S. |
|---|---|---|---|---|
| Agr. and Veg. Products.. | $22,893,818 | $82,525,273 | $192,797,690 | $41,440,716 |
| Animal Products | 3,059,624 | 35,429,151 | 69,179,101 | 47,356,324 |
| Fibres and Textiles | 51,649,747 | 67,929,760 | 1,035,796 | 1,832,594 |
| Wood and Paper | 2,570,822 | 31,094,385 | 15,768,954 | 147,836,119 |
| Iron and Products | 8,549,294 | 98,043,227 | 4,952,576 | 4,852,236 |
| Non-ferrous Metals | 2,431,298 | 24,948,870 | 5,837,793 | 15,175,065 |
| Non-metallic minerals .. | 6,073,872 | 115,254,369 | 2,934,406 | 12,584,585 |
| Chemical Products | 3,163,328 | 18,398,596 | 980,764 | 5,559,774 |
| Miscellaneous | 10,984,027 | 33,783,246 | 1,068,407 | 9,793,087 |
| Total Trade | $111,375,830 | $507,406,877 | $294,555,487 | $286,430,560 |

3—Imports and Exports of Canada by Principal Countries.

| Countries. | Twelve Months Ended April. 1920. | 1921. | 1922. |
|---|---|---|---|
| **Imports for Consumption—** | | | |
| United Kingdom | $140,999,780 | $207,671,779 | $111,375,830 |
| Australia | 1,343,381 | 820,578 | 1,175,085 |

## ASSESSM'T OF COTTONS' PLANT

### Plant at Cornwall Assessed on Machinery and Power Equipment as Well as Other Property

The Ontario Railway and Municipal Board has given out judgment in the appeal of the Canadian Cottons, Limited, from the decision of Judge O'Reilly and has found that the Cornwall, Ont., power plant belonging to the Canadian Cottons, Ltd., should be assessed as follows:

Lands, $2,00; buildings, $150 000; business assessment, $91,200. Total, $243,200.

The assessor for the township of Cornwall for the year 1921, assessed the power plant in question as follows:

Lands, $2,000; buildings, $78,000; business assessment, $12,500. Total, $92,500.

At the court of revision an error was discovered in the business assessment which the court of revision rendered and also made a change in the assessment on the lands belonging to the power plant of the company. The court of revision made the assessment as follows:

Lands, $2,000; buildings, $78,000; business assessment, $46,920. Total, $125,120.

From the latter assessment as fixed by the court of revision and township of Cornwall, the Canadian Cottons, Limited, appealed to iHs Honor Judge O'Reilly. Judge O'Reilly fixed the assessment on the lands and buildings at $108,200, but also ruled that the company was not liable for business assessment. From this judgment of Judge O'Reilly the Canadian Cottons, Limited, appealed to the Ontario Railway and Mupnicipal Board who renered the judgment as mentioned above making the Canadian Cottons, Limited power plant assessable for $243,200.

The points of law which have been decided in the case are that fixed machinery for motor purposes in connection with the manufacturing plant is assessable together with the lands and buildings in which the machinery is placed, and also that such power plant is liable for the business assessment which manufacturers are liable to under the act.

## TIMBER LIMITS ACQUIRED

It is reported that the Premier Paper & Power Company have purchased the H. Croix Paper & Lumber Company, acquiring the latter's watershed and 26,000 acres of pulp wood, and is planning the early construction of a new paper mill and power plant to cost approximately $1,500,000. The mill will be 35 miles from Halifax and will consist of two hydraulic turbines generating approximately 3,300 h.p., four waterwheels to drive grinders and one newsprint machine.

## ADVANCES FOR BUILDING SHIPS

### Position of Crown Set Forth In British Columbia Bankruptcy Proceedings.

In the appeal to the British Columbia Court from an order in bankruptcy made by Justice Murphy, whereby the trustee and receiver in bankruptcy was directed to restore to the respondent in the case of the King v. Hodges, the possession of two ships under construction at Prince Rupert with their engines, boilers, etc., and certain material in the building yard, the facts and decision of the Court of Appeal are briefly as follows:

"Under a contract for the building of certain ships, the Crown advanced 35% of the purchase price, and in alleged pursuance of a power conferred under the contract took possession of the ships and certain materials, and also of the yard, plant and equipment for the purpose of completing building of the vessels. Shortly afterwards, the contractors were adjudged bankrupt and the trustee in bankruptcy was appointed receiver and took possession of all the bankrupt's assets, including those in possession of the Crown The Court held, affirming the judgment of Justice Murphy, that the trustee should give up possession to the Crown of the ships together with the slips in which they stood and free access to so much of the yards as should be found reasonably necessary to be used in completing the work on the ships and also all material, engines, boilers and auxiliaries and fittings which were actually on board the vessels or in the building yards, but there being no clause in the contract which expressly authorized the Crown to use the plant and equipment it was not entitled to such use, which could only be conferred by apt and unmistakable language.

"Held also that the Crown, although it had under a covenant in the contract a special lien for its advances upon the purchase price, was not a creidtor and so could not file a claim or value its security and so could not conform with section 46(3) of the Bankruptcy Act."

## RESUME NICKEL SMELTING

Announcement was made following tha annual meeting of International Nickel in New York that smelting operations would be resumed at Copper Cliff, Ont., on September 1 next, when two furnaces will be blown in. This means two hundred thousand tons or ore per month, or about one-third production. J. L. Agnew, the Canadian president, said there was no change in the situation. There is sufficient ore in reserve to maintain this production for about six weeks or two months, and therefore opening of the mines will be delayed.

## PAYMENT IN FOREIGN EXCHANGE

### Goods Must Be Paid For in Currency of Country of Origin.

The Montreal Superior Court, on Feb. 10, delivered judgment on a litigation between Leonard L. Stein and Co., of Switzerland, plaintiffs, and C. Courey and Co., merchants, of Montreal, defendants. The dispute arose over exchange of currency, and the court's judgment upholds the practice and custom of commerce that goods are payable in the currency of the country from which they are ordered and emanate.

On December 22, 1916, plaintiffs sold to defendants two lots of Swiss goods to be shipped from St. Gaul, Switzerland. The first lot was shipped and duly paid for in Swiss francs. The second lot was received by defendants in Montreal on August, 29, 1917, the price, including freight and insurance, amounting to 7,796.95 Swiss francs.

Defendants in payment sent on May 23, 1918, a draft on London for two hundred and eighty-seven pounds, six shillings and six pence sterling, which represented 7,796.95 French francs, but only 5,415.95 Swiss francs.

Plaintiffs refused to settle the account on that basis and demanded the balance of the account, namely, 2,381 Swiss francs. Defendants contested the claim by pleading that their indebtedness to plaintiffs was payable in gold or its equivalent; that the French gold franc coin was equal in value to the Swiss gold franc coin, and therefore they had a right to pay their indebtedness by a draft in sterling on London which, at the rate of exchange then prevailing for French francs, would realize 7,796.95 French francs.

Justice Maclennan rejected the defendant's plea, holding that payment of this account in gold was to be based upon the value of the Swiss franc and not upon the value of the French or any other franc. Consequently, he said, plaintiffs were entitled to receive in Canadian currency an amount which could be converted on the date of payment, at the rate of exchange then current, into the amount of Swiss francs owing by defendants to plaintiffs.

The Canadian currency which could be converted into 2,381 Swiss francs— the amount herein sued for —on March 1, 1918, when the account was payable under the agreement between the parties, would amount to $539.77, and for this sum defendants were adjudged to be liable.

In addition, His Lordship found defendants were liable for $120, representing arbitrators' fees. The dispute had been reffered to arbitration before the present action was taken. The agreement was to accept the finding and the losing party pay costs. The arbitrators were of opinion that defendant should settle the account in Swiss francs. Defendants, however, allowed action to proceed before the court.

The result is that they are condemned to pay plaintiffs the sum of $659.77, with interest on $539.77 from March 1, 1918, and on $120 (the arbitrators' fees) from the date of service of the present action (November, 1921) and costs.

## ENLARGE PLANT

An addition is being built by the Hurlburt Shoe Company of Preston, Ont. The addition will be approximately the same size as the present plant, providing for the more than in the proceeding month. doubling of the production capacity. Work on the new building will start immediately.

## *New Industries*

The Canadian By-Products Co. Ltd., a concern manufacturing fire bricks, will shortly build a plant in Hamilton, Ont., that will have a capacity of 20,000 fire bricks per day. It is stated that this will be the first factory of its kind in Canada.

A new automobile Industry has been established In Windsor, Ont., trading under the name of Windsor Steam Motors. The new company is a branch of the Trask Detroit Steamer, who manufacture steam cars in Detroit.

The Rocky Mountain Paint Co., has located at Calgary, Alta., where they will manufacture all kinds of paints and colors.

A number of Chicago and Kansas City newspaper publishers have organized a company known as the Wigwam Pulp & Paper Co., and they will probably commence operations this year. The new mill will be erected on the Elk River, B.C., about four miles from Elko, and a railway line this length will be necessary to connect the plant with the C.P.R. It is stated that upwards $3,500,000 will be required before the plant is in operation, and in addition the promoters of the venture are considering the establishment of a sawmill to handle the timber that is not suitable for pulp. Nearly 1,500 people will be employed when the plant is in full operation.

The Culp Paper Co., a Rochester, N. Y., concern has secured an option on some property in Niagara Falls, Ont., with a view to the erection of a factory in that city shortly. The company owns a patent for bleaching newspaper or any other printed paper without destroying the fibre.

A new company known as the Ezykleen Products Co., has been formed in North Bay, Ont., and will commence operations immediately. The company will manufacture a number of household cleaning preparations, and will employ twelve men at the start and later more men will be engaged.

# Municipal Finance

**Port Dalhousie, Ont.**—The tax rate for 1922 will be 35 mills on the dollar.

**Toronto, Ont.**—The revenue of the waterworks department from January 1 to May 31 amounted to $1,042,569, as compared with $976,340 for the same period last year.

**South Vancouver, B.C.**—Tax collections up to June 22 amounted to slightly over $200,000.

**Crowland Twp., Ont.**—The general tax rate has been set at 10 mills on the dollar, an increase of 5 mills over that of last year. The estimated expenditures for the year have been placed at $26,866.

**Essex Co., Ont.**—The council has fixed the assessment for 1922 at $74,133,100, a decrease of exactly $1,000,000 from last year. The following is the assessment for the various municipalities in the county: Anderdon, $3,839,900; Colchester North, $2,899,500; Colchester South, $4,143,200; Gosfield North, $3,273,800; Gosfield South, $4,224,000; Maidstone, $3,721,800; Malden $2,916,800; Mersea, $6,749,900; Rochester, $3,138,700; Sandwich East, $2,715,000; Sandwich South, $2,336,700; Sandwich West, $5,800,000; Tilbury West, $2,570,000; Amherstburg, $2,084,000; Belle River, $293,100; Essex, $1,039,200; Ford City, $4,304,700; Kingsville, $1,198,400; Leamington, $3,198,200; Ojibway, $2,200,000; Riverside, $2,546,000; Sandwich, $5,000,000; St. Claire Beach, $589,700; Tecumseh, $947,00.

The council struck a tax rate of 2 mills on the dollar for current expenses and 1½ mills for road mentenance. The estimated current expenses for the year are placed at $179,499, and $112,254 for roads.

**Flowery Plains, R.M., Alta.**—The tax rate for the present year will be 7 mills on the dollar.
valuation for the current year is $752,445.

**Leeds and Grenville Co., Ont.**—The council struck the tax rate for general purposes at 4 mills on the dollar. During the period from January 1 to June 22 of this year the county expended $135,564, and received $125,347. There was an overdraft at the bank of $10,244.

The assessment for this year has been placed as follows: Elizabethtown, $1,940,512; Bastard and Burgess (S.), $1,395,660; Rear of Yonge and Escott, $556,570; Front of Yonge, $643,440; Front of Escott, $566,405; Rear Leeds and Lansdowne, $961,660; Front Leeds and Lansdowne, $1,842,925 ; Kitley, $838,285; North Crosby, $627,550; South Crosby, $806,470; South Elmsley, $481,460; Augusta, $1,610,840; Edwardsburgh, $1,560,370; Oxord, $1,213,800; Wolford, $706,580; South Gower, $387,660; Newboro, $92,750; Athens, $227,990; Westport, $219,380; Kemptville, $298,900; Merrickville, $299,950; Cardinal, $410,690; Gananoque, $1,375,860. Total, $19,065,707.

**Toronto, Ont.**—In a report on the finances of the Harbor Commissioners prepared by the city auditor, the inventory shows $19,707,023 of real estate, plant, buildings and equipment, with stores valued at $187,446. The total debenture debt is $17,847,000; capital account, $8,985,436. Sinking fund provision is placed at $554,097, which is made up of debenture debt redeemed in 1918-19-20.

Since 1917 the accumulated deficit amounts to $2,587,035. The surplus on operations over the construction period provided only 41,2 per cent. of the interest, with the result that there were no current funds to meet other debenture charges and repayment of debt.

**Edmonton, Alta.**—According to City Commissioner Yorath, the public utilities show a net surplus of $177,360 for the first five months of 1922, as compared with a surplus of $94,593 for the same period in 1921.

There was a net surplus of $19,024 for the month of May this year, as compared with a net loss of $874 for May of last year. The street railway shows a loss o only $506 for May, 1922, as compared with a loss of $11,018 or May, 1921, and or the irst five months of this year, a profiti of $9,637 against a loss of $19,999 or the same period o 1921.

## JUNE BOND SALES ARE LOWER

### Total Sales Amount to $16,622,860, as Against $27,506,323 for May.

Sales of provincial and municipal securities during the month of May show a considerable decrease from the previous month, the decline amounting to slightly over eleven million dollars. The decrease was due to the fact that there were no provincial issues during June as compared with two in May, amounting to five million, and also a decrease of about five million dollars in municipal financing. A summary of last month's transactions shows the following results:

| | June, 1922. | May, 1922. |
|---|---|---|
| Provincial | | $5,694,000 |
| Municipal | $4,832,860 | 10,268,323 |
| Corporation | 11,790,000 | 11,544,000 |
| | $16,622,860 | $27,506,323 |

During the first six months of this year there has been more activity than during the same period last year. New financing for the six months' period, including the Dominion loan for one hundred million, amounted to $247,736,778, as compared with $133,646,978 in 1921, which includes temporary borrowing, such as provincial treasury bills, which matured before the end of the year, amounting to about $13,750,000.

Of the total sales during the month United States investors absorbed six million, mostly industrial issues, or thirty-eight per cent. of the month's total.

Did You Buy Bonds a Year Ago?

Investors who, a year ago, purchased Government, Municipal and Corporation Bonds, have seen their investments appreciate materially in value.

It is the belief of financial authorities that the upward trend in bond prices will continue for an indefinite period.

May we suggest for your consideration bonds that combine not only safety of principal, with attractive income return, but which also have every possibility of appreciation in value?

## ONTARIO INCOME ASSESSMENTS

### City of Ottawa Enforces Collection of Tax on Special Dividend.

The Ontario Railway and Municipal Board on February 7th delivered judgment in the appeal by the City of Ottawa from the Carleton County Court, to decide the provincial income assessment of the Toronto General Trusts Corporation, a shareholder in the Hawkesbury Lumber Co. Prior to 30th September 1916, the Hawkesbury Co. had accumulated a surplus of $1,791,917, out of earnings. This surplus had been and was used as working capital. At a shareholders' meeting on December 15th, 1920, a dividend of 875% was declared out of that surplus, payable on 22nd December to shareholders of record. The shareholders were requested to invest their cheques in Victory bonds, held by the company, five out of the seven shareholders doing so.

### Dividend Not Reported.

The respondents made returns to the Assessment Commissioner for Ottawa in 1921, in conformity with the provisions of sec. 11 (2) of the Assessment Act, stating the amoun of income actually received during 1920—the income of the said several respondents not being exclusively salary or other fixed amount capable of being estimated for the then current year 1921; but none of these returns contained any entry of the dividends received by the respondents from the Hawkesbury Co. The amounts received by them from the company as aforesaid were, however, added to the incomes stated by them and they were assessed accordingly They appealed unsuccessfully to the Court of Revision; but upon a further appeal to the County Court Judge, their assessments were reduced by the amounts received from the company. The city then appealed to the Board.

### Definition of Income.

The Chairman referred to the definition of "income" in sec. 2 (e) of the Assessment Act; and said that in the contingency provided for by sec. 11 (2) it was not necessary that a dividend should be surely payable in 1921 in order that resort might properly be had to the amount of income received in a given case during the year ending on the 31st December then last past: In a given case where the income is not a salary or other fixed amount capable of being estimated for the current year—which was the case here—antomatically the substantive provision of sec. 11 (2) is applicable, and the income or assessment purposes for the current year is ascertained as there provided. The sense in which "annual" is used in the definition of "income" (sec. 2 (e) ), in its application here, is "completed in a year"—a year being the fiscal period the revenue received during which, or a sum not less, is imputable to that year as income for the purposes of the Act. That revenue having been received for the yea ending on the 31st December 1920 it, or a sum not less, might properly be adopted, in the circumstances of these cases, as the assessable income for the current year.

The Board was also of opinion that the dividends in question were not capi'al, but income and assessable as such.

# Government and Municipal Bonds

The past week in the government and municipal bond market was not a very active one, being practically the same as the previous weeks. There was a very slight strengthening in the market, but prices showed an inclination to ease off slightly. The general opinion among the bond dealers is that there will be no break in the market until after the summer holidays, when an active market is expected.

Bond sales during the week were slightly heavier than for the previous week, although most of them were for small denominations. Despite the holiday recession prices paid to the municipalities continue to hold up, and the bonds are being readily disposed.

Victory bond prices were fairly steady with a very slight variation of price in some of the issues. The demand for Victories during the week was not so heavy as formerly.

### Coming Offerings

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders Close |
|---|---|---|
| Prescott & Russel Co., Ont. | $200,000 | July 12 |

Toronto Twp., Ont.—An issue of $40,000, 6 per cent., 20-instalment bonds has been sold to W. L. McKinnon & Co. at a price of 103.34, the money costing the township about 5.60 per cent.

## BROKER'S TRIAL POSTPONED

The case of Colin C. Cameron, former partner of the firm of Thornton Davidson & Company defunct stock brokers, who is charged with stealing $500,000 and with falsifying the firm's books to the extent of another $500,000, was on June 29 postponed until the September term of the. Court. of King's. Bench. The failure of Thornton Davidson & Company hastened the collapse of the Merchants Bank.

## CURTIS AND HARBEY PLANT

Interest on claims made upon a debtor in liquidation and which have since been paid in full was ordered paid by a judgment of the Court of Appeal confirming a judgment of the Quebec Superior Court which had condemned J. L. Apedaile, liquidator of the Curtis and Harvey, Canada, Limited, to pay two firms $7,394.

The Curtis and Harvey plant at Rigaud was totally destroyed by explosion and fire on Aug. 18, 1917, and subsequently a winding-up order was issued. The amount of the principal involved was $77,207, covering a claim paid to the Nicholas Chemical Company, and $333,803, to the General Chemical Company. Interest on these amounted to $4,904 and $2,299 respectively.

## DECISON ON REGINA COUPONS

### City Does not Have to Pay Interest at Par of Exchange, According to Latest Ruling

The contention of the city of Regina that it does not have to pay interest on its 1918 sterling issue of debentures at par rate of exchange was upheld by a judgment handed down in the Saskatchewan court of appeal on June 29. The judgment reverses the finding of the Court of King's Bench.

In 1918 the city of Regina sold certain debentures. Each of these debentures contained a promise to pay to bearer at branches of the Bank of Montreal in London, England, New York, Toronto or Regina the sum of £100 sterling on March 21, 1938, and to pay interest at the rate of five percent. on presentation of interest coupons. which were attached to the debentures.

The court of appeal points out that each of these coupons contains a promise by the city of Regina to pay to the bank two pounds, ten shillings.

The Toronto General Trust Corporation, plaintiff, became holders of 91 of these debentures and in March, 1920, they presented at the bank coupons for interest falling due up to date. They were in payment of interest £227.10 calculated at the current rate of exchange at which sterling could be purchased. The current rate was at that time considerably below par.

## VALIDITY OF CHATTEL MORT-

In the case of Proctor V. Anderson and Northern Elevator Co., the Saskatchewan Court of Appeal has handed down a decision upon the effects of chattel mortgages given for seed grain under the Manitoba and Saskatchewan Chattel Mortgages' Acts. The judgment in subsequence is as follows:

"A mortgage given under the Bills of Sale and Chattel Mortgage Act, R.S.M. 1913 which assumes to bind a growing crop for something more and other than the purchase price of seed grain is absolutely void under section 33; it is also null and void if the affidavit of bona fides does not set forth 'that the mortgagor is justly and truly indebted to the mortgagee in the sum mentioned in the mortgage,' and in any event if the mortgagee has not filed a copy of the mortgage in the proper office within three weeks from the removal of the grain into Saskatchewan, as required by section 35(2) of the Chattel Mortgage Act of Saskatchewan, he will not be permitted to set up any right of property or right of possession to the grain under his mortgage against the creditors of the mortgagor. The term 'creditors' means all the creditors of the mortgagor and not merely the execution creditors."

## OPERATING FULL TIME

As a result of orders received for overseas markets, the plants of the Wayagamack Pulp and Paper Co., are now running at full capacity. The increase that has come recently has necessitated operating the plants the full 24 hours a day. The volume of business recently received has been the largest since the general set back in the paper business.

Present enquiries would indicate that full capacity production will be the order for several months to come. In addition to the outside business, there has also been a noticeable improvement in the demand from the home market.

**Fifty Bonds to Choose From**

Every one of them safe investments, being portions of the issues of Canadian Provinces, Cities, Counties, and Townships.

As a large amount of maturing interest is available for re-investment at this time, we offer in our July List, investments that will meet all requirements as to maturities and interest yields consistent with safety.

The variety of Bonds described will be very informative to those who plan now to exchange early maturing Bonds for Bonds of longer maturities, thus assuring to themselves prevailing interest rates for a long time to come.

# *The Stock Markets*

Beyond the movement in several utility issues. particularly Toronto Railway and Brazilian, the stock market during the past week was practically featureless. The Canadian market is closely following the trend of the New York market, which has experienced a decided slump from the buoyancy of earlier months, due to several unsettling influences, such as the threatened railway strike and the strike of the coal miners.

Toronto Railway stock was in the limelight during the week, with sales almost equal to half the total sales. Heavy trading in this stock had the effect of sending up the price from 73¼ at last week's close to 79¼ at the end of the week under review. Various suggestions have been put forward regarding this increase, but the most logical reason is perhaps due to the near approach of the end of the clean-up proceedings between the company and the city of Toronto, and the prospect of a substantial price eventually for the stockholders, variously estimated from about $90 to around $125 per share. Both Toronto and Montreal markets shared heavily in the buying of this stock.

Brazilian Traction continued to hold its own, despite the continued dullness, although sales were not so heavy as formerly.

In the paper group Abitibi took first place in regard to activity, with Brompton coming a close second. The other paper stocks showed a slight weakness, being traded in broken lots only.

Considering the dullness of the market, the general industrial list was fairly steady, with losses equalling the gains in most cases. Trading in these stocks was slightly narrower than previously and mostly in broken lots.

### Professional Offices, Ltd.

An issue of $275,000 7 per cent. first mortgage serial bonds of Professional Offices, Ltd., Toronto, is being offered by Steward, Scully Co., Toronto, at a price of 100 and accrued interest to yield 7 per cent.

The bonds are dated July 1, 1922, and are to be retired in full in eighteen years, commencing January, 1925. Principal and interest is payable half-yearly, January and July, at Toronto and Montreal. The bonds are in denominations of $1,000 and $500, with privilege of registration as to principal only. The bonds are redeemable in the reverse of their numerical order at par and accrued interest, together with a premium of ½ per cent., for each year or fraction thereof of the unexpired term of the bonds so redeemed.

The building is being erected for the convenience of physicians and surgeons at 86 Bloor street west, Toronto, and it is stated that over 40 per cent. of the available space had been let before the construction work had been started.

The gross annual earnings of the building are estimated at approximately $97,500, and the expenses are estimated at about $50,000. The principal and interest payments are a little over $27,000 per year, so that the gross rental value is nearly four times the principal and interest payments for the year.

### Dean's Sunnyside Pleasure Boats

An offering of $50,000 8 per cent. cumulative preferred stock of Deans' Sunnyside Pleasure Boats, Ltd., is being made by Fidelity Agency of Canada, Ltd., Toronto, at $100 per share, carrying a bonus of one share of common stock for each two shares of preferred stock subscribed.

The capital of the company is 1,000 8 per cent. preferred stock, par value $100, of which 450 shares are issued, and 2,000 shares of common stock, par value $100, all of which has been issued.

The company has been incorporated for the purpose of carrying on business as a boat livery, etc., and have secured a twenty-one renewable lease from the Harbor Commissioners for the rental of boats.

A. B. Ormsby is president, and H. G. Stanton is first vice-president.

## EXCHANGE ON FREIGHT SHIPMENTS

The rate of exchange in connection with shipments of freight between points in Canada and the United States from July 1 to July 14 inclusive will be 1¾ per cent. and the surcharge on the said traffic will be 1 per cent. The rate of surcharge on international passenger business will be based on 2 per cent. exchange.

## PROSPECTS FOR POWER ENTERPRISE

A. J. Nesbitt, of the investment banking house of Nesbitt, Thomson and Company, Ltd., Montreal, was the guest of honor at a complimentary dinner tendered him by A. L. Crossin, president of the Bond Dealers Association of Canada, in Winnipeg on June 29. There were about fifty business and professional men of Winnipeg present.

In a short address of welcome, Mr. Crossin expressed the gratification which Winnipeg bond dealers felt over Mr. Nesbitt's announcement that he had decided to establish for his firm a branch office in Winnipeg. The establishment of such an office, said Mr. Crossin, meant that the West now had a point of contact with capital in which it stood so badly in need. They all realized that if they wanted to make Winnipeg something more than a market town for farmers they had to interest themselves in establishing manufacturing plants here. This could only be done by developing and utilizing the great water powers of the Winnipeg river, and Mr. Nesbitt's firm was taking a very active part to this end. He thought that the greatest co-operation should exist in order that Winnipeg might take full advantage of the opportunities which nature had provided her with, and suggested that the slogan for business men in Winnipeg should be, "All of the 400,000 h.p. of the Winnipeg river working."

Mr. Nesbitt pointed out what his firm had done in regard to the financing of the Winnipeg Electric Railway company. They did not enter Winnipeg, he said, until they had made a most exhaustive investigation of the industrial situation here, and the potentialities of the city. They were completely satisfied as to the possibilities of the city and decided to express their faith in the future of Winnipeg by giving their support to the Street Railway and the Manitoba Power Company. He predicted that in a very few years the Manitoba Power Company would have to put in additional units.

## BRITISH CATTLE SUPPLY COMPANY

The affairs of the British Cattle Supply Compaany, incorporated in February, 1917, and placed in liquidation in October, 1917, have been officially wound up, the creditors receiving a final dividend of 20.9 per cent. under the direction of the Ontario courts. The lawyers and liquidators have been paid and the remaining $6.40 has been turned into the liquidation funds for postage, etc. The creditors in all received 70.9 per cent. in dividends.

According to the prospectus, the company had options on 494,000 acres of first-class ranching lands in Alberta. It was intended to purchase, produce and deal in live-stock and live-stock products, and failure to secure title to the above lands was the main cause of the collapse of the scheme. The capital was placed at $2,500,000, and members of Parliament and Senators were on its Advisory Board, but the business did not progress beyond the stock selling stage. The amount received by the liquidator was $30,112.14. The directors of the firm were Jerry C. Dohan, Geo. C. Beal, C. R. McKeown, A. C. Gordon, Thomas E. Good, Harry Talbot, Harry Russell, D. B. Wood, A. C. Garden and A. N. Lambert.

## TURNER AND McCARTHY

F. J. Turner, formerly with the Vancouver Insurance & Vessel Agency, Ltd., and Geo. J. McCarthy, for a number of years in the real estate department of The Canadian Financiers Trust Company of Vancouver, have opened a general brokerage office at 505 Hastings Street, Vancouver.

The title of the firm will be Turner & McCarthy Besides conducting a general insurance business it is their intention to handle realty in all its branches.

## JOHNSTON AND WARD.

An extension of the branch office system of Johnston and Ward, members of the Montreal Stock Exchange, in Ontario will take place shortly. Offices will be opened at Kingston, Toronto and London. These will be in charge of D. B. Weldon, London; Donald MacLeod, Toronto, and W. W. Anglin, Kingston. This firm's branch system has heretofore been confined to Eastern Canada with one office at St. John's, Nfld. The three new offices will make a total of nine branches.

# *The Unlisted Securities Market*

The unlisted securities as outlined in A. J. Pattison Jr. & Co's report were for the most part quoted at higher figures on more active trading. Buyers are still in the majority at present level and all dividend payers continue to steadily advance without meeting any large volume of selling. Investors show an inclination to sell bonds which show a profit and to replace the funds in the stocks bearing a higher yield.

The oil stocks rallied from the low point of the week on news of a general increase in prices. Imperial closed 115-117, International Petroleum 22¼-23, and Mutual 10-11. Massey Harris under strong demand moved up to 54 bid without changing hands. This issue appears to be headed for materially higher figures. Cockshutt Plow was offered in large blocks in a market bare of bids, easing 2 points to 46-49 without creating interest. Holders of Massey Harris, save in exceptional cases are not interested in disposing of their holdings at anywhere near present levels, with the result that quotations change 4 or 5 points without any stock coming out while Cockshutt Plow appears to be under steady liquidation by English shareholders. The demand for Westinghouse moved this issue to 115 bid, a rise of 4 points without bringing out stock. Gunns Preferred. which lacks any kind of support, was offered down to 58—no bid was obtainable. Durant Motors were quite active at 9¾-10½. Alberta Pacific Grain Preferred lost a point to $4.88 while the Common widened slightly to 103-112½. Cuban Canadian sugar Preferred gained 7 points to 30 bid on rumors of the improved position of the company, which it is stated has now turned the corner. Mattagami Debentures gained 5 points for the week to 40 bid, with none offered. Whalen Debentures made their appearance for the first time in weeks, being offered at 65. Home and Sterling Bank were both in demand in a market practically bare of offerings.

## NEW LIFE COMPANY MAKES START

### First Annual Meeting Held in Hamilton Last Week—Sixty Thousand in Cash Paid.

The first shareholders' meeting of the Commonwealth Life and Accident Insurance Company was held on June 25 in Hamilton. The following were elected directors of the company: W. H. Wardrope, K.C., Hamilton; Hon. F. C. Biggs, Dundas; Thos. McFarland, London, (Pres. and Gen. Mgr. D. S. Perrin Co.); C. J. Parker, Mayor of Brantford; W. D. Euler, M.P., Kitchener; Lt.-Col. W. D. Price, M.P.P., Toronto; Col. F. C. McCordick, St. Catharines; Capt. Geo. J. Guy Hamilton; Geo. C. Coppley, Mayor of Hamilton; Wm. Hunter, Hamilton; A. C. Garden, Hamilton; Walder Parke, Hamilton; J. P. Whelan, Hamilton; J. W. Gillies, Hamilton; F. G. Malloch, Hamilton.

P. Whelan, Hamilton; F. G. Malloch, Hamilton.

At a directors' meeting held later, Wm. Wardrope, K.C., was elected president of the company; George C. Coppley, Capt. George J. Guy, and Wm. Hunter, vice-presidents; Wm. Hunter, who has carried through the organization of this new company, will be the managing director.

Mr. Hunter stated that $350,000 of stock had been subscribed, and $61,400 in cash paid in.

## NUKOL PROMOTERS GUILTY

After seventeen days of actual trial seventy-two witnesses heard and about 250 exhibits filed as evidence, the Ontario courts have found Hiram F. Slater and his son-in-law, J. L. Thompson, guilty of conspiracy to defraud the public and stealing and receiving about $400,000 in connection with the Nukol Fuel Company.

## NESBITT, THOMSON AND CO.

Nesbitt, Thomson & Co., investment bankers, have opened a branch office of the firm at Winnipeg, in charge of A. H. Gilmour. This makes the fourth outside office established, the others being at Toronto, Hamilton and London.

## ONTARIO INCOME ASSESSMENTS

### City of Ottawa Enforces Collection of Tax on Special Dividend

The Ontario Railway and Municipal Board on February 7th delivered judgment in the appeal by the City of Ottawa from the Carleton County court, to decide the provincial income assessment of the Toronto General Trusts Corpration, a shareholder in the Hawkesbury Lumber Co. Prior to 30th September, 1916, the Hawkesbury Co. had accumulated a surplus of $1,791,917, out of earnings. This surplus had been and was used as working capital. At a shareholders' meeting on December 15th, 1920, a dividend of 875 per cent. was declared out of that surplus, payable on 22nd December to shareholders of record. The shareholders were requested to invest their chequs in Victory Bonds, hld by the company, five out of the seven shareholders doing so.

### Dividend Not Reported.

The respondents made returns to the assessment commissioner for Ottawa in 1921, in conformity with the provisions of sec. 11. (2) of the Assessment Act, stating the amount of income actually received during 1920—the income of the said several respondents not being exclusively salary or other fixed amount capable of being estimated for the then current year 1921; but none of these returns contained any entry of the dividends received by the respondents from the Hawkesbury Co. The amounts received by them from the company as aforesaid were, however, added to the incomes stated by them and they were assessed accordingly. They appealed unsuccessfully to the Court of Revision; but upon a further appeal to the county court judge, their assessments were reduced by the amounts received from the company. The city then appealed to the board.

### Definition of Income.

The chairman reoerred to the definition of "income" in sec. 2 (e) of the Assessment Act; and said that in the contingency provided for by sec. II. (2) it was not necessary that a dividend should be surely payable in 1921 in order that resor might properly be had to the amount of income received in a given case during the year ending on the 31st December then last past. In a given case where the income is not a salary or other fixed amount capable of being estimated for the current year—which was the case here—automatically the substantive provision of sec. II. (2) is applicable, and the income for assessment purposes for the current year is ascertained a sthere provided. The sense in which "annual" is used in the definition of "income" (sec. 2 (e) ), in itis application here, is "completed in a year"—a year being the fiscal period the revenue received during which, or a sum not less, is imputable to that year as income for the purposes of the act. That revenue having been received for the year ending on the 31st December, 1920, it, or a sum not less, might properly be adopted, in the circumstances of these cases, as the assesable income for the current year.

The board wa also of opinion that the dividends in question were not capital, but income and assessable as such.

## PAPER PLANT SOLD

A sale has been effected of the assets of the Western Canada Pulp & Paper Company, Limited, comprising its Port Mellon plant and timber limits.

Following judgment entered against the company by the Chartered Trust and Executor Company on debenture bonds of $1,000,000, a sale was directed by Justice Macdonald. This was to have taken place in the office of the registrar of the Supreme Court but an offer acceptable to the bondholders had previously been made. The exact nature of the offer is not disclosed other than that it is sufficient to pay off creditors and has been made by a Toronto company.

## WESTERN POWER CO.

The Western Power Co. of Canada, Ltd., capitalized at $10,000,000, with head office at Vancouver, has been incorporated with an extra-Provincial charter. The company is a subsidiary of the British Columbia Electric Railway Co., and owns and operates a hydro-electric plant at Stave Lake, B.C., and furnishes power to Vancouver and the neighboring country.

They Want
what they read about

The standards of living for the average family in Canada grow higher each year. The luxuries of yesterday are the necessities of to-day. People in the smaller towns and on farms want the newer things they read about.

Dry Goods Stores, Grocers, Shoe, Hardware and Paint Stores, in the smaller towns, all find they can show the newest things by carrying small stocks of them and re-ordering by Long Distance. The jobber or manufacturer's warehouse is at their elbow — their order departments are alert for telephone trade!

Shipments are often made the same day. Up-to-dateness of merchandise is no longer confined to the big city stores — and large sums are not locked up in stock.

Try it. Have a big store in a small town. "Use the Bell to Sell" — and to Buy.

*Every Bell Telephone is a Long Distance Station*

## LIQUOR EXPORT

It is legal to transport liquor for export from Saskatchewan by automobile. The amendment to the Saskatchewan Temperance Act, which came into force on June 1, which provides that liquor must not be transported by automobile, but by common carrier, rail or water, is ultra vires of provincial legislation in so far as it refers to liquor for export. This was the unanimous decision of the Saskatchewan Court of Appeal on June 30, when it handed down judgment in the case of the Canada Drugs, Limited, vs. Attorney-General of Saskatchewan, in which a number of amendments to the Saskatchewan Temperance Act were attacked.

The Court was evenly divided on the question of restricting location of wholesale liquor export houses to cities within the province having a population of 10,000. The Court declared ultra vires the amendment requiring a return to be made prior to delivery.

The section of the Act requiring that a return be made as to kinds and quantities of liquor kept in stock was declared valid to the extent necessary for proper enforcement of the Saskatchewan Temperance Act.

**TWO THOUSAND LIFE UNDERWRITERS TO MEET IN TORONTO**

This great gathering of life men from all points in Canada and the United States, to convene in August, will be representative of the Grand Army of Life Insurance Agents who have placed nearly Fifty Billions of Life Insurance protection over Canadian and American homes. Life Insurance is the most useful commodity in the world because it represents food, clothing, shelter and education for those who without it might be hungry, naked, homeless, or ignoant. The Mutual of Canada aims to distribute this great commodity at net cost of the consumer, being among Canadian companies the only one organized on a purely mutual co-operative basis. Mutual benefits actually paid, in the aggregate amount of $37,000,000. So that the mutual has had substantial share in the beneficent work of the Canadian life companies.

Assurances in Force $235,000,000.

## INCREASE IN EMPLOYMENT

### Reports up to June 1, Show Improvement, in Conditions

According to the employment service branch of the Department of Labor, employment figures to June 1, show a continued betterment of conditions throughout the Dominion. It is stated that from the first of the year the improvement in conditions has been steadily maintained, until now there is considerably less unemployment than in June last year.

The number of employes actually at work on June 1, according to reports received from 6,352 employers, was 723,157 as against 675,421 on May 1. These figures, it was stated do not take into account the number of people employed in agricultural work throughout the Dominion.

Seansonal employment has, of course, taken care of agreat majority of the unemployed throughout tho agricultural areas and from some sections it is being repoted that there are more jobs than there are men to fill them. The iron and steel industries improved during May due to the re-opening of railway shops, lumbering industries took on more employes as also did railway maintenance, water transportation, building, and highway construction. One of the difficulties being faced, it is stated, is that of dealing with unemployed men who belong to one or another of the skilled or technical trades. In some of these lines there is no work available and the unskilled jobs which are open have no appeal.

Present indications, according to officers of the labor department, are that employment conditions will continue to show the steady improvement which has been maintained since the first of the year.

## SHOPS CLOSED DOWN.

The Grand Trunk Railway shops at Point St. Charles, Que., closed down for a week and re-opened on July 3. Nearly 7,000 workers were affected by the shut down.

## CITY OF MOOSE JAW

### Debenture Issue—$182,470.07

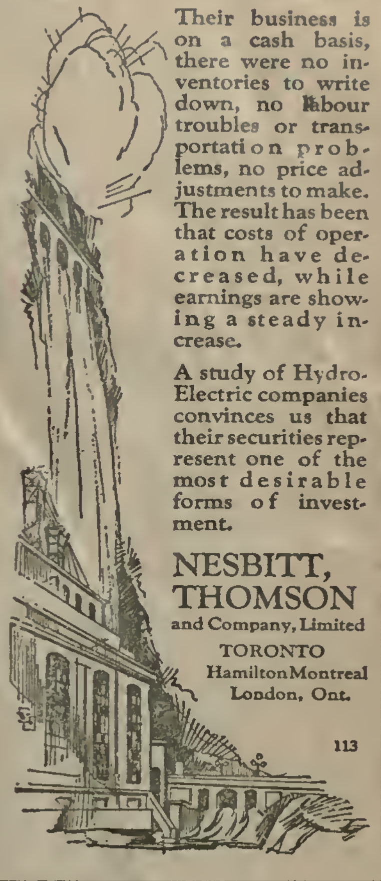
The highest or any tender not necessarily accepted.

Full particulars will be furnished on application.

W. F. DUNN, GEO. D. MACKIE,
Mayor. City Commissioner.

*Forging Ahead*

Alone practically among' industries, deflation has worked to the benefit of Water Power Companies.



Their business is on a cash basis, there were no inventories to write down, no labour troubles or transportation problems, no price adjustments to make. The result has been that costs of operation have decreased, while earnings are showing a steady increase.

A study of Hydro-Electric companies convinces us that their securities represent one of the most desirable forms of investment.

NESBITT, THOMSON

**Joint Investments**

MANY husbands and wives have long enjoyed the advantage of a joint bank account, but few realize the benefits of a joint investment.

By this system a husband may purchase securities and have them registered in such a manner that the interest is paid to him during his lifetime, but at his death the securities so registered become the property of his wife, to whom the interest is paid without reference to any subsequent or prior will that the husband may have made.

We will be pleased to answer any enquiries re this system of investing to anyone wishing to purchase outright or on our Partial Payment Plan.

# Corporation Finance

**Brazilian Traction, L. & P. Co.**—A further improvement in the earning position of the company is indicated by the report for the month of May, which shows a substantial increase both in gross and net, and a decline in operating expenses.

The gross earnings amounted to 16,093,000 milreis, as compared with 15,413,000 for the month of April and 14,962,000 for May, 1921. An important cut was made in operating expenses from 6,600,000 milreis in May, 1921 to 5,898,000 for May of this year. Net earnings at 10,195,000 milreis show an increase over the same month last year, when they amounted to 7,862,000, and represent a new high since the improvement in earnings set in, more than a year ago.

The annual meeting of the company has been called for August 3.

**Barcelona Traction, L. & P. Co.**—During the month of May there was an increase in both gross and net earnings over the corresponding month a year ago, although in both instances there was a recession from the high levels established in March and April. The net earnings, owing to continued high operating expenses, were lower than they have been since last November. The following are the earnings for May with comparison:—

| | —Pesetas— | |
|---|---|---|
| May | 1922 | 1921 |
| Gross earnings from operations | 2,654,917 | 2,862,358 |
| Operating expenses | 1,694,693 | 1,112,190 |
| net earnings | 1,960,224 | 1,750,168 |

**Durant Motors of Canada, Ltd.**—The first financial statement of the company, covering the operations for the two months period ending April 30 last, indicates that the company has closed a satisfactory amount of business within the limited period of operation. The plant opened on March 1, and in the period of two months total revenuė from the sale of cars and parts, with receipts from other operations, amounted to $652,944. "In view of the many obstacles," President W. C. Durant points out, "which have to be met in the placing of a new car on the market, your directors regard this result as most satisfactory." Total receipts, including earnings and receipts from stock sales, amounted to $2,104,778. Disbursements include: Land and buildings, $45,011; machinery and equipment, $149,762; expenses of organization, $261,597; materials and supplies, $596,543; labor, power etc., $306,817, and cash on hand at April 30, $741,783.

President Durant states that the Leaside plant of the company is working to capacity, turning out 4-cylinder cars in all closed and open models. Arrangements are well under way for the manufacture of the new Star car, but to do this it will be necessary to build an addition to the present plant, as it is now taxed to capacity.

**Winnipeg Electric Ry. Co.**—Although the gross earnings during May were slightly lower than for the same month last year, this was offset by a decrease in operating expenses. Net earnings show a slight increase over May, 1921. The following is a comparison of earnings for May:

| | May, 1922 | 1921 |
|---|---|---|
| Gross earnings | $436,619 | $447,180 |
| Operating Expenses and taxes | 321,268 | 332,144 |

x Decrease

**Canadian Pacific Railway Co.**—As was indicated in the weekly reports of earnings, the company during the month of May suffered another decline in both gross and net earnings, while working expenses, for the first time since January, 1921, are shown at an increase. These features naturally cause a sharp decrease in net earnings. The showing in this respect is, in fact, only slightly better than that of April, when net was down by $1,007,358. The latter decline was the greatest since July, 1920, when the month's expenses included provision for the estimated increase under the new wage award of that date. Net earings for May, 1922, were $2,344,513, as compared with $3,293,551 for May, 1921. As is usual for the month under review, the net was greater than that for April, which was only $1,548,772.

While net earnings for the month were the second largest this year, the result was the poorest for any month of May in over ten years.

Gross earnings were $13,664,245, a decrease of $227,799 from the previous May. Working expenses, at $11,319,732, are up $721,238.

Net profits for the five months of this year are $7,451,757, a decrease of $2,393,650. This decrease was accounted for chiefly by the poor results of April and May, the first three months having been fairly promising. Gross earnings for the five months were $62,484,911.

**Southern Canada Power Co.**—During the month of May there was an increase in both gross and net earnings, as compared with the same month in 1921. The following are the gross and net earnings for May with comparison:

| | May, 1922. | 1921. |
|---|---|---|
| Gross earnings | $65,664 | $59,835 |
| Op. exp. and purchased power | 31,787 | 29,559 |
| Net earnings | $33,877 | $30,276 |

**Maritime Telegraph & Telephone Co.**—The gross earnings for the month of April amounted to $119,944, and after operating expenses were deducted there remained $29,093 for net earnings for interest. Deduction of bond interest left the surplus at $15,760.

**Saguenay Pulp & Power Co.**—The annual report for the year ended December 31, 1921, presented at the annual meeting of the shareholders on June 29, shows some rather drastic changes as compared with the previous year.

Gross profits are down from $8,984,238 to $5,882,138, and expenses show a decrease from $4,891,885 to $3,172,915. After various charges and adjustments, the total income shows a decline from $3,818,353 to $2,433,073. After interest, depletion reserve and inventory write-off, the later not appearing upon last year's report, and amounting to $528,652, net profits amounted to $64,981, as compared with $1,368,373 during 1920, before provision for income taxes in both cases.

As indicated in the balance sheet at the end of 1921, there was a surplus of current liabilities over current assets of $913,669, as compared with net working capital at the end of 1920 amounting to $1,060,450.

The figures compare as follows:—

| | 1921 | 1920. |
|---|---|---|
| Current asets .......... | $1,663,513 | $5,185,977 |
| Current liabilities ...... | 2,577,182 | 4,125,527 |
| Excess liabs. .......... | $ 913,669 | *$1,060,450 |

---

*Net working capital.

The balance sheet shows that property account is down at $20,017,073, against $21,105,740; investments are sharply higher at $342,060, against $9,190; sinking funds are off at $309,579, against $461,047. Accounts receivable are higher at $588,233, against $317,933; inventory of stores off at $1,058,149, against $1,191,095; inventories of wood, $4,464,574, against $2,441,952. Reserves are off to $95,289 from $1,583,523, while capital surplus is $353,304 against $115,209. Against a deficit of $34,247 carried under assets in 1920, there is a surplus of $1,676,890 carried under the contra account of 1920. Notes payable are up at $854,342, against $93,230; accounts payable up at $1,266,283, against $658,000; bond interest accrual is $254,531, against $262,179. Total assets stand at $27,151,471, against $27,045,477 in 1920.

In his address to shareholders, Hon. F. L. Beique, president, said:—"This result is not quite up to our expectations, as contained in our last annual report, but is very satisfactory when bearing in mind the unexpected slump which took place early last year in the price of pulp and paper, and obtaining to this date. It was only by reason of advanced contracts made in 1920 with a number of English purchasers, and under which, during the season of navigation of 1921, over 600,000 tons of ground wood pulp were delivered at a price of $62.50 per short ton, f.o.b. mill that the company is able to make such a good showing.

**Schumacher Gold Mines, Ltd.**—At the special general meeting on June 30, the shareholders unanimously ratified the action of the directors in entering into an option agreement with the Hollinger Consolidated Gold Mines, Ltd.

The shareholders carried a by-law providing for the payment on account of capital amongst shareholders. In this connection President Schumacher stated that in the event of the option being exercised the monies paid by the Hollinger Company from time to time would be distributed among the shareholders as they were received.

The deposit of $165,000 which has already been paid by Hollinger will be forfeited if the $300,000 payment due about July 15 next is not paid. President Schumacher stated, and further pointed out that if such $300,000 payment is made the Hollinger Company agrees to enter into a firm contract to purchase and pay the balance as provided in the option agreement.

**Nova Scotia Tramways & Power Co.**—Although gross earnings for the month of May show a slight decrease from the same month last year, this is offset by a large reduction in operating expenses. The following is the earnings for May, as compared with the same month last year:

| | Month of May | |
|---|---|---|
| | 1922. | 1921 |
| Gross earnings .......... | $108,033 | $109,238 |
| Operating exp. and taxes .. | 84,545 | 108,383 |
| Net for interest, etc. ...... | 23,488 | 855 |
| Int. and sinking fund ...... | 17,724 | 17,061 |
| Surplus .............. | $5,755 | $16,206 |

## Annual Meetings

**Hudson's Bay Co.**—The annual meeting of the shareholders of the Hudson's Bay Company was held on June 30 in London, and cabled reports received at the Winnipeg offices of the company outlined the address of the governor of the company, Sir Robert M. Kindersley.

Sir Robert stated that interest receipts for the fiscal year were down £48,000, due to much lower rates and absence of large sums of money held in suspense pending taxation settlements. There was some decrease in land taxes, and expenses of land administration were down $32,000 due to smaller sales. The sum of £28,000 was added to the capital reserve, making the total £339,000. The net surplus on land account was £70,000, but, by reducing "carry forward," a distribution of £100,000 on land account (being 10 per cent., as against 15 per cent. last year) was made possible. Owing to liquidation of business with foreign governments, credits were down over £100,000. The capital invested in the fur trade, Sir Robert reported, was £1,770,000, as against £1,509,000 in the previous year, and in stores and other trading £3,260,000, as against £4,185,000. Prices for fresh furs had been well maintained and profits were satisfactory. The company was operating 195 principal fur trade posts.

During the year a separate company was formed for an experiment with reindeer, and 550 animals had been successfully transported from Norway to Baffin's Land.

Land department results might be considered disappointing, said the Governor, but it was considered useless to press sales of land when there was little or no demand. Farm land sales were the lowest since 1910.

There was encouragement in the promise of the 1922 crop. The company's stores had operated at a loss, which, it was said, was not surprising considering the general conditions not only in Canada, but throughout the world.

"Canada's real prosperity," said Sir Robert, "always has depended, and must depend, upon her crop, and the well-being of her agricultural communities. Disturbance of economic conditions due to the war is being gradually adjusted. Recovery is necessarily slow, but there are no grounds to suppose that the recent check to the prosperity of Canada is anything but temporary."

The Governor held out no extravagant hopes for stores operations this year, as results were disappointing to the present, but a good crop should give a great impetus to general trading.

## When You Are Among Those "Next of Kin"

When a man dies without leaving a will, the members of his family find themselves in much confusion;—What is to be done about the business? How are these securities to be divided?

If that happens to you, or to any friend of yours, remember that the shortest cut out of the confusion, is a petition to the Court for the appointment of

**The Canada Permanent Trust Co.**

as administrator of the estate. A prompt settlement follows,—as equitable to all parties as the law permits.

The fact remains, however, that no settlement of an unwilled estate can ever be satisfactory to everybody. Someone will have a lifetime of thinking,—"I know Father would have planned things so differently."

The only way is to make your will, naming as your Executor

**The Canada Permanent Trust Co.**

Your family is then assured smoothness of settlement, security in your estate, and that just division which only you can make.

# Railway Appeal Before Privy Council

### Case for Railways Opened on Monday by Sir John Simon—Absence of Profit Does not Mean that Shares are Without Value, He Urges

The appeal of the Grand Trunk Railway against the decision of the Arbitration Board regarding the value of the preference and common stocks of the railway, opened before the Privy Council in London on July 10. The appeal was heard by Lord Birkenhead, the Lord Chancellor, and Lords Shaw, Cave, Parmoor and Carson. There was a big array of counsel, led by Sir John Simon, representing the company, and A. C. Clauson, K.C., assisted by E. L. Newcombe, K.C., Deputy Minister of Justice, and W. N. Tilley, K.C., on behalf of the Canadian Government. The general audience included Sir A. W. Smithers, Chairman of the Grand Trunk Railway.

#### Argument for Company

Sir John Simon then began the long argument on behalf of the company, their Lordships diligently following his direction to passages in evidence and the judgements in connection with the arbitration. The proceedings, as is usual in the Privy Council, were carried on in semi-conversational style between their Lordships and counsel, their remarks being almost inaudible to the others in the chamber.

Sir John Simon's first point which seemed to arouse their Lordships' especial attention was that 1,700 miles of the Grand Trunk Railway lay in the United States, with 67 per cent., of the revenue governed by what might be called the American system, which was important in considering the judgement of William Howard Taft, the company's representative on the Arbitration Board. Counsel for the railway proceeded to urge that the majority of the tribunal went wrong in matters of law, firstly, holding a certain class of evidence inadmissible. He said that the judgement of Sir Walter Cassels was found to rely upon, and make much of, material which was never admitted as evidence before the Board of Arbitration. In fact, said Sir John, when referred to before the tribunal, it was declared not to be evidence at all.

#### Evidence Inadmissible

Continuing, counsel for the company submitted that Sir Thomas White, the other member of the Arbitration Board, took the view that certain evidence was inadmissible because the railway was being acquired as a going concern, and there was no evidence that the Grand Trunk directors ever contemplated disposing of the line in any other manner. Therefore, evidence concerning what any portion might be worth on any other basis was inadmissible.

Sir John said: "What I would submit is that there is a minimum value below which you cannot go. Even assuming the Grand Trunk had no dividend prospects, yet there might be portions of property which it would be possible to sell.'

Lord Shaw suggested that if any railway came into a receiver's hands who convinced himself that it could not be run at a profit, it would be his duty to fix the value of the whole concern at once.

Sir John Simon submitted that it was fundamentally wrong to assert that shares, even in a concern with no prospect of making a profit, were worth nothing for the company's assets, nevertheless, might be exceedingly valuable.

#### Capital Value.

Later Lord Shaw remarked that Sir Thomas White, in his judgment, seemed to have considered the question of potential earnings, and yet would not allow the question of capital value to enter in. His Lordship expressed himself as a little puzzled on this point.

Sir John Simon said Sir Thomas appeared to hold that unless it was established that the owners really contemplated selling he refused to consider what the railway could sell for.

For a couple of hours their Lordships listened to Sir John Simon reading the judgment of Mr. Taft, making running comments thereon. When counsel came to discuss the Drayton report of 1917, he admitted frankly, "at that time the Grand Trunk interests were best served by inducing the Canadian Government to believe that the company was on the point of insolvency. The company went to the Government in the character of paupers to get assistance." Sir John's complaint, however, was that, while this matter was ruled out before the arbitrators, a great portion of the judgment given by Sir Walter Cassels was based expressly upon it.

Lord Carson remarked that in an arbitration of this kind strict rules of evidence were not always applied, the arbitrators being given a certain amount of liberty, such as considering reports issued some time previously.

#### Tuesday's Session

Sir John Simon concluded his address on July 11, when the hearing was resumed. He was followed by the junior counsel, who elaborated some of the points made by his leader.

A. C. Clauson, K.C., in opening the case for the Dominion Government, said the latter's standpoint was that the financial interest of the shareholders in the concern was now very trifling, but the Government offered readily to provide four per cent. on twelve and a half millions, which, it claimed, was more than ample to repay the shareholders' equity of redemption. Counsel reminded their Lordships that a dividend had never been declared on the common stock of the company.

"I don't think anyone was ever bold enough to prophesy that one ever could have been declared," added Government counsel.

Adjournment was taken until Thursday, when W. N. Tilley was to support the Government's case.

---

## WILL COMPLETE YUKON ROAD

### Legislature Made Appropriation at Session Just Ended—Overland Trail to be Diverted

The Yukon Legislature on June 14 prorogued its 1922 session which lasted three weeks. The House adopted an appropriation for completion of the Keno to Mayo road over which much valuable ore from the new silver camp will be hauled to the sea. It also voted to finance the scheme under which the great overland trail will be diverted northward from Minto on the Yukon River in such a way that it will serve both Dawson City and Mayo Camp, with a junction near the confluence of the Stewart and Crooked Rivers.

#### Change Winter Highway

As a result, the winter highway into Dawson City will traverse the Upper Klondyke Valley instead of the old placer creeks of Quartz, Bananza and Eldorado. By this route the distance to Dawson is increased five miles, but the grades are easier.

The executive council will memorialize the Government to build a dam at the head of the Yukon River in order to overcome the difficulties caused by shallow water at the head of Lake Labarge. The council has also asked the Ottawa Government to install a telegraph service this year between the Yukon main line and Mayo Camp, which at present is without telegraph service, but boasts about one-third of Yukon's population.

J. T. Phelan, Ottawa, superintendent of the Yukon and British Columbia Federal Telegraph Service, is now investigating this proposed branch line. He left for Vancouver recently and is prepared to submit estimates of the cost of the suggested branch line.

---

## VESSELS TO BE SOLD

### Canadian Government Plans to Reduce Merchant Marine—May Also Write Down Capital Cost

The disposal of the vessels of the Canadian Government Merchant Marine fleet, recommended by the management to be tied up and sold as opportunity offered, will, it is expected, be one of the first problems to confront the new board when it takes office. The C.G.M.M. steamers are administered by the Board of Management of the Canadian National Railways, though they are operated as a separate corporation. The new board of management, to administer all the Government lines will, it is expected, be named shortly. The selection of a chairman is understood to be under consideration at the present time, and the members of the board to administer the railways will likely be named as soon as the chairman is decided upon.

The C.G.M.M. fleet is managed from Montreal and the head offices of the board are in Toronto. Under present conditions it is not thought likely that any attempt will be made by the present board to find a market for the vessels which are to be sold, but rather that the incoming board will find ships on its hands.

The vessels which have been recommended to be disposed of have been tied up at the wharves as fast as they finished the voyage they were on when the fiscal year ended, it is learned. Some of them are still on the ocean, but will be tied up on their arrival in their home ports.

#### Vessels to Be Sold

The list of vessels recommended to be sold is as follows: Canadian Warrior, Recruit, Trader, Sailor, Signaller, Adventurer, Gunner, Aviator. Sower, Settler, Raider, Farmer, Miner, Beaver. Observer, Trapper, Hunter, Rancher, Rover, Sealer, Coaster, Harvester, Pathfinder, Engineer and Logger, and the three vessels, the Thos. J. Drummond, Sheba, and J. A. McKee, which were transferred from the Department of Marine and Canals to the C.G.M.M. fleet on April 1, 1920.

Of the remainder of the fleet of 66 ships, the Canadian Exporter came to grief in the Pacific Ocean and the Commander went ashore near Platte Point, on Little Miquelon Island on July 3. If the latter vessel is again placed in commission the C.G.M.M. fleet will total 37 vessels. The Canadian Recruit, which was included in the list of vessels recommended for disposal, was rammed by the steamer Maskinonge, while lying at anchor in the St. Lawrence, and was abandoned to the underwriters. The loss on her was stated to be covered by insurance.

#### Reduce Capital Cost

The board of management also recommended that the capital cost of the vessels be reduced to what might be considered present replacement value. At the end of the last fiscal year, it was estimated that the average replacement value of the vessels would be $75 per ton. The average cost of the vessels was $191 per deadweight ton. A further recommendation for the Government and the new board to consider was that interest due the Government "be payable for each year only if earned, after allowing for depreciation. Such remission of interest to be applicable for a period of five years."

The third annual report of the C.G.M.M. Ltd, showed a deficit after all charges, including depreciation and interest, of $8,047,635.06.

---

## COPPER MINING ACTIVE

Copper shipments to the Atlantic refineries from British Columbia continue to be above 1,200 tons per month, and the advance in price, together with the increased demand, has brought the copper mining industry to the front again. Domestic manufacturing activity has increased to the point where the big brass mills must have larger quantities of copper with which to fill current requirements.

## OPERATION OF STAMP TAXES

### Arrangements Regarding Licenses and Security of Embossed Cheques Announced by Customs Department.

Information regarding the method of collecting the new stamp taxes which become effective on August 1, is contained in a circular issued on July 11, by the Department of Customs and Excise. The circular brings up twenty four points."

Clause 2 relates to the application for a license: "There shall be forwarded with the application for a license a requisition (Form E., 159) for the numbers of the embossed cheques required by the licensee, together with a certified cheque, by way of deposit, payable to the Receiver-General for an amount equivalent to the estimated tax as per assertions 1 (A) and 1 (C) on application for license plus 25 per cent. The commissioner may at any time require a larger deposit."

**Embossed Cheques**

Cheques will be embossed and issued to a licensee subject to certain conditions, most of which are as follows: "A licensee shall keep an account in which shall be entered at the time each cheque is drawn, particulars of the cheque, showing the serial number, the date of issue, the amount and the sum due as the excise tax thereon. A separate account shall be kept for each bank or each branch of a bank on which the licensee draws cheques. On or before the fifth day of each month, the licensee shall forward through the Collector of Customs and Excise at the port through which the license was obtained to the commissioner the account or accounts, as the case may be, for the preceding month, verified by the statutory declaration of the licensee, and accompanied by a certified cheque, payable to the Receiver-General, for the total sum of tax shown as accrued by said account or accounts; and all bank statements of cheques debited to the licensee's account and all relevant books of account of the licensee shall be open to inspection and audit for the purpose of these regulations, by officers of the Department of Customs and Excise, and such audit shall be made by officers of the department at such times as are deemed necessary.

"Each embossed cheque shall have printed or lithographed on it in a prominent manner, the name of the licensee, the number of the license and the name of the bank on which the cheque is to be drawn; and no person other than the licensee whose name is so printed or lithographed shall draw such cheque, and no bank shall pay an embossed cheque drawn by any person other than the licensee whose name is so printed or lithographed, or on which the license number does not appear.

**Cancelling License**

"In the event of a licensee abandoning his license, there may be repaid to him the amount of his deposit in excess of the amount payable in respect of the stamp tax on all embossed cheques issued by him, less the cost of embossing and transportation of that portion of unused cheques remaining on hand, and the unused cheques must be retured to the commissioner. If a license is cancelled for a violation of any of the provisions of the Special War Revenue Act and amendments, or of these regulations, or for any other reason, no portion of the deposit will be paid to the licensee, and he shall be liable for any further amount payable by him in respect of stamp tax on embossed cheques which he has issued, and he shall return to the commissioner all unissued embossed cheques.

**Blank Cheques**

"The blank cheques must be forwarded to the American Bank Note Company, Ottawa, who must be advised by the shipper as to the quantity and description of the blank cheques in the consignment, the outer covering of the parcel being also marked to indicate the name and address of the shipper. Packages, the gross weight of which exceeds 90 pounds, if shipped from Montreal; 60 pounds if shipped from Toronto, or 40 pounds if shipped from Winnipeg, must be forwarded by freight. Under these weights shipment must be made by express. From each of the three places mentioned the parcels are to be forwarded by Canadian Government Railways or Canadian National Express (as the case may be), charges collect."

In this connection it is pointed out that there will be no expense to the licensee for the embossing itself, provided all the conditions stipulated in the circular are complied with.

Clause 24 refers to the conditions of refund: "Refund of excise tax may be allowed on embossed cheques returned to the department, when it is established to the satisfaction of the commissioner that the cheques, although drawn, were for some valid reason, never negotiated, but on which the excise tax has been paid. Minimum amount of tax for which a refund will be allowed under this section shall be $5."

---

## DISCUSS TARIFF AND WATERWAYS

### Premier and Other Members of Cabinet Now In Washington—Statement Looked For on Their Return

**(Special to The Monetary Times)**

Ottawa, July 12,—The departure this week of the Prime Minister and another member of his cabinet for Washington has aroused much speculation as to the object of their visit. The announcement came from Washington that it had to do with the international deep waterways scheme and with the tariff; and there is considerable reason to believe that those announcements were more or less officially inspired. So far as the administration here is concerned, it is believed that the announcement was not unsatisfactory to it, and covered pretty accurately what will actually be discussed.

It is realized here that a very pronounced change has come over the political situation in the United States with regard to the attitude towards Canada on the tariff. The domestic situation there has been altering, and the fact that there was practically no hint in our recent budget at reprisals has had its effect on American sentiment.

It is not likely that there will be any immediate action on either side of the line, but it is believed that the Canadian ministers went to Washington on invitation to discuss the general situation. While nothing official has been given out here at all, there is an intimation that a statement will be made on their return, and it will be waited with interest, although it may be nothing very enlightening.

An interesting feature of the Railway Commission's recent order reducing rates on basic commodities by 7½ per cent, is the comparison it makes between rates in Canada and those in the United States, and from which the conclusion is drawn that freight rates are substantially lower in this country than they are across the line. As the subject is of importance it will be of interest to know the reasons advanced for this view. The Commmission says:

"Two or three years ago, and before the general increase in rates in the United States authorized by the Interstate Commission, effective August, 1920, a careful comparison between the level of freight rates was made in Canada and the United States, which showed, having regard to all controlling conditions, that the general level was slightly in favor of the Canadian shippper."

"Freight rates in Canada were not increased during the first four years of the war, but in 1918 and 1920 it was necessary not only in Canada, but in other countries as well, to materially increase freight rates, so as to enable the privately owned railways, but not in full measure, to meet their advancing operating costs, which had increased by leaps and bounds and in a manner entirely without precedent or parallel. The wage increase in 1918 and 1920, coupled with the increased cost of coal and other materials and supplies, resulted in such increases in operating costs that a substantial increase in freight rates was inevitable."

**Wage Advances**

"Notwithstanding that the employees of the Canadian railways were granted increases in wages equal to those in the United States and that increased costs and war conditions bore more heavily upon railway conditions in Canada than in the United States, the increase in rates as authorized by this Board did not hear as heavily on the Canadian public as the increase authorized in the United States by the Interstate Commerce Commission."

"These general increases, commonly known as the Forty per cent increases, although in fact they averaged appreciably under that figure, became effective in the United States on the 26th of August 1920, and in Canada on the 13th of September, 1920. There has been no general decrease in the freight rates authorized in the United States since August 26, 1920, although there will be a general decrease of 10 per cent effective July 1, 1922. On the other hand, the increased rates effective September 13, 1920, were subject to a general decrease of 5 per cent. January 1, 1921, and a further general decrease of 10 per cent, December 1, 1921."

**Comparison of Rates**

It is then pointed out that in the case of a rate of 100 lbs, both in Canada and the United States, the average rate was $1.25 in Eastern Canada in December, 1921, and $1.20 in the West; whereas in the United States, under the 10 per cent decrease effective July 1st., the rate on the eastern group of roads was $1.26, on the western group, $1.21½; on the southern, Mountain and Pacific groups, $1.12½ and on interterritorial traffic $1,20.

In Canada the railways in September, 1920, were forbidden to increase rates on crushed stone, sand and gravel, while a limitation was also placed on the increase in the rates on coal; charges for switching, interswitching, milling-in-transit, diversion, re-consignment, stop-overs, demurrage, weighing etc.

The opinion of the Commission then proceeds; "In the United States there was no similar limitation with respect to rates on crushed stone, sand, gravel and coal, and they were subject to the same percentage increases as authorized for other traffic; further, the percentage increase appliable in the group where the service is performed was made in the charges for switching, transit arrangements weighing, diversion, reconsignment, lighterage, floatage, storage (not including track storage) and transfer, while no increases for these services was allowed in Canada."

The Commission then proceeds to show how this works out with respect to coal. Under the increase authorized in the latter part of 1920 both in Canada and the United States, the charges in two countries became as follows;

In the United States a rate of 80c per ton became 112c. in the west, 108 in the east and 100c in the southern and mountain-pacific group. In Canada it became 90c.

In the United States a rate of 150c. per ton became 210c. in the east, 203c. in the west and 188c. in the south and mountain-pacific group. In Canada it became 165c.

In the United States a rate of 300c. per ton became 420c. in the east, 405c. in the west and 375 in the south and mountain-pacific group. In Canada it became 320c.

**Rates on Coal**

Under the reduction in rates in the United States effective July 1st, the situation with respect to coal will be as follows; Where the rate prior to 1920 was 80c per ton it now becomes 101c in the east, 97c in the West and 90c in the southern and mountain-pacific group. In Canada after August 1st the rate on anthracite will be 90c and 80c on other coal.

In the United States where the rate before the 1920 increase was 150c per ton, it will be 189c in the east, 182c in the west and 169c in the southern, mountain-pacific group. In Canada the rate on anthracite after August 1st, will be 169c, and 150c, on all other coal.

In the United States where the rate prior to the 1920 increase was 50c per ton it now becomes 378c in the east, 365c in the west and 338c in the southern Mountain-Pacific group. In Canada after August 1st the rate on anthracite will be 320c and 300c on all other coal.

"Subsequent to the general increase in 1920, there have been a number of substantial reductions in Canada between various points on different commodities. In Canada, among the more important reductions made by the railways, were the grain rates from Fort William and Lake ports to the Atlantic seaboard and Eastern Canada; on live stock on which a reduction of approximately 25 per cent, was made in July, 1921, from the rates effective September, 1920, on hay in Eastern Canada; on lumber from the Pacific coast to eastern points on wool and hides from western to eastern points, etc., etc."

In the United States a reduction in carload rates on grain, grain products and hay in western and Mountain-Pacific groups became effective in January, 1922; rates on livestock in the same groups in excess of 50 cents per 100 lbs. were reduced 20 per cent, but not below 50 cents in October, 1921; and carload rates upon products of the farm, garden, orchard and ranch were reduced 10 per cent. in January, 1922. These are the only three instances where reductions were made covering the entire country, or the whole of any one or more rate groups, since the increases of 1920 became effective. These rates are not further reduced in the United States July 1, 1922.

# Notes on Municipal Accounting

### Business of a Municipality is Much Similar to That of a Financial Concern, and Should be Transacted With Same Regard for Efficient System of Accounting.

**By J. A. Grant, C.A., of P. S. Ross and Sons, Montreal.**

(From an address before the Sherbrooke Convention of the Union of Municipalities).

Accounting as it should be applied in every kind of business, while covering the legal requirements, also has the function of producing complete and reliable information regarding all business transactions, as well as permitting the setting forth of the results of such transactions promptly, clearly and concisely. In order that this may be accomplished it is necessary that definite methods should be employed that will locate responsibility for waste, inefficiency and infidelity.

It is an axiom accepted by the business world that no corporation can be successfully carried on without proper and adequate accounting methods. This can be applied with equal force to the conduct of municipal affairs, particularly in view of the close analogy between the conditions and methods pertaining to each. Municipal councillors being the custodians of funds belonging to the ratepayers, should their administration of same be wasteful and extravagant, each individual ratepayer suffers and is impoverished to the extent of his share of such waste and extravagance.

#### Would Avoid Defaults

Numerous cases are brought to light from time to time wherein municipal employees have proven unfaithful to their trust with resultant loss to the taxpayers. In the practice of our profession we have encountered cases of this kind, in every one of which proper accounting methods would have made it extremely difficult, if not impossible, for the employee to have become a defaulter, with a consequent saving of the town's money as well as his own character and reputation.

Municipalities rarely conduct their operations for the purpose of obtaining profit, as they are supposed to render all services to the citizens at cost. This being the case in dealing with municipal accounts the terms "Profit and Loss" or "Surplus Accounts," should be eliminated, and replaced by "Capital" or "Appropriation Accounts."

Before proceeding further, it would be well to dwell at some length on the following points of resemblance between financial corporations and municipalities.

#### The Private Corporation

1. Powers—determined by the State in charter or general law.
2. Beneficiaries—called shareholders.
3. Board—elected by beneficiaries.
4. Officers—elected by beneficiaries or board.
5. Electors—voting trust or shareholders.
6. Capital—raised by borrowing or by voluntary contribution. (Subscription).
7. Current revenues—by direct charge for specific services to individuals sufficient to pay cost and a profit to the corporation.
8. Problem of board management—to determine policy, rates to be charged for service, and distribution of benefits (to shareholders).
9. Problem of executive management—to execute policies, direct the work, to use the organization, equipment, and funds with greatest economy and efficiency, and to protect the properties, stores, and treasury from loss or impairment.
10. Limitations placed on executive management—strict accountability.
11. Distribution of benefits to shareholders—in the form of dividends, i.e., the appointment of the net profits or margin above cost included in prices charged for service.

#### The Municipal Corporation

1. Powers—determined by the State in charter or general law.
2. Beneficiaries—called citizens.
3. Board—elected by beneficiaries.
4. Officers—elected by beneficiaries or board.
5. Electors—voting trust or electorate.
6. Capital—raised by borrowing or by voluntary contribution. (Taxation).
7. Current revenues—by direct charge for specific services to individuals or indirect charge by levy to pay cost of service to community.
8. Problem of board management—to determine policy, rates to be charged for service, and distribution of benefits (to citizens).
9. Problem of executive management—to execute policies, direct the work, to use the organization, equipment, and funds with greatest economy and efficiency, and to protect the properties, stores, and treasury from loss or impairment.
10. Limitations placed on executive management—appropriations and strict accountability.
11. Distribution of benefits to citizens—in the form of services at cost, and reduction of taxes.

I am strongly of the opinion that the annual statements published by the average municipality contain both too much and too little information. It seems to be the custom in a great many places to include in the printed statement a mass of petty details that are only of interest to the individuals concerned in these small transactions, information that is of no particular value to the citizens generally.

There should be three clear, comprehensive and business-like statements prepared, viz.:

1. Cash statement showing receipts and disbursements under general headings.
2. Statement of income and expenditure.
3. Assets and liabilities.

#### Cash Statement

Most municipalities are content at the present time with issuing a cash statement only, which, as I have already remarked, includes altogether too much detail. It should be sufficient to state the total amount of expenditures in each department under the department heads, such as fire, light and police, health, roads, etc.

Care should be taken in the preparation of the income and expenditure statement to show income and expenditure as regards capital and revenue separately. For example, a municipality has, as a general rule, a certain amount of expenditure for the maintenance and upkeep of roads, sewers, walks, etc., which naturally would appear in the revenue portion of the statement. Expenditure for the construction of new roads, walks or sewers should appear under the heading of capital expenditure. In no case should these expenditures be merged in the municipality's statements.

The position of any municipality cannot be clearly set forth without the preparation of an assets and liabilities statement wherein the current and fixed assets are clearly shown, against which are set the municipality's liability for bonded or other indebtedness and its net worth shown in the capital or surplus account.

The preparation of such statements is very easily accomplished when the municipality's books are kept along proper lines.

#### Safeguarding Funds

We now come to the question of properly safeguarding the municipality's funds, of which the council and its officials are the custodians. It should not be necessary for me to urge upon anyone present the necessity for a municipality having its officials who are in any way connected with the handling of funds, bonded with a good reliable bonding company. We have known cases where parties have accepted the bond of certain individuals for the fidelity of their trusted employees, only to find that the bonding parties were no more reliable than the employees themselves.

It should be easy for a municipality in these days of numerous reliable and satisfactory bonding concerns, to have its trusted employees bonded for amounts sufficient to cover the maximum funds that may be lying at any time in their hands, the charge for which would fall very lightly upon the taxpayers. A small outlay of this kind annually would ensure the municipality against possible loss of large sums.

In addition to all of this, the best safeguard is the employment of experienced auditors to periodically inspect and audit the books of the municipality. I am aware that the ratepayers in many municipalities consider the employment of properly qualified auditors from outside points, an unwarranted expense, but I am sure that those municipalities that have been enterprising and progressive enough to bring in chartered accountants to reorganize their accounting systems and audit the books regularly, would be the first to recommend that other municipalities should take similar action.

#### Value of Accounts

It is a very poor municipality indeed, whose business is not worthy of being conducted as carefully and systematically as that of a private corporation, yet how often do we see business men who are most careful and particular in their personal dealings, showing the utmost indifference toward municipal affairs. It would seem that they do not realize that every bond or debenture issued by their municipality is really a mortgage on their property, in common with that of their fellow citizens, or that the expenditures made by their councillors, wisely or unwisely, as the case may be, must eventually come out of their own pockets. The installation of a proper system for the conduct of a municipality's affairs and the handling of its funds, together with provision for competent and efficient supervision by qualified auditors, is an investment that undoubtedly yields good returns to the taxpayer by ensuring that he gets good value in return for the money he pays in taxes, as well as minimizing the risk of improper alienation of his property.

---

## BANK OF MONTREAL CROP REPORT

### British Columbia Still Suffers from Drought—Floods Caused Some Damage in St. John Valley

Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches. The branch managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts mentioned.

Heavy general rains have greatly improved prospects in every province east of the Rockies, and hopes run high for better than average crops of grain and hay. British Columbia, however, is still suffering badly from drought.

**Prairie Provinces.**—Crops continue to make good progress. Needed rains have fallen and conditions generally are favorable. Damage from pests is small. Edmonton district: Conditions good following beneficial rain. Wheat in shot blade. Oats looking well. Hay in some districts will be short. Calgary district: Heavy rain somewhat late for northern part of district where condition of crop only fair. Southern portion, grain, pasture and hay good. Lethbridge district: Conditions generally favorable. Some localities suffering badly from drought have been materially improved by recent rains. Unless general rain comes soon crops will be below average. Conditions vary and are best in northern localities. Little damage from hail. Regina district: Crops have benefitted from heavy rains and conditions are favorable. Some losses from hail. Prospects indicate average to good crop. Winnipeg district: Crops well advanced. Damage from recent violent wind and hail storm confined to comparatively small part of province. General outlook favorable. Fall rye headed out in some localities.

**Quebec.**—Cereal and root crops are looking well, but warm weather is needed. In some districts complaints are heard that there has been too much moisture. Hay and pasture everywhere in splendid condition.

**Ontario.**—Rains have been general. Warm dry weather would now ensure large crops. Fall wheat filling out well and beginning to ripen. Large crop indicated. Spring wheat, oats and barley in good condition, above average. Very heavy yield of hay promised. Corn a little backward. Fruits, good average crops looked for. Pasture in splendid condition.

**Maritime Provinces.** — Conditions generally bright. Annapolis Valley prospects are for fair to good crop of good quality apples. Average crop practically assured everywhere; in fact all prospects good except in limited parts of the St. John Valley where floods caused damage.

**British Columbia.**—Weather hot and dry. Rain badly needed everywhere. Hay half average. grains 70 per cent., roots 60 per cent., potatoes. Ashcroft 25 per cent. above average. In Okanagan water situation rather serious, apples 80 per cent., small fruits above average except plums and prunes. Fraser Valley tree fruits particularly good. berries much below average. Nicola and Ashcroft report grasshopper plague.

# Dominion Savings Meeting Called

## Shareholders Will Vote on August 9th on Proposed Sale of Assets to Huron and Erie Mortgage Corporation—Winding up Order is Postponed Meanwhile

Notice has been sent to the shareholders of the Dominion Savings and Investment Society, London, Ont., calling a special meeting for August 9 to vote on the terms of the provisional agreement by which the society is absorbed by the Huron and Erie Mortgage Corporation. The agreement is one which was drawn up in Toronto on June 15, and which was presented to the courts at Osgoode Hall at the time Londoners made a plea for an order winding up the Savings Society, and the court withheld the winding-up order in consequence. Since that date further agreements have been made between the parties, one of which included the transfer to the corporation of assets of the society from time to time as required as security for all payments to creditors of the society.

A vote of the Huron and Erie shareholders, it is understood, will not be required, as the corporation has power to conclude the merger without awaiting such action. The agreement, however, will become operative only when ratified by the shareholders of the Dominion Savings and assented to by the Lieutenant-Governor-in-Council.

### Letter to Shareholders

A letter to the shareholders of the Dominion Savings and Investment Society, enclosing a notice of meeting, follows:

"London, July 5th, 1922.

"Dear Sir:—

"We enclose you herewith a notice calling a meeting of the shareholders at London on the 9th day of August, 1922, at 11 o'clock, in the forenoon.

"We also enclose you a Power of Attorney to vote in favor of the adoption of the terms of the provisional agreement, a copy of which is enclosed.

"As the agreement secures payment in full without delay to the depositors and debenture holders, and will in that way also secure the largest amount possible to the shareholders, and as it has been approved by the Court and by the Superintendent of Loan Corporations at Toronto, and is very much in the interest of all the Shareholders, we would like you to sign and return to us the enclosed proxy, which will be used only for the purpose of confirming the said agreement.

"As the meeting is being held shortly, we would respectfully ask you to give this matter your attention, and send the proxy in immediately without fail, as votes not represented at the meeting will in effect be equivalent to votes against ratification of the agreement enclosed herewith.

"We enclose a stamped envelope for reply.

"Yours very truly,
"T. H. PURDOM,
President."

### Notice of Meetings

The call for the meeting of the shareholders of the Savings Society reads:

### Notice to Shareholders

"Take notice that a special or extra general meeting of the Shareholders of the Dominion Savings and Investment Society will be held at the offices of the Society, corner Richmond and King streets, in the City of London, Ontario, Canada, on the 9th day of August, 1922, at the hour of 11 o'clock in the forenoon for the purpose of taking into consideration a certain agreement entered into provisionally by the directors of the Society (which agreement is dated the 15th day of June, 1922, and made between the Society, of the First Part, The Huron and Erie Mortgage Corporation, of the Second Part, and Thomas H. Purdom, Alexander Purdom and Nathaniel Mills, of the Third Part), whereby the Society has provisionally agreed to sell and the said Corporation has provisionally agreed to purchase the assets of the Society for the consideration and upon and subject to the terms and conditions therein set forth, and for the purpose, if approved, of the ratification by the Shareholders of such agreement so entered into as aforesaid and for the purpose of appointing trustees pursuant to Clause No. 7 of the said agreement so entered into provisionally and for the purpose of considering, doing, approving and authorizing all acts and things necessary to give effect to and carry out the terms of the said agreement and for the purpose of approving, ratifying, sanctioning and confirming the further agreements hereinafter referred to and all the actions of the directors in negotiating and entering into the said provisional agreement, and the further agreements made between the same parties whereby the Society in consideration of The Huron and Erie Mortgage Corporation having agreed to render immediate assistance to the Society, agreed among other things, to transfer to the said Corporation assets of the Society as from time to time requested, to be held by the said Corporation as collateral security for the payment of all claims of creditors of the Society which should be acquired by and assigned and transferred or endorsed to the said Corporation and all liabilities which the Society should be under to the Corporation and of interest on all such claims and liabilities, all on the terms in the said agreements set forth and for the purpose of transacting such other and further business as may be brought before the meeting.

"Dated at London this 28th day of June, 1922.

"By order of the Board of Directors of the Society.

T. H. PURDOM,
President.

R. M. WINSLOW,
Manager.

1. A copy of the provisional agreement referred to in the within notice is enclosed herewith.

2. A copy of the further agreements mentioned in the above notice, may be inspected at the office of the Society during ordinary business hours.

3. According to the provisions of the Statute governing the Society the only Shareholders who may vote at the meeting called by the above notice are those whose names are duly entered in the books of the Society at the date of the first publication of the notice calling the meeting and they shall vote only upon the shares then standing in their names.

### The Agreement

"This agreement made this 15th day of June, 1922.

"Between:

The Dominion Savings and Investment Society, hereinafter called 'The Society', of the first part.

"The Huron and Erie Mortgage Corporation, hereinafter called 'The Corporation', of the second part, and Thomas H. Purdom, Alexander Purdom and Nathaniel Mills, all of the City of London, in the County of Middlesex, of the third part.

"Witnesseth:

1. The Society agrees to sell and sells to the Corporation and the Corporation agrees to purchase and purchases all the assets, goodwill and entire undertaking of the Society for the consideration hereinafter set out.

2. The Society shall from time to time as the Corporation shall require by proper instruments and conveyances satisfactory to the Corporation transfer, assign and convey to the Corporation and (or) to its nominees each and all of the assets of the Society, and pending conveyance shall hold in trust for the Corporation each and all of the assets of the Society.

### Directors to Return

3. The Society and the parties of the third part shall upon request from time to time of the Corporation cause the directors for the time being of the Society, or as many of them as the Corporation shall from time to time desire, to retire in series and shall elect in their place and stead nominees of the Corporation who shall be duly qualified with shares by the parties of the third part to the end that the Corporation shall have control through the board of directors of the Corporation of the acts of the Society.

4. The Society shall, if and when requested by the Corporation and forthwith after each such request, appoint a nominee of the Corporation as acting manager of the society, and he shall have full control of the business and staff of the Society, including its present manager, and the Society shall not, nor shall its executive, have any power to dismiss or interfere with such manager of the Society in the discharge of his duties, except as the Corporation may desire.

### Assumes Liabilities

5. The consideration for the sale hereby made shall be the assumption by the Corporation of the liabilities of the Society to the creditors of the Society, and the Corporation shall pay and satisfy such liabilities in due course.

6. The parties of the third part hereby agree and each of them hereby agrees to so vote all shares in the capital stock of the Society held by them or any one or more of them, and all shares which they or any one or more of them control or which they or any one or more of them are or is otherwise entitled to vote as to assure the due approval of the Society according to law of the sale hereby provided for and generally of the terms of this agreement.

7. Wherever hereinafter used the words, "the trustees," shall mean the trustees for the time being for the benefit of the shareholders of the Society under the trust hereby constituted. Such trustees shall be those appointed by a majority vote of the shareholders of the Society at the meeting of such shareholders to be called to consider and if thought fit to ratify this agreement, and their successors in the trust, or failing such appointment, shall be the parties of the third part and their successors in the trust.

### Trustees' Option

8. As soon as the Corporation shall have realized from the assets of the Society hereby sold to it sums equal to the said liabilities of the Society hereby assumed and agreed to be paid by the Corporation (including liabilities to the Corporation), or within thirty days thereafter, the Corporation shall notify the trustees in writing to that effect, and the trustees shall thereupon have the option to purchase such of the assets of the Society hereby sold to the Corporation as shall then remain in the hands of the Corporation unrealized, and also the proceeds of any assets so sold and realized upon over and above the amount of the liabilities of the Society hereby assumed by the Corporation (including liabilities to the Corporation), such option to be exercised by notice in writing under the hand of the Trustees given to the Corporation within six months after the receipt by the trustees of the notice from the Corporation above provided for and by payment by the trustees to the Corporation of:

(a) Twenty-five thousand dollars ($25,000).

(b) Interest at seven per cent. per annum on the amount by which from time to time the sums advanced or paid out or applied by the Corporation (whether from amounts realized from assets of the Society or otherwise) under this agreement or in connection with the carrying out of the same or in satisfaction of any liabilities of the Society, exceed the amounts realized up to such time in cash from the assets of the Society hereby sold to the Corporation.

(c) All expenses, charges, costs and outlays incurred by the Corporation in connection with the assets of the Society and the care, management and realization thereof, and in connection with any such advances, payments or applications by the Corporation or in connection with the liabilities of the Society or in connection with this agreement and the carrying out of the same.

### At Discretion of Corporation

"Provided, nevertheless, and it is hereby expressly agreed by the Society with the Corporation that nothing in this paragraph, or in the option above provided for, shall limit or interfere with the absolute rights of the Corporation as purchasers and owners of the said assets of the Society to hold, manage, deal with and realize on the said assets as the Corporation shall from time to time think proper, or give the Society any right to complain as to the amount of the realization in any case or as to the amount or condition of the assets at any time remaining unrealized, the whole management and realization of the said assets to be in the absolute discretion of the Corporation and the trustees to have no further or other right than to exercise the said option or abandon it as the trustees may think best.

### When Duly Ratified

"Provided further that in the event of the said trustees exercising the said option they, the said trustees, shall hold the said assets in trust for the benefit of the shareholders of the Society at the time when this agreement takes effect in proportion to the paid-up value of their several shareholdings.

9. This agreement is entered into provisionally pursuant to the Loan and Trust Corporation Act, and shall become operative if and when duly ratified by the shareholders of the Society and assented to by the Lieutenant-Governor-in-Council.

"In witness whereof the parties hereto have hereunto set their Corporate seals and hands and seals respectively.

"Signed, sealed and delivered in the presence of

R. P. Baker,

T. H. Purdom, Alex. Purdom, Nathaniel Mills. manager;

T. H. Purdom, Alex. Purdm, Nathaniel Mills.

D. McEachern, the Huron & Erie Mortgage Corporation, T. G. Meredith, president; Chas. J. Clarke, treasurer."

# Prospects for More Than Average Crop

### Manitoba Free Press and Canadian Pacific Railway Reports are Optimistic—Situation In Alberta is Good, According to Latest Reports

Western Canada is promised more than an average crop, the outlook being certainly brighter than at this time last year, states the third crop report of the Manitoba Free Press, published on July 4. Naturally there has been some damage and deterioration from drought, insects and hail since the last report was issued on June 13, but the total damage does not appear large or serious, the report states.

The wheat crop in Manitoba has suffered less from any drawback, and has easily held its early lead. Taking the province as a whole, wheat is ninety per cent. in shot blade and fifty per cent. in head. No damage is reported from drought, and moisture is sufficient for the time being except in three or four districts. No frost is reported. The progress of coarse grains is considered very favorable. Rye cutting will be general from July 10th to 15th. No reports of black rust have been received. The general remarks show that conditions in Manitoba are excellent.

In Saskatchewan conditions are generally considered satisfactory, but the crops are a week or ten days behind Manitoba. Wheat is reported about sixty per cent. in shot blade, with very little actually in head. The majority of districts report sufficient moisture, but some districts report soil conditions as very dry or rain badly needed, and some damage has undoubtedly taken place from drought and hot winds. Fairly general showers last week helped to improve matters. The progress of the coarse grains varies greatly, many districts reporting conditions good but others backward or slow.

Alberta crops have not made the favorable progress during the past three weeks that was expected. Crops from Swift Current to Calgary on the main line of the Canadian Pacific Railway are showing evidence of the recent dry, hot weather, with prospects of an average crop as further rains are received during July. The recent rains have saved the situation in so far as many large areas are concerned. North of the C.P.R. main line to Red Deer has suffered from the hot weather and all crops are short and light. Conditions are better north of Red Deer. Taking Alberta as a whole, oats will not be a heavy crop, although there will be big yield in spots.

#### Canadian Pacific Report

Another week of good crop weather has been spread over the west, with moderate temperatures, according to the weekly crop report issued on July 3 by the Agricultural Department, Canadian Pacific Railway. There has been an ample supply of rain in the three Prairie Provinces, according to the report. Live stock continues to improve with pastures affording ample sustenance. The Dominion Government has not yet issued figures as to this years' flax acreage, but northwest grain dealers estimate 540,000 acres seeded to this crop.

Manitoba has experienced cooler weather, with frequent showers up to date of report. A large percentage of grain battered by the storm of June 23 is already showing good recovery. In the southern portion of the province wheat is coming into head and indicates an early harvest. Rye cutting, it is expected, will commence at a number of points this week. Prospects are good for a heavy hay crop ensuring a good supply of Winter feed. Summer fallowing is progressing extensively. Very little damage has resulted from grasshoppers.

Crops are growing well in Saskatchewan. There have been good heavy rains over many sections, amounting in some instances to.75 to over one inch of precipitation. Further moisture is required, however, between Loreburn and Hawarden, on the Outlook Subdivision, Milden and Druid, Kerrobert subdivision; also in the north-west, including a few points on Macklin, Cutknife and Wilkie subdivisions. Wheat in this province is generally speaking, in shot blade, and heading in some districts. Little damage is reported from grasshoppers.

#### Conditions in Alberta

Crop conditions in Alberta have been greatly improved by the recent general rainfall, particularly in the south, where such rainfall has not been experienced for years. There will be a scarcity of hay in some districts, where moisture came too late. Rye has been affected in these places, but will be cut for feed. It is expected there will be an average crop of wheat and oats over the province. The grasshopper menace in Alberta is practically over.

In the Edmonton, Dunvegan and British Columbia Railway district a number of light showers during last week afforded a welcome relief to crops. The manager of the E.D. and B.C. Railway estimates acreage under various grains as follows: Wheat, 92,650 acres; oats, 136,700 acres; barley, 39,165; other grains, 8,850 acres.

Few points in British Columbia reported during the week. Small fruits are coming on the market. Vegetables are making favorable growth. Early varieties are likely to be affected, however, owing to the shortage of moisture. Tree fruits are developing satisfactorily.

#### Medicine Hat

Half an inch of rain was registered in Medicine Hat on June 28, from the welcome precipitation that seemed general over the whole of southern Alberta. Districts southwest of Medicine Hat, where no rain has fallen since May 17, received a soaking variously estimated at from three-quarters to one and a half inches, which came just in time to save the crop from drought and cutworms. From districts in all directions come reports of heavy rain that fell practically all night, and which will be of incalculable benefit to the crops.

---

## ALBERTA LANDS

Colonization plans for irrigation lands in Alberta are now about to be drawn up and the land-settling scheme set in operation. The listing of lands in the Lethbridge Northern district has been completed and a total of about 30,000 acres of improved farm lands is thus available for settlement. This work has been going on under the direction of the irrigation council for some time past, and has now reached the point where it will be possible to proceed with an actual publicity programme.

Lands listed in this way for sale by their present owners are in the hands of the government authorities exclusively and irrevocably for a period of two years. Nearly all the acreage thus listed ranges in price from $12.50 to $35 per acre. In the case of sale a commission of $2 per acre will be collected by the government, and from the fund so provided the government will pay the expenses of an immigration and colonization campaign.

Considerable interest has already been expressed in Alberta lands, it is stated, by prospective settlers from the Western States, and the government officials believe that when they have the campaign fully under way it will be possible to attract a good number of first-class farmer-immigrants. The land-listing carried on so far has been strictly confined to the Lethbridge Northern Irrigation district.

---

## GOLD EMBARGO IS CONTINUED

### Government Again Prohibits Export of Coin, Bullion and Fine Gold Bars

A proclamation has been issued in the Canada Gazette, extending the prohibition of the export of gold coin, gold bullion and fine gold bars for another year. The proclamation is issued under an act passed three years ago authorizing the continuance of the measures taken during the war to prohibit the export of gold. The proclamation reads:—

"Whereas in and by section 3 of chapter 21 of the Statutes of the Parliament of Canada passed in the session thereof held in the ninth and tenth years of Our Reign, intituled 'An Act to provide for the continuance in force of a certain Proclamation made under the Finance Act, 1914, and to authorize the prohibition of the export of Gold,' it is amongst other things in effect provided that Our Governor by proclamation to be published in the Canada Gazette may from time to time and for any period or periods declare and proclaim that the export of gold coin, gold bullion and fine gold bars from the Dominion of Canada shall be prohibited except in such cases as may be deemed desirable by the Minister of Finance and under licenses to be issued by him;

"And Whereas a proclamation bearing date the thirtieth day of June, in the year of Our Lord, one thousand nine hundred and twenty was issued under the provisions of the said section directing that the export of gold coin, gold bullion and fine gold bars from the Dominion of Canada be prohibited except in such cases as might be deemed desirable by Our Minister of Finance of Canada and under licenses issued by him, such proclamation to continue in force until the first day of July of the year one thousand nine hundred and twenty-one;

"And Whereas a further proclamation was issued continuing in force Our said proclamation of the thirtieth day of June, one thousand nine hundred and twenty until the first day of July of the present year;

"And Whereas Our Governor General in Council has authorized that Our said proclamation bearing date the thirtieth day of June, 1920, be continued in force until the first day of July in the year of Our Lord one thousand nine hundred and twenty-three unless an earlier termination thereof be by proclamation declared.—

"Now Know Ye that by and with the advice of Our Privy Council for Canada, we do hereby proclaim and direct that Our said proclamation bearing date the thirtieth day of June aforesaid be continued in force and effect until the first day of July, in the year of Our Lord, one thousand nine hundred and twenty-three unless an earlier termination thereof be by proclamation declared."

## AUTOMOBILE LOSS NOT COVERED

### Car Dropped Off Ferry Into Water—Company Not Obliged to Pay

The case of British Empire Underwriters v. Wampler, which was an action on a policy of insurance on an automobile, has recently been decided by the Supreme Court of Canada.

The policy insuring the motor car contained an endorsement as follows: "In consideration of $28.50 premium; . . . it is understood and agreed that this policy is extended to cover the insured to an amount not exceeding $1,700 on the body ,machinery and equipment while within the limits of the Dominion of Canada and the United States, including while in building, on road, on railroad car or other conveyance, ferry or inland steamer, or coastwise steamer between ports within said limits subject to the conditions before mentioned and as follows: (A) Fire, arising from any cause whatsoever and lightning. (B) While being transported in any conveyance by land or water—stranding, sinking, collision, burning or derailment of such conveyance, including general average and salvage charges for which the insured is legally liable."

The Court held, reversing the judgment of the Ontario Supreme Court, Appellate Division, and restoring that of the trial Judge, that damage to the plaintiff's motor car while being unloaded from a ferry boat, caused by the boat backing away and allowing the car to drop into the water, was not covered by the policy, the loss not having been caused by the stranding, sinking or collision or burning of the ferry boat.

BUSINESS INSURANCE

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

A Message From Lloyd George

"Risk is inseparable from civilized life, but though we cannot avoid risk, we can by a suitable organization of society place nearly the whole burden of risk on the shoulder of those who are able to bear it. Willingness to take risks is in the wage earner or salary earner a weakness, or in great excess, a vice. The contrary of the vice of gambling is the virtue of thrift, and the system of Life Insurance has given the thrifty man an opportunity of practising his virtue, compared to which the stocking, the small mortgage and the savings bank are but clumsy and ineffective devices."

The Great-West Life issues Policies of Insurance at favorable rates, possessing exceptional investment advantages. Particulars will be sent to you upon request.

Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

## THE COAL AND RAILROAD SITUATION

The most important feature of the industrial situation and of the general business situation in the United States, is the pending issue with the coal miner and the railroad employees. The coal strike has lasted three months, which in itself is not surprising, as it was quite certain from the beginning that there would be no early adjustment of the differences. Indeed there is no present prospect of any "adjustment," but rather for a trial of strength to the bitter end.

In the anthracite field the miners are still demanding an increase of 20 per cent in wages but probably only to counter the demand of the operators for a reduction. The operators have made no offer to settle by continuance of the existing scale, holding that the industry should adjust itself to a lower level of wages and prices, but offered to join in a request to the President of the United States to name a commission to arbitrate the matters in dispute. The miners have declined to consider this proposal.

The anthracite field is all unionized and the shut-down is complete. Stocks of anthracite coal are now getting low, and as there is no great surplus capacity for production the danger of a short supply next winter is becoming serious. Anthracite is used mainly for household purposes and while absence of the usual supply would occasion very great inconvience, possibly, in view of the way people of Europe have lived in unheated houses, it may be classed as a luxury rather than a necessity.

The bituminous industry is more important to the country, but it is not so completely suspended Production is going on at about one-half the normal requirements, mainly in West Virginia, Kentucky and States farther south. Reserves were large when the strike began, and the country could probably go one or two months longer before any general suspension of the industry would take place. Production has increased from about 4,000,000 tons in the early weeks of the strike to about 5,000,000 tons per week. But this has occurred in non union districts. There does not appear to be much reason for expecting a break among the union miners. They are very resolute in their stand for the present wage scales, and no doubt sincere in their feeling that a reduction would do them great injustice.

## A MODERATE BUILDING BOOM

At the present time there seems to be a mild revival of building activity in Canada. The various branches of the building trades are closely dependent, as are most other branches of industrial activity, upon general business conditions. The trade depression through which we have been passing has made serious inroads upon progress in this field, as elsewhere. There is, however, one impor ant difference; building is one of those industries in which the natural movement of the trade cycle was not greatly interfered with by the war. It is generally conceded that the down-swing of the business cycle had made its beginning just prior to the war, but that the sudden demand for goods and for services, induced by war conditions, postponed the depression in those industries which were concerned directly with the production of necessities, and with the promotion of military activities. The building trades are not included in this category, except indirectly and in a limited way.

At the end of 1912, building construction throughout Canada was at its height. In 1913, however, a decline in building took place, and this continued until about the beginning of 1916. The level which was reached at that time was maintained for nearly three years. Soon after the signing of the armistice, there was slightly increased activity in building construction, which continued until the effects of the general trade depression began to be felt in the spring of 1920. As a consequence of this long period of comparative inactivity in construction, there has been a serious shortage of buildings, more especially of dwelling houses throughout the country.

The stage, then, has been set for extensive building construction, but certain factors have operated to prevent the carrying out of such a program. Chief among these were the high costs of labor and of materials. Labor costs have fallen considerably in certain districts. Taking the country as a whole, building costs are also are tending slightly downward. The wholesale price index number of 48 building materials, according to figures compiled by the Department of Labor, stood at 253.4 in April, as against 254.3 in March. This is a very substantial decline from the figure for April 1920, which was 386.6 but is still very much higher than the April 1913 figure, viz. 141.6.

During the first five months of the present year, the number of building construction contracts awarded, showed a gradual and substantial increase. The aggregate value of these contracts during the period named was $96,831,600, in comparison with $85,326,700 for the correspond- ord since 1914, with one exception, was made in ing period of last year. The highest monthly rec- the month of May, when building contracts amounted to $34,827,000.

A survey of the building and rent statistics throughout the Dominion indicates a wide variation of conditions in the different districts. Rents on the average have as yet shown little inclination to fall. In British Columbia, the housing situation is quite satisfactory. There is neither a shortage of houses, nor is there any considerable surplus. A large number of new residences have been built during the last two years. Retail merchants report that the tendency of business rents is likely to be downward in the near furture. In the Middle West, construction costs are still too high to warrant building residences as an investment. Rents have declined somewhat in those centres that have been slower to recover from the depressed condition of business. In Ontario and Quebec, the larger cities report substantial building programs, both for industrial and residential purposes. The high cost of building, in addition to high taxes and high rates on mortgage loans, has discouraged the building of houses for rent. Those houses which are being built are for personal use or for resale to owners. Rents in this area show a tendency to decline in larger centres. In towns and rural districts, however, rentals remain firm and in some cases they have shown a slight increase. In larger cities there is slightly more available space than was the case last year. Little change has occurred in rents in the Maritime Provinces. Building there has been greatly restricted on account of the high cost of materials and also of labor.

In general, then, rents have not fallen materially nor are there definite prospects for any substantial reduction in the immediate future. The decline in salaries and incomes, lower building costs, increased construction, and the additional space available therefrom must, however, make for lower rentals eventually.

## REPARATIONS

Is the reparations tangle being straightened out?

This question may be affirmatively answered by the result of the negotiations for a German loan, coupled with certain conditions which have received the assent of the German Government. But the question will yet remain as to the permanent effects of such a loan. Does it represent anything like a settlement of the vital elements in the reparations problem, or is it merely an expedient for temporarily bridging the gap? Even if the latter view be accepted, no little satisfaction may be experienced at the postponement of what was developing toward a serious crisis. The breathing spell may be utilized in finding a better and more lasting solution. If the German printing presses stop turning out "money," if more adequate taxes are imposed by that country, if exportations of capital are halted and at least some of that already exported is returned, all these accomplishments may go far toward relieving the Franco-German tension. But do they go to the heart of the matter after all? When loans are provided which will inevitably aid greatly in the revival of German industry, will the Allied countries themselves receive the increased fruits of this production in the shape of imports, or will they view with complacency a sharp impetus to German exports to the countries that were neutral during the war? If they are willing thus to have German industry accelerated, may not the loans granted for reparations purposes turn out in the long run rather more favorably for the country penalized than for those countries for whose benefit the reparations were intended?

These difficulties are far from imaginary, though a way may be discovered for applying the reparations that will render the present obstacles less formidable than they now appear. Should it prove impossible to find a workable plan of exacting reparations from Germany, it would tend to encourage future wars by making nations contemplating aggression feel secure against the payment of heavy indemnities.

### APPOINTING AN ADMINISTRATOR

Here is another example of the troubles which ensue from intestacy and procrastination in writing of wills. When the great railroad builder, James J. Hill, died he left to his widow, Mary T. Hill, the bulk of his immense estate. Last November the widow passed away without leaving a will or making any disposition of the remaining estate valued at over $15,000,000. Thereupon ensued an undignified scramble among heirs and next of kin. They divided into two camps on the question as to the appointment of an administrator. The matter was submitted to the Probate Court in St. Paul. One contingent urged the appointment of the Northwestern Trust Company of St. Paul, which is identified with the Hill interests. The other side asked for the appointment of Louis W. Hill as administrator.

The Court held that neither was entitled to letters of administration, but suggested that the next of kin submit the name of some other person, persons or party upon whom they might agree, and in the event of failing to make a selection the court would appoint an administrator. After further parleys George P. Flannery, president of the Northwestern Trust Company, was agreed upon and was recently appointed administrator of the $15,000,000 estate.

New York Exchange is now moving within narrow limits. Its stability and the smallness of the premium is beneficial to business.

The outlook for the fire insurance companies, judging by estimates of losses, seems to be worse than ever. Education and other preventive means seem to have had no appreciable effect.

A vigorous campaign is being conducted in Great Britain for the removal of the Canadian cattle embargo. If it succeeds it will be due more to native organization than to Canadians.

The enormous reduction in Canadian trade indicates that at last we have been compelled to restrict purchases to our means. The figures themselves are an indication, not a cause, of the state of business, and even then regard must be had for the reduced value of the dollar. To try and swell "trade" is like pushing up the mercury in the thermometer.

### CANADIAN PACIFIC APPOINTMENTS

A number of important changes in the staff of the Canadian Pacific Railway, Eastern lines, are announced. Alfred Price, General Manager Eastern lines, is granted leave of absence after forty years' service, on account of ill-health, and is succeeded by J. F. Scully. George Hodge is appointed Assistant General Manager Eastern lines. W. N. Neal is appointed General Superintendent Algoma District.

Mr. Price was born in Toronto and began his business life as a telegraph messenger for the Montreal Telegraph Company in Toronto in 1875.. Among positions he has filled in the C. P.R. are Superintendent Toronto Terminals, 1903, and General Superintendent at Winnipeg and Calgary.

Mr. Scully joined the C.P.R. as an office boy in Montreal in 1887. He has also had considerable Western experience as a Superintendent. He was General Superintendent of the Algoma Division at North Bay prior to his present appointment.

H. J. Humphry, Superintendent of Trenton Divison, with headquarters at Toronto, is appointed Assistant General Superintendent, succeeding Mr. Neal.

N. J. Main of Montreal is appointed Superintendent of the Trenton Division, with headquarters at Toronto.

## *Personal*

C. A. RICHARDSON, manager for Canada of the North British and Mercantile, who has been visiting the Head Office at Edinburgh, Scotland, is expected home shortly.

A. H. RODGERS, formerly with the Norwich Union Fire Insurance Society as secretary, has joined James Brandon in the general insurance business, with offices in Toronto. The firm has secured an Ontario charter, and will be known as Brandon-Rodgers, Ltd.

## *Obituary*

W. H. BIGGAR K.C., Vice-President and General Counsel of the Grand Trunk Railway System, died in Montreal on July 7th, in his sixty-ninth year. Mr. Biggar was elected Mayor of Belleville in 1888-89 and was elected to the Ontario Legislature in 1890 in the Liberal interest as M.P.P. for West Hastings.

MALCOLM H. ROWLAND died at his home in London, Ont., on July 9th. Mr. Rowland was at one time manager of the Canada Loan and Savings Company before it was absorbed by the Huron and Erie. He was also auditor for the Huron and Erie, Dominion Savings, City Gas Company and many other large concerns.

## THE PROVINCES HESITATE

(From the Montreal Gazette)

It is apparent, from statements attributed to the Premier of Alberta, that the provisions of the act to re-establish the Wheat Board are not wholly satisfactory to the western provinces. The law, in accordance with constitutional requirements, does little more than provide for the appointment of a Board for the purpose of buying and selling wheat. It is an enabling act: the powers necessary to render the operations of such a Board effective must be conferred by provincial legislation, and, under the terms of the act, at least two provinces must legislate concurrently to this end. The Legislature of Manitoba has been dissolved and a new House, which will not be elected until the eighteenth of this month, can scarcely be expected to get down to business in time to co-operate with the other two prairie provinces in the handling of this season's crop. There is some talk of a special session, and farmer candidates are being asked to agree to the holding of such a session without indemnity. They may agree to it, but it is not yet certain that they will control the Legislature and will be in a position to effect the immediate passage of the necessary legislation. At any rate, Alberta and Saskatchewan are not counting upon the help of Manitoba, and they are in something of a quandary in consequence. With one province in the open market, and with anywhere from forty-five to sixty million bushels of wheat to sell, the position of the other two provinces becomes one of considerable difficulty; these provinces will have become responsible for the financial success—or failure of a Board—whose authority has been so restricted that a large percentage of the marketable crop is excluded from it.

Arrangements are being made for a conference between representatives of the Alberta and Saskatchewan Governments, but the Premier of Alberta, Mr. Greenfield, who is taking the initiative in the matter, is not at all enthusiastic over the probable outcome. He is concerned particularly over the clause of the Dominion act which declares that:

"The Government of Canada shall not be responsible for any deficits that may occur in the operation of the Board in concurring provinces, and should a surplus occur it shall be divided among the concurring provinces pro rata."

In other words, all the financing of a public character must be undertaken by the provinces, the Board being empowered to "receive advances of money for the general purposes of the Board from any province, or from any bank, corporation or individual, upon such terms as may be stipulated with the approval of the Governor-in-council." Mr. Greenfield, who seems to have given the subject some thought, is frankly dubious about this phase of the problem, although, if the Wheat Board is to do all that its advocates have outlined for it, he ought not to be. He expresses the opinion that the Dominion, having forced the principle, should assume some share of the financial responsibility rather than leave it, as has been done, entirely to the provinces. The suggestion here made that the Dominion has forced the principle is not well founded, the Parliament of Canada having done no more than accede, within the limits of its constitutional authority, to a request which came from the three western provinces, and the reservation of the right to appoint the members of the Board is not a reason for assuming financial responsibility in connection with the exercise of compulsory powers to be conferred upon the Board by provincial legislation.

Western politicians and farmers and farmer-politicians have come rather late to an appreciation of the very wide difference between conditions as they exist now in respect to the marketing of wheat and conditions as they existed during the regime of the former Wheat Board. That Board, rightly or wrongly, was clothed with a monopolistic authority under which it exercised absolute control over the Canadian wheat output, and, as the creation of the Parliament of Canada, it had the financial backing of the Dominion. It was established as a war measure and was given compulsory powers which could not be conferred upon a new Board by the Dominion under normal conditions. It operated at a time when the price of wheat was a secondary consideration with the buyers, whose first concern was to secure deliveries, and when there was not only a single selling agency in Canada—the Board itself—but also single purchasing bodies in Great Britain and in Allied countries in Europe. In these circumstances, the Wheat Board's operations were bound to be financially successful, and they were successful, a fixed price being given to the producers in the first instance, followed by later payments in redemption of participation certificates.

No such conditions now prevail in the great wheat markets of Europe. France and Italy are assured substantial crops, while the movement of wheat toward Europe from large surplus-producing countries, checked or stopped during the war, has returned to its natural commercial channels. There is today, neither the same demand nor the same easy system of selling to national purchasing agencies; a Canadian Wheat Board now must take its chance against ordinary commercial competition from buyers and sellers alike and must take the risk of loss from a possible fall in prices, such loss to be passed on to the provinces from which the Board's authority is principally derived. The financial success of the enterprise, therefore, is by no means assured, and the Governments of the western povinces show wisdom in hesitating before they embark upon an undertaking the consequences of which may be serious.

### MARINE INSURANCE CASE.

By the finding of the supreme court of Canada, the Whalen Pulp & Paper Co. has been freed from a judgment of $15,000, obtained in the supreme court by the Standard Marine Insurance Co. in a dispute over money advanced for pulp shipments.

The judgment was set aside by the court of appeal and the court of appeal dismissal has been upheld by the supreme court of Canada. About $7000 law costs are also affected by the decision.

Exclusively Canadian

We take pride in the fact that this is an exclusively Canadian Bank, with every effort concentrated on the development of domestic interests. For forty-five years our organization and capacities have been gradually broadening to cope with the increasing demands of industrious Canada.

Consult our local manager regarding your plans for development.

## FIRE LOSSES REACH HIGH TOTAL

### Canada Not Alone in Misfortunes—Bankers Advise Against Floating New Loans In New York

(Special to The Monetary Times)

New York, July 12.—According to estimates made by the Journal of Commerce fire losses in the United States and Canada during the month of June while below those of June, 1921, were still far above what may be regarded as normal for a summer month. The total losses from fire during June were approximately $24,000,000. During June, 1921, the losses were approximately $29,000,000.

During the first six months of the present year the total losses were thus $192,000,000 as against losses of some $164,000,000 during the same six months of 1921.

The newspaper estimates that since the period of business readjustment began in January, 1920, property to the amount of $856,000,000 has gone up in flames and that of this total some $300,000,000 may be regarded as purely and simply the product of the poor business conditions.

### Shifting Trade Losses

Commenting on these statistics editorially, the newspaper says in part: "It is a rather startling fact that when trade losses become pronounced through business readjustment any such proportion of the trade losses can be shifted to insurance and thereby to the general public without awakening the people to the injustice of allowing such a procedure. This can only be explained by the fact that the great majority of the people still cling to the fallacy that the insurance company is the one to stand the loss and that they personally are not interested, whereas in reality they pay these criminal losses plus the cost of distribution by the insurance company which is from twenty-five to forty per cent."

### Alberta's Loan

Gossip is current in Canadian banking circles here that the Province of Alberta experienced no little difficulty in selling the $3,500,000 five-year five and a half per cent. issue floated here during the past week. The province experienced a repltition of the difficulty expericienced by the Province of Manitoba some weeks ago. The Canadian officials and the local dealers found it difficult to see eye to eye in regard to possible terms. Apparently the Canadians found it difficult to realize that the American dealers were not anxious to take their bonds unless they readjusted their opinions in regard to what the Province of Alberta should pay for its money. The Canadians are said to have felt that money should not cost them over five and a quarter per cent. Acting on this opinion they rejected almost scornfully several bids for a thirty year loan. But they were apparently compelled to change their opinions, for the loan eventually cost the province 5.70 per cent. The bids received on the thirty year loan worked out on a 5.44 per cent. basis. While technical conditions in the local bond market, principally a temporary oversupply of long term bond, unquestionably had much to do with the change from long term to short term bonds on the part of provincial authorities, the relatively high rate the province had eventually to pay for its money is regarded in some quarters were as indicative of a slightly changed attitude toward Canadian bonds in general on the part of the average American bond dealer.

Your correspondent is told that Canadian bankers here are warning their provincial and municipal clients in Canada that contemplated loans had better be held off until later in the year as conditions in the bond market here are distinctly unfavorable. This is said to have been brought about by the fact that a large part of the last Dominion of Canada loan is still on the hands of the underwriting syndicate and that many of the more influential bond dealers feel that many of the Canadian provinces and municipalities should attempt to restrict their borrowing in this market.

## *Railroad Earnings*

The following is the approximate gross earnings of Canada's transcontinental railways for the first period in July:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| July 7th | $3,168,000 | $3,440,000 |
| **Canadian National Railway** | | |
| July 7th | 2,075,360 | 2,106,981 |
| **Grand Trunk Railway** | | |
| July 7th | 2,233,202 | 2,669,013 |

## *Exchange Quotations*

Closing rates in Toronto Wednesday, compared with the preceding week, were as follows:

| | July 5 | July 12 |
|---|---|---|
| Sterling | 449.87 | 449.12 |
| France | 8.29½ | 8.38 |
| British W. I. | .94¼ | .94 |
| Jamaica | 4.51¾ | 4.51 |
| Belgium | 7.85 | 7.97 |
| Denmark | 21.85 | 21.77 |
| Germany | .23½ | .25 |
| Greece | 2.92 | 2.91½ |
| Holland | 39.08 | 39.31 |
| Italy | 4.65¼ | 4.62 |
| New York | $1\frac{1}{16}$ | $1\frac{3}{16}$ |

### POST OFFICE SAVINGS BANK

The April statement of the Post Office Savings Bank does not show such a good appearance as the previous month's report, deposits being lower than formerly, and withdrawals showing an increase. Deposits are lower by about forty-six thousand, and withdrawals are up by about sixty-three thousand dollars. The following is the statement for the month of April:

| | |
|---|---|
| Balance in hands of Minister of Finance on 31st March, 1922 | $24,837,181 |
| Deposits in Post Office Savings Bank during the month | 209,436 |
| Deposits transferred from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada | 6,145 |
| Interest allowed to depositors on accounts closed during month | 35 |
| | 25,052,798 |
| Withdrawals during the month | $ 656,539 |
| Palance at the credit of depositors' accounts on 30th April, 1922 | 24,396,258 |
| | 25,052,798 |

## *Bank Clearings*

The following are the bank clearings for the week ended July 6, compared with the corresponding week of 1921:—

**Eastern Bank Clearings**

| | Week ending July 6 | Increase over 1921 |
|---|---|---|
| Toronto | $103,098,189 | $ 3,061,595 |
| Montreal | 97,860,368 | x19,967,952 |
| Hamilton | 6,356,737 | 258,680 |
| Halifax | 3,959,679 | 101,045 |
| St. John | 3,014,008 | 1,053,951 |
| Brantford | 1,228,614 | x165,972 |
| Moncton | 1,308,705 | x90 |
| Kitchener | 1,147,581 | 105,515 |
| Sherbrooke | 934,237 | x124,203 |
| Kingston | 1,057,646 | x1,759 |
| Ottawa | 7,910,831 | x577,502 |
| Peterboro | 888,809 | x177,290 |
| Total | $228,765,404 | x$16,433,952 |

**Western Bank Clearings**

| | Week ending July 6 | Increase over 1921 |
|---|---|---|
| Winnipeg | $ 39,048,511 | $ 518,206 |
| Vancouver | 14,126,143 | x845,648 |
| Calgary | 5,244,506 | x1,211,142 |
| Regina | 3,768,857 | x112,965 |
| Victoria | 2,513,168 | 27,951 |

| New Westminster | 589,848 | x52,641 |
| Lethbridge | 535,039 | x132,950 |
| Medicine Hat | 398,741 | x126,503 |
| Edmonton | 4,168,307 | x182,451 |
| Total | $ 72,377,095 | x$ 3,508,572 |
| Eastern total | 228,765,404 | x16,433,952 |
| Grand total | $301,142,499 | x$19,942,524 |
| Moose Jaw | $ 1,453,011 | |
| Prince Albert | 408,671 | |
| Brandon | 654,695 | |

x—Decrease.

### NOVA SCOTIA COAL

The output of the Dominion Coal Company's collieries for the month of June totalled 298 577 tons, an increase of 92,000 tons over the output during May. It is expected the collieries will work steadily during the month of July.

## *Business Conditions*

Although there is the usual seasonable quieting down in some lines and weather conditions in certain districts of the Dominion of Canada have curtailed distribution of summer merchandise to a moderate extent, crop reports are generally favorable, and, with continued industrial expansion, there is widespread expectation that fall and winter trade will be very active, according to dispatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities. At the moment, the attention of retailers is devoted chiefly to replenishment of depleted stocks and many small orders covering almost all kinds of staple commodities are being received at leading wholesale and jobbing centres. Greater interest is also being displayed in providing for future requirements, and inquiries, not a few of which have resulted in the placing of substantial orders, are much more numerous than at this time last year. The financial situation is steadily improving and collections tend towards betterment.

Montreal reports that, while summer quiet now prevails in numerous lines, most indications are regarded as favorable, and merchants, who are especially encouraged by the receipt of cheerful agricultural advices, are predicting an active fall and winter trade. Collections are fairly prompt.

Business conditions show no material change at Quebec, buying in both wholesale and retail lines being still conservative and limited strictly to current requirements. Collections remain low.

Vagaries of the weather have affected retail distribution of seasonable goods at Toronto, but, taken as a whole, business shows appreciable improvement over conditions a year ago. Industrial improvement is maintained; labor is more fully employed than for a long time past, and considerable encouragement is derived by merchants from the favorable crop advices coming in from numerous districts. Collections show some improvement.

With the crops in most districts in the Far West and Northwest in excellent condition, merchants in the leading wholesale centres are disposed to regard the outlook with increasing confidence. Reports from Winnipeg, Saskatoon, Regina, Calgary and other points indicate a noticeable growth in optimism, and state that, while business shows a substantial gain in volume compared with last year at this time, orders are still being placed with caution, and this condition is expected to prevail generally until the harvests have been gathered. Collections remain slow.

## *Bank Branch Notes*

The Canadian Bank of Commerce opened a new branch on July 5th at the corner of Danforth and Coxwell Avenues, Toronto, under the management of F. M. Mathias.

L. R. Atkinson, formerly manager of the Bank of Toronto at Millbrook, Ont., has been appointed manager of the branch at New Westminster, B.C.

E. B. McInerney, formerly manager of the Royal Bank of Canada at St.. John's, Newfoundland, has been appointed manager of the branch at Paris, France.

The Bank of Montreal announce the opening of a branch at Timmins, Ont., under management of Mr. W. C. Mitchell.

The branch of the Dominion Bank at Teulon, Man., will be closed on July 15th, and collections held by them will be handed to The Canadian Bank of Commerce at that point.

### QUEBEC BEING SUED

Once more the city of Quebec is to be sued for $40,000 damages alleged to result from the low water pressure obtainable from Lake des Roches and other water power sources, due to the present installation of Quebec's water works system. This is the inauguration of a third series of actions against the city, the first having already cost $75,000, the second, entered by the Richard estate for $126,000 recently, and the present one, entered by Mr. Louis Larue, on behalf of Dame Mary Mulligan. In the Bastien cases the Privy Council adjudged against the city and since then have entered periodically actions, which were decided by the courts, based on the decision of the highest tribunal of the Empire. In the last action entered the plaintiff contends that she has been unable to operate a mill located on Lake des Roches and claims right to damages.

## TRADE OPPORTUNITIES

### Shanghai Offers Excellent Openings For Canadian Companies

That there are excellent opportunities for Canadian manufacturers in Shanghai, is the statement made by Marsel Chapeaux, of the firm of Chapeaux Freres, Shanghai, who is at present in Montreal.

Discussing the opportunities Mr. Chapeaux said, "Although there are thirty-three different nationalities doing business of one kind or another in Shanghai, there is not a single Canadian house which has thought fit to commence operations there, in spite of the excellent possibilities which Shanghai has to offer. If Canadian firms would look into the prospects at Shanghai, they would find it to their great advantage to take immediate steps towards opening up branch establishments there."

Mr. Chapeaux was of the opinion gaged in business in Shanghai for the last twenty years, said that Canadian firms should not be discouraged by the example of the American firms which have been attempting to do business there. Most of these American firms have failed, he said, because they did not understand conditions in China, and insisted upon imposing American methods where such methods could not possibly prosper. This was unfortunate, because China has enormous possibilities, and with the right sort of handling, these firms could have been very successful.

Mr. Chapeaux was of the opinion that if Canadian firms would profit by American mistakes, and send representatives to Shanghai prepared to adapt their business methods to Chinese conditions, they would find Shanghai a very profitable field. There are all sorts of resources in China which have not been developed—rich coal mines which have hardly been touched. It is true that in the past the Chinese have refused to allow Europeans to work their mines, but now they are greatly in need of European and American capital, and they will be obliged to allow of the development of the mines by those who can provide the capital. Competition is not feared in Shanghai or any other part of China, because of the wealth of possibilities still open for development.

Canadians, said Mr. Chapeaux, who seem to be very active in most directions, have neglected excellent opportunities in this case. In the Far East, the few Canadians who are there are more popular than any other white men, and others would be assured of very good treatment. Australians have not been so slow in seeing the possibilities of business in Shanghai, and have even established a commission there for the sole purpose of looking after Australian commercial interests. Canadians would do well to pay a little attention to the East as soon as possible, concluded Mr. Chapeaux.

Coal Strikes in West Virginia
Mill Lock-Outs in New England
Buildings Bombed in Chicago

These are only three of the indications of industrial unrest that create an increasing public demand for

Strike, Riot and
Civil Commotion Insurance

## SECURES LARGE CONTRACT

The East Kootenay Power Co., has closed a contract with the Consolidated Mining and Smelting Co. to supply power to the Sullivan Mine at Kimberly, and also for the new concentrator about to be installed at that mine. This contract calls for 3,000 h.p., immediate delivery, and all the requirements of the company up to 8,000 h.p, for a period of ten years. In connection with this concentrator which is being installed at the Sullivan mine at Kimberly, the capacity is to be 1,500 tons per day, which is several times larger than the present concentrator the company has at its other properties.

The East Kootenay Co., has a power development on the Bull River. B C., and has contracts with the cities of Cranbrook and Fernie and with several of the coal mining companies in that territory. The company is installing another plant on the Elk River which will have a capacity of 20,000 h.p.

## B. C. MANUFACTURERS' ASSN.

At the annual meeting of the British Columbia Manufacturers' Association held in Vancouver recently, the growth of the manufacturing industry in British Columbia was indicated by statistics submitted by J. A. Cunningham, president of that association.

Mr. Cunningham stated that seventeen thousand people are employed in the thirteen hundred manufacturing plants in the province, the roll for the beginning of 1922 showing thirty-one lumber companies and thirty-four general manufacturing plants added to British Columbia during 1921. The volume of business of the basic industries was as follows: agricultural, $60,065,000; mining, $23,066,641; lumber, $64,790,000; fishing, $22,239,000; other industries, $58,100,000.

The following officers were elected for the year: J. H. Falconer, honorary-president; J. A. Cunningham, president; and F. T. King, vice-president.

# Western Canada Insurance Club

## First Year's Work Reviewed at Annual Meeting Held in Winnipeg—Thomas Bruce Elected President—Organization Comprises Officials and Agents

The Western Canada Insurance Club, which was organized last year, held its first annual meeting in Winnipeg on June 27, with J. C. Waugh, president, in the chair. The following officers were elected:—

President, Thos. Bruce; vice-president, N. J. Black; secretary-treasurer, F. W. Pace, with an executive composed of the chairmen of the following standing committees:—

Competition:—J. C. Waugh, chairman, W. E. Hawkins, R. J. Lambert, H. H. Smith, W. L. White, F. T. Bryers.

Board office.—W. E. Meikle, chairman, A. H. S. Stead, W. H. Hurd, F. L. Heberling, C. E. Saunders, H. C. R. Wainwright.

Educational.—J. Pickering, chairman, W. P. Fess, B. B. Smith, E. S. Clarke, F. W. Martin, E. E. Canney,

Statistical.—F. J. L. Harrison, chairman, Robt. McKay, S. S. Patchell, R. O. Taylor, Alex Burgess, H. Du Jardin.

Entertainment.—D. J. Stewart, chairman, J. A. Forlong, W. Q. Burgess, W. B. Sterling, C. C. Heubach, W. A. Mackie.

Vigilance.—Dan McLean, G. K. Watson, S. S. Patchell, W. Q. Burgess, C. D. Lindsay, F. McMurray.

Publicity.—J. A. Dowler, chairman, W. J. Scrimes, E. J. Smith, T. Lawrie, A. L. Dennison, D. Cownie.

House organ.—J. H. Curtin, chairman, W. Lawrie, J. V. Nutter, J. A. Dowler, A. V. P. Rigg, J. Holroyde.

Grain insurance.—J. Holroyde, chairman, D. J. Stewart, W. P. Harris, F. C. Simpson, E. M. Whitely, G. I. Roberts.

Local.—J. V. Nutter, chairman, R. Bingham, R. L. Denison, F. R. Hopkins, C. H. McFayden, H. P. Crabb.

Membership.—W. E. Hawkins, C. K. Cavanaugh, R. S. McKibben, L. W. Greenisue, F. F. Carruthers, A. R. I. Palmer.

Foreign competition.—R. McKay, chairman, J. Pickering, W. J. Willcox, J. H. Curtin, B. C. Baken, H. H. Smith.

Legislation.—Thos. Bruce, chairman, W. R. Allan, W. T. Kirby, C. S. Riley, W. J. Christie, C. E. Sanders.

### First Year's Work

The first year's work of the club, which was reviewed by several speakers, indicated in the reports given the unique and remarkable success which has followed the organization of this, the first underwriters' organization in the Dominion to include company executives, general agents, soliciting agents, and all persons actively engaged in the business of fire and casualty insurance.

"The inspiration and effort of the club," Mr. Waugh stated, "had been a desire to disseminate to agents and the field force of insurance particularly, and to the insuring public generally, some intelligent comprehension of the broad field of the theory and modern practice of insurance. They had been at pains to give out the facts regarding insurance problems, the relations of insurers and insured."

Reports of the club's activities included emphasis on the publication of the monthly journal "Insurance" edited by the club, the circulation of which in the year had increased from an initial issue of 8,000 copies to now more than 15,000 copies each month of issue. It is sent to every agent in Western Canada representing a board company, besides circulating to heads of business institutions, bankers and financial men, public and government officials, and others interested directly or indirectly in insurance application. Numerous special bulletins had also been distributed, the number of these during the year totalling to an issue of 56,000.

### Use of the Club

N. J. Black, who was elected vice-president, outlined the uses of the club; the following were some of his remarks:—

"On the printed program the subject of my remarks is given as 'Use Of Club.' This terse method of expressing it suggests to one's mind a variety of treatments.

"You have laid before you in printed form the annual report, and have listened to addresses from our retiring president and secretary, emphasizing various features of the Club's work.

"I will confine myself to one or two suggestions of broad fields of usefulness, which seem to form the real objective of the Club and in which all these other activities will find a place.

"As a preliminary allow me to remind you of a time honoured truth, that we receive in benefit from any cause in direct proportion as we contribute to it. The value of this Club has been felt by many from Halifax to Vancouver, and the Club is indebted to them for many suggestions and acts of usefulness.

"I said I would not refer to the annual statement, but there is just one word in it that seems to properly come within the scope of my remarks. It is a word that has meant much to the success of this Club during the past year. That word is the name of our retiring President, Mr. J. C. Waugh. Mr. Waugh has contributed the same family characteristic to his work in the Club and has been an inspiration to all those associated with him.

### Medium of Expression

"One of the outstanding avenues of usefulness that I wish to mention, is that this Club forms a Medium of Expression. The public are still anxious and willing to listen to the voice that speaks from mature experience and knowledge. Insurance by means of iron clad financial contracts, operated for profit which is derived more from reduction of fire waste than by manipulation of rates has a real story to tell to the public, a story they are entitled to be told, and which in their own interests they should hear. The men who are devoting their daily activities to the sale of that insurance have also something to say to each other.

"Then it is a medium of expression amongst the agents themselves. The problems of your business are not peculiar to you or your office. They are being faced by a hundred different agents at the same time. The Insurance Club is a clearing house of difficulties, a source of information and a means of education for all.

### Watch Legislation

"The Insurance business needs protection from unconsidered legislation, from competition, and from mal-practices within its own ranks.

"Without reviewing in detail the methods adopted to meet these dangers, and which form a part of the work of your Committees, the point I wish to make is this, that the greatest asset possible to you and me as Insurance Agents is the building up of a public opinion without, and an Esprit-de-corps within, that will stand as the proverbial rock foundation of our work and against which the waves of inexperience and ignorance may dash themselves in vain. The Insurance Club affords the greatest possibilities as a Protective Agency of the Insurance business.

### Eastern Canada

"Then there is another feature. It would perhaps not be altogether proper to refer to it except at a time like this and in a meeting of this character, but it is a fact that we have already many reasons to be proud that the Western Canada Insurance Club is entitled to be stamped 'Made in Winnipeg.' Our retiring President has in his pocket an invitation to visit Eastern Canada, and it is prefaced by the remark that the Club should extend its operations to Eastern Canada or another organization along similar lines instituted.

"In closing let me say that no one in a few minutes can exhaust this subject, it must be left to your thought and imagination. The greatest value, after all, rests in its membership. As it stands represented and explained by these documents before you, it is an idea, a latent force, a dormant possibility, but touched by the lives of those I see around me, it becomes a living thing, pulsating with life and energy and its limit of influence and usefulness only bounded by the energy, ability and sacrifice of the members who hold its future in their hands."

### Publicity

J. A. Dowler presented an address on "Publicity and how to Utilize" as relating to the work of the Club. Mr. Dowler said:—

"It might be asked.

"Why is Publicity necessary?

"What have we to give publicity to?

"It is doubtful if there is anything that plays a more important part in the foundation of modern business today than Fire Insurance.

"It is the very basis of credit and large business undertakings would be impossible without it, because of the risks envolved.

"It touches every business, every household. It enters into the cost of everything we use and yet how little the average citizen, in fact even the better reformed business men know of the Fire Insurance business.

"The manner in which it is carried on.

"How the rates are calculated.

"Why it is necessary to build up Reserves.

"Why Stock Company Insurance is safer than Mutual Insurance.

"Why our enormous fire waste. The heavy taxes involved in the last analysis, must come out of the public.

"Why the difference between what is paid to the Companies in premiums and what is paid back by the Companies in losses does not represent net profit to the Companies.

### Why Publicity is Necessary

"Little if anything has been done to inform the public on these points or give them the real facts.

"It is these wrong impressions that exist and the general lack of proper knowledge that answers my first question, 'Why is publicity necessary?'

"The publication of the facts concerning the functions of the Underwriters Association and answers to all the questions I have referred to, answers my second question 'What have we to give publicity to?'

"How then had we best set about to properly inform the public and gain the public good will through a more complete and proper understanding of the Fire Insurance business generally.

### Propaganda

"The words propaganda and advertising to my mind represent two different types of publicity. It is advertising that sells Coca Cola but it is propaganda that is necessary to accomplish our purpose.

"The use of these two different types of publicity may have many fundamental principles in common but I believe at least four of these fundamentals to be:—

1. A definite objective.
2. Concentration.
3. A definite carefully planned line of action.
4. Persistence.

"We already have our objective which takes care of our first fundamental.

"In order to take care of our second fundamental 'Concentration' we should set down a definite and at first limited list of things to which we wish to give publicity and concentrate on those things until we accomplish what we are after. This list for instance might at first be limited to the following subjects:—

1. The functions of the Underwriters' Associations.
2. Growth of Fire Waste and its relation to the individual citizen.
3. Consistent and uninterrupted reduction in Fire Insurance rates that has taken place during the past 25 years.
4. The Local Agent's function in the business.

"The third fundamental 'A definite and carefully planned line of Action' depends almost entirely on the resources at our disposal. While a certain amount of money is essential to the accomplishment of any propaganda campaign, the use and co-operation of the men and organizations at our disposal is by far the most important and effective means of carrying out our plans.

"Having properly informed this large organization of Company men and Agents on the subjects we must secure their utmost co-operation in the larger task of informing the public.

### Methods to Be Employed

"The following are a few methods which might be employed:—

**Reaching the Agents.**

1. Co-operation of Company Managers, Employees, Inspectors in their correspondence and dealings with the Agents.
2. Arrange for meetings of Local Agents to be addressed by the Secretary or Company official.

**In Reaching the Public**

1. Co-operation of Company Officials, Employees, Inspectors and Agents in their correspondence and dealings with the public.

3. Furnish pamphlets on various subjects to companies for distribution to public by agents in their mail matter and along with Policies, etc.

4. Furnish News Items and articles for publication in daily papers, financial papers, and trade papers.

"That is rough and incomplete but definite line of action.

"Persistence"

"You know publicity is something like taking medicine and when the doctor tells you to take three pills a day. one after each meal, it won't do to take the whole three in the morning, nor will you get well twice as quick if you take twice as many pills. It is the same with publicity, it must be used regularly and persistently, the full effect will not be apparent at first, but it is bound to have a beneficial effect in due time.

"The matter of giving publicity to the business of Fire Insurance throughout Western Canada is a Big Job—not a one-man job—but a job that needs the utmost co-operation of every member of this Club. I trust therefore, that during the next year every man will do at least something to help accomplish our purpose."

## *Annual Reports*

### NORTHERN ASSURANCE COMPANY

Total income of over $32,500,000 is shown in the 1921 annual report of the Northern Assurance Company, of London, England. The compay is one of the most active in the Canadian field, writing fire and casualty lines under the management of G. E. Moberly, Montreal. Its net premiums on fire account in Canada in 1921 were $1,066,706, and losses $636,137. Its subsidiary, the Royal Scottish Insurance Company, Ltd., of Glasgow, entered the Canadian field in 1920, also under the management of Mr. Moberly.

The report of the company's operations as a whole shows funds totalling $60,777,556 at the end of 1921.

In the fire department the premium income is lower and the claims are higher than in the preceding year. The premiums were $12,879,115, being a decrease of $1,375,940 as compared with 1920. The loss ratio for the year under review amounted to 60.6 per cent. (or 55.2 per cent. after making provision for unearned premiums) as compared with 47.09 per cent. in 1920 and 44.2 per cent. in 1919. The expenses were 42.9 per cent. as against 39.1 per cent. in 1920. Owing to the reduction in fire premium income an amount of $685,000 is released from the unearned premium reserve, and the effect of this is to show an underwriting profit in the fire account of $221,495. To this is added interest earnings on investments of the fire department amounting to the large sum of $697,475, yielding a combined total of $918,950 as the result of the year, which has been transferred to Profit and Loss Account.

In the Accident department the premium income is slightly lower at $4,873,775 with an underriting profit of $506,970 as compared with a loss of $62,775 in 1920. Interest earnings in 1921 contributed $172,015, which added to profits of above $506,970, gives a total of $678,985, the amount transferred to Profit and Loss.

Results in the marine department were not so favorable, there being an underwriting loss of $160,000. Due to interest on investments, however, the company was able to transfer $738,955 from this department to profit and loss.

### WINNIPEG LIFE AGENTS

At the annual meeting held on July 16, the Winnipeg Life Underwriters' association elected the following officers for the coming year: Cecil M. Twiss, Manufacturers' Life, honorary president; John O'Grady, Great West Life, past president; John T. Hanna, New York Life, president; Arthur F. D. Anderson, Aetna Life, vice-president; J. E. Trotter, Mutual Life of N.Y., treasurer; J. L. Routly, Imperial Life, secretary.

The board of directors was elected as follows: A. L. Petty, Great West Life; A. S. Kennedy, Sun Life; A. E. Wilson, Canada Life; P. G. Leaney.

## *Recent Fires*

Fire losses in Canada during the week ended July 12, are estimated by The Monetary Times at $1,273,100, compared with $781,700 the previous week. The details are as follows:—

Total $90,000. Loss total. On Grain: Com. Union $10,000; Guardian $15,000. Total $25,000. Loss total.

On Premier Elevator Co. Building: Phenix of Paris $2,500; Lloyds $10,000; Mt. Royal $1,500; Norwich Union $5,000; Brit. Empire $1,500; Alliance of Phil. $5,000; Queensland $4,000; Guardian $2,500; Niagara $2,000; Firemen's Fund $2,000; Montrela Und. $5,000; Pacific Coast $3,500; North Empire $2,500; Motor Union $500; Glens Falls $2,500; Continental $2,500; Union of Canton $2,000; Brit. Colonial $1,500; Calumet $2,000. Through Doremus & Co., N.Y. and Coyle & Company, Dublin $67,000. Total $125,000. Loss total. On grain: Mount Royal $6,000; Guardian $4,000; North Empire $2,500; Calumet $2,500; Am. Central $2,500; Essex and Suffolk $5,000; Fire of Canada $2,500; St. Paul $5,000; Globe and Rutgers $5,000. Total $35,000. Loss total. Grand total $275,000.

**Quebec, Que.**—Fire losses in the city of Quebes for the month of May total $6,628,60.

### AGENTS ARE REBATING

Insurance agents, in a large number of instances, have at various times unwittingly broken the rule on prohibition of rebating, according to Arthur E. Fisher, provincial insurance commissioner for Saskatchewan, due largely to lack of knowledge of the act which covers this offense. In reading the sections of the act which cover this point, although the term "fire" insurance is used throughout, it must be understood that the ruling applies to agents writing hail insurance also, from whom the largest number of infractions come.

Here are the regulations:

"No agent, broker or other person, representing or doing business in Canada for any fire insurance company, licensed under this act, shall in any way directly or indirectly, divide or offer to divide his commission or remuneration with or give or offer to give any part of his commission or other remuneration or any other matter or thing of value to any person whose property he may be insuring or seeking to insure, or to any person having, or claiming, or appearing to have any influence or control as to the placing of such insurance as an inducement to insure with him or in or with a company employing him, or represented by him, nor shall any person knowingly receive as such inducement any such commission or other remuneration or any rebate of premium or other consideration intended to be in the nature of a rebate or premium."

### COBALT ORE SHIPMENTS

The shipments of ore from Cobalt Station for the week ended June 30, were:— Mining Corp., 81,405; La Rose Mine, 56,117; total, 147,582. The total since January *1st* is 1,769,998 pounds or 884.9 tons.

The only shipment of ore from Cobalt Station for the week ending July 7th, is American Smelting Refining Co., 50,119. The total since January 1st is 1,820,117 pounds or 910.05 tons.

### WATERLOO TRUST

The Waterloo Trust and Savings Company has opened an office in Galt, Ont., under the management of Charles F. McKenzie. George A. Dobbie and L. L. Long, both of Galt, have been added to the directorate as local representatives on the board.

# *New Incorporations*

Authorized capital of $11,989,000 is represented by companies whose incorporations were reported to The Monetary Times during the week ended July 8, compared with $14,932,500 the previous week. A comparative summary by provinces is as follows:—

|  | Wk. End. July 1. | Wk. End July 8. |
|---|---|---|
| Dom. .... | $ 1,435,000 | $ ,040,000 |
| Alta. .... | ........ | 546,500 |
| Br. Col... | 860,000 | 455,000 |
| Man. .... | 510,000 | ........ |
| Ont. .... | 11,480,000 | 6,227,500 |
| Que. .... | 647,500 | 55,000 |
| Sask. .... | ........ | 665,000 |
| Totals .. | $14,932,500 | $11,989,00 |

The following is a list of companies recently incorporated unde Dominion charter with head office. authorized capital and name of on of the directors:—

Dubilier Condenser and Radi Corp. of Canada, Ltd., (Otto G. O'Regan) Ottawa, $50,000; Appleford Co. Ltd., (Geo. H. Sedgewick Hamilton, $1,500,000; Anderson Motor Co. Ltd., (Frances X. ## ENGLISH COAL IMPORTED

### Low Freight Rates Makes Purchase Possible After Eight Years

After a period of eight years, during which only American and Nova Scotia coal has been used in Montreal, English coal has once more begun to appear on the Canadian market.

The low rates of ocean transportation that prevail today make it possible to buy English coal in Montreal for almost the same price as that produced, in the United States. As a result of the war many of the old marketing places of English coal have been lost. English coal magnates are now strenuously competing for the Canadian trade.

Although no great scarcity of coal has been apparent in Montreal this year yet, the present situation is not far from being acute. In spite of the small amount of coal produced in the United States since the miners went on strike a fairly steady supply has been forthcoming, from different sources.

"It is impossible to make any definite statement in regard to the coal strike," said A. Dick of the Dominion Coal Co., "but coal men generally expect the situation to become more acute, although they look for a partial resumption of work by the beginning of August."

The non-union mines have been working at full capacity, but they are having a hard time to supply the western part of the United States and the lake ports.

A fleet of ten ships owned by the Dominion Coal Co., is at present plying between Montreal and Sydney, N. S. Two ships of ten thousand tons each, seven of seven thousand tons, besides a number of smaller vessels are carrying to Montreal a total of 75,000 tons each week.

The Dominion Coal Co. has 40,000 tons of coal lying in Montreal at the present time. This stock will be greatly increased for the winter's needs. Although the stocks on hand are now more or less depleted a steady supply has been available for all consumers.

The demand for coal this year is much greater than it has been for some years past. Many factories in the Eastern Townships of Quebec that were forced to close, owing to the business depression, have found it profitable to reopen this spring. Their pressing needs are the cause of the increased demand.

There has also been some demand from Toronto. Ten thousand tons were shipped from Montreal to Toronto in June. It is expected that 20,000 tons will be shipped in July.

## LUMBER MILLS WILL REOPEN.

Reorganized by A. C. Frost, of Chicago, the large lumber mills at Giscombe, B. C., on the Grand Trunk Railway, will reopen and work on a large scale. The mill has been closed for almost four years.

The mill, which is 468 miles west of Edmonton and 24 miles east of Prince George, will ship its products to eastern markets. It has a capacity of 125,000 feet a day, and is one of the largest mills of Northern British Columbia. It controls extensive timber limits in the vicinity of Eagle Lake.

The controlling company four years ago was the Giscombe Lumber Company, Limited, which went into liquidation. The new company is operating under the name of the Giscombe Spruce Mill, Limited.

# Trade Again Shows Decline

### Twelve Months Imports Lower By $435,000,000—Exports Also Lower—Imports From Australia Increase By 50%

Both imports and exports for the twelve months ending May 31, 1922 show a large decrease from the same period during 1921, the former decreasing by about four hundred and thirty-five million, and the latter by about four hundred and twenty-six million, dollars. The 1922 total is also considerable lower than the 1920 total.

During the twelve months, we exported more than we imported to the United Kingdom, but on the other hand we imported more than we exported to the United States. Imports for consumption from Australia show an increase of slightly over fifty per cent., over the previous twelve months. There were several other gains in imports, noticeably from Argentina, Greece, Mexico and Roumania. Imports from Cuba show a decrease of twenty million dollars.

There were several minor increases in exports, particularly to Hong Kong, and Mexico. Exports to Japan show an increase of ten million, due to lumber shipments from British Columbia.

A comparison of Canada's trade for the twelve months ending 1920, 1921 and 1922 is given below:—

SUMMARY OF THE TRADE OF CANADA

1.—Imports and Exports of Canada by Main Groups.

| | Twelve Months ended May. | | |
|---|---|---|---|
| | 1920 | 1921 | 1922 |
| IMPORTS FOR CONSUMPTION. | $ | $ | $ |
| Agricultural and Vegetable Products | 261,305,356 | 252,448,550 | 159,045,997 |
| Animal Products | 100,075,367 | 54,287,378 | 45,859,541 |
| Fibres and Textiles | 264,263,530 | 208,258,457 | 144,254,754 |
| Wood and Paper | 45,065,286 | 55,635,795 | 35,544,919 |
| Iron and Its Products | 198,045,055 | 228,568,676 | 109,322,842 |
| Non Ferrous Metals | 55,945,371 | 51,236,481 | 29,764,541 |
| Non-Metallic Minerals | 126,911,872 | 207,987,355 | 129,998,793 |
| Chemical Products | 32,906,067 | 35,699,858 | 24,727,304 |
| Miscellaneous | 66,021,608 | 68,327,812 | 49,319,645 |
| Total Imports | 1,150,539,512 | 1,162,360,362 | 727,808,246 |
| Dutiable Goods | 752,090,074 | 802,382,842 | 478,407,848 |
| Free Goods | 398,449,438 | 359,977,520 | 249,400,398 |
| Duty Collected | 190,669,416 | 162,706,289 | 122,058,633 |
| EXPORTS (CANADIAN). | | | |
| Agricultural and Vegetable Products | 385,861,203 | 494,190,478 | 317,436,099 |
| Animal Products | 303,812,482 | 182,898,283 | 131,924,613 |

## STEEL MILLS ARE BUSIER.

### Plants at Hamilton, Sydney and New Glasgow Have Orders.

Although the May report of the production of iron and steel in Canada shows a further contraction in the output as compared with previous months, there were several reports during the latter part of July and the first part of August which stated that some of the companies had received additional orders and were increasing their staff accordingly.

The Nova Scotia Steel Company has secured an order from the Canadian Pacific Railway for steel products which will cause considerable increased activity in the steel plant at New Glasgow, N. S. The company has been carrying on during the depression, but the amount of employment provided has for some time been small.

According to a statement given out by the British Empire Steel Corp., the billet and blooming mills at the Sydney steel plant went on double shift on July 3. This new activity will increase the force employed to over 2,300 men. The mills will roll billets from cold ingots to furnish material for the rod and billet trade. For the first time in the twenty-two years of its history, the plant has successfully entered the foreign market for finished steel products. Orders are on hand for nails, barbed wire and galvanized wire for Buenos Aires, South Africa, New Zealand, Costa Rica, Colombia, India and British West Indies, it is announced. The largest order is 700 tons for Australia, and the smallest 100 tons each for South America and India.

It is stated that the British Empire Steel Corporation intends to expend the sum of $19,000,000 for additions and repairs to the Sydney, N.S., steel plant. It is also stated that engineers employed by the company are preparing plans for new open hearths and blooming mill which are to cost in the vicinity of $10,000,000. One blast furnace is to be rebuilt and a second one extensively repaired.

According to H. J. Waddle, president of the Canada Drawn Steel Co., the plant in Hamilton, Ont., is operating five days per week, or over double what they had been working a short time ago. It was stated that this increased activity was due to a much better demand for agricultural machinery and for products for car shops and various other kinds of machinery.

## NEW TRADE TREATY

### New Proposal Between Canada and France will be Discussed

According to an official announcement on July 5, Hon W. S. Fielding, minister of finance, Hon. Ernest Lapointe, minister of Marine and fisheries, and Hon P. C. Larkin, Canadian High commissioner in London, will represent Canada at the next assembly of the League of Nations, which opens at Genoa on September 4.

While in Great Britain and France, the minister of finance will take up various departmental matters between those governments and the government of Canada, it is understood. One of the matters which it is thought may engage his attention while in Paris will be that of resuming negotiations with the French government for a more comprehensive trade treaty between Canada and France than now exists.

The matter of a trade treaty between the two governments has been discussed to the extent of approaches having been made to the government by the French consul general at Montreal some weeks ago. At that time the government intimated its willingness to enter into negotiations "at a convenient time," but since then no action has been taken.

Referring to this matter, which was raised in the House of Commons during the recent session, Hon. Mr. Fielding said he anticipated "that one of these days the French government will take some further action; that they will give us some information as to what they suggest, and our desire is to have again with France a comprehensive treaty, as we had a few years ago."

There is also the question of a treaty with Greece, which may be taken up while the minister is overseas.

## RUBBER FOOTWEAR

Japanese buyers are looking to Canada to supply them with rubber footwear for the rainy seasons.

Inquiries have been received by the Department of Trade and Commerce from nearly a score of Japanese import and export firms, asking if Canadian manufacturers can supply them with storm rubbers for wear over the boots, and also with the long rubber boots similar to those worn in Canada.

Canadian manufacturers are being advised by the department that there is a good market awaiting their product in Japan if they care to develop the business there.

## NEWFOUNDLAND PAPER MILL

According to an official announcement, a plan for establishing a large paper-making industry on the Humber river on the west coast of Newfoundland, abandoned last winter when the government refused to guarantee the bonds of the enterprise in principal and interest, has been revived. The scheme was promoted by the Armstrong Whitworth Co. of London, England, and the Reid Newfoundland Company.

According to original plans, the Newfoundland government was to guarantee bonds to the extent of $20,000,000 to launch the industry and also to guarantee interest on the issue. This it refused to do. The present proposal is that the British and Newfoundland governments each guarantee $10,000,000 bonds and it is understood that the British authorities have agreed to assume their quota.

It is further announced that the Armstrong, Whitworth Company proposes to buy out the Reid company's interests in the project and carry on operations alone. Negotiations are proceeding with the two governments, and Premier Squires, who left recently for England made the trip chiefly in connection with the paper project, it was intimated.

## TOBACCO PRODUCTION IN 1920

The value of all Canadian tobacco products for 1920, was $74,652,188, an increase of $10,598,131 over the total for 1919, according to figures compiled by the Dominion Bureau of Statistics. The difference in figures is attributable to higher taxation and higher value of tobacco, as generally speaking production was lower in 1920 than in 1919.

Cigarettes contributed the largest item in a tabulation of values and quantities for 1920, reaching a total of 2,936,156,000 valued at $31,625,078. Smoking tobacco (all kinds) follows with 14,715,331 pounds valued at $19,749,207. Cigars with a production of $14,109,929 for 194,361,000 hold third rank. The province of Quebec is credited with 89.2 per cent of the total value of all tobacco manufactured; Ontario is second in importance with 9.7 per cent, the Western provinces, third, with 0.8 per cent and the Maritime provinces last with only 0.3 per cent.

Only Ontario and Quebec report the manufacture of cigarettes. No chewing tobacco is manufactured west of Ontario, and Quebec manufactures all of the snuff, with the exception of 160 pounds credited to the Western provinces.

Imports of unmanufactured tobacco show a decrease of 3,770,292 pounds in 1920 over the preceding year, the totals being 24,891,021 pounds and 21,120,729 pounds for 1919 and 1920 respectively. Cut tobacco is the largest item of manufactured tobacco imported, the figures being 474,897 pounds valued at $586,011 in 1919, as against 567,202 pounds worth $986,931 in 1920. The total value of imports amounted to $15,718,180 in 1920, an increase of $2,061,947 over the $13,656,233 reported in 1919.

Exports show the very large decrease of $4,332,748, the respective values for 1919 and 1920 being $4,997,557 and $664,849. Unmanufactured tobacco shows the only increase being $168,274 in 1920, as against $92,860 in 1919.

## *New Industries*

With the passing of a by-law by the ratepayers, of Bracebridge, Ont. the Maple Leaf Hosiery Co., will commence operations at once, and will employ about 50 hands.

The ninth new industry to locate at Belleville, Ont., within the past fifteen months, is the Belleville Rubber Crepe Products Co., which has already commenced operations.

The Winchester Dye Co. Ltd., is equipping a plant to manufacture dyestuffs at Trenton, Ont. The company has recently been incorporated with Canadian capital.

A plant has been erected at Fergus, Ont., by the Dominion Dyestuffs, Ltd., and a line of ten or twelve standard colors, including acid direct and chrome colors, is being made. The company has an authorized capital of $150,000.

## BIG OUTPUT OF NEWSPRINT

The International Paper Co., is now operating at about 75 per cent., capacity, the production of newsprint being 920 tons per day. The fourth and final unit of the large machines at the Three Rivers, Que., plant is also starting up. It is stated that the company has about 1,250,000 cords on hand.

## PURCHASE LUMBER

The Pacific Mills, Limited., of Vancouver has purchased ninety square miles of timber on Skidgate Island at a cost of $500,000. The timber will be brought to the company's paper plant at Ocean Falls.

# Municipal Finance

**Lindsay, Ont.**—The tax rate for this year has been struck at 45 mills on the dollar, an increase of 5 mills over last year.

**Brampton, Ont.**—The tax rate for 1922 has been struck at 40 mills on the dollar, being two mills higher than last year. The total assessment of the town is $3,435,324. The estimated revenue for the year is placed at $52,377, with an approximate expenditure of $183,830.

**Hamilton, Ont.**—The financial statement for the year 1921 has just been issued by the city auditor in which he says: "The various receipts have been paid over and credited in the treasurer's books. The traffic and other receipts of the Hamilton Street Railway have been checked and the payments to the city verified. There is a small mileage adjustment to be made which will be included in our 1922 accounting.

"The guarantee bonds of the corporation officials have been examined and found correct.

"The arrears of taxes amount to $590,864, an increase of $109,689, over the previous year. The percentage of arrears for 1921 is 8.5, a small increase over the previous year, but the 1921 rolls were much larger than the preceding year, the receipts amounting to $4,000,242, as compared with $3,238,730. The tax collector is still making all efforts possible to collect the outstanding taxes and this policy will be continued. Interest at 6 per cent. in addition to the usual penalties, is being added to the past due taxes, dating May 1, 1919, following legislation secured.

"The redeemed debentures, amounting to $607,138 and the paid interest coupons, amounting to $661,246, have been counted by me and destroyed by fire in the presence of the city clerk and the acting city treasurer.

"The debenture debt, less sinking funds, now amounts to $12,320,241, an increase for the year of $1,440,572.

"During the year investments from our sinking fund to the amount of $11,750 in Victory bonds and $431,600 in our own debentures were made."

Total assets of the city amount to $34,060,129, and total liabilities, $26,634,388. The liabilities include the $6,478,928 issued to guarantee the Hydro radial project, and $800,000 for housing purposes.

Taking the city's population to be 118,000, the debenture debt per capita in 1921, amounted to $104.40.

**Regina, Sask.**—The Regina General Hospital had a deficit of $16,844 for the five months ending May.

**Prince Rupert, B.C.**—According to the annual report for the year ended December 31, 1921, as prepared by the city's auditors, the debenture debt at the beginning of the year amounted to $1,723,537. To this was added $342,200 for debentures sold during the year. An amount of $182,052 was deducted for instalment repayments during the year, leaving the net debt as at December 31, 1921, exclusive of $38,584 held in sinking funds, not yet applied, of $1,883,685.

The city's gross surplus of assets over liabilities has increased during the year from $918,172 to $1,032,790, which is mainly accounted for by the inclusion this year among the city's assets of its school properties amounting to $95,694.

The general revenue accounts shows that the revenue during the year amounted to $238,885, and expenditures were $225,789, leaving a surplus of $13,096, as compared with a surplus of $16,109 during 1920.

During the year the civic utilities had a net surplus of $13,987. The electric light department's surplus was $11,918, and the telephone department had a surplus of $3,634, while the water department had a deficit of $1,566.

Total taxes levied during 1921 amounted to $329,609, as compared with $313,403 in 1920. The total assessment in 1921 was reduced to $8,773,649, and the tax rate was increased to 30.82 mills.

**Hamilton, Ont.**—Out of an estimated amount of $255,000 from water rates for the first half of 1922, $252,000 had been collected up to June 18.

**Lethbridge, Alta.**—The tax rate for the present year has been struck at 45.9 mills on the dollar, an increase of 1.3 mills over last year. The total amount to be raised by taxation is about $30,000 less than previously, being $542,128 as against $572,605.

**Brantford Twp., Ont.**—The tax rate for 1922 will be 24 mills on the dollar, an increase of 8 mills over last year. The increase was necessary in order to pay off the present overdraft of $22,694.

**Mount Royal, Que.**—The Metropolitan Commission has approved the loan of $300,000 to build workmen's homes. The money will be borrowed from the provincial government.

It is stated that the financial conditions of the town is very good, the value of the land being $9,585,584, and the value of buildings $604,500. The funded debt, including the floating debt and the above loan, is $1,818,113, and the municipality has a surplus on hand of $17,796.

**Kitchener, R.M., Alta.**—The total assessment for 1921 has been placed at $2,065,627, with a total levy of $25,820. The tax rate is 12.5 mills on the dollar.

**Calgary, Alta.**—During the month of May the street railway had a deficit of $11,234, as compared with a deficit of $230 in May last year.

**Regina, Sask.**—Tax receipts for the period ending June 30 were $824,566, out of a levy of $1,965,000 for the year. This compares with $941,498 collected for the same period, out of a levy of $2,063,000 for the year.

**Toronto, Ont.**—Payments on the first instalment of taxes amounted to $14,788,625, out of a total of $26,057,471 for the year.

**Crowland, Twp., Ont.**—The tax rate for this year was placed at 10 mills on the dollar, an increase of 5 mills over last year's rate. The estimated expenditures for the year total $26,866.

**Edmonton, Alta.**—According to City Commissioner Yorath the city's financial position on June 28 was infinitely better than it was on the same date last year, there being a cash credit at the bank, on current account of $570,318, while bonds are held by the city to the sum of $459,606 are also to be credited, making the city's total credit balance on the above date, on current account $1,029,924. At the same period last year the city had a bank overdraft of $313,331.

**Mitchell, Ont.**—The tax rate for 1922 will be 40 mills on the dollar, which estimated on the assessment roll of $1,005,463, will produce $40,217 in taxes. The expenditures are estimated at $53,293 and receipts at $13,075.

**Grimsby, Ont.**—The tax rate for the present year will be 16 mills on the dollar, a decrease of 5 mills from last year.

**Wallace R. M. Man.**—The tax rate for 1922 will be 7 mills on the dollar, the same as last year.

**Hamilton, Ont.**—For the first half of the year the works department expended $281,607, leaving a balance of $307,784 for the balance of the year.

**Regina, Sask.**—The city's public utilities showed a net surplus of $55,174 for the first five months of the year after making allowance for an administration charge of $7,083, according to a report prepared by the city auditors.

While the estimated surplus of the electric light and power department for the entire year, 1922, was $75,007, the department has nearly made that much the first five months of the year, the surplus at May 31 being $73,289.

On the other hand the other two utilities have created a deficit for the period amounting to a little over $11,000. The street railway is responsible for $7,001 of this total, the waterworks department being behind $4,030.

**Calgary, Alta.**—Tax collections for the period ended June 20, amounted to $1,377,764, as compared with $1,563,672 for the same period last year.

**Edmonton, Alta.**—At the last session of the Provincial Legislature, an amendment was obtained to this city's charter which enabled the city to charge 5 per cent. interest on all taxes not paid before the 1st of June, instead of as under the previous arrangement of allowing 10 per cent. discount for the prompt payment of taxes.

Under the old system of allowing a discount, the sum of $250,000 had to be included in the tax levy, but under the new system it is expected that the 5 per cent. interest rate will go a long way towards paying the bank interest on loans which the city finds it necessary to make. It will be seen that the change in method was justified from the following results:—

Up to the 13th of June, 1922, the amount of taxes collected, including arrears, was $2,333,746 compared to $2,120,486 to the same date in 1921, an increase of $213,251. The amount of current taxes collected this year is $1,939,403 compared with $1,643,890. to the same date in 1921, an increase of $295,513. The percentage of current taxes collected this year to the 13th of June is 64.8 per cent. compared with 47.7 per cent. up to the same date in 1921.

The collection of taxes has been so good that the bank loan on current account has been paid off and the city has approximately $1,000,000. standing to its credit at the bank. Instead of allowing this money to remain on deposit with the bank earning a small rate of interest, $600,000 will be invested in bonds maturing in December next bearing 5½% interest.

**Toronto, Ont.**—In a report on the finances of the Harbor Commissioners prepared by the city auditor, the inventory shows $19,707,023 of real estate, plant, buildings and equipment, with stores valued at $187,446. The total debenture debt is $17,847,000; capital account, $8,985,436. Sinking fund provision is placed at $554,097, which is made up of debenture debt redeemed in 1918-19-20.

## BIG INCREASE IN SHIPPING

### Vessels Leaving Vancouver in 1921, More Than in Previous Year.

The Vancouver Harbor Board has just issued the annual report of the number of vessels and gross tonnage shipping out of Vancouver during 1921, and it is shown that there was a large increase in deep-sea shipping during the past year.

The report shows that the number of vessels shipping out of the port during 1920 was 336, and during 1921 the number was 389. The total gross tonnage in 1920 amounted to 1,884,042, as compared with 2,659,366 in 1921. Adding foreign coastwise shipping to the figures for 1921, the total was 496 vessels and 2,946,000 gross tons. This is a gross tonnage increase of 1,062,617 over 1920.

A summary of the volume of trade shows greater imports than exports, the imports for the 12 months being 1,554,562 tons and 531,203.382 board feet of lumber and logs. The value of imports was $197,406,832. The exports were 269,230 tons and 351,355.173 board feet of lumber and logs, valued at $112,136,784. The local coastwise imports show an excess of exports of 516,977,161 board feet, the imports being 530,703,206. The foreign coastwise imports of lumber were 151,346 and the exports 29,598,000, an excess of exports over imports of 29.446,655. The deep sea lumber imports were 348,931 board feet and exports 136,175,333.

The report deals extensively with the wheat movement, showing that the total amount of wheat shipped in from January 1, 1922, to March 25, 1922, was 3,281,741 bushels.

## CONFERENCE ON WHEAT

An interprovincial conference between Alberta and Saskatchewan on the wheat board question may be arranged for an early date. Premiers Greenfield and Dunning are now in correspondence on the matter, the idea being that the two provinces should get together, compare notes and ascertain whether or not it will be possible for them to act in co-operation and in time to secure the functioning of a wheat board this year.

Under the terms of the Dominion Act it will be necessary for at least two provinces to act together in the adoption of the Federal legislation, and since Manitoba is just now immersed in a Provincial election contest, it recognized that the onus is upon Alberta and Saskatchewan, if the wheat board scheme is to be made operative.

The place and time of meeting for the two-province conference have not been fixed, but it is likely such a meeting will be arranged shortly.

## NEW PULP MILL

It is reported that the Premier Paper and Power Company of Halifax has purchased the H. Croix Paper and Lumber Company, acquiring the latter's watershed and 26,000 acres of pulpwood, and is planning the early construction of a new paper mill and power plant to cost approximately $1,500,000. The mill will be 35 miles from Halifax, and will consist of two hydraulic turbines generating approximately 3,300 h.p., four water wheels to drive grinders, and one newsprint machine.

A Higher Income
—No Extra Cost

Investors can, from time to time, exchange their holdings of bonds for other well-secured issues and not only receive a satisfactory increase in their net income returns, but also make a substantial addition to their capital investment.

We will be pleased to make suggestions on request.

The Strength of Water Power Securities

Strikes, deflations, inventories to mark down, and all other afflictions of the average industrial security have had but little effect upon strategically located Water Power Companies.

The services of Power Companies have been but little affected by changing business conditions. On the contrary, most of them are showing steadily increased earnings, both gross and net.

Our experience which extends over many years, convinces us that they are the most desirable securities, combining safety with a generous interest return.

## BILLS OF SALE ORDINANCE.

In an action by execution creditors to recover a quantity of lath which the Alberta Fish Co. claimed to have bought from the debtor company, the Supreme Court of Alberta has decided that the immediate delivery and actual change of possession required by section 9 of the Bills of Sale Ordinance (Alberta) is an open delivery reasonably sufficient to afford public notice thereof. The provisions of the section are not complied with by removing the goods a short distance from a lumber yard to a railway right of way, there being nothing to indicate to the public that the goods are not still in the possession of the lumber company.

## APPLICATION OF SUCCESSION DUTIES

### Justice is Critical of Law Enabling Province to Collect on Outside Property

Chief Justice Hunter, of the B.C. Supreme Court, in deciding a case on succession duties, has recently given a rather interesting instance of the application of the rule that property outside the province belonging to a person dying domiciled in B.C. is liable to succession duty. He says: "It follows that if a man maintains a residence in Toronto and dies domiciled in British Columbia, that the contents of his Toronto residence are liable to British Columbia taxation, although he may never have had any intention of moving the asets to British Columbia. I find it difficult to persuade myself that such a result was ever contemplated by those who framed the enactment, in fact I would have thought that by the use of the words 'within the Province' they expressly intended that it should not be in the power of the Province to tax property actually situate in another Province but that each Province was to be confined to such as was within its own borders. However, the result is that by means of a maxim which says that things are in law what they may not be in fact, taxes may be exacted in respect of property outside the Province, and one can imagine the rapture of the first Provincial Minister of Finance who made the discovery that he might get an extra territorial property under the shield of this legal fiction, as well as the shock experienced by the recipient of the first attack.

"If Latin maxims are to be called to control the plain meaning of English statutes then there seems to be some danger that the Court will become the temple of a mysterious cult intelligible only to the initiated instead of being preserved as the shrine of that common sense which all can understand. However, the question is settled so far as I am concerned, and there must be judgment for the Crown."

## LARGER PAPER CAPACITY

It is expected that early in July the newsprint mill of the St. Maurice Lumber Co. at Three Rivers, Que., a subsidiary of the International Paper Co., will bring its fourth paper machine into operation, and will then constitute one of the largest single paper mills on the North American continent, with a newsprint capacity of approximately 340 tons a day. The mill is also equipped with a wrapping machine capable of turning out 30 tons a day and has an excess of pulp production of some 200 tons.

# Government and Municipal Bonds

Following practically the same trend as during the same time last year, the bond market has developed the usual summer complaint, namely quietness, and no amount of coaxing seems to be able to get it into activity again. This is shown in several of the sales during the past week, when, although hids were fairly numerous, there was a tendency to shade the prices slightly lower than those which have been prevailing during the spring.

An interesting feature of the week, and one which shows the trend of the market, was the large bond offering of the province of Alberta, which was for $3,500,000, 5 per cent., 30-year debentures, on which alternative bids were asked for bonds payable in Canada or the United States. A bid of 93.582 was put by a syndicate headed by Harris Forbes and Co., which represented a cost to the province of 5.44 per cent., but all tenders were rejected. As the province was in need of money they decided to issue 5½%, 5-year bonds and tenders were therefore asked for on same, the issue going to a syndicate headed by Wood, Gundy and Company, they paying a price of 99.14 Canadian funds, representing a cost to the province of 5.70 per cent.

With the exception of the Alberta issue, bond sales during the week were slightly lower than previously, and a glance at the sales will show that the price trend is inclined to be slightly weaker.

### Coming Offerings

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders close |
|---|---|---|
| York Township Ont. .... | 306,080 | July 17 |
| Moose Jaw, Sask. ...... | 182,470 | July 15 |
| St. Jerome, Que. ...... | 156,000 | July 18 |
| Peel Co., Ont. ........ | 80,000 | Sept. 1 |
| Bridgeburg, Ont. ...... | 60,000 | July 24 |
| St. Laurent, Que. ...... | 35,000 | July 14 |
| West Vancouver, B.C. .. | 36,100 | July 20 |
| Cochrane, Ont. ........ | 26,000 | July 15 |
| Stettler, Alta. ......... | 20,000 | July 18 |
| Dutton, Ont. .......... | 18,000 | July 17 |
| Wetaskiwin, Alta. ...... | 11,000 | July 18 |

**Bridgeburg, Ont.,**—Tenders will be received up to 6 p.m., July 24, 1922, for the purchase of $30,000, 6 per cent., 20-instalment school, and $30,000, 6 per cent., 20-Instalment town hall debentures. H. G. Patriarche, town clerk. See advertisement in this issue.

**York Township, Ont.,**—Tenders will be received up to July 17, 1922 for the purchase of $76,000, 6 per cent., 20-25-30-instalment, and $230,080, 6 per cent., 10-instalment debentures. W. J. Douglas treasurer, 40 Jarvis St. Toronto.

### Debenture Notes

**Newmarket, Ont.,**—The council has decided to build a $54,000 school.

**Dominion of Canada,**—On July 5, Hon. W. S. Fielding, minister of finance, stated that it was decided to raise money required by the government to meet loans maturing on December 1, 1922, in Canada, the Domestic Loan will probably be floated in the early autumn. Mr. Fielding stated that the government had not yet taken any steps in regard to the new loan, but that early autumn would be the best time to raise money through a domestic loan.

**Colborne, Ont.,**—The request of the Board of Education for $40,000 has been granted by the council.

**Enderby, B. C.,**—The rate payers passed the $23,000 electric light by-law.

**Saskatchewan,**—The following is a list of authorizations granted by the local Government Board from June 24 to 30, 1922.

School Districts:—8 per cent., 10-years: Emerson, $3,000; Bear Island, $4,000. 15-years; Salvador, $4,000; Golburn Valley, $1,300.

Rural Telephones:—8 per cent., 15-years annuity: Verwood, $1,200; Coleston, $2,350; Bradley, $2,550.

**Montreal South, Que.,**—The Deputy Minister fo Municipal affairs has authorized the flotation of a $20,000 bond issue for sewer purposes.

**Saskatoon, Sask.**—Money by-laws totalling $81,000 were defeated by the ratepayers.

**Hull, Que.,**—Money by-laws totalling over $500,000 have been passed by the ratepayers.

**Alberta,**—All bids for the $3,500,000, 5 per cent., 30-year debentures were rejected on July 6, and the rate of interest being raised to 5½ per cent., the bonds were sold to a syndicate headed by Wood, Gundy and Co., at a price of 99.14 Canadian funds.

Tenders were originally called for $2,500,000, 5 per cent., 30-year bonds payable in Canada and United States, and $1,000,000, 5 per cent., 30 year bonds payable in Canada only. Bidding for these issues was fairly keen, no less than ten bids being received. The following is a list of tenders for both issues, the larger issues being represented in American funds:

| | $2,500,000 | $1,000,000 |
|---|---|---|
| Harris Forbes & Co., and National City Co. | 93.582 | 92.77 |
| A. Jarvis & Co., Brown Bros., and Cyrus Pierce Co. ........ | 92.736 | |
| A. E. Ames and Co., Guaranty Trust Co, Blythe, Witter & Co. and the Continental & Commercial Trust and Savings Bank. ........ | 91.63 | 92.42 |
| Wood, Gundy & Co., Dominion Securities Corp., and Dillon Read and Co. .......... | 92.19 | |
| A. Jarvis & Co., McLeod, Young, Weir & Co., Gairdner, Clarke & Co., and W. A. MacKenzie and Co. ............ | | 91.28 |
| C. H. Burgess & Co., Canada Bond Corp., MacNeill, Graham & Co., and Nesbitt, Thomson and Co. .......... | | 91.133 |
| R. C. Matthews & Co., McLeod, Young, Weir & Co., Halsey, Stuart & Co., Blair & Co., Wells & Dickey Co., and First National Co. ........ | 90.95 | |
| Wood, Gundy & Co., and Dominion Securities Corp. .......... | | 90.95 |
| Harris, Forbes & Co., R. A. Daly and Co., R. C. Mathews & Co., and National City Co. ...... | | 89.69 |
| A. E. Ames & Co. .. | | 89.579 |

**Cornwall, Ont.,**—The council has authorized the issuing of $75,000, 5½ per cent., debentures for school purposes.

**Rosetown, Sask.,**—The ratepayers have passed the $24,000 by-law for the erection of a new school.

**North Bay, Ont.,**—A by-law for the issuing of $47,000, 5½ per cent., 20-year debentures was passed by the council on July 3.

**Alberta,**—The Board of Public Utility Commissioners has authorized the following school districts to borrow money: Elmwood, $1,800; Veteran, $4,000; Carolside, $500; Conjuring Creek, $2,900; Whitecourt, $6,000; Limeson, $1,500; Edmonton, $175,000 and $25,000; Allbush, $1,000.

**Perth County, Ont.,**—In a letter to the Monetary Times, G. Hamilton, county treasurer, states that the county will not be issuing any debentures at present, and not likely to in the future.

**British Columbia,**—The following certificates have been issued by the Municipal Department upon the following dates:

June 12: District of Summerland, $15,000, 6 per cent., 15-years, for waterworks.

June 13: City of Kelowna, $6,000, 6 per cent., 10-years for fire apparatus.

June 13: City of Kelowna, $20,000, 6 per cent., 20-years for electric light by-law.

June 13: City of Kelowna, $65,000, 6 per cent., 20-years for waterworks.

June 13: City of Cranbrook, $35,000, 6½ per cent., 20-years for waterworks.

June 15: City of Nelson, $60,000, 6 per cent., 15-years for street improvements.

July 4: City of Kamloops, $17,000, 6 per cent., 20-years for sewers.

**Simcoe County, Ont.,**—The finance committee was favorable to granting county guarantees on the following debentures: Beeton village, $18,000 for the erection of a school house; Town of Stayner, $67,000 to erect a public and continuation school; Alliston, $40,000 to pay for erecting in addition to the school now used as a high school in Alliston, and for making improvements thereto; also for the purpose of building an addition to the school now used as a public school; Bradford, $8,000 for the purpose of constructing a permanent roadway; Orillia, $30,000 for waterworks purposes; Collingwood, 37,350 for the issue of consolidated floating debt debentures; Midland, $30,000 for extensions and improvements to its electric light system.

**St. Lambert, Que.,**—All tenders for the $125,000, 6 per cent., 10-instalment school debentures were rejected by the school commissioners. A bid of 98.78 was put in by Rene T. Leclc & Co., and another bid of 98.27 was received from the Municipal Debentures Corp., and L. G. Beaubien & Co.

**Ford City, Ont.,**—The ratepayers will be asked to vote on August 5, on a by-law authorizing the expenditure of $ 1,000 for fire equipment.

On July 11, the council passed a debentures by-law for $63,000 for purchasing hydro equipment.

### Bond Sales

**Riviere du Loup, Que.,**—An issue of $200,000 5½ per cent., 20-year debentures was sold to Municipal Debentures Corporation jointly with Provincial Securities, Ltd., at a price of 95.07, the money costing the city about 5.92 per cent. The following is a list of tenders:—Municipal Debentures Corp., and Provincial Securities L'd., 95.07; L. G. Beaubien & Co., and Credit Anglo-Francais, 95.02; Versailles Vidricaire & Boulais, Ltd., 95.01; Provincial Bank of Canada, 94.012.

**Alberta,**—A syndicate composed of Wood, Gundy & Co., Dominion Securities Corp., and Dillon, Read & Co., were the successful tenders for the $3,500,000, 5½ per cent., 5-year debentures, paying a price of 99.14 Canadian funds, the money costing the province about 5.70 per cent.

The above issue is that for which tenders were called for up to July 6 for $3,500,000, 5 per cent., 30-year debentures, all tenders being rejected and the bond dealers being given another 24 hours in which to submit revised bids. The interest rate has been changed from 5 to 5½ per cent., and the maturity has been reduced from 30 to 5 years.

**Toronto Twp., Ont.,**—The following is a list of tenders received for the $40,000, 6 per cent., 20-instalment debentures; W. L. McKinnon & Co., 103.34; Gairdner, Clarke & Co., 102.64; R. C. Matthews and Co., 101.75; Wood, Gundy & Co., 101.65; Municipal Bankers' Corp., 101.56; and C. H. Burgess & Co., 101.43.

**Victoria, B.C.,**—The Cemetery Board has sold $40,000, 5½ per cent., 30-year debentures to Pemberton & Son and British American Bond Corp., at a price of 97.25, the money costing the Board about 5.72 per cent.

**Parry Sound, Ont.,**—The Municipal Bankers' Corp., has purchased $25,000, 6 per cent., 30-instalment debentures.

**Edmonton, Alta.**—An issue of $25,000, 6 per cent., 10-instalment debentures has been sold locally.

**Charlottetown, P.E.I.**—The following is the list of tenders received for the $50,000, 5½ per cent., 20-year debentures: Johnston & Ward, 100.52; J. M. Robinson & Sons, 100.29; Thomas Armstrong & Bell, Ltd., 100.09; R. C. Matthews & Co., 99.27; McLeod, Young, Weir & Co., 99.11; R. A. Daly & Co., 99.05; Eastern Securities Co., 99.034; A. Jarvis & Co., 99.; Wood, Gundy & Co., 98.82; and A. E. Ames & Co., 98.13.

**Orillia, Ont.**—W. C. Brent & Co., have purchased $30,000, 5½ per cent., 30-instalment debentures at a price of 98.21, the money costing the town about 5.66 per cent. The bonds are guaranteed by the county of Simcoe. The following is a list of tenders: W. C. Brent & Co., 98.21; McLeod, Young, Weir & Co., 98.07; W. L. McKinnon & Co., 97.70; R. C. Matthews & Co., 97.63; Gairdner, Clarke & Co., 97.516; Wood, Gundy & Co., 97.38; and C. H. Burgess & Co., 95.55.

## LIABILITY FOR SUCCESSION

### Court Defines "Property Situate In Nova Scotia" as Regards Bequest of Shares.

In the case of Attorney-General of Nova Scotia v. Delmar, the plaintiff claimed that certain shares of the capital stock of the Nova Scotia Steel and Coal Co. held by Joseph Raphael De Lamar at the time of his death, the certificates for which shares at the time of the death of the said De Lamar were in the city of New York, were property situate in Nova Scotia and subject to the payment of duty under the Succession Duty Act.

The testator, a citizen of the United States and having his domicile in the city of New York, bequeathed to his daughter, also a citizen of the United States and domiciled in the state of New York, certain shares of common stock of the Nova Scotia Steel and Coal Co., a company incorporated by special Acts of the Nova Scotia Legislature, having its head office at New Glasgow. The company's stock was listed on the New York Stock Exchange and the Equitable Trust Co. of New York was the transfer agent of the shares of the company in New York and was authorized by resolution of the directors of the company to issue and countersign, when properly signed by the officers of the company, an issue of certificates of shares of common stock to the number of 75,000 shares and also to keep the necessary records in connection therewith,

The Court held that as the certificates for the shares bequeathed were in New York at the time of the death of the testator, they could not be said to be "property situate in Nova Scotia" within the meaning of sec. 7 of the Succession Duty Act, as they could be transferred in New York, where they were registered, without reference to anyone in Nova Scotia and without invoking the aid of the laws of the province and it not being necessary to come to Nova Scotia for the administration of the estate or for ancillary probate, everything necessary being able to be done in New York and that such shares were not subject to the payment of duty under the Succession Duty Act of 1917.

## COAL IMPORTS

According to advices, coal was imported from the United States during March to the extent of 615,000 tons more than in February and amounted to 41 per cent., more than the average quantity imported during the same month in the three preceding years. The total importations from the United States for this year to the end of March were only about 1 per cent., less than the average quantity brought in during the same period of the three years 1919-20-21.

The Canadian coal visible at the end of the twelve months ending March, 1921, comprising all coal imported or mined in Canada, but excepting the tonnage of Canadian coal exported during the period, amounted to 30,751,000 tons, as compared with 35,900,000 tons for the twelve months ending March, 1921, and 29,226,000 tons in the twelve months ending March, 1920.

The output of coal from Canadian mines in the month of March was 1,400,000 tons or 107,000 tons more than in the preceding month.

**Advice That Was Good!**

A year ago, with plenty of emphasis, we urged investors to buy Government and Municipal bonds while prices were low and interest rates high.

Those who acted upon this advice have seen their bonds advance from, say 5 to 10 points.

Yet, even now, the advice to buy bonds is excellent. Interest rates are still high and everything points to a further increase in principal value and a decline in interest yields.

The wise investor is investing his cash balance now and is also selling his short term bonds to buy long term securities at present prices.

Write for a good list of long term bonds and let us advise you again.

# The Stock Markets

Although Wall Street has been somewhat unsettled, during the past few weeks, by very disquieting news from Germany regarding the probability of a financial crisis in that country, the Canadian markets do not appear to show any affect of this unsettlement so far. There was a decidedly healthy tone throughout the list, and on the whole, the general price trend was upward.

During the first part of the week under review, the market showed improvement in every respect over the previous days, there being a considerable increase in the volume of business, and appreciable broadening out of the list, and a firm to strong tone predominating. Paper issues were the dominating feature during this period with Abitibi leading the market in the point of activity, and scoring an advance of several points over the preceeding week. The other paper stocks were also active, some of them showing advances from one point upwards. Utility issues, more particularly Toronto Railway, Twin City and Brazilian, continued to keep up their good showing from the previous weeks, and were traded in to a large extent. The general industrial list showed a noticeable improvement, with gains slightly predominating the losses.

However, during the latter part of the week under review, and more particular on Saturday, the stock market once more reverted to the dullness that marked it before the flurry which occurred during the first part of the week, and and a large measure of the buoyancy displayed during the first part, was lacking at the end of the week. This movement had the effect of curtailing the volume of business, and also showing a slight weakness in the list. The general list was slightly narrower and most of the trading was in broken lots only. Most of the issues were fairly steady, although some were inclined to ease off slightly.

With the market once more reverting to the dullness which has prevailed over the market for some time past, it is not generally expected that it will show any signs of a revival until some time in the fall, and more particularly until the crops are harvested.

### Brunette Sawmills, Ltd.

The Westminister Trust Company, New Westminister is offering $100,000, 7 per cent., first mortgage sinking fund bonds, maturing in 1932, of the Brunette Sawmills, Ltd. This issue is the balance of a total issue of $150,000, of which $50,000 has been purchased by a group of New Westminister investors.

The bonds will be callable by drawing for sinking fund investment at the following prices on 6 per cent., basis: 1925 at 105.65; 1926 at 104.98; 1927 at 104.28; 1928 at 103.05; 1929 at 102.07; 1930 at 101.86; and 1931 at 100.96. The bonds will also be callable for retirement of the whole issue at the above prices plus one per cent., bonus.

The authorized capital of the company is composed of 10,000, 6 per cent., cumulative preferred shares at $100 each, and 10,000 ordinary shares at $100 each, making a total capitalization of $2,000,000.

The proceeds of the sale is partly for the purpose of financing the reconstruction of the plant, which was partially destroyed by fire last January. The net earnings for the past nine and a half years have averaged $66,000 per annum, or six times the annual interest charges created by this issue. In 1920 the plant was appraised at a value of $796,634.

### Windsor Machine Works

An issue of $100,000, 8 per cent., first mortgage bonds of the Windsor Machine & Tool Works, Ltd., is being made by Marshall & Wilkin, bond dealers, Windsor, Ont., at a price of $100 and accrued interest.

The bonds are dated June 8, 1922 and are due June 8, 1932, with interest payable half-yearly at the office of the Canada Trust Co., Windsor. Bonds are in denominations of $100, $500 and $1,000.

A sinking fund will be provided for the redemption of the bonds, which will be purchased on June 8, 1927 at 105; June 8, 1928 at 104; June 8, 1929 at 103; June 8, 1930 at 102; June 8, 1931 at 101; and June 8, 1932 at 100.

The appraised value of the company's plant, etc., is $235,000. The company was originally founded in 1910 by L. A. Wilkie, who is general manager, and has now worked up to its present position. The average earnings of the company for the past seven years have been $23,500, or an earning of over 20 per cent., net on the average investment.

### Appleford Company

The Appleford Company, Ltd., of Hamilton is offering $635,000 preferred shares of the company. The capitalization is composed of 10,000, 8 per cent., preferred shares at $100 par value, and 5,000 common shares at $100 par value, making a total authorized capital of $1,500,000.

The company has been organized to purchase the entire capital stock of the Appleford Counter Check Book Co. Ltd., of Hamilton, and the British American Wax Paper Co. Ltd., of Toronto. The above issue is to provide for the purchase of the two companies, and also provide $100,000 working capital.

The Appleford Counter Check Book Co., has been in business for the past thirteen years, and during 1920 and 1921, the gross sales amounted to over three quarters of a million dollars per year. The British American Wax Paper Co., has been in operation for the past sixteen years in Toronto.

# The Unlisted Securities Market

In their report on last week's unlisted market, A. J. Pattison Jr. & Co. say that in a period of dullness, price changes were erratic though in most cases improvements from last week-end were noted. The market at the present time is in a stronger position than for many months. This is clearly demonstrated in one such as the present, which though almost entirely devoid of public interest does not fail to absorb all offerings and week by week record advanced prices.

Massey-Harris again proved a feature, moving up to 56-60 on few transactions and leaving many bids still under the market unfilled. Cockshutt Plow Preferred was offered down to 46½, a drop of 2½ points without changing hands. Durant Motors were somewhat active, moving up to 10 bid at one time, afterwards easing off to 9¼-10½. Mount Royal Debentures with bonus of common were fairly active between 95-97½. There was a good demand all week for Home Bank with no stock offered. Collingwood Shipbuilding made an appearance for the first time since the declaration of the dividend being offered at 51. Imperial Oil held steady at 115-116 with a few odd lots selling at slightly lower figures. Famous Players Preferred was bid up to 53 without meeting any offerings. Alberta Pacific Grain Preferred narrowed at 87-89 without being traded in. King Edward Construction Preferred was in some demand at 75. Algoma Steel 5's improved to 55-55½ on rumors of improved business. Whalen Debentures at 63-65 continue to move upward though offerings began to filter into the market at 65. Trust & Guarantee was offered at 72 with the best bid at 69½.

## FIRE LOSS WAS WRONGLY REPORTED

### Saskatchewan Courts Find Effort Made to Defraud Insurance Company

Reports of the decision of the Saskatchewan Court of Appeal in the case of Miller Horse Hardware Co. v. Dominion Fire Insurance Co., and others, have recently been published and are of interest in the construction put on certain sections of the Saskatchewan Insurance Act.

The plaintiffs were assignees of Mary Stockhammer, who carried on business at Khedive and to whom Mary Stockhammer assigned four fire insurance policies, three covering the stock in trade and fixtures and an additional one from the Dominion Fire Insurance Co., covering the shop building. On January 1, 1917, the building and its contents were destroyed by fire. On January 9, Mary Stockhammer assigned these four policies and all her rights thereunder to the plaintiff company. The defendants were notified of the fire and of the assignment to the plaintiffs.

On January 12 the Dominion Fire Insurance Co. wrote to the plaintiffs, stating that they were not interested in the matter as their policies had been cancelled before the fire. As to this contention, the Court agreed with the trial Judge that these policies were not cancelled but were in force at the time of the fire. On March 6, a firm of solicitors in Winnipeg wrote to each of the defendants on behalf of Mary Stockhammer, enclosing proofs of loss, supported by her statutory declaration. This was done in compliance with the requirements of sec. 82 of the Saskatchewan Insurance Act. On May 28 1917, these actions commenced.

Section 82 of the Act contains the statutory conditions which form part of the contract between the parties. Conditions 18, 19, and 20 deal with the proof of loss to be furnished to the insurer, and condition 23 provides that the loss shall be payable 60 days after the completion of such proof, unless a shorter period is fixed by the contract. Condition 21 which is relied upon by the defendants in this case, is as follows: "21. Any fraud or false statement in any statutory declaration, in relation to any of the above particulars shall vitiate the claim of the person making the declaration."

The "above particulars" include an account of the loss to be verified by statutory declaration containing all the particulars which the nature of the case will permit. It is alleged that the account furnished to the defendants by Mary Stockhammer and verified by her is false and fraudulent and that, consequently, the defendants are released from liability under their policies.

### Case of Fraud

In the judgment, the Court say: "I have examined the evidence carefully and while I am mindful of the fact that a finding of fraud and perjury, such as is involved here, should be based only upon the strongest evidence, and not presumed from the mere existence of an excessive claim, I am nevertheless convinced that fraud does exist in this case. In addition to the amount of the items specified by the trial Judge, I am satisfied from a perusal of the evidence that the figure given as the value of the stock destroyed was a gross over-valuation and that it was not given in ignorance or by mistake or through mere carelessness, but deliberately, with the intent to get much more money from the defendants than the loss warranted.

"While I agree with the trial Judge in his finding of fraud, I must state, with respect, that I differ from him as to the effect of this fraud upon the rights of the parties to these actions. In my opinion, the fraud of the insured vitiates the claim of the assignees (the plaintiffs.) Upon on behalf of the plaintiff before us, that the meaning of Condition 21 is that a fraud of this sort vitiates only the claim of the person who actually makes the declaration, whatever that claim may be, but that the plaintiffs, having obtained an assignment of these policies before the false statement was made, are not affected by it. I cannot agree with this contention. The particulars of the loss were furnished in order that the plaintiff's right to sue might be created in accordance with Condition 23. No other proofs of loss were furnished than those of the insured herself.

"If we consider her as acting for herself, Mary Stockhammer's interest lay in having the insurance monies paid over to the plaintiffs, who were her creditors in order that her indebtedness to them and to her other creditors might there by be paid off or reduced; and her fraud will prevent her from attaining this object. If we consider her as acting for the plaintiffs in making this statement, then, I take it, they are bound by her fraud, she being their agent for the pur pose. The assignment took place after the fire. It can make no idfference, in my opinion, once the fire had taken place, whether she sent in her versed the order of things and assigned before making the statement. In either case the result would be the same. Again, to consider the matter from another and narrower point of view, it might be said that the plaintiffs at the time they commenced these actions had no other statements of loss to rely upon, in order to shew compliance with Condition 23, than those fraudulent statements, and they put them in evidence as part of the case. They surely cannot be heard to argue now that, although false, these statements are a sufficient compliance with the condition to give them the right to sue.

### Building Contract Separate

"There remains one question to be disposed of. Mary Stockhammer had two policies with the Dominion Fire Insurance Co., one on the goods for $3,000, and one on the building for $1,600. The proof of loss put in by her covers all the property, real and personal, included in both policies. The claim in the goods policy is defeated by her false statement, but does it follow that the claim for the insurance on the building is also vitiated? I think not. Each of these policies constitutes a separate contract between the parties. There is no suggestion of any false statement regarding the building, and I do not think the insured or her assignees have lost the right to claim under that policy. It would be different if all the property was covered by one policy because in that case there would be only one contract, and fraud in one particular would vitiate the contract altogether."

## CHANGE IN CIVIL SERVICE

### Fewer Appointments Will Come Under Scope of Commission.

Exclusion of a large number of positions in the civil service from the operation of the Civil Service Act, has been recommended by the Civil Service Commission and confirmed by the government. This means that the appointments made in the various classes specified will not, in future, be made by the Civil Service Commission. The classes of positions exempted from the operation of the act include:

1. All positions where the salary does not exceed $200 per annum.
2. All positions for which the compensation provided is fees of office, and positions of an honorary character to which no compensation is attached.
3. Positions of orderly in the office of the Governor General's secretary.
4. Positions of Indian interpreter, department of Indian affairs.
5. Positions of physician performing the duties of port physicians under the department of health at points in Nova Scotia, New Brunswick, Prince Edward Island, Quebec and British Columbia.
6. Positions in 144 classes of skilled and unskilled labor specified in the regulations.

### Tests Not Practicable.

It is stated that the Civil Service Commission finds that it is not practicable to prescribe a system of competitive examinations or tests, as required by the Civil Service Act, for making appointments to positions of this nature. The commission is further of the opinion that the classes specified were among those which parliament had in mind for exemption in amending the Civil Service Act during the session of 1921.

In recommending that the classes mentioned be exempted from the operation of the act, the Civil Service Commission states that the selection of employes for the specified classes should be left entirely in the hands of the departments, provided that the appointment is necessary, that the preference extended to returned soldiers is observed, that the person selected shall satisfy the department as to his qualifications, and that he shall be suitable as to age, character and habits. Compensation paid should not exceed the salaries set forth in the classification schedules and where "prevailing rates" are provided as the compensation for a class, or where no class schedule exists, the rates of pay, it is stated, should be such as are recommended by the department and approved by the Governor-in-council, without bonus.

---

## PRODUCION OF QUEBEC

According to the official figures it is shown that the pulp and paper industry of the province of Quebec occupies first position among the manufactures of the province as regards the value of product, its output in a year reaching $64,060,540. Second comes the lumber industry with $61,493,919; third, the cotton textile industry with $57,530,438; fourth, the milling industry with $42,071,066; and fifth, the boot and shoe industry with $41,842,877.

## NEW MINING COMPANY

The Harvey-Kirkland is the name of a new company which is developing mining claims in the Kirkland Lake district. The group consists of four claims lying south of Gull Lake and east of the Montreal-Ontario property.

The Harvey-Kirkland is capitalized at $5,000,000, made up of 5,000,000 shares of the par value of $1 each.

## REGINA BOARD OF TRADE

The annual meeting of the Regina Board of Trade was held on June 29, and the following directors of the board were elected: Jas. Feir; J. K. R. Williams; I. H. Bowman; W. H. A. Hill; R. W. Drew; C. J. Watson; W. G. Yule; D. M. Balfour; F. L. Bastedo; and W. J. Styles. The financial statement showed receipts of $7,615, and expenditures of $7,135 with a bank balance of $478.

E. B. Grass, president of the board in reviewing the year's work, said he thought that crop conditions throughout the province were much better than at the same time last year. With the reduction in freight rates, and in the cost of commodities generally, Regina and the surrounding country should, he stated, have a successful year.

# DEBENTURES FOR SALE

## CITY OF MOOSE JAW

### Debenture Issue—$182,470.07

Cashier.

New Glasgow, N. S.,
June 29th, 1922. 99

**TWO THOUSAND LIFE UNDERWRITERS TO MEET IN TORONTO**

This great gathering of life men from all points in Canada and the United States, to convene in August, will be representative of the Grand Army of Life Insurance Agents who have placed nearly Fifty Billions of Life insurance protection over Canadian and American homes. Life Insurance is the most useful commodity in the world because it represents food, clothing, shelter and education for those who without it might be hungry, naked, homeless, or ignoant. The Mutual of Canada aims to distribute this great commodity at net cost of the consumer, being among Canadian companies the only one organized on a purely mutual co-operative basis. Mutual benefits actually paid, in the aggregate amount of $37,000,000. So that the mutual has had substantial share in the beneficent work of the Canadian life companies.

Assurances in Force $235,000,000.

## RESUME OPERATIONS

The Manitoba Rolling Mills at Selkirk, which owing to the damage caused by the recent large storm and lack of power, had to close down, resumed operations on July 3. The mill which has been running a single shift for the past six months started on July 3 on the bar mill and sixteen inch mill.

The company has a number of orders on hand including one for six hundred tons for the new power plant on the Winnipeg river.

## NEW LUMBER COMPANY

A syndicate of British and California business men are organizing a ten million dollar undertaking which will be a holding and operating company of large British Columbia properties. It is to acquire the property and assets of the Masset Timber Company, the Puget Sound Box Company, and the Western Marine Supply Company. The company will build and operate large sawmills and operate a large fleet of lumber-carrying ships. Many prominent men are behind the project.

# Corporation Finance

**Canada Land & Irrigation Co.**—According to reports of the operations of the company, given out in London recently. it was stated that the balance of land available for sale is 486,509 acres of which it is estimated that 190,000 to 200,000 acres can be irrigated. There is an unascertained liability for cost of completing canal, which will be chargeable to general property account, and it is therefore, impossible to say what profit, if any, has resulted from land sales made to date. Accounts show debit balance of £34,390. Owing to abnormal financial conditions prevailing in Western Canada, as elsewhere during 1921, there was practically no demand for land, and it was not possible to force sales. Continued drought and heavy depreciation in price of all farm produce seriously handicapped farmers in company's district, and collection of instalments on land sold has suffered in consequence. Directors have considered it advisable to carry part of amount overdue for interest on land sale instalments to a suspense account. Loss on farming operations is largely due to depreciation in inventory values of company's live stock. Dry farming has been discontinued.

**Cape Breton Electric Co.**—Net earnings of the company for the month of April were $8,795, as compared with $8,437 during the same month last year, an increase of $357.

**Red Star Refineries, Ltd.**—At a special general meeting of the shareholders, a by-law providing for the increasing of the capital stock of the company from $3,000,000 to $6,000,000 by the issue of 300,000 new shares of the par value of $10 each, was approved.

In a letter issued to shareholders, it is stated that there has been a change made in the board of directors, through the election of a new board. Those elected thus far are T. J. Storey, of Brockville, Benjamin Briscoe, of Detroit, and F. F. Beall, of Detroit. Other names to be added to the board will be announced shortly.

The company has sold, through the influence of the new men on the board, $600,000 preferred and $300,000 common stock to a New York stock brokerage organization, and proceeds from this sale will cover present needs. No further public offerings of the stock will be made just now.

Work on the construction of the plant will commence shortly, ground has been broken, and the work will be pushed to completion, so that by the autumn the company will be able to deliver their new Super-Gas.

The original $3,000,000 capitalization was divided between $1,000,000 8 per cent cumulative preferred stock, and $2,000,000 common stock, both of the par value of $10 per share.

**Porto Rico Railways Co.**—Both gross and net earnings during the month of May, show an increase over the same month a year ago. Gross earnings during the month amounted to $112,001, an increase of $1,476 over last year. Net earnings were $39,864, an increase of $12,553 over 1921.

For the five months ending May, gross earnings show a decline from $562,994 in 1921 to $545,124 in 1922. Net earnings are, however, up from $206,629 to $224,585.

**Acadia Sugar Company.**—The report of the Acadia Sugar Co. for the last fiscal year, after providing for interest on floating debt, shows a loss on trading of $112,522. The trading statement now shows a debit balance of $107,064.

Special meetings have been called to consider a scheme of reorganization whereby a new company, domiciled in Scotland, will be incorporated for the purpose of taking over the undertaking. In consideration of dividend arrears on "A" preference shares accrued to the end of 1919 the new company will credit the holders of these shares with an addition of 25 per cent. of their holdings. The new company will issue to present shareholders of all classes of shares corresponding shares to the extent of 80 per cent. of their holdings, provided that holders subscribe for general mortgage debentures to the extent of 20 per cent. of their holdings.

In the case of the "A" preference shares the 80 per cent. will be based on increased holdings. General mortgage debentures to be offered will be secured by deed of trust, and a mortgage on real estate, subject to prior charges not exceeding $2,000,000, and further by a floating charge on the remaining assets of the company. Under the proposed scheme the company will transfer to the old company preference shares to an amount of £10,000 par value, and also ordinary shares to £10,000 par value.

**Ames-Holden, McCready, Ltd.**—The developments of the last few days indicate the possibility of a settlement with the creditors and bondholders of Ames-Holden, McCready, Limited.

The committe of bondholders have been in negotiation with the principal creditors and as a result of the progress made it is stated that there is now a much better chance of some general plan being worked out. The plan that has practically been decided upon will require a substantial cash payment to creditors and negotiations are now under way to see just how this money can be raised.

In the meantime, it is stated that operating conditions for the company have improved very materially and that the turnover in the last few months has run over $700,000 each month. This shows a very considerable increase over the corresponding period last year.

## Annual Meetings

**Barcelona Traction, L. & P. Co.**—At the annual meeting held on July 4, an optimistic report of the operating position of the company was presented. E. R. Peacock, president, presided at the meeting. Mr. Peacock stated that the company was doing substantially better than a year ago. and the outlook was hopeful. By inference, however, he indicated that holders of the common stock should not look for any return for some time to come.

The annual report was presented and approved. One change in the directorate was announced, the place on the board made vacant by the resignation of J. S. Lovell, being filled by C. D. Magee, of Toronto.

The president reviewed the general conditions in Spain, and more especially in Barcelona, where, as he pointed out, there has been a distinct revival in the past five months or so, to the definite advantage of the company. Large textile mills in that city have largely increased their operations, and their power requirements have expanded accordingly. The company, he added, was doing a moderate amount of construction, the money for which had already been provided. A large sub-station was being erected in a rapidly-growing factory area. The high tension underground cable was being extended and the secondary transmission systems were being reformed.

The company was carrying out a campaign to increase its power customers, because, as President Peacock pointed out, the power was available. The office formerly maintained in New York is being transferred to Toronto, where all the company's executive interests on this side will be concentrated.

The railway continues to do well, the President added. An extension to a city of 45,000 population has recently been opened, and has already had the effect of materially augmenting revenue. It is probable, too, that extension in another direction will be undertaken shortly, providing the necessary concessions and financing can be arranged.

The tramways company, in which the parent company has a large interest, but which is operated independently, is doing well, but has not fully kept pace with the improvements in other departments. The Barcelona company is now taking a more active part in supervising operation, and hopes to bring it up-to-date within two or three years.

**Durant Motors of Canada, Ltd.**—The first general meeting of the shareholders was held at Leaside a few days ago. Carrol Downes, Vice-President, occupied the chair, and, in addressing the meeting outlined the history of the Durant companies, both in Canada and the United States. Mr. Downes also dwelt on the relation between the companies and stated that although the parent company did all the buying of materials, etc., they sold them to the subsidiary companies at actual cost. Shareholders in the American companies number over 54,000 and in the Canadian 5,400.

Leaside plant, since March 1, has produced over 2,000 cars, and enlargement of this plant will be started right away. Two buildings, three stories high, and one large shipping building, will be erected. This will give the company 400,000 square feet of floor space or five times the present amount. It is expected that 18,000 Star cars will be produced in these buildings the first year, 10,000 for export and 8,000 for the domestic market. As soon as the plant is completed all export orders will be handled by the Canadian company.

"We are not trying to put Mr. Ford out of business, but when a man can sell 950,000 cars in one year, we consider that a good field to pasture in," stated Mr. Downes. The Star car will be sold at Ford prices and will be modern in every respect. Already orders have been received for over 1,000 of these. On the adjournment of the meeting the shareholders present were taken on a tour of the plant.

### LOOK FOR EARLY HARVEST

**Losses Small Compared With Total Area in the West—Costs of Labor Low**

**(Staff Special)**

Winnipeg, July 10.—The crop outlook continues very satisfactory and with normal conditions between now and the middle of August the prairie provinces will harvest a crop that gives promise of being considerable above the average. Districts in all three provinces have been visited by bad storms and the almost inevitable damage by hail has also been fairly heavy, but these losses, while pressing heavily upon the individuals concerned, are but a small factor when the crop for the whole west is considered. The whole situation is most encouraging.

In few years has the crop outlook been better at this time than it is at the pesent. Wheat is headed out in many districts but particularly in southern Manitoba where the crop promises to be a couple of weeks earlier than usual. The Rye harvest should be general by the fifteenth of this month. With these bright crop prospects things with the western farmer should be considerably improved this year. A good harvest with reasonably low production cost is promised, and with the recent reduction in freight rates on grain, it will mean a saving of many millions, every dollar of which will go to the producers.

Wholesale conditions continue to improve and collections this week were better.

### ORAL PROMISE OF INDEMNITY

**Relieved from Payment of Notes Because Promise Was Not Proved by Writing**

The case of Keens v. Baldwin has recently been decided, being an action in which Keens claimed from Baldwin indemnity in respect of payments made upon a promissory note bearing date the 5th July 1916, made by "Glass Garden Builders Limited," Keens, Baldwin and two others—the four makers of the note other than the Company being directors and as it appeared, signing as sureties for the company.

Baldwin counterclaimed and said that by a guaranty signed on the 19th October 1917, Keens and Baldwin became cosureties to the Bank of Hamilton for advances made by it to the company and claimed contribution from Keens and Baldwin became co-sureties to the Bank.

Justice Middleton in a written judgment said that the claim put forward by Keens was based upon an oral promise said to have been made in 1915, prior to the note and to the bond to the bank, that Baldwin would save him harmless with respect to all obligations he might undertake in connection with the company. Baldwin denied the promise.

The judge was of opinion that a written promise was necessary. If Baldwin is to be made answerable to Keens for the default of the company in payment of these obligations, his promise must be proved by a writing and not by mere word of mouth.

### CANADIAN FAILURES

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended July 7, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows—

The Pioneer Appraisal Organization of Canada

ESTABLISHED 1905

In view of recent happenings in financial circles, it is altogether likely that greater scrutiny will be exercised by Banks and other financial institutions in respect of the affairs of their customers, as well as of the securities offered to them for Loans.

An appraisal affords just such evidence of financial standing and of values as is required for these purposes. Being independent and disinterested it commands confidence, particularly when accompanied by the certificate of an experienced and reputable firm.

## SECURITY REVIEW PROFITABLE

This is one of the times of the year when holders of securities have occasion to clip coupons, receive dividends and handle many of their investments.

A careful review of all the investments at present, therefore, is more than usually opportune. Such a review almost invariably results in discovering some profitable exchange, sale, adjustment or new investment. Then too accumulating funds for new investment may be available from:

1. Incoming funds from sale of property, etc.
2. Money now drawing a low rate of interest.
3. Bond or mortgage interest.
4. Bank interest.
5. Stock dividends.
6. Early maturing bonds, etc.

Such funds may be safely and profitably employed and adjustments and exchanges made, at present, to excellent advantage. Suggestions on request.

*We shall be glad to consult with those having investment problems.*

BANKING INVESTMENT INSURANCE INDUSTRY

# How Trustees Regard Life Insurance

By J. D. GUNN

(From an address before the Saskatchewan Life Underwriters' Association.)

The subject of life insurance is of peculiar interest to an executor or administrator of an estate of a deceased person. In these days of heavy taxes, when in order to live a man must invest his capital so as to bring in the largest possible return, it is found that to bring in such a return it is almost absolutely necessary to so tie up one's money as to either not make it immediately realisable or, if immediately realisable, then at a loss. In consequence executors and administrators have very often, unless there be some provision made, the experience of finding a man worth a considerable sum of money having no realisable assets to provide for the immediate maintenance of his family. The estate left may be of a really valuable nature, but it may be locked up in a business, and because it is not immediately realisable it may work considerable hardship on the dependents. This applies particularly to the west where so much money is invested in land and in securities on land. The executor or administrator is faced with this, that he must either sacrifice the estate of the deceased or advance sufficient money to the estate to keep the dependents of the deceased until the estate can be realized and realized at a reasonable price.

### Providing for Death Duties

It has to be kept in mind that an executor, unless authorized otherwise in a will, or an administrator, can only by statute mortgage the trust estate for payment of the testator's debts and in all probability he will have to apply to the court for authority to borrow money. Even then the assets of the estate may be such as not to lend themselves to borrowing purposes, unless such assets are revenue bearing. This is where a policy of life insurance payable on the death of the decedent, is of so much value. It provides means of keeping the widow and family until the assets of the estate can be realized at a price at or near their full value. To meet this, of course, many men make provision for their dependents by means of life insurance policies made payable to a certain protected class of beneficiaries, of which I shall speak later and there is no doubt that these policies will go a long way toward the conservation of the estate but a life insurance policy has another and further advantage apart from the immediate benefit of the beneficiaries.

For the purpose of raising taxes the state has found it necessary to impose taxes on its subjects, and a favorite form of revenue raising is a tax imposed on inheritants, which is known in the Old Country as death duty and in this province is called succession duty. By the way, before I go any further, it would probably be of interest to you to know that in this province the taxes raised by such a duty all go for the support of our provincial University.

### Saskatchewan Succession Duties

In 1903 the legislature of the North West Territories passed an act providing by will or ment of duties on all estates passed by will or intestacy in the territories. The duty was on a graduated scale but there were certain exceptions. The ordinance did not apply to any estate the value of which after certain allowances did not exceed $5,000. Nor to an estate passed to father, mother, or certain other preferred beneficiaries where the aggregate value did not exceed $25,000. These exceptions continued until 1917 when probably the supply of rich men in our province diminished. Our legislature then decided that they should have more revenue from this source, and the exception was reduced from $25,000 to $10,000.

The property on which duty is payable includes property transferred in contemplation of death, donations made where the immediate enjoyment of the gift has not been assumed by the donee, property vested jointly with interest to the successors, property passing under a present or future deed or settlement in taking effect as a will, annuities purchased or provided by the deceased, life insurance policies and property over which the decedent had any power of disbursement. Generally speaking the net is spread so widely that practically everything is included. There are certain minor exceptions such as gifts made during lifetime. At the last session of our legislature the Succession Duty Act was further amended so that a life policy not exceeding $5,000, payable direct to a beneficiary, is not dutiable. I believe, however, that it is the intention of the act to include this $5,000 in the aggregate value of the estate which would necessarily take a higher rate, and about which I will speak further in a few minutes.

### Two Classes of Beneficiaries

Beneficiaries are divided into two classes. first, the preferred class composing father, mother, husband, wife, child, son-in-law or daughter-in-law of the deceased and, second, all others. The preferred class is again divided into resident and non-resident beneficiaries. The duty is on a graduated scale in the case of the preferred beneficiary class and the rate ranges from one-half of one per cent. where the assets exceed $10,000 and do not exceed $15,000, to ten per cent. where the estate exceeds $1,000,000. There are certain additions where the amount passed to any one person exceeds certain amounts. The second class (all others) is again divided into two classes. First, where property passes to persons resident in the Province and, second, where it passes to persons non-resident. The duty is payable at the death of the deceased, but if paid within 18 months thereafter no interest is chargeable. If not so paid, interest at the rate of 5 per cent. per annum from the death of the deceased is chargeable, and such duty forms a lien upon the property in respect of which it is payable. Executors are forbidden to transfer any bond, debenture, or share of bank stock until the Succession Duty is paid or security is given for the payment of the duty. Now here is where a policy of life insurance comes in. It provides a ready means for the payment of the Succession Duty in addition to the funeral expenses. It is true that an insurance company may not pay the amount of the policy until it is satisfied as to the appointment of an executor or administrator, but under these circumstances with money so readily available there is no difficulty in a trust company financing the matter.

### Expensive Individual Executors

"Experience has shown that if a man dies without making a will, it will cost the heirs the total of the estate over a period of eight years. Insurance statistics tell us that at the end of eight years the average estate is dissipated entirely and that the heirs are working for a living. all because competent management was not provided for them. If an estate is a total loss in eight years it means a shrinkage of 12½ per cent. per year. Surely a capable executor for 2 per cent. would be a much better bargain. In the second place you will find lots of men who say that they have not had time. It is true that a will in which trusts are to be provided for the heirs requires considerable thought, but I have yet to see a will that would require, in consultation with a solicitor, more than three or four hours to prepare, and yet a man thinks nothing of spending sometimes three or four hours a day in various forms of pleasure. In the third place you will find some men say that they do not know who to appoint as their executors. If you wanted your watch repaired you would not take it to an automobile mechanic. If I wanted a life insurance policy I would not go round the corner and ask the grocer what company or what form of policy he would recommend. I would go to one of you men who has made a life study of the life insurance business. This same thing applies in the selection of an executor.

### Trust Companies' Assistance

You are assisting men to build estates. I mentioned before the advantage it is to an estate to have a few thousand dollars coming in from a life policy which may be payable in a lump sum or payable at stated intervals. This is where a trust company may be of service and, by the way, practically all a trust company has to offer is service. Your company under the settlement contract is required to make payment to the beneficiaries in amounts at stated times, whereas the trust company can provide for more elastic settlements. For example, a widow might receive an annuity of $1,000 a year under a life policy. Her expenses during a particular year, owing to illness may have been very heavy, yet, much as your company might desire to help her it is powerless to act. Under an agreement with a trust company provision can be made for the trustee to use its discretion under such circumstances. Provision is also frequently made for the disbursement of funds for the education of children which your company cannot undertake to fulfil inasmuch as the payments would be made direct to the beneficiary, whereas the trustees would be empowered to pay the necessary fees and expenses in connection with the education of the children. You have no doubt come across cases where a man has a life policy with possibly two or three companies. Under these conditions if the policies are payable to the estate and a trust company has been named as executor a single trust is created.

### Why Estates Lose Money.

Trust companies will tell you that more losses to estates are incurred through having to sacrifice the assets to meet claims than from any other cause. In such cases where the assured has made a will it is the practice to make the policy or policies payable to the executor, or if he has no will the policies should be payable to his estate. It is an outstanding fact that life insurance taken for any of the foregoing purposes is very seldom allowed to lapse by the insured. This is a field where the life insurance company and trust company can work in harmony, for it is only by serving the best needs of the people as a whole that either can expect to maintain the confidence necessary to success. The largest loss is occasioned through poor investments and both life insurance and trust companies are prohibited from making such investments by our laws as they are restricted to certain classes of securities. Working in harmony there is no reason why life insurance proceeds cannot be spread over a much longer period than seven or eight years.

Every man should make a will, and just here it might not be out of place to mention a few of the essentials in drawing a will, and, by the way, it is always advisable to have a solicitor draw the will. As you are no doubt aware, a will to be legal and binding must be signed by the testator in the presence of two witnesses, who must sign in the presence of each other and of the testator. A witness to a will should not be a beneficiary mentioned in the will, as such bequest would be automatically revoked. Any obliteration, alteration, or interlineation should be initialed by the testator and the two witnesses. You have probably asked yourself why do men not make their wills? Men will spend years building up an estate and make absolutely no provision for its distribution. There are possibly several reasons why men do not make wills. In the first place the average man seems to be under the impression that it costs more to handle an estate if he appoints a reliable executor than it would if he made no provision for the distribution of his property. Such a conclusion is absolutely wrong.

## OFFER RECIPROCAL TAX PROVISION

### Canada May Not Tax Citizens Working in United States, Provided Latter has Similar Regulation

Changes in the Rush-Bagot agreement, international fisheries, reciprocal treatment in income taxation, and the waterways project were discussed at Washington last week, according to a statement by Premier King on his return to Ottawa on July 16. The Prime Minister denied that the subject of reciprocal trade arrangements was dealt with, and he also stated that the position he took in the House of Commons on June 10 on the St. Lawrence waterways proposal was the position he restated to the United States Government, namely, the time was not opportune, he informed Secretary of State Hughes, to proceed with the project in view of Canada's present financial condition .

#### Fisheries

As for the fisheries on the Atlantic Coast, an effort was made by Canada before the opening of the session of Parliament just ended to have the United States renew or extend, on its part, the reciprocal arrangement entered into by the two countries some time ago regarding coasting privileges. By this pact Canadian fishermen were allowed to take their cargoes into Boston and other New England ports, discharge the cargoes, restock their stores of provisions and clear direct to the fishing grounds. The same privilege was extended by Canada to American fishermen off the Maritime Provinces. The United States Government did not deem it expedient last winter to extend the operation of the arrangement, while Canada continued to extend coasting privileges to the Americans. It is understood that representations were made by the Prime Minister to clear up this matter.

On the Pacific Coast, too, there is room for amicable negotiations, as Canadian fishing interests have been suffering from the incursions of American fishermen, and it is on this question that a special committee of the House of Commons will this summer investigate the conditions of the industry in British Columbia.

#### Armed Vessels on Lakes

The Prime Minister intimated that the need for a revision of the Rush-Bagot agreement grew out of changing conditions on the Great Lakes. The Canadian Government had had to deal, he said, with a number of applications for the passage of armed vessels through the Canadian canals. These were used for the training of naval militia on the Lakes. Further, United States shipbuilders on the Great Lakes wished to be allowed to compete for the construction of war vessels for the United States navy. These matters were bound to become of increasing importance, and it was deemed wise to take up the revision of the Rush-Bagot agreement as soon as possible.

The present time was a suitable one, too, as the Disarmament Conference at Washington had created an atmosphere favorable to it. It was felt also that, if the situation were allowed to develop further, the demand was sure to arise from the Canadian side of the Great Lakes for the presence of armed vessels.

"We reached a point in the negotiations on this subject," said the Premier, "where it was desirable that I should have further instructions with my colleagues. The outlook is very good for putting the agreement regarding the disarmament on the Great Lakes on a permanent basis."

On the fisheries question the Premier found the Federal authorities of the United States sympathetic with his representations, but it was not deemed desirable to attempt to get a treaty through the American Senate at the present time, owing to the strength of local influences which have been fighting the proposed agreement.

The proposal for Canadian representation at Washington was discussed only informally.

#### Reciprocity in Taxation

The question of reciprocity in taxation grows out of the action of the United States Congress in imposing a tax of 8 per cent. on the incomes of Canadians who are employed in the United States but reside in Canada, an exemption of only one thousand dollars being allowed. At the last session Parliament passed similar legislation to apply to Americans employed in Canada and residing in the United States, but the Government reserved the right to withhold this tax, provided the United States Government should withdraw its corresponding impost. While in Washington, Mr. King informed the United States authorities that Canada desired not to impose this tax unless it was necessary. The subject is now under consideration by the American Government.

## RESERVE DECISION ON GRAND TRUNK APPEAL

### Question of Evidence Complicates Arbitration Award—Doubt as to Result Were Same Judge to Hear Case Again

"Their Lordships will take time to consider what advice to tender His Majesty." The Lord Chancellor, Lord Birkenhead, in this way announced upon conclusion of argument on July 13 that the Privy Council has reserved judgment regarding the appeal of the shareholders of the G.T.R. against the award of the board of arbitration in connection with the value of the preference and common stocks of the railway upon its acquisition by the Canadian Government.

The opinion among counsel is that their Lordships will probably allow the appeal on the ground that the judgment of Sir Walter Cassels included matter from the Drayton-Acworth report and also because of the rejection of evidence concerning reproduction value. It was plain, however, during the closing stages of the proceedings that their Lordships were fully impressed with the gravity of re-hearing the arbitration. This was especially evident when Sir John Simon on behalf of the G.T.R. in his final address again referred to the Cassels judgment.

#### Re-hearing Considered

Lord Carson asked—"Supposing we come to the conclusion that Sir Walter Cassels was wrong and we refer the matter back; what will happen then? Will Sir Walter Cassels give another judgment eliminating certain portions of his previous judgment, and relying on other facts? It is a very grave matter, you see."

Sir John Simon replied—"I do not at all shut my eyes to the fact that a re-hearing of the arbitration is a very serious undertaking, but if there be a complaint on a point of law having some substance behind it, I am sure the fact of setting it right will entail considerable time, labor and expense, but will not deflect your Lordship's judgment."

"This is not like an ordinary case where you can call further evidence," declared Lord Carson, "according to your case you have an arbitrator who would have to eliminate from his mind something which already has affected it."

"I submit that if it is established that a rehearing should take place one cannot refuse it, because somebody may be embarrassed," retorted counsel for the railway.

Lord Carson suggested it would be extremely difficult for a judge who had once made his mind up to be asked to give a second judgment. Sir John Simon then declared that Sir Walter Cassels under the circumstances might consider it desirable, if a re-hearing was ordered, to refrain from participating.

#### Hear All Evidence Again

Lord Carson asked if their Lordships gave judgment in a certain direction would it involve a re-hearing de novo.

Sir John Simon thought that it would. Later he declared that Sir Walter Cassels' references to the Drayton-Acworth report treated as gospel, statements describing the Grand Trunk as a bankrupt company. "If Chamberlain went crying 'stinking fish' in an endeavor to borrow money, one cannot penalize the shareholders for it, Sir John continued.

The Lord Chancellor said that one reasonable person might take the view that the evidence ought to have been admitted and another reasonable person might take the view, that the evidence even if admitted, would not help him as an arbitrator arriving at a decision.

W. N. Tilley, K.C., representing the Dominion Government in the course of his address earlier in the day, declared that the present position would not have arisen if the counsel for the G.T.R. had indicated at the opening of the arbitration, the method by which it was proposed to prove the reproduction value.

## CONFER ON SASKATCHEWAN TAXATION

### Some Companies Have Paid Registration Fee, While Others Have Held Back—Government Objects to Refunding

The enforcement of the recent amendment to the Saskatchewan Corporation Taxation Act was the subject of a conference in Regina on June 16, between members of the Cabinet and representatives of companies doing business in the province. Among the latter were F. W. Wegenast, barrister of Toronto, E. F. Hutchings of the Great West Saddlery Co., Winnipeg, and W. H. Mills of Western Grocers, Ltd., Regina. On his return Mr. Wegenast outlined the developments as follows:—

"You will recall that by certain amendments at the last session of the legislature, the province laid the ground for an attempt to collect registration fees, notwithstanding the recent decision, from those companies which had not yet paid. The principal one of these companies was the Great West Saddlery Company, Limited. I advised that the amending legislation left the statute still invalid and the companies should not be called upon to pay the fees. In the meantime several companies, acting, I believe, on the advice of the Canadian Manufacturers' Association, had paid the fees demanded. In several cases, however, where the amount was substantial the companies held out. I had expressed the view that the matter could probably be amicably arranged by an interview with the Saskatchewan Government. The C.M.A., however, were opposed to having the matter taken up in this way. After I had waited for several months some of the Western companies insisted that I should take the matter up for them, which I did.

#### Fee Was Tax in Effect

"I placed before the members of the Government the views which I had previously held out for, namely, that under the decision of the Great West Saddlery case the provincial government could not impose a registration fee which was in effect a corporation fee and when it came to taxation, the tax should not be levied on the authorized capital of the company, or even the paid up capital, without regard to the amount employed in the province.

"I believe the Government is going to adopt both these views. I found that they had already gone carefully over the memoranda which I had forwarded and seemed prepared to accept my argument on the two points in issue.

#### Ministers Oppose Refunds

"The serious question was what to do about the companies which had already paid their fees. The Attorney-General himself suggested that it would be inequitable if some companies paid their fees while others were let off. Mr. Hutchings, on his part, had expressed willingness to pay a reasonable amount based on the amount of capital employed in the province. I suggested that such a basis might be adopted, and that those companies which had paid might be given credit for their payments. The Ministers were, of course, unwilling to pay back any money, and the Attorney-General suggested that when a basis had been drafted it should be further discussed with me.

"There the matter rests at present.

#### Manitoba

"I also had a conference with the officials who are advising the Manitoba Government, and ascertained that the matter of amending the Companies Act is to be taken up at the next session of the Legislature. I was asked to dictate a statement of the principles which I thought should guide the officials in their amendments, and I did this. I was assured that the views which I expressed would be given careful consideration."

## LAWYERS WANT GROUP INSURANCE

At a recent meeting of the Calgary Bar Association the secretary of the association, reported that the executive had made a full investigation into the matter of insuring the lives of the members of the association as a group and after the matter had been discussed the executive was requested to endeavor to arrange for the placing of such insurance upon the lives of the members.

## CROP REPORTS CONTINUE FAVORABLE

### Drought in British Columbia is Most Unfavorable Feature—Moisture Plentiful Elsewhere

The weekly crop report of the United Grain Growers read at the board of trade of Calgary on July 14, still continues decidedly encouraging. On the MacLeod line, for instance, it is said, the prospects are the best since 1916. It bears out the forecast of Grant Hall, vice-president of the C.P.R., George Kane and others in close touch with the situation, that with continued favorable weather there will be a fair average crop this year, especially in the south country.

The Canadian Bank of Commerce crop report for Manitoba and Saskatchewan as at 8th July 1922 is as follows:—

#### Manitoba

Northern District: Reports indicate that upwards of 50% of the wheat is headed out and crop prospects continue to be very satisfactory. The weather during the past week was cool and cloudy, and growing conditions were very favorable for the crops at this stage.

Central District: Weather conditions have been very favorable and crops generally continue to show satisfactory progress. In the districts affected by the recent heavy storm the crops are recovering to some extent and in some cases a fairly satisfactory yield is anticipated.

Southern District: A large percentage of the wheat is headed out and on the whole crop prospects are exceptionally good.

#### Saskatchewan

Northern District: The weather during the past week was cool and cloudy but reports indicate that the crops, particularly in districts where the soil is light, are beginning to suffer from the effects of drought, and unless moisture conditions improve shortly the yield will not be above average.

Central District: A number of points in the district have benefited from local showers, but a general rainfall is necessary as the crops are beginning to suffer from lack of moisture.

Southern District: Weather conditions continue to be very satisfactory and prospects for a good yield are exceptionally favorable. Hail is reported at several points, but the damage appears to have been confined to comparatively small areas.

#### Bank of Montreal Summary

The Bank of Montreal reports as follows:—

General rains have been of material benefit in the Prairie Provinces, and on the whole the crops are in a favorable condition. All the crops in Ontario are unusually promising. Hay is all cut. and is a heavy crop. Good yields of hay are practically assured in Quebec and Maritime Provinces; roots and fruit in good condition. In British Columbia meat crops are suffering from drought.

#### Prairie Provinces

Edmonton District—Wheat heading out some sections. Should be fair average crop. Oats good condition. Hay not promising. Calgary district—Due to heavy rainfall, prospects more encouraging. Early sown wheat northern and north-eastern section heading out too soon. Yield probably light. Oats and barley later sown should yield well. Pasture improving. Hay crop light. Lethbridge District—Conditions materially improved by splendid rains. Alfalfa cutting commenced, yield favorable. Pasturage excellent. Conditions best since 1916. Some hail damage. Saskatoon District—Local showers only during the past week, and heavy rain now needed as grain showing effects of drought. Crops on stubble land will be short, and yield light. Wheat heading out or in head. Favorable weather conditions required to produce fair average yield. Regina District—Prospects generally promising. Good rains have fallen and moisture is ample. Late sown wheat in a number of districts not headed out. Scattered damage from hail. Grasshoppers held in check and danger is now practically over. Rye filling well and cutting general in a few days. Winnipeg District.—Recent heavy rain has provided heavy moisture. Crops have made rapid progress under ideal conditions, and prospects are good. Rye cutting should be general about 20th. No damage from rust or grass-hoppers.

#### Province of Quebec

The warm weather has been beneficial to all crops. Hay is proceeding in many districts, and a good yield is assured. Root crops are doing well. Grass pasture is everywhere in very good condition.

#### Province Of Ontario

Weather conditions generally favorable, and crops on the whole well advanced. Fall wheat ripening very fast. Cutting has commenced in some districts. Indications are for crop above the average. Spring wheat, oats and barley promise well over average. Hay unusually large crop. Practically all cut. Corn crop in good condition, and making rapid growth. Fruit, large crop indicated. Pasture in splendid condition.

#### Maritime Provinces

Hay promises heaviest crop in years. Pasture excellent. Oats, potatoes, apples and small fruts all good; in fact all reports optimistic of results above average.

#### Province of British Columbia

Drought general, except for light showers around Princeton. Hay, grain and roots all below average. Ashcroft.—Potatoes above average, but bean crop failure. Okanagan.—Water situation causing anxiety. Apples fair crop. Stone fruits good. Tomatoes ripening well. Fraser Valley.—Tree fruits above average. Small fruits drying on stem. Vancouver Island. —Berries fair crop. Up country range condition poor, due to drought and grasshoppers.

## TRADE QUESTION NOT DISCUSSED

### This Point Emphasized by Premier on His Return—Unusual Course of Giving Out Immediate Interview Adopted

(Special to The Monetary Times)

Ottawa, July 19.—The return of Premier King from Washington, and the frankness of the manner in which he permitted himself to be interviewed—a somewhat unusual course for Canadian Prime Ministers—has been the principal feature of the week at Ottawa, where things have been marked by more than the usual summer dullness owing to the fact that no cabinet councils were held in the absence of the leader.

Contrary to expectation, the trade question was not discussed at all during the Washington visit, and the Premier took pains to mention the fact explicitly. The Rush-Bagot agreement; the fisheries question on both coasts; the proposal for Canadian representation at Washington; and the matter of international reciprocity in regard to income taxes were the matters which Mr. King mentioned as having been discussed. If there was anything of further significance, it was not disclosed.

Apparently nothing in the way of a definite conclusion was reached on any of the matters mentioned; and the discussion seems to have been largely tentative: The progress made, such as it was, was detailed to the cabinet meeting on Tuesday of this week, and discussed there.

#### Rush-Bagot Agreement

There is difference expressed in official circles here as to the best course to follow with regard to the Rush-Bagot convention. Some express belief that it is best to "let sleeping dogs lie"; that the recent state of affairs has sufficed for over a century, without either side having given notice or being incommoded; and that it might be as well to let this state of affairs continue. It is pointed out with much force on the other hand, that recent occurrences have made it desirable that Canada should know definitely just where she stands on the matter, several American ships of a naval character having recently passed through the lakes.

It is interesting to recall just what the Rush-Bagot agreement is. It provides that the armed forces to be maintained by either of the two parties to it shall be confined to one vessel, not exceeding 100 tons burden, and armed with one 18 pounder cannon, on Lake Ontario; two vessels of like burden and armament on the upper Lakes; and one vessel of the same size and armament on Lake Champlain. Whether any material changes will be made in the agreement or not, remains to be seen.

#### The Income Tax

The question of reciprocity in taxation is one which affects only a comparatively local population Persons residing at Windsor, Bridgeburg, Fort Erie, Sarnia, and other places close to the boundary and working in the United States, have been obliged to pay income tax in the United States. Last session of parliament, the Canadian government passed retaliatory legislation on Americans working in Canada but residing in the United States, but has not yet applied the tax. It does not desire to enforce retaliatory legislation of any kind, feeling that it is not one of the things which make for international harmony. This attitude was impressed on the American authorities by the Prime Minister, and it is hoped it may have a good effect.

Apparently there was not much discussion on the international waterways question. Mr. King again repeated in person what he had already said in parliament—that Canada is not financially able to consider such a proposal at the present time. There was also tentative reference to the desirability of a Canadian representative at Washington.

#### Fisheries

One of the most important questions taken up was that of the fisheries. It is somewhat discouraging to find that the United States government apparently believes that the present time is not propitious to discuss this matter because of the attitude of the Senate. There are several aspects to this question, the most important being that concerning the salmon fisheries on the Pacific coast and in the Fraser River. The run of fish up that river has to follow along the American coast before entering the river, and owing to the destructive methods of fishing adopted by American canners and fishermen, including the use of traps, it is being steadily depleted, and those who know the situation in British Columbia anticipate that the practical extinction of the Fraser River fishery owing to this and other influences is not far distant. The matter has been taken up with the United States government several times, but, thus far, very little satisfaction has been gained. Retaliation is an unpleasant weapon to resort to, as the Prime Minister shows he realizes, but in the matter of the conservation of Canadian natural resources, it would seem that the necessity of having to resort to it is becoming more probable.

#### The National Railway Board

It is unofficially promised that the personnel of the new Railway Board will be announced this week. It will put an end to a period of wild speculation as to who the men will be to guide the destinies of our railway system. One of the latest names heard here as the probable new head of the Canadian National system has been that of Sir Eric Geddes, which is going somewhat far afield.

The head officials of the different railway brotherhoods in Canada—and the way in which the brotherhoods are multiplying constitutes one of the difficulties in dealing with them—have been here during the week interviewing the Minister of Labor regarding the troublesome question of the proposed reduction in wages. The labor organizations on this side of the line are displaying a much more amicable disposition than in the United States; and the Minister of Labor—probably as a result of his long experience as an active brotherhood official—is displaying good judgment and tact in dealing with them.

#### Coal Situation

Attention is called in a government bulletin issued this week to the alarming possibilities which may ensue from a shortage of hard coal stocks in Canada and at the mines in the United States. J. S. Cook, who is in charge of this work, does not suggest the necessity for a return to fuel control, but it is one of the possibilities of the near future, what with striking transportation men, and Canada not half supplied for the approaching season of consumption.

With unusually favorable crop reports, apparently well warranted, from the west, with our export trade according to the latest figures, begenning to slowly pick up again, and with consumptive demand increasing the outlook for the big government loan which Mr. Fielding announced some time ago appears somewhat brighter It is assumed that it will be a domestic loan, and it will be floated in the early autumn.

## BOND HOUSE TAKES UP INSURANCE

The insurance connections that have been established by the investment house of Versailles, Vidricaire & Boulais of Montreal for the purpose of arranging insurance for companies that they have been engaged in financing have induced them to establish a department of insurance of their own, and announcement is made that this branch will act as agents for the National Fire Insurance Co. of Hartford, Connecticut, and a number of other well known companies. In addition to fire, a general insurance brokerage business will be carried on under Ernest Tremblay, which will include accident, employers' liability, plate glass and other casualty lines.

# Financing Over the Dry Years

## The Good Farmer Has a Crop Sooner or Later, and Average For Canada Compares Favorably With That For Other Countries—How is He to be Carried in Meantime?

The relation of the western farmer to the banks is discussed at length in the June 20th issue of the "Farm and Ranch Review," in the form of an open letter "to those Canadian Captains of Finance, Industry and Commerce, Who Hold the Fate of the Western Farmer in Their Hands." The letter which is signed by Charles W. Peterson, the president and editor of the paper, states:—

"My Dear Friends:—

"I believe you are our friends. I am certain you want us to succeed with the least possible amount of mental wear and tear. As I cannot address you personally, I take this time-honoured method of bringing to your attention the case of the farmer of Western Canada, who is engaged in an occupation the success of which depends upon weather and market conditions over which he has absolutely no control whatever. He is frequently "slow pay" during unfavourable years, but, in the long run, he is an exceedingly safe credit risk, when his roots are in the soil of his land—the home and workshop of himself, his wife and little ones.

"The present agricultural prospects of the three prairie povinces, are broadly speaking encouraging. There are, of course, the usual dry spots. Drouth is the arch enemy of our farmers and in this respect we have lots of company. Drouth is the arch enemy of farmers all the world over, except in districts where excessive rainfall is a vastly more destructive element in crop production. The soil in a subhumid country is usually exceeding rich, in fact, almost inexhaustible. Where the rainfall is heavy, it wears out rapidly. Just take your choice! So a dry climate has its compensating advantages.

### The Lean Years

"We have behind us just now a run of unfavourable seasons in the west. The whole prairie section has, with few exceptions, been very hard hit. Seasons and markets have been against us. But Western Canada is not going broke. Just make a mental note of that. We are subject to occasional periods of dry seasons, some sections more so than others. The wise farmer prepares for the evil time as best he can. Our business and financial institutions, however, seem unable to adjust themselves to lean years. The farmer is continually studying new cultural methods to preserve the moisture and hold the soil in dry periods. Drought-resisting varieties of grain are being developed. In fact, we are rapidly minimizing the detrimental effects of periodic limited rainfall. When a series of dry years come now, we see no wholesale exodus of settlers as we did in 1893 and 1894. But finance and business become possessed with fear and nerves, and gloom prevails in our cities. Wild panics and wild liquidation of live stock at ruinous prices is the result.

### The Case of Australia

"As we, unfortunately, can't adjust our drouth periods to suit our business system, it might be well to seriously consider the advisability of adjusting business to suit the drouth. How do they do it in Australia? Compared with that country, we simply don't know what dry weather is. There, millions of head of stock die periodically because there is not even enough water to drink left in the great rivers, and seasons like that follow one after the other, resulting in tremendous depletion of live stock by actual death from starvation. Neither wool nor mutton can be marketed, year after year, from drouth-stricken areas, because the sheep are too weak to stand shearing or transportation. But even during the deepest distress, people there do not go around enveloped in gloom, predicting the bankruptcy of the continent and all its people. They recognize, that these distressing seasons are recurring factors to be reckoned with. They are simply a part of the day's work, and, very sensibly, they devote all their time and energies to salvaging the farmer and his property in order that he may 'carry on'. They know, because experience has demonstrated it, that favourable seasons are bound to follow and that all liability will then be liquidated.

### A Different Orientation

"But we seem unable to take unfavorable seasons philosophically. The fact of the matter appears to be, that in the minds of our Eastern business and financial leaders our Great West remains pretty much on an experimental basis. There is apparently little abiding faith in our magnificent agricultural empire west of Lake Superior. A few years of adverse agricultural conditions seems sufficient to undermine their confidence in our future. This depressing pessimism is, of course, eventually communicated to their western representatives and by them passed on to the man in the fighting line, who is perhaps making superhuman efforts to carry on. The net result is a lowering of morale most detrimental to recovery. Business gets absolutely out of joint. There is a wild scramble for security and farmers are compelled to sacrifice their property. All this is very distressing, very unnecessary and very useless. We must work for an entirely different business orientation, and an entirely different business point of view. The man on the land, in periods of stress, needs sympathetic encouragement rather than hounding. He wants to pay his debts as quickly as possible, but he can't perform miracles. Of course, the periods of stress in agriculture are also 'weeding out' periods. The bad and improvident managers fall by the wayside. The natural law of the survival of the fittest comes into play. It operates in farming as it does in any other line of activity..

### The Bank and the Small Farmer

"We pay through the nose for the so-called 'service' in almost every direction. Here is a case where we really want service and can well afford to pay for it. Every business risk has its monetary value. If the farmer were to get added protection or security against the financial problem of the lean season, he might possibly have to pay a higher rate of interest for his accomodation. There would probably be a guaranteeing and investigating medium between the bank and the farmer, and this "risk-taker" would have to be compensated. It might be his elevator company or his live stock commission house or some new organization. Canada is about the only agricultural country that I know of where such a middleman does not function between the farmer and the ultimate discounting or re-discounting agency. At the present time, local bank managers, in their relations with farmer customers, function as collectors rather than bankers. In respect to new business, whatever little authority these men had exercised in the past, it has been practically all withdrawn, and the smallest credits now must be specially authorized and are granted only where ample liquid security is available. The deciding voice in connection with the small loan, where the moral asset is of paramount importance, lies no longer with the man who comes in personal contact with the applicant. Some bankers, are of course, more exacting than others, but my general statement stands, that new agricultural credit is now surrounded with so many safeguards as to be practically unattainable. But our banks labor under the dangerous delusion, that Canada's banking system is perfect—without a flaw. And when any institution gets sufficiently imbued with that notion, it is on its way to dry rot. The fact of the matter is, that the great chartered banks of Canada are unfitted, from almost any point of view, for dealing directly and successfully with the small farmer.

### Over-Expansion Credit

"The banks have not in the past been niggardly with their credit facilities. I am well aware that they have enormous amounts of farm loans outstanding in a 'frozen' condition. It is the future I fear. The inevitable tendency will now be to curtail credit. In fact, this is absolutely the situation at present. This not an intelligent attitude. The West is suffering from an undue expansion of credit during past years. But this country cannot prosper under a 'feast to famine' policy in banking. And the farmer is vitally interested also in the credit facilities of those branches of commerce and industry from which he makes his purchases. Their "carrying capacity" is determined by the attitude of their own banks. It is not an easy problem that confronts us all. The basis of credit is confidence, and my chief grievance is the present undoubted tendency on the part of business people to take the gloomy view of the situation. There is nothing to justify any doubt of the ability of Western Canada to 'come back' with flying colors. Those who know the West most intimately are the most sanguine as to the future. And this is simply intelligent optimism as compared with stupid pessimism.

### The Ten-Year Period.

"Now business folk might think, that in expressing unbounded confidence in the soundness of Western dry-land agriculture, I take too much for granted and want them to do the same. But it so happens that I know what I am writing about, not alone from a life-long residence and close connection with agriculture in various parts of Western Canada, but from actual first hand farming experience, in a large way as well as in a smaller way. The directors of the Review' operate, and are principal owners of the Crowfoot Farm, east of Calgary. It is located in one of the driest districts of Alberta. Here follows our yield of wheat per acre in bushels for the past ten years, acknowledged and known to be the driest ten-year period in the past 38 years for which we have rainfall records:

| Year | Yield | Year | Yield |
|---|---|---|---|
| 1912 | 17.50 | 1917 | 25.33 |
| 1913 | 31.50 | 1918 | 3.35 |
| 1914 | 18.00 | 1919 | 12.91 |
| 1915 | 52.00 | 1920 | 19.42 |
| 1916 | 38.29 | 1921 | 3.00 |

"Just figure this up for yourself and you will find, that our ten-year average is 22.13 bushels per acre. I might mention here that in 1921 hail and not drouth was responsible for the low yield. The ten-year average for the whole of the United States is 14.2 bushels per acre, including winter wheat which gives a greater yield, and the average for Canada is below 15 bushels per acre. The average yield for North Dakota is 8 bushels per acre. Furthermore there is not a state in the union, outside the irrigated areas, that comes anywhere near the Crowfoot average for ten years decidedly 'dry land' farming.

### The Great Problem

"I am not going to quote reams of statistics of production for our prairie provinces. Anyone can consult them as they are easily available. They will be found entirely satisfactory and confidence-inspiring. I am merely going to reitterate the bald fact, that over any ten or twenty-year period, good, bad, and indifferent years included, the West is as sound as the proverbial dollar, and that statement stands for practically all the drier areas as well as those with greater average rainfall. Any good farmer can depend on a highly satisfactory yield of wheat over any ten-year period. That means that our agricultural industry is on a sound and lasting foundation. Our sole problem therefore, is our lean year or years. If our present financial and business leaders cannot find the means of tiding the farmer, and the man who does business with the farmer, over these periods, that system—or apology for a system, must be scrapped and another one, more elastic and intelligent, substituted. This must surely be the final outcome. If it is not, it is tantamount to a confession of failure and inefficiency on the part of our business and financial executives. It is also a confession of utter inability to appreciate and provide for the needs of pioneer communities and to do their part in upholding Canada's reputation as a successful colonizing nation. I again ask: 'How do they do it in Australia.'

"Yours faithfully and hopefully,
Chas. W. Peterson."

---

## STRATHCONA FIRE

Leave to appeal the appointment of liquidators for the Strathcona Fire Insurance Company was refused by Justice Lafontaine in Quebec Superior Court on July 10, and the motion presented on behalf of creditors of the company to reverse the judgment of Justice Coderre naming J. E. Lemire and W. Damphousse liquidators was dismissed, with costs.

Partial success crowned the efforts of attorneys on behalf of Turcotte and Merrill, trustee, who had asked on Saturday, to have them appointed joint liquidators with the other two, and the Court allowed them to be added to the inspectors already named.

# Huge Amount of Idle Lands

### Analysis of Surveyed Areas Shows Twenty Five Million Acres Now Available for Entry—Value of About Three Hundred Million Dollars Represented

The Natural Resources Intelligence Branch of the Department of the Interior furnishes an enlightening summary of the land situation in the West, in its June report. One of the most significant facts brought out is that although nearly 26,000,000 acres still remain available for homestead entry, this area is less than half of the acreage already homesteaded. The remaining 26,000,000 acres includes the lands that have been passed over by homesteaders in the process of selection, but is composed chiefly of new areas beyond the present fringe of settlement.

A second important point is that—aside from the immense areas already disposed of under homestead laws or remaining available for homestead entry—there has been a total of 48,000,000 acres set aside in the form of grants to the Hudson's Bay Company, grants to various railways, and school endowment for the western provinces. These lands are being sold from year to year. Total sales up to March 31, 1921, amounted to some 28,000,000 acres, thus leaving a very considerable acreage still unsold at that date. Recent investigations carried out by the Natural Resources Intelligence Branch of the Department of the Interior have shown that there are, within fifteen miles of existing railways in the three Prairie Provinces, considerably more than 20,000,000 acres of unoccupied land privately owned. This figure does not include the several million acres of unsold school lands which, though not subject to homestead entry, are nevertheless publicly held and obtainable by purchase through the School Lands Branch of the Department of the Interior.

Taking the situation as a whole, it is evident that there is still ample opportunity for the homesteader who desires to enter the newly-opened areas, but that the great settlement problem of Western Canada today is that of filling up the vacant lands within the settled areas. The maximum advantage both to the individual settler and to the country, seems clearly to lie in this direction rather than in that of extending the actual bounds of settlement over a still greater area. In the present situation, the prairie provinces have over 20,000,000 acres of unoccupied land in private ownership. At an average valuation of $15 per acre this area represents some $300,000,000 worth of land lying idle.

DETAILED STATEMENT OF SURVEYED AREAS IN MANITOBA, SASKACHEWAN AND ALBERTA, JANUARY 1, 1922

| | Manitoba acres | Saskatchewan acres | Alberta acres | Total acres |
|---|---|---|---|---|
| Area under homestead (including military homestead | 8,404,800 | 27,634,300 | 18,300,000 | 54,339,100 |
| Area under pre-emption, purchased homesteads sales, half-breed scrip, bounty grants, special grants, etc. | 5 108,200 | 7,762,900 | 3,895,100 | 16,766,000 |
| Area granted to railway companies | 3 566,997 | 15,177,063 | 13,120,014 | 31,864,074 |
| Area granted to Hudson's Bay Company | 1 196,700 | 3,183,600 | 2,175,700 | 6,556,000 |
| Area of school land endowment (1-18 of area surveyed in sections) | 1,637,300 | 3,942,000 | 3,755,700 | 9,355,000 |
| Area sold subject to reclamation by drainage | ........ | 267 | 32,505 | 32,772 |
| Area sold under irrigation system | ........ | 76,832 | 980,850 | 1,057,682 |
| Area under timber berths | 908,200 | 785,600 | 1,293,900 | 2,987,700 |
| Area under grazing leases | 132,600 | 3,069,500 | 2,933,400 | 6,135,500 |
| Area of forest reserves and parks | 2 386,700 | 5,953,700 | 16,754,000 | 25,094,400 |
| Area reserved for forestry purposes (inside surveyed tract) | 746,300 | 1,430,000 | 1,677,500 | 3,853,800 |
| Area of road allowances | 976,900 | 1,467,500 | 1,287,200 | 3,731,600 |
| Area of parish and river lots | 505,211 | 84,010 | 118,564 | 707,785 |
| Area of Indian reserves | 433,860 | 1,071,109 | 1,367,974 | 2,872,943 |
| Area of Indian reserves surrendered | 87,560 | 410.297 | 302,228 | 800,085 |
| Area of water-covered lands (inside surveyed tract) | 4,260,400 | 1,911.200 | 2,302,200 | 8,473,800 |
| Area now available for entry | 5,348,300 | 5,068,000 | 15,460,100 | 25,896,400 |
| Total surveyed area | 35,700,028 | 79.027,878 | 85,756,935 | 200,484,841 |

## NEW STAMP TAXES

Some confusion, apparently, has arisen with regard to the date when the new stamp tax on cheques will come into force. An official announcement on July 6 intimated that the new rate of two-cent stamp tax for every $50 of the amount of money for which the cheque is drawn up to, but not exceeding $5,000, will become effective on August 1 next. Cheques drawn for any amount exceeding $5,000 will be subject to the same stamp tax as those drawn for $5,000, namely, $2.

## ONTARIO RURAL CREDITS

Two farm loans associations under the new Ontario Rural Credits Act have been organized in Sudbury District by D. J. Robicheau, agricultural representative. The Balfour and Rayside Association, with headquarters at Chelmsford, has a membership of 51, and the Cosby and Martland, with headquarters at Noelville, a membership of 36. These associations guarantee loans which are made to members by the Ontario government. Applications for loans are made to the local directors of each association by the members and if approved, the association endorses the notes. To date loans amounting to more than $16,000 have been approved by the Balfour and Rayside Association. The loans bear interest at 6½ per cent. and are repayable 31st December, with the option of renewing for another year at the discretion of the directors.

## BIG MINING DEAL

Another big mining deal was closed last week in the Porcupine district when the Rochester property was taken over by the Canadian Gold Mines Company, made up of British and American financiers. The purchase of this property involves a total of $275,000 on terms of $10,000 cash and with substantial cash payments falling due at intervals of every three months, until paid in full.

Coming so quickly on the heels of the deal whereby the Hollinger secured an option on the Schumacher, this latest deal attracts added attention and goes to show the growing interest in properties. lying adjacent to the big producers. The Rochester lies next to the Hollinger, on the north. Theodore Cross, of New York, is one of the principal American financiers, while Mr. Sara, of Montreal, is identified with the British interests involved.

The deal was negotiated by T. J. Flynn, of Haileybury, and is one of several offers that had been under consideration. Plans of operation call for diamond drilling as well as shaft sinking and this work will be commenced at a reasonably early date. The principal vendor of the property is George Rochester, a prominent business man of Haileybury.

## ASSESSMENTS HIGHER IN WEST

### Government Report Also Shows That Per Capita Debts There Are Above Eastern Towns and Cities.

The third of a series of reports on municipal finance in Canada, prepared by the Dominion Bureau of Statistics has now been issued by Col. J. R. Munro, chief of the finance branch. The report covers the 280 towns of from 1,000 to 3,000 population in Canada.

Total assessed value of property in these towns is $227,073,141; in the towns of 3,000 to 10,000 the figure was $280,294,473 and in the cities of over 10,000 the total came to $2,924,553,003. It is of value to investors in municipal bonds of different cities to have an idea of the average assessment in towns of different size. Worked out on a per capita basis the figures show that in towns of 1,000 to 3,000 population the assessed value per capita of taxable property is $542; from 3,000 to 10,000, $507; and over 10,000, $982.

In Western Canada assessments are much higher per capita than in the East as this table shows:

| | | Per Capita |
|---|---|---|
| Towns of 1,000 to 3,000:— | | |
| Prince Edward Island | | $450 |
| Nova Scotia | | 258 |
| New Brunswick | | 378 |
| Quebec | | 614 |
| Ontario | | 463 |
| Manitoba | | 634 |
| Saskatchewan | | 640 |
| Alberta | | 601 |
| British Columbia | | 851 |
| Yukon | | 391 |
| Average East of Manitoba | | 503 |
| Average Manitoba and West | | 666 |
| 3,000 to 10,000 | East | 455 |
| 3,000 to 10,000 | West | 785 |
| 10,000 and over | East | 907 |
| 10,000 and over | West | 1239 |

Turing to debt figures the report shows that debts average higher in the West than in the East per capita.

| | | Per Capita Debt |
|---|---|---|
| 1,000 to 3,000 | East | $ 72 |
| 1,000 to 3,000 | West | 104 |
| Average all Canada | | 80 |
| 3,000 to 10,000 | East | 78 |
| 3,000 to 10,000 | West | 224 |
| Average all Canada | | 101 |
| 10,000 and over | East | 167 |
| 10,000 and over | West | 325 |
| Average all Canada | | 202 |

## MANITOBA PUBLIC ACCOUNTS

Report of a special audit of Manitoba Government finances made by a firm of chartered accountants to the Provincial Treasurer on July 11 states that the actual deficit for 1921 was 30,000 less than the amount stated by Hon. Edward Brown in his Budget speech, to be $765.486.

The auditors declare that a surplus or deficit in the accounts of a government "arises chiefly from a successful or unsuccessful outcome of the forecasts of a Budget," and is not, as in commercial activities, the result of market conditions.

## B.C. GOLD PRODUCTION

British Columbia production of gold will be the largest this year in the history of the province. This result is being attained largely through the activities at Premier Mine. The production in silver, lead and zinc will also be the largest on record in the province. The copper situation is gradually increasing and the close of the year promises to see the price of metal on a paying basis, with resultant profit to British Columbia mines.

The Britannia mine, near Vancouver, will next year, become Canada's largest copper producer. With Granby Copper Mountain and the smaller mines in readiness to produce, the copper output will not be far short of 100,000,000 pounds a year. British Columbia is the largest copper-producing province in Canada.

## TIMBER LIMITS PURCHASED

The E. Burtt Lumber Company, Limited, of Cardigan, York county, have bought the mills and 30 miles of timber limits at Doaktown, N.B., owned by Frank D. Swim, ex-M.L.A.

## BUSINESS INSURANCE

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

## A Message From Lloyd George

"Risk is inseparable from civilized life, but though we cannot avoid risk, we can by a suitable organization of society place nearly the whole burden of risk on the shoulder of those who are able to bear it. Willingness to take risks is in the wage earner or salary earner a weakness, or in great excess, a vice. The contrary of the vice of gambling is the virtue of thrift, and the system of Life Insurance has given the thrifty man an opportunity of practising his virtue, compared to which the stocking, the small mortgage and the savings bank are but clumsy and ineffective devices."

The Great-West Life issues Policies of Insurance at favorable rates, possessing exceptional investment advantages. Particulars will be sent to you upon request.

## MUNICIPAL TAXES

In London, Ontario, a proposal is being discussed to have the board of education collect its own taxes and levy its own rate for school purposes. Under the present law, of course, this cannot be done as in Ontario the estimates for education are prepared by the school board and presented to the City Council, the latter including the necessary rate in the total tax levy for the year.

This is a case of authority without responsibility. True, the board of education is elected by the people and is responsible to them just as is the city council, but the latter is the tax collecting and general financial authority and as such is always regarded as being responsible for taxation.

What is required is not the complete separation of the board of education from the city council, but rather the subordination of its financing to the control of the council. The London suggestion would result in two distinct governments—one controlling general matters and the other controlling education, with two corresponding financial organizations. There is no reason, however, why educational work should be regarded as different from the other branches of municipal activity. It is, of course, true that expenditure on education has in recent years increased enormously; but this fact, instead of justifying the separate handling of educational affairs, rather suggests that the power which has been placed in the hands of the board of education has not been kept in check by the responsibility which attaches to a tax collecting authority. School trustees now maintain that the continual objections on the part of municipal councillors to expenditures for education show that they have no appreciation of the needs. Perhaps it is the trustees who over-estimate the needs in many cases, however, and if municipal councillors were responsible for education, they would, unquestionably, be more liberal than their vote-catching views expressed in council now indicate.

## OUTLOOK FOR FALL AND WINTER

Conditions at the close of the first half of 1922 indicate that business will expand moderately during the autumn and winter months. It is now one year since the definite beginning of recovery from the depression of 1920-21. Progress was slow until the close of 1921, but since the beginning of 1922 improvement has been rapid. Money is cheap. The crop outlook is excellent. With few exceptions, stocks of raw materials and of manufatcured products are not larger than necessary to bridge the normal period between production and consumption. Commodity prices are rising. The movement at present seems to be primarily one of adjustment between the different classes of commodities, and as long as the upward tendency does not assume a speculative character, it is a favorable factor. Except for strikes, there is little idleness. Production has expanded steadily since the beginning of the year, and as yet the usual mid-summer dullness has been little felt.

Any fair appraisement of the situation must, however, take cognizance of several groups of qualifying factors. First and most important of these is the postion of domestic consumers. Many are cautious and disposed to economize. Buying is not likely to be stimplated by reports of impending shortage of goods, or fears of higher prices, for except in the case of necessaries the public is willing to wait, or to do without, if prices show a tendency to soar. Furthermore, large sections of the population cannot buy, no matter how willing, if prices rise too rapidly. Although they have recovered somewhat, wages and salaries are lower than two years ago. Enforced unemployment left many workers in debt, of with depleted savings, not yet made good. Strikes have kept thousands in idleness for months and threaten to result in idleness for other thousands if not speedily brought to an end. Farmers are usually conservative buyers and although prices of farm products have improved, prices of what farmers must buy are still too high in relation to what they have to sell to place them in a position to expand their purchases rapidly. Furthermore, they are paying their debts. There is every ground. to expect a reasonable volume of fall business at moderate prices, but there is no basis for expectation of such volume at high prices or of boom business at any price.

The second retarding factor is the labor situation. The United States is in the midst of widespread labor troubles, and these affect Canada directly. It is useless to declaim against the spirit that has brought this situation to pass. Each side in both the railroad and coal strikes believes it is justified. Workmen do not lightly sacrifice their earning power, or corporations carelessly take the risk of damage to their property or thoughtlessly forego the hope of profits for a long period. That section of the public which is not directly concerned is an equal sufferer for these conflicts are certain to be felt in lessened productivity and restricted distribution in every line. The only settlements which can be ultimately in the public interest are fair settlements, and the public has the right to take all measures which may serve promptly to bring them about. Delay in reaching settlements will temporarily delay expansion, but it will not affect the fundamental causes which for more than a year have been making for better business.

The third factor which seems likely to limit business expansion on this continent is the European situation. Outwardly it remains complicated. Enormous issues of paper have further depreciated the German mark. There have been assassinations and other evidences of political unrest and Germany has formally applied to the Reparations Commission for a moratorium on reparations payments. Difficulties arsing from depreciated currencies and disorganized public finances are bound to be a retarding influence, and may have a certain adverse effect on exports of grains and other food products, cotton and other raw materials.

There is another side to the situation, however. It is at last recognized that financial chaos cannot continue indefinitely, that grandiose schemes for financial rehabilitation, by which the European combatants had hoped to escape some part of the penalty of the crime of war, are all bound to fail, and that Europe must save itself. Favorable exchanges clearly reflect the efforts of those countries, combatant or neutral, which have faced the facts. Those countries which thus far have avoided the issue must meet it now.

## BRITISH DEBT REFUNDING

The question of funding the British war debt to the United States, reported to be under consideration by the British government, is given prominence by newspapers there. Overtures for the funding of the debt were made by the United States government some time ago, according to The Times, these being accompanied by an invitation to a conference in Washington. The Daily Mail asserts that important communications are now passing on the subject between the two governments, adding that a British mission will leave shortly for the United States to discuss the question and while there will also talk over the possibility of an international economic conference in Washington.

The Morning Post's financial editor welcomes the evidence that the funding plan is now receiving attention. "Unquestionably this matter plays an important part in the whole problem of international debts," he says, "and it is clear that America is looking to Great Britain to give a strong lead to recognition of these external obligations."

The writer, however, ridicules the report that payment of the debt to the United States in a lump sum in the near future is contemplated. adding: "We must remember that, apart from the question of beginning the liquidation of our large debt to the United States in the autumn. we have smaller obligations to meet during the present year. It is understood that there is a liability of three million pounds due to Japan, while there is a line of three-year British notes in the United States which will mature November 1, amounting to about $50,000,000. It will be readily seen, therefore, that while it is generally believed the British government's stock of dollars in America is fairly large, there is every reason to maintain a strong position in that respect."

### POLICY OF CAUTION REQUIRED

Though the deep waterways project was one of the matters discussed by Premier Mackenzie King at Washington last week, it is not likely that the Dominion Government will change its attitude. With an increase in taxation required to meet present expenditures, in which the interest on public debt is the heaviest burden, there is no public favor for any project which would increase that debt. Though a large body of experts consider the scheme as sound economically, the fact remains that for many years it would merely add to our curent outlay.

There is moreover the consideration of capital cost. If it would be profitable now, it will be still more so when costs are lower. In the face of business depression there is also the likelihood of unmarketable power. On the whole, the arguments are in favor of a postponement for more mature consideration and better conditions.

### AN INTERPROVINCIAL CONFERENCE

Invitations have been sent out by the prime minister to the premiers of the provinces for a conference on unemployment. The Dominion government is now in communication with the provinces in regard to the date and the subjects which will be considered. Unemployment in its various phases is expected to occupy the chief place on the programme, but it is likely that other subjects will come up for discussion.

Among these will be, it is understood, the various draft treaties and recommendations which have been made by the International Labor Conference under the League of Nations. These agreements include questions which are provincial as well as those which are Dominion in character, and it is considered desirable that common action should be considered between the governments affected.

An order-in-council has already been adopted by the governor general-in-council setting forth the opinion of the law officers of the crown in regard to the jurisdiction under which the various proposals come. In a few cases the law officers find that there is exclusive federal authority to act, but in many other instances jurisdiction is concurrent or the matters are properly within the scope of the provincial legislatures. As already indicated, the date of the conference is not yet known; but it is not anticipated that it can meet before late in August or in September.

"The Lord may help—life insurance would," says the advertisement of an Indianapolis life insurance company. There appears to be about as much uncertainty about the one as the other.

### WHAT THEY KNOW AT HEAD OFFICE

A girl clerk was sent from Head Office to relieve at one of the City branches. The Manager asked her whether she could run the Savings Ledger. "No," she replied, "I don't know anything about banking, I have always been in Head Office."

### WILL HANDLE GRAIN TRAFFIC

Whatever the volume of the coal and grain business was this fall the Canadian Pacific would be in a position to handle it. This was the assurance given by Grant Hall, vice-president of the company, in Calgary on July 12. Mr. Hall is on his annual tour. He is in a most hopeful frame of mind regarding the crop situation in the three western provinces. Present prospects were that there would be another fair average crop.

"No, I do not anticipate any complications arising on this side owing to the strike among United States shopmen," he remarked in reply to a question. "There is no occasion to think this at the present time," he added.

## *Personal*

ALEXANDER ROBERTSON has recently been appointed fire superintendent of the Dominion Gresham Guarantee & Casualty Company. Mr. Robertson was associated with the Liverpool and London and Globe at the Head Office for Canada, Montreal, for a period of twelve years, and about 18 months ago severed his connection with the company to join the Motor Union in an executive position at its Head Office in Toronto.

A. H. RODGERS, of Brandon-Rodgers, Ltd., insurance, Toronto. Mr. Rodgers was formerly secretary of the Norwich Union Fire Insurance Society.

G. A. ELLIS, who has been with the firm of Edward Cronyn & Co., stock brokers, Toronto, for a number of years, has been made a member of the firm and has been appointed Mr. Cronyn's attorney on the Toronto Stock Exchange.

H. M. SCOTT, of Peter Lyall & Sons, Victoria, who has been the firm's superintendent of the new Esquimault drydock since the beginning of the year, has been placed in charge of the company's business at the Welland Canal.

TRAVERS SWEATMAN, K.C., has been reelected president of the Winnipeg Board of Trade. S. W. Miller was elected managing secretary.

J. R. WADDELL, of Montreal, has been elected a director of the Union Bank of Canada.

## *Obituary*

JOHN M. GRANT, an ex-Mayor of Woodstock, died in Los Angeles, Cal., on July 12th. The late Mr. Grant was born in Elgin, Scotland, and came to Canada at the age of five years, settling in Woodstock. In 1881 he was elected to the town council, became first deputy reeve in the succeeding year, and for the following two years was reeve. He served as Mayor of Woodstock in 1882 and 1883.

### APPEAL ON LABOR CONDITION

In the judicial committee of the Privy Council on July 13 the petition of Brooks and Bidlake versus the Attorney General of British Columbia, was unopposed, and was granted. The petitioners appealed against a condition imposed by the province in granting timber leases that no Chinese or Japanese labor should be employed, which they claimed was not valid, in view of Dominion legislation concerning aliens.

### RIORDON COMPANY

While it is likely to be several weeks yet before the new financing that is under consideration will be arranged for the Riordon Co., conditions of demand for the company's products that is, sulphite pulp, have steadily improved. It is understood that not only the Kipawa but the Hawkesbury Mills are operating at capacity and have orders on hand to keep them engaged for the next two months.

## CANADA'S FIFTY-FIVE YEARS

(From the New York "Commercial")

Canada is fifty-five years old. In these few years she has become an empire in the extent of her political and economic influences. A land of towering mountains, sweeping forsets, plains, valleys; of expansive lakes and mighty rivers, her magnificent natural assets still under the control of the pioneer's spirit, assure a future whose greatness is beyond reckoning. How great her reserve of virgin agricultural lands is seen in the fact that more than 200,000,000 acres in the western provinces have been untouched by the plow.

In the land thus far cultivated, Canada has assumed second place among the wheat growing nations, her production in 1921 having been more than 300,000,000 bushels. Her crop acreage this year, according to government estimates, is as follows: Wheat, 22,464,000; oats, 16,933,500; barley, 2,747,000; rye, 207,960; peas, 189,300; mixed grains, 872,700; hay and clover, 11,106,800 acres. Canada claims a virtual monopoly of some valuable mineral deposits. Having only one-half of one per cent. of the world's population she produces 90 per cent. of its cobalt, 88 per cent. of its asbestos, 85 per cent. of its nickel, 12 per cent. of its silver and 4 per cent. of its gold. She has 17 per cent. of the coal resources of the globe and 71 per cent. of those of the British Empire. Canada's forest resources are immense. Her claim is that they are second to none. She is the world's first fur producer.

A splendid neighbor whose years, we hope, will be as benedictions of peace and prosperity.

### WHOLESALE PRICES RISING

The index number of wholesale prices in Canada constructed by Prof. H. Michell of McMaster University, stood at 164.5 for the month of June, 1922, thus registering a rise of 2.2 per cent. over the previous figure of 160.9 for May. This compares with 176.6 for June, 1921; 269.9 for June, 1920, and 236.2 for June, 1919. The index for the twenty foodstuffs included stood at 179.5, an advance of 2.5 per cent. over the previous figure of 175.1 for May. This compares with 193.0 for June, 1921; 317.5 for June, 1920, and 263.2 for June, 1919. Beef, pork, butter, cheese, sugar, tapioca and currants advanced, while lard and flour fell. The index for the twenty manufacturers' goods stood at 149.5, an advance of 1.6 per cent. over the previous figure of 147.0 for May. This compares with 160.2 for June, 1921; 222.2 for June, 1920, and 209.1 for June, 1919. Cotton, hides, iron, steel billets, lead, copper and tin, advanced, while galvanized sheets and silver fell.

This is the first time since the great decline, that the index in Canada has registered a decided advance, and it may be assumed, with fair certainty that prices in the Dominion are now following those in the United States, and are definitely rising. How long this advance will continue it is impossible to say, but all indications would seem to show that it will continue for some time.

Professor Michell's index number has been revised since it was last published, a few alterations having been made in the commodities included. One line of dressed leather has been dropped and binder twine substituted. Steel billets have been included instead of a line of tool steel. Bituminous coal has been substituted for hard maple, and spruce deals for oak. In the twenty foodstuffs, currants have been substituted for coffee. The effect of these changes has been to raise the number very slightly.

It is to be noted that Professor Michell's number is constructed of finished and semi-finished products entirely, no raw materials being included. Thus, flour is quoted and not wheat, bar iron and not iron ore. The purpose of this selection is to provide a very sensitive index of general manufacturing and business conditions as reflected in the movements of wholesale prices. The base, which is reckoned as 100, is the sum of the average prices of each of the forty commodities for the ten-year period, 1900-1909.

## Your Business Abroad

With a fully equipped British and Foreign Department, transacting every type of foreign banking business, and with close foreign affiliations, this Bank can render you valuable service in conducting financial affairs abroad. You are invited to write to this department for any information or advice desired about foreign markets and conditions.

# The Life of a Bank Note*

It was on the 10th day of July, 1920, that I, a nice new Royal Bank of Canada $5 note, arrived at the Circulation Department, Ottawa. Only the affixing of a signature was required to make my appearance perfect, and that operation took very little time. Of course I was not alone, there were twenty thousand of us, four on a sheet, making a total of $100,000. For the purpose of record, we each had a number as well as a series letter. As soon as the Circulation Department accepted us from the American Bank Note Company, notice of our "Birth" was sent to the Head Office of the Bank.

We were not destined to remain inactive in the Ottawa safe for any length of time, for only a few weeks elapsed ere we were taken out to undergo another operation before we were sent away for a trip. This time I was severed from my companions, "B, C, and D." as I belonged to series "A." All the notes of "A" class were checked, and a slip called a "specification," which was initialled by the checking officers, was attached to us. After having been carefully wrapped and sealed, we were now ready for our journey. To ensure our safe arrival at our destination, several precautions were taken. For instance, when we left the Circulation Department, we were escorted by two officers, who obtained a receipt for us at the Registration Department of the Post Office. We were also insured, and "advice" of our despatch was forwarded to our destination, which happened to be one of the larger branches in the Middle West. Here we were received and checked by two officers, who tucked us away in the safe, as our services were not required just then. Our arrival was duly reported to Ottawa.

### Travelling

In the safe where we now were, I was surprised to find many other Royal Bank notes, but I discovered that we were all soon to be used in connection with the "Moving of the grain." In the course of time, I formed part of a shipment that was sent out to one of the outlying districts, where I performed many services, passing from bank to the farmer, from the farmer to the farmer's help, from the farmer's help to the store. and so on, until ultimately I was taken away from that district to one of Canada's largest cities. Here life became very active; I was in a bank one day, in a pay-envelope the next, a store the next, and so on. Often I wondered why people accepted me so readily, but that was accounted for by the strong position of the bank that was responsible for my redemption, as well as by my special security in the form of a deposit which each bank makes with the Dominion Government, and which is known as the "Deposit with the Dominion Government for security of Note Circulation."

It was now getting on towards Christmas time when money appears to circulate very freely. I was given as a Christmas present to a poor family, who used me to such good advantage, that they had a Christmas dinner which they will always remember. Shortly after this I found myself at one of the branches which had a surplus of notes, and as I was still pretty clean, a little crumpled, perhaps, but still fit for businesss, I was included in a remittance which was being forwarded to Ottawa Branch. There I was destined to remain until the breaking up of the winter, when a call came from a branch in the lumbering district for a supply of notes. We were prepared in the usual way and sent off to make ourselves generally useful in the lumbering business.

Except for a short time in Newfoundland, where I circulated just as freely as in Canada, the remainder of my life was spent in the Lower Provinces, for the most part in the mining area of Nova Scotia. Ultimately, I came into the hands of a foreign family, who were very careful of their money, but who, instead of depositing it in a bank, preferred to keep it around the house in various places. One day I found myself put into the oven for safekeeping by the woman of the house. She happened to be out when her husband arrived from work, and he, being anxious for his supper, lit the stove. When his wife came in shortly afterwards she rushed to the oven and took me out, but not before I had become discolored and badly scorched. As I was now in such a state that I would not be accepted by the storeman or the general public, nothing remained but to take me to the bank, where the Manager informed my owner that he would have to give an explantion of the cause of my mutilation, that in the meantime I could be accepted for collection only, and that it would be necessary to forward me to Head Office for valuation.

### Execution

Eventually, I arrived at the General Manager's Department, and, as my usefulness was at an end, I was given a place with all the dirty, torn, and dilapidated notes. Here I must remain for the "grand finale" when we will all be taken out to "answer the last roll call." A Royal Trust Company's officer, representing the Canadian Bankers' Association, and the Chief Accountant, representing The Royal Bank of Canada, will officiate at the ceremony, and, when they see us safely into the fiery furnace they will sign our death notice—The Certificate of Destruction.

---

(*From the Royal Bank Magazine)

## *Bank Branch Notes*

A. N. McDonald, formerly Inspector in the Western District, the Bank of Toronto, has been appointed manager of the branch at Yorkton, Sask.

F. H. Reid, manager of the branch of the Bank of Toronto at Edmonton, Alta., has been appointed manager of the branch at Winnipeg, Man. He will be succeeded at Edmonton by T. E. Fletcher, formerly of head office.

Sherwood Collins, of Paisley, has taken a position in the Royal Bank at Cargill, Ont., succeeding Carlyle Garland, who has been transferred to Clifford.

P. A. Neonan who has been in the New York agency of the Union Bank has been appointed manager in Pakenham.

The bank of Toronto will build a modern branch bank in Sudbury on the site now occupied by Smith's store, Durham St.

The Sterling Bank announces the following:—G. A. R. King, a recent member of the staff, has been appointed manager of the Fort Erie branch; G. G. G. McKenzie has been transferred from Gilbert Plains to Wadena, and R. B. Turnbull from Hanley to Glenella; J. H. Robinson, formerly manager of the Whitney branch has been appointed manager at Duntroon; H. R. Warren, recently manager at Regina, has been transferred to the branch at Port Stanley. E. H. Johnson, who was temporarily in charge at Port Stanley, has received the management of Bayfield; D. B. Campbell has been promoted from the position of teller at Port Rowan to accountant at Uxbridge; G. R. Bradley, formerly manager at Gilbert Plains, and who has been receiving training in Winnipeg, has now been appointed manager at Regina; W. H. G. Phipps, manager of the Staff Department, has been appointed manager of the branch at Montreal, Mr. Bodman is being transferred to Head Office; F. E. Atkinson, of Port Dalhousie, is now manager at Port Rowan, replacing B. V. Hemsley, who is assisting in the Credit Department at Head Office.

## LIABILITY OF BANK

The Saskatchewan Court of Appeal recently decided the case of Marsh v. Royal Bank, in which the facts were that Marsh discounted a note for $500 with the Bank which then without authority from Marsh applied the proceeds on debts by Marsh to third parties, which third parties were indebted to the Bank. The said third parties then indorsed the notes to the Bank on account of their indebtness to the Bank.

Marsh then brought action to recover the proceeds of the notes and the Court held that the fact that the Bank made these payments for him was no answer to a claim for the proceeds of the note and that Marsh was entitled to the proceeds of the note with interest to the time his liability to the bank was discharged in the books of the bank at the same rate as that which the bank charged him and since that date at the rate of five per cent. It was also held that a counterclaim based upon assignments obtained by the bank from such third parties was ineffective, as the parties had been paid and there was therefore nothing to assign—the counterclaim was therefore dismissed.

## NEW MACAROW TRIAL COMMENCED

### Charge is Now That of Making a False Statement in a Return, Not of Making a False Return

The trial of D. C. Macarow, former General Manager of the Merchants Bank, began on July 18 before Chief Justice Decarie, in the Court of Special Sessions, Montreal. The charge against Mr. Macarow, against whom the Grand Jury has found a true bill, differed from that on which he was summoned to the Police Court, where proceedings ended in his being acquitted by Judge Cusson.

The text of the charge follows:—

"Daniel C .Macarow, on or about November 19, 1921, at the city of Montreal, said district, being then and there General Manager of the Merchants Bank of Canada, a chartered bank, with intent to deceive or mislead the Minister of Finance and Receiver-General for the Dominion of Canada, in particular, and the public in general, made wilfully false or deceptive statements in a return respecting the affairs of the said bank, to wit: In the return for the month of October, 1921, to the said Minister of Finance and Receiver-General respecting the liabilities and assets of the said bank."

The difference between the two charges lies in the fact that he is not now charged with "making a false return," but with "making a false statement in a return."

Bennett John Roberts, the Secretary of the Finance Department at Ottawa, gave evidence on the receipt of the return, and J. M. Kilbourne, Secretary of the Merchants Bank, was called to file a number of documents produced at the Police Court hearings.

### Prominent Men Present

The array of legal talent was considerably augmented since the case was taken before Judge Cusson for preliminary hearing. The Crown was represented, as before. by C. A. Wilson, K.C., and J. J. Creelman, K.C. Mr. Macarow's legal advisers were N. K. Laflamme, K.C., M.P., George Montgomery, K.C., S. W. Jacobs, K.C., M.P., ex-Judge Adolphe Bazin. Sir Montagu Allan was represented by Aime Geoffrion, K.C., who held a watching brief, while for the first time a representative appeared for the Bank of Monteral in the person of A. R. Holden, K.C., who also held a watching brief.

E. A. B. Ladouceur, Clerk of the Crown and Peace, acted as Clerk of the Court, the well of which was filled with prominent Montreal business men called by the Crown as witnesses. Among them were Hon. C. C. Ballantyne, a director of the Merchants Bank prior to its amalgamation, and Farquhar Robertson, another director.

Mr. Macarow did not appear in the dock, as Mr. Laflamme asked that he be permitted to sit with his counsel, owing to the nature of the evidence and the very complicated figures which would have to be submitted to the court, concerning which he would have to be consulted. Judge Decarie allowed the request.

At Mr. Wilson's request, the roll of witnesses was called. It follows: J. M. Kilbourne, H. B. MacKenzie, J. G. Muir, H. B. Loucks, W. Meldrum, H. R. Little, E. J. Finucan, W. C. Finlayson, J. D. G. Kippen, H. H. Hamilton, Thomas Hurd, Sir H. Montagu Allan, F. Howard Wilson, Hon. C. C. Ballantyne, Senator Lorne C. Webster, Farquhar Robertson, G. L. Cains, John Baillie, N. J. Dawes and R. H. McMaster.

The court announced its decision to sit from 10 o'clock to noon each morning and from 2 to 4 in the afternoon during the hearing.

## MERCHANTS BANK STAFF

Readjustment of salaries of former officials of the Merchants Bank to put them on the same basis as the Bank of Montreal staff, went into effect on July 11. "There has merely been effected an adjustment of salaries, so as to bring the former Merchants Bank staff on the same footing as the existing staff of the Bank of Montreal," declared one of the chief officials of the latter bank. "The two staffs were paid on a different basis. The Merchants Bank staff were paid a straight salary, whereas in the Bank of Montreal the staff were paid a salary, and were given district allowances, and bonuses to cover the high cost of living during certain periods."

# British Empire Trust Company, Limited

## A RECORD YEAR.

### "VERY STRONG AND SATISFACTORY POSITION"

The twenty-first ordinary general meeting of the shareholders of the British Empire Trust Company, Limited, was held on Monday, July 3rd, at the Liverpool-Street Hotel, London, England.

Mr. J. Davidson (deputy chairman and managing director) presided.

The Secretary (Mr. H. M. Cox) having read the notice convening the meeting and the report of the auditors.

The Chairman said: Gentlemen the report and accounts having been in your hands for some time, may I assume that we take them as read? (Agreed) I regret to say that your chairman (Mr. H. M. Horne-Payne) owing to ill-health, is not able to preside to-day, but I have pleasure in reading his address to you. It is as follows: "We are glad to meet you to-day with a statement of affairs which shows a very strong and satisfactory position. From the point of view of income, the company's position is better today than at any previous time in its history, because our two main sources of income—viz., trusteeships, registrarships and secretaryships, and interest and dividends on ivestments have now reached higher figures than ever before. Our income from trusteeships etc., amounts to £15,782, as compared with £14,481 last year, and interest and dividends on investments amounts to £68,889 as compared with £65,693 last year. Our income this year is further increased by £16,071, arising from the appreciation on the balance of the company's investments, due not to any specific cause, but to the improvement which has taken place in security values generally. This brings the company's revenue up to the satisfactory total of £100,743 11s. 9d. After providing for income tax, corporation profits tax, general expenses and expenses of administration, including the exceptional expense of £3,416 incurred in removing to, and fitting up, new offices, and after bringing in the balance of the undivided profits from last year, there remains a balance of profits of £90,096, 3s. 7d. The payment of the dividend of 5 per cent. cumulative preference shares requires £12,500, leaving available for further distribution £77,596 3s. 7d. After deducting from this figure dividends now recommended by the directors—viz.. 8 per cent. on the employees' profit participating shares, 5 per cent. on the ordinary preferred shares, and 7 per cent. on the deferred ordinary shares, there remains a balance of undivided profits of £50,453 1s. 2d., which the directors recommended should be carried forward to the present year.

### British Columbia Electric Railway

The agreement, referred to at last year's annual meeting unfortunately proved unacceptable to the people of Vancouver, mainly, I am convinced, because it was not understood. As authority to continue to charge a 6-cent fare in the City of Vancouver continued only until July 1 1922. the company decided to proceed with its application to the Dominion Government for the company's undertakings to be placed under the control of the Dominion Railway Commission.

"The application was heard by the Dominion House of Commons on May last, and was supported by a petition signed by many of our great bankers, financial houses, and brokers interested in Canadian investments.

"The application which was opposed by the government of the province of British Columbia and the local municipalities on the ground that its effect would be to remove the company's undertakings, which lay practically entirely in the province of British Columbia, from the control of the Provincial Government, was refused; but an agreement has been come to with the Municipality of Vancouver under which the company's right to charge a 6-cent fare has been extended to December 15, 1922. Agreements have also been come to with the surrounding municipalities, giving the company the right to continue existing charges until that date. In the meantime further negotiations with these municipalities are taking place with a view to such revision of the franchises as will give the company the authority to make adequate charges.

"In the event of the failure of the municipalities and the company to come to an agreement, the Governnment of the Province of British Columbia proposes to establish some local tribunal or authority to institute an inquiry as to what fares the company should be allowed to charge in order to earn a reasonable return upon the invested capital.

The report of the Canadian Western Lumber Co. for the year 1921 recently issued, shows that although 1921 was a bad year in the lumber industry, the profits of the company were sufficient not only to pay the current interest, of 5 per cent. on the first mortgage debenture stock, but also to pay four per cent. in respect of arrears of interest. The arrears of interest have in the past two years been reduced by 9 per cent. and I do not think it will be long before the balance of arrears is paid off.

### Canadian Interests

"I am glad to say that the position of the Winnipeg Electric Railway Company continues steadily to improve. Notwithstanding the industrial depression which prevailed during the year of 1921, which caused a more frugal use of electricity, gas, and traction service, the company passed through the period in a relatively successful manner, the net earnings showing a substantial increase over the previous year.

"The net earnings were as follows:—

| | |
|---|---|
| In 1918 ........ | $1,221,428 |
| In 1919 ........ | 1,323,623 |
| In 1920 ........ | 1,881,503 |
| In 1921 ........ | 2,020,030 |

"For the first five months of 1922 the net earnings show an improvement of $58,078 over the corresponding period of last year.

"At the annual meeting I dealt with the history of the Canadian Western Natural Gas, Light, Heat and Power Company, Limited, and the treatment which it had received at the hands of the City of Calgary, and I reviewed the position down to July 27, 1921, on which date we were awaiting the decision of the Public Utilities Commission of the Province of Alberta as to what rates the company should be allowed to charge for gas.

"On November 30, 1921, the Public Utilities Commission made an order fixing the charge at 48 cents net per 1,000ft. for all gas sold in the City of Calgary for domestic purposes as compared with 35 cents per 1,000ft. previously charged by the company. This rate was made effective from November 1, 1921, and while affording a considerable measure of relief to the company, was far from being entirely satisfactory.

"It will be remembered that it was on representations made by the city of Calgary to the Legislature of the Province of Alberta that a clause was enacted in the Public Utilities Bill of that Province, giving the City of Calgary the right to appeal to the Public Utilities Commission for arbitration as to the price which the company should be allowed to charge for gas. I pointed out to you last year the unfairness of this legislation, inasmuch as it gave the City only, and not the company the right to appeal. Nevetheless, the City of Calgary, under pressure of events, did apply to the Public Utilities Commission to have the rates adjudicated, with the result that I have already stated.

### Action by the City of Calgary: Canadian Credit

"You will, therefore, be amazed to hear that the City of Calgary has brought an action against the Canadian Western Natural Gas, Light, Heat and Power Company, Limited. and a separate action against the Calgary Gas Company for an order declaring the Public Utilities Commission to be null and void and directing specific performance of an alleged obligation to sell gas at 35 cents per 1,000 ft. in the City of Calgary, or alternatively declaring that the Canadian Western Natural Gas, Light, Heat and Power Company, Limited, has no rights to sell gas at all within the City of Calgary.

"You will note that the City contests the company's right to sell gas in the City of Calgary in spite of the facts that the City of Calgary themselves appealed to the Public Utilities Commission to decide the price at which it was to be sold, and that for years the City has been demanding that the company shall increase its gas supplies in order to furnish the needs of all the inhabitants. The company having now on the strength of the order of the Public Utilities Commission increased its gas supply at a large expenditure, and being in course of still further increasing its supply, the City turn around and endeavor, by legal process, to have it declared that the company has no right to sell gas in Calgary excepting at the entirely unremunerative price of 35 cents per 1,000 ft.

"Whether successful or not, such action as that of the City of Calgary is absolutely destructive of all credit, and will be received with the strongest condemnation and most active resentment, and if persevered in to the loss of the debenture holders and shareholders, will severely reflect on the credit in London of every enterprise in Canada. No one will regret this more deeply than I do personally, for I have devoted my life to procuring the investment of British capital in Canada, and to promoting by every means in my power cordial relations and sympathy betwen Great Britain and the great Dominion."

I now beg to move, "That the accounts for the year ended April 30, 1922, and the report of the directors and auditors thereon, be received and adopted."

The motion having been duly seconded and unanimously approved, the meeting terminated.

TWO THOUSAND LIFE UNDERWRITERS TO MEET IN TORONTO

This great gathering of life men from all points in Canada and the United States, to convene in August, will be representative of the Grand Army of Life Insurance Agents who have placed nearly Fifty Billions of Life Insurance protection over Canadian and American homes. Life insurance is the most useful commodity in the world because it represents food, clothing, shelter and education for those who without it might be hungry, naked, homeless, or ignorant. The Mutual of Canada aims to distribute this great commodity at net cost of the consumer, being among Canadian companies the only one organized on a purely mutual co-operative basis. Mutual benefits actually paid, in the aggregate amount of $37,000,000. So that the mutual has had substantial share in the beneficent work of the Canadian life companies.

Assurances in Force $235,000,000.

### INCREASE IN BUILDING PERMITS

**May Total is $17,765,326, Against $14,082,170 For April.. Substantial Increase Over Last Year.**

The value of the building permits issued in 56 cities, showed another decided increase during May, the value rising from $14,082,170 in April to $17,765,326 during the month under review, an expansion of $3,683,156 or 26.2 per cent. The value of the building authorized during May moreover exceeded that reported for the corresponding month of last year by $4,363,161, or 32.6 per cent, the permits for May, 1921, having aggregated $13,402,165.

The volume of building contemplated in all provinces except New Brunswick, Manitoba and British Columbia, showed considerable gains during May, the increase of $1,343,883, or 51.3 per cent in Quebec being the most noteworthy. The largest percentage gain occurred in Saskatchewan, where the permits, valued at $1,281,431 were 315 per cent. higher than for April. The declines in the provinces mentioned above were all slight, that of 14.4 per cent., in Manitoba being the most pronounced.

Prince Edward Island and British Columbia were the only provinces to show contractions in the value of building authorized during May as compared with the same month last year. Of the increases in the other districts, that of $2,041,019, or 31.4 per cent., in Ontario was the most marked. There was also decided expansion in New Brunswick and Alberta, those provinces reporting percentage gains of 316 and 177 respectively.

#### Montreal and Toronto Higher.

Of the larger centres, Montreal and Toronto registered increases in the value of permits issued as compared with both April, 1922 and May, 1921. Winnipeg and Vancouver showed declines in the former and gains in the latter comparison. Of the smaller centres, Halifax, Moncton, Sherbrooke, Westmount, Fort William, Kitchener, Oshawa, Peterborough, Brandon, Moose Jaw, Regina, Saskatoon, Calgary and Edmonton reported considerable expansion in both comparisons.

The following is a comparison of the value of building permits issued during May, 1922, May, 1921 and April, 1922:

### REVISED FEES FOR WIRELESS

The advent of broadcasting radiotelephone stations has necessitated a revision in the annual fees payable for licenses issued by the Naval Department for the installation and operation of radiotelegraph stations in the Dominion of Canada. In addition to the revision in the license fees, the fees to be paid in respect to examinations for certificates of proficiency in radiotelegraphy and radiotelephony are also revised.

The revised annual license fees are as follows: Limited coast station, $50; public commercial station, $50; private commercial broadcasting station, $50; private commercial station, $10; experimental station, $5; amateur broadcasting station, $5; amateur experimental station, $1; private receiving station, $1; technical or training school station, $5; ship station, $1.

Revised fees for examinations are as follows: Extra first-class certificate, $5; first-class, $2.50; second-class, $1; third-class, $1; experimental, $2.50; amateur, 50 cents; emergency (any class), $5; radiotelephone certificate, $2.50.

### NOT LIABLE FOR SURETY BOND

**Union Casualty Company Relieved From Liability Because of Fraudulent Statement**

The case of Fertile Valley v. Union Casualty Co. has recently been reported, in which action was brought on a policy of insurance issued to the municipality of Fertile Valley to protect it from embezzlement by its secretary treasurer. The insurance company agreed to indemnify the municipality to the extent of $5000, against any pecuniary loss they might sustain by reason of the theft or embezzlement which might be committed by their secretary treasurer. To induce the Guarantee Company to execute the bond of indemnity statements were furnished by the plaintiffs respecting the secretary treasurer. On June 13, 1919 the secretary treasurer was dismissed for misconduct and then it was discovered that he had embezzled large sums of money.

#### Reeve Had Made Statement

On the renewal of the policy for 1919, the reeve of the municipality had furnished statements as to the integrity of the secretary treasurer and such statements were taken as the basis of the contract of insurance. The statements given, were untrue to the knowledge of the reeve who made them and His Lordship decided that the municipality had no claim against the insurance company. The decision may be summarized in these words: "A Guarantee Company which contracts to insure a municipality against loss by reason of theft or embezzlement committed by an employee while in its employ, is entitled to the same degree of faith and full disclosure by the employer as is the case in contracts of life or fire insurance, and any wilful misrepresentation on the part of employer will relieve the company from liability under the contract."

### BRITISH EMPIRE STEEL

A reflex of the coal strike in the United States is being noticed by the British Empire Steel Corporation in its coal operations. The company's mines produced 382,661 tons of coal in June, which is an increase of nearly 75,000 tons over May, and represents an annual rate of around 4,600,000 tons.

The company has already passed through the travail incident to readjustment of wages from the war peaks, and with its mining costs reduced to a competitive level the company is able to devote its attention to wooing away some of the business which the now strike-hampered American producers have been doing with Canadian coal consumers. More than 2,600,000 tons of American bituminous coal were imported into the Province of Quebec alone during 1921. With the American coal strike now finishing its fourteenth week, British Empire steel is counting upon capturing much of this trade. More than this, the company is watching the New England market with an eye to export possibilities. Coal is bound to become increasingly scarce in the northeastern section.

### BELLEVILLE DRIVING ASSOCIATION

Following a meeting of the Ontario Cabinet on July 12, Hon. H. C. Nixon, provincial secretary, issued a statement announcing the decision of the government not to issue supplementary letters patent to the Belleville Driving and Athletic Association in connection with its intended race-track venture at Port Credit. This is the enterprise referred to in The Monetary Times of June 30, its preferred stock having been offered for public subscription.

### B.C. LIQUOR PROFITS

British Columbia municipalities will receive as direct revenue a share of the last six months' profit made by the provincial liquor administration, equal to about $1.50 a head. Under the Liquor Act municipalities receive one-half of the net profits from the liquor control after reserve fund has been provided for.

From June 15, 1921, when the Liquor Act took effect, to March 31, 1922, the administration made $1,772,271 in profits. Of this sum $400,000 was distributed to the municipalities.

### S. F. HAYES AND CO.

S. F. Hayes and Company have taken over the Toronto office of Balfour, White and Co.

## Are You Master of Your Business

or is your business master of you?

Many business men have entrusted to this Corporation the care of their *personal* property, collection of interest, dividends, rents, investment of funds. Relieved of these duties, they have now more time to spend with their families and for necessary recreation. They have become in a real sense the masters and not the slaves of business life.

Can we furnish you with a similar service? It is fully described in our Booklet *"Your Financial Agent."* Send to-day for a copy.

## MATTAGAMI BOND-HOLDERS WANT REORGANIZATION.

### Feel that Present Time is Opportune—Premier King's Visit Thought to Have Improved Relations With States

(Special to The Monetary Times)

New York, July 19.—It is understood here that a number of American holders of the first mortgage bonds of the Mattagami Pulp and Paper Company are planning to form a bondholders' protective committee and to effect a further reorganization of the company's affairs. The company, which has been in the hands of a receiver since August last, is said to be operating to capacity and the principal American holders are believed to feel that the time is opportune for the drastic reorganization which they regard as inevitable.

While so far as your correspondent has been able to learn, no detailed plan of reorganization has been worked out by those American bondholders interested in the fortunes of the company their feeling seems to be that drastic reorganization is preferable to a continuance of the present receivership. The company's ability to again place its affairs on a sound basis is believed to be hampered by the extent to which its business has been capitalized. Any reorganization plan to win the support of the principal American bondholders must therefore, it would seem, have to involve some cut in the company's present capitalization.

### The Premier's Visit

The Canadian Premier's visit to Washington has evoked a great deal of comment on this side of the line, comment which has been so uniformly favorable to Canadian aspirations that it surprised even Canadians. It seems to be the general opinion among Canadians and those interested in improving Canadian-American relations that Premier King and the Hon. Mr Graham have materially strengthened Canada's position in Washington as a result of their visit to the national capital. In spite of the able way in which Sir Auckland Geddes, the British Ambassador in Washington, has always managed to present the Canadian point of view to the Washington authorities, naturally he cannot be expected to speak with either the authority or the conviction that a Canadian would when discussing Canada's problems or aspirations. The Canadian Ministers' visit to Washington has therefore served to give the President and his advisers an insight into Canadian affairs that they could have obtained in no other way.

This increased knowledge of Canadian affairs and the various matters which affect the interests of the United States and Canada alike will likely produce fruit when the Administration prepares to modify its tariff policy in regard to Canada, a move which is being looked for at an early date by friends of Canada in the United States.

### Export Trade

Writing in the current issue of Export Trade, A. G. Sclater, Manager of the Statistical Department of the Union Bank of Canada, expresses the opinion that in spite of the increase in the British preference made in the Canadian Budget Speech, Canada has still left the way open for further negotiations with the United States in connection with better treatment for American made goods under the Canadian general tariff. The policy behind the new Canadian tariff, in Mr. Sclater's opinion emphasizes Canada's willingness to make tariff concessions to the United States if the United States is willing to make concessions in return.

"And in this willingness to bargain on the part of Canada," says Mr. Sclater, "perhaps lies the chief hope of those who would like to see the trade relations of the two countries grow closer together than to continue to grow less as they have been doing during the past year."

## BRITISH EMPIRE TRUST COMPANY, LTD.

Among the British institutions which have played a considerable part in the financing of Canadian enterprise is the British Empire Trust Company, Limited, which held its twenty-first annual meeting in London on July 3rd. The receipts from investments for the year ended April 30th. were shown as £68,889, an increase over the preceeding year and the appreciation in investments was estimated to be £16,071. Adding £15,782 derived from trusteeships, etc, a total revenue of £100,743 was arrived at. The Company paid substantial dividends on its securities and carried forward £50,453 to the present year.

The Company is interested in the British Columbia Electric Railway, the Canadian Western Lumber Company, the Winnipeg Electric Railway Company and the Canadian Western Natural Gas Co., and the posi ion in respect to these was referred to in some detail by the managing director, J. Davidson.

D. B. Hanna, Sir Wm. McKenzie and R. M. Horne-Payne are on the board of directors, the last mentioned being chairman.

## *Recent Fires*

Fire losses in Canada during the week ended July 19, are estimated by The Monetary Times at $243,000, compared with $1,273,100 the previous week. The details are as follows:—

**Alix, Alta.** July 9th. Home of J. Pinfold. There was no insurance.

**Athens, Ont.** July 13th. House on the farm of Mrs. B. Livingstone, occupied by B. Beale.

**Clairmont, Alta.** July 5th. House and barn of Edgar Ellis. Loss is covered by insurance.

**Dixville, Que.** July 8th. Barn belonging to Reginald Mayhew on the Norton road.

**Edmundston, N.B.** July 12th. Residence of Verne Cameron, on the road leading off Victoria street.

**Fawn Lake, Alta.** July 8th. Home of J. Clelland. Cause, lightning.

**Fredericton, N.B.** July 8th. Piggery belonging to Geo. W. Aiken. Loss $3,000.

**Hull, Que.** July 13th. Building occupied by Jos. Normand, 124 Wright street. Cause, overheated electric iron. Loss $2,000.

**Halifax, N.S.** July 9th. Home of S. Yauchauk, 163 Creighton street.

July 7th. Several residences at Africville. Loss $1,800.

**Harrington, Ont.** July 16th. Grocery store of E. W. Sovereign. Loss $3,000, insurance $200.

**Janetville, Ont.** July 18th. Home of G. A. Begg. Cause, coal oil stove.

**London, Ont.** July 17th. Main building at the Asylum. Loss, $1,000.

**Montreal, Que.** July 12th. Premises of the Peerless Cone Co., 3 St. Helen street. Loss $61,000.

**Mooretown, Ont.** July 10th. Barn on the farm of Delbert Ferguson.

**Ottawa, Ont.** ..July 11th. Factory belonging to Eustace Wilson on Bank street. Loss $1,000, covered by insurance.

July 12th. Home of A. Belanger, 208 Bolton street. Cause, explosion.

**Peterboro, Ont.** July 11th. Home of Richard Alford, Smith township.

**Roebuck, Ont.** July 13th. Buildings owned by W. J. Caldwell. Cause, spontaneous combustion. Insurance, $3,000.

**Stirling Ont.** July 12th. Residence of Nathaniel Heath.

**Sudbury, Ont.** July 16th. Building occupied by W. Norris on Durham street. Loss $1,200.

**Summerland, B.C.** July 15th. Union Packing House pre-cooling plant, C.P.R. wharf, car slips and freight sheds, Dominion Express Office and some smaller buildings. Loss $70,000.

**Sydney, N.S.** July 13th. Morrison building. Loss $30,000. Insurance $16,500. Cause, explosion.

....**Tatamagouche, N.S.** July 13th. 750,000 feet of lumber. Loss, $14,000.

**Thomaston, N.S.** July 16th. One million, two hundred thousand feet of lumber were destroyed, along with the barn of W. E. Mattison.

**Tilbury, Ont.** July 13th. Barn on the farm of P. Orlet, Grace sideroad.

**Walkerville, Ont.** July 14th. Caple's grocery store, 54 Wyandotte street. Loss $2,500.

**Welland, Ont.** July 16th. Sawmill and planing mill of the Lambert Lumber Yard. Loss $50,000.

**West Hamilton, Ont.** July 17th. Ealy Bros.' knitting factory on Bowman street.

**Windsor, Ont.** July 13th. Home of Herman Brush, 812 Campbell avenue. Loss $3,000.

**Woodstock, N.B.** July 9th. Sawmill belonging to Edward McDade. There was no insurance.

**Woodstock, Ont.** July 7th. Barn and outbuildings on the farm of Frank Markle, near Curries. Cause, lightning.

## FIND CASE OF REBATING

Holding that the agreement between the Ottawa Lumbermen's Credit Bureau and its former secretary-treasurer, H. A. Swan, part of which provided for the return of insurance commissions to the members of the bureau, had been a violation of the provisions of the Insurance Act, Judge Mulligan on July 8, dismissed the action brought by the bureau for the recovery of $665 of the members.

During the hearing of the evidence it was shown that when Swan wanted an increase in salary, an agreement between the members of the bureau and the former secretary-treasurer was made. It provided for the opening up of an insurance or real estate business as a side line. In the case of the members of the bureau who wished to place their insurance, the arrangement, it was claimed, was that the commission would be returned to them and Swan would not participate in any of the profits. On any business outside of the members of the bureau that Swan picked up, he was to keep the commissions.

It was argued on behalf of the members of the bureau that the return of commission on their insurance did not constitute a rebate, as Swan was in their employ as secretary-treasurer.

## *Business Conditions*

Despite a seasonable quieting down for taking inventories and vacations in numerous lines, business generally in the Dominion of Canada continues to show an improving tendency, and the current volume of sales compares favorably with that at this time a year ago, according to dispatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities. While buying, in the main, is still confined rather closely to requirements actually in sight, growing confidence in the future is clearly reflected in the gradually increasing interest that is developing in many quarters in connection with Fall and Winter supplies, and some wholesale houses report the receipt of substantial orders for dry goods, clothing, footwear, furnishings, furniture, jewelry, drugs, groceries and other staples. This improvement is attributed to the steady progress of the crops in most sections, the wide-spread building activity and the uninterrupted trend to normal conditions in the iron and steel, lumber, paper and pulp, and mining industries, which is accompanied by an easing in the financial situation and by somewhat better collections.

Montreal reports that the current volume of business compares favorably with that of a year ago, and, while there is a seasonable quieting down in some lines, more orders for dry goods, clothing, footwear and other staples are being placed for future delivery and a distinct feeling of confidence prevails in mercantile circles. Collections are slightly better.

## *Exchange Quotations*

Closing rates in Toronto Wednesday, compared with the preceding week, were as follows:

| | July 12 | July 19 |
|---|---|---|
| Sterling | 449.12 | 449.50 |
| France | 8.38 | 8.45½ |
| British W. I. | .94 | .94⅓ |
| Jamaica | 4.51 | 4.51¼ |
| Belgium | 7.97 | 7.97 |
| Denmark | 21.77 | 21.82 |
| Germany | .25 | 19½ |
| Greece | 2.91½ | 3.28 |
| Holland | 39.31 | 39.24 |
| Italy | 4.62 | 4.65 |
| New York | 1 3/16 | 15/16 |

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the first two periods in July:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| July 7th | $3,168,000 | $3,410,000 |
| July 14th | 3,185,000 | 3,397,000 |
| **Canadian National Railway** | | |
| July 7th | 2,075,360 | 2,106,981 |
| July 14th | 2,096,455 | 1,913,161 |
| **Grand Trunk Railway** | | |
| July 7th | 2,233,202 | 2,669,013 |
| July 14th | 2,167,619 | 1,998,504 |

Inc., (Gui Casimir) Montreal, $20,000; St. Lawrence Feldspar Co. Ltd., (Alphonse Decary) Montreal, $300,000; Diamond Taxicab Asoc. Ltd., (Roht. A. Greer,) Montreal, $10,000; Childerhose Woolens Ltd., (Harry Budyk) Victoriaville, $49,000; S.A. de Lorimier, Inc., (Jules de Lorimier) Montreal, $49,000.

## NEW INDUSTRY

The Canadian By-Products Company, Ltd., is locating a plant in Hamilton, Ont., for making fire-bricks. The fire bricks to be manufactured under the process owned by this company have been manufactured in the States for a number of years, and the bricks have proven that they exceed the standard requirements of the bureau of standards of the American government. Hamilton and district consumes approximately 13,000,000 fire bricks annually, and the plant running at full capacity cannot supply half this great demand.

## PLAN NEW PAPER MILL

It has been reported that Price Brothers & Co., are contemplating building a new mill of the most modern type, as well as a model townsite comprising dwellings, golf links, school, etc., at an estimated cost of ahout six million dollars.

It is also stated that plans are now being drawn up for the company and other matters being endorsed by them for the construction next year of the new mill for the manufacture of newsprint.

Further details of the scheme are not at present availahle, nor as to the exact location of the mill and town-site mentioned. It is thought, however, that the new development will be located in one of the most suitable sections of the company's large timber lands, closely adjacent to good water power and dense pulpwood growth.

## COTTON MILL BUSY

It was announced at the annual meeting of the Canadian Cottons, Limited, at Marysville, N.B., that the company has at the present time 50 per cent., more orders than at the same time last year and sufficient to keep the mill fully occupied for the next four months.

## SMITH INCREASING OUTPUT

The Howard Smith Paper Mills, Ltd., are having plans prepared for an extension to the main building of their Cornwall, Ont., plant, to meet the growing requirements of the already greatly enlarged scope of operations. This will provide increased accommodation for the handling of the finished output.

Other improvements are under consideration which will add considerably to the convenience and economy of handling the output of the mill, and at the same time, improve the general layout and appearance of the surroundings.

The business of the company is growing and there is a steady increase in the demand for the class of paper, both for domestic and export consumption, turned out by this mill. This consists of a sulphite bond, writing, lithographic, hlotting paper, Bristol board, cover paper and special high grade book.

The management report that the export business of the company is picking up in a most encouraging manner, and paper is now being shipped to the four corners of the world, orders being received from Australia and New Zealand, South Africa and Great Britain. The domestic demand is also better and a steady diminution of imports is now noted. This is one of the things the company set out to accomplish and is meeting with well merited success.

## AMHERST BUSY

The Amherst, N. S., branch of the Canada Car & Foundry Co., has received an order for the manufacture of 2,500 cars wheels for the Canadian National Railways. Work on this order will be started next month.

The Robb Engineering Works is at present working on some small boiler orders, and a certain amount of repair work. The company expects some orders for Montreal soon.

# The Coal Situation in Canada

By S. J. COOK.

Chief of the Mining, Metallurgical
and Chemical Branch, Dominion
Bureau of Statistics.

There will probably be a shortage of anthracite coal for domestic use in Canada next winter, and householders who have not yet laid in their supply should do so as soon as possible.

Imports into Central Ontario of anthracite coal in domestic sizes during the six months ending June, 1922, amounted to 776,000 tons, as compared with 1,421,000 tons, the average quantity imported during the same period in the three preceding years. Of the same grades the Province of Quebec received 240,000 tons this year, as compared with an average importation of 515,000 tons in the three preceding years.

The percentage of the average supply received by Ontario this year is therefore 55% and by Quebec, 47%.

These figures in themselves are not startling, but when the situation in the United States, whence anthracite coal for these provinces comes, is reviewed, it appears that stocks at the mines accumulated in anticipation of the great strike now in progress have been practically wiped out, and the most recent news from the anthracite field indicates that only the smaller sizes are now being offered. It is also pointed out that even if mining is immediately resumed, the movement of the grain crop and the increased movement of freight other than coal consequent upon the revival in industry as a whole, will make it impossible for the railways properly to handle coal available for shipment, with the probable consequence that a congestion in traffic will tie up the coal supply. The railwaymen's strike will tend to aggravate the situation.

### Bituminous Coal

From an industrial point of view the situation does not appear to be so bad. While during the six months ending June, 1922, Ontario imported bituminous round and run-of-mine amounting to 2,866,000 tons, as compared with an average for the period in the three preceding years of 3,000,000 tons, the importations of bituminous slack amounted to 673,000 tons, as against an average of 591,000 tons for the same period in the three preceding years.

Quebec received 590,000 tons of bituminous round and run-of-mine, as compared with an average importation in the same months of the three-year period of 899,000 tons. Imports of bituminous slack into Quebec in the six months amounted to 186,000 tons, as against an average for the period of 178,000 tons. Anthracite dust presumably for industrial use imported into Ontario in the period amounted to 19,000 tons, as against a three-year average of 18,000 tons, while Quebec received 73,000 tons, against an average for the period of 67,000 tons. It will be observed that more anthracite dust has been imported into the two central provinces during the past six months than during the same period in the three preceding years.

A rather unusual feature of the importation statistics is that Manitoba has received during the past six months some 14,000 tons of bituminous round and run-of-mine as compared with an average importation received at the customs ports in that province of 13,000 tons. Bituminous slack received at the same ports during the first half of the current year amounted to 29,000 tons, as against an average of 14,000 tons in the three preceding years. It is, however, to be noted that much of the coal dumped at the Head of Lakes finds its way into Manitoba and the western provinces, and the receipts at the Head of Lakes for the first six months of the present year amounted to only 1,600 tons of bituminous round and run-of-mine, as against a three-year average of 350,000 tons. No bituminous slack has been reported this year, while the three-year average receipts at the Head of Lakes for the period amounted to 24,000 tons. No anthracite has been received at the customs ports at the Head of Lakes this year. In the three preceding years an average of 71,000 tons had been received by this time.

### Domestic Output

Complete figures regarding the output of coal from Canadian mines during the six months ending June are not yet available. It is probable that British Columbia will be the only province to maintain its average output. The Maritime Provinces should from now on continue to show increased output, and it is probable that the strike in the United States mines will make possible the expansion of markets for Maritime coal.

The output from the mines of Alberta has been very considerably reduced during the past three months, while the larger mines in Saskatchewan have been operating fairly steadily. Many small mines in the latter province have, however, been operating on part time only.

From Toronto the demand for anthracite is reported as increasing, but the call for bituminous continues light, with sufficient on hand and coming forward to meet all demands.

### Current Prices

Toronto quotations as reported in "Coal Age" for July 13, 1922, were as follows:

| Retail: | Per short ton |
|---|---|
| Anthracite egg, stove and nut | $15.50 |
| Pea | 14.00 |
| Bituminous steam | $9.25—9.75 |
| Domestic lump | 11.25 |
| Cannel | 16.00 |
| Wholesale, f.o.b. cars destination: | |
| ¾ inch lump | $9.25—10.00 |
| Slack | 8.00— 8.75 |

Additional freight charges to other Ontario towns should lie between 50c and $1.00 per ton, so at the present time it would seem that a price not exceeding $17.00 would represent a fair retail price for anthracite coal at points in Central Ontario.

---

## ADVANCE SUMMARY OF COAL STATISTICS

The Mining Branch of the Dominion Bureau of Statistics issued, on July 12, an advance summary of coal statistics for Canada showing the imports from the United States of anthracite and bituminous coal by grades and by provinces during the first six months of the present calendar year, with comparative figures showing the average imports during the same period in the three years 1919-20-21. Division is made to show the importation by provinces.

Exports of Canadian coal are shown for the same period, division being made between the coal exported from the Western provinces and the coal exported from the Maritime provinces. The tables follow:

TABLE 1—IMPORTS OF ANTHRACITE COAL BY GRADES AND BY PROVINCES

## ONTARIO IRON INDUSTRY

### Steel Manufacturers Hold Conference with Provincial Government

A conference in Toronto on July 5, of representatives of miners, engineers, steel manufacturers and transportation officials interested in the development of the iron ore industry in Ontario, unanimously adopted a resolution calling on the Dominion and provincial governments to launch a scheme of state aid to iron mine operators over a period of fifteen years.

Although payment of a bounty of 75 cents per ton of ore, and the giving of assistance in the erection of the necessary plants were suggested as alternatives, the members of the conference finally decided to ask for aid without specifying any sum or method.

The members of the conference also put themselves on record as being of the belief that the iron ore resources of Ontario are sufficient to support an important iron and steel industry and requested the Ontario government to appoint a committee consisting of at least one metalurgist, one geologist, and one transportation expert, to prepare a report on the various phases of the development of the industry. Hon. Harry Mills, minister of mines, who presided, intimated that the government would accede to the request.

Considerable significance was attached to the gathering in view of the fact that it marked the first general conference between iron ore operators and steel manufacturers in Canada, some forty of whom were present. Prominent amongst the steel men was J. D. Jones, general manager of the Algoma Steel Company, at Sault Ste. Marie, who declared that if the low-grade Canadian ores could be offered at a price equivalent to that of the higher grade American ores now in use, his company would be willing to use Canadian ore altogether. The Algoma manager also stated that he believed that given production on a sufficiently large scale, pig iron from Canadian ore could be manufactured to sell at $1.57 less per ton than the pig from American ore.

---

## *New Industries*

The Dent, Griffin Company are establishing their plant at St. Catharines, Ont., where they have already purchased a plant for their requirements and are installing equipment to the value of $70,000. The company will employ 50 hands, and will have a minimum annual payroll of $45,000. The company will engage in the manufacture of silk gloves.

## BOARDS OF TRADE TOURS

### Toronto Will Visit Northern Ontario, While Montreal Members Will Cross Continent.

A trans-Canada tour, commencing September 1, is being arranged by the Montreal Board of Trade, a party of members of the British House of Commons being invited to join. The itinerary of the tour is so arranged that the party will leave Montreal over the lines of the Canadian Pacific Railway and will continue over that route to Vancouver. From Vancouver the members will proceed to Prince Rupert by the Grand Trunk Pacific Steamship Line and will return eastwardly over the lines of the Canadian National Railway, running from Cochrane to North Bay over the Temiskaming and Northern Ontario Railway.

By rail and lake and ocean the party will travel more than 7,000 miles on the journey from Montreal and return.

Amongst the members of the Board of Trade who have made application for reservation on the trans-Canada tour are the following:— R. H. Barron, William M. Birks, N. B. Blackade, R. B. Brown, Arthur Browning, Major E. G. M. Cape, George S. Cleghorn, Gain E. Corneil, W. E. Cushing, W. A. Desbarats, J. V. Desaulniers, W. O. H. Dodd, Louis C. Drummond, Thomas E. Drummond, Col. Royal L. H. Ewing, W. E. Findlay, Alexander Gibb, M. H. Holden, Norman Holland, H. B. Henwood, W. M. Kearns, H. A. Layton, H. B. Mackenzie, C. H. McLean, B. McNally, W. H. Miner, Allan Parsons, E. M. Renouf, H. J. Ross, John W. Ross, A. F. C. Ross, Joseph M. Rowat, Charles E. Spragge, Col. Robert Starke, James F. Slessor, Pemberton Smith, Dr. A. D. Stewart, George H. Townsend, Arthur B. Wood.

### Toronto Board

Members of the Toronto Board of Trade are planning for a trip to Northern Ontario, early in September. Leaving Toronto ou September 10, the party will begin the week with a tour of Sturgeon Falls, Copper Cliff and Creighton, where the pulp mills and nickel industries will receive their attention, spending Monday night in Sudbury, the centre of the world's nickel supply. Tuesday will be spent at Cobalt, the silver-mining centre; Haileybury, the Judicial seat of the new District of Timiskaming; and New Liskeard, the leading agricultural town of this part of Northern Ontario. For Wednesday the itinerary calls for a visit to the gold mines at Timmins, while at Iroquois Falls the pulp and paper mill will be inspected, in addition to a trip through the model town. Cochrane and Swastika will be visited on Thursday, and North Bay on Friday.

## STEEL INDUSTRY IMPROVES

According to an announcement from the British Empire Steel Corp., headquarters, Sydney, N. S., on July 10, the payroll of the Sydney steel plant amounted to $10,000 per day, for the first time since November 22, 1920.

On that date the depression in the steel trade first began to be felt and various departments of the plant closed down one after another until at one time there were barely 1,300 men working three days a week.

During the past three months business has been picking up and still further improvement is looked for. Local business conditions reflect the increased industrial activity, which is supplemented by full time at the mines which are rushed to supply orders from Upper Canada and the United States.

## AUTOMOBILE INDUSTRY EXPANDS

### Two Canadian Companies to Enlarge Plants

That the depression which had settled over the automobile industry during the past year or so has completely disappeared, may be taken from two announcements made during the past week, which tend to show that the industry is once more on a stable basis.

At the annual meeting of the Durant Motors of Canada, Ltd., in Toronto on July 6, Carrol Downes, vice-president, stated that the Leaside, Ont., plant, since March 1, 1922, had produced over 2,000 cars, and enlargement of the plant would be started right away. Two buildings, three stories high, and one large shipping building, will be erected. This will give the company 400,000 square feet of floor space or five times the present amount. It is expected that 18,000 "Star" cars will be produced in these buildings the first year, 10,000 for export and 8,000 for the domestic market. As soon as the plant is completed all export orders will be handled by the Canadian company.

Property aggregating several hundred acres and fronting the Detroit river, between the present site of the Canadian plant and the Walkerville Boat Club has been bought by the Ford Motor Co. of Canada. Official announcement was made on July 8 that the company would begin in the near future to erect a huge motor plant. The new plant will cover approximately 125 acres, and will cost in the neighborhood of $6,000,000. It is expected that the production of the company will be doubled immediately the new plant starts to operate, and the plans are to turn out 500 cars a day, in place of the 250 per day being made at present. This will not represent the entire capacity of the company, however, as the plans will allow a production of 1,000 cars per day as soon as the market warrants the output.

## CANADA'S FISH CATCH

During the month of May 839,435 hundred-weights of sea fish were landed on both the Atlantic and Pacific coasts of Canada, valued at $2,464,899. During the same month in 1921, the landings totalled 667,380 hundred-weights, valued at $2,062,107.

# *Municipal Finance*

**Toronto, Ont.**—Up to the period ending July 10, the city received $636,100 for tax arrears prior to 1920, and $1,351,110 for the year 1921, making a total of $276,558 over that of 1921. At the present time the overdue taxes, exclusive of those for 1922, amount to $2,619,534, of which amount $2,166,050 was due in 1921 and the balance previous to that year.

For the first six months of the year it cost the board of education $3,441,417 to operate, or $42,654 less than the estimated expenses. For the remainder of the year the board has $290,426 in the treasury.

**Calgary, Alta.**—For the first half of the year the city license department has provided a revenue of $59,500. This total shows quite a decrease over the returns quoted for 1921, when $100,068 was turned into the city's coffers for the first half of the term. The decrease is due to the fact that practically every license fee in the city has been cut down during 1922.

**North Bay, Ont.**—The auditor's report of the city's finances for the year ended December 31, 1921 has just been published in which he states that the amount of uncollected taxes at the end of the year was $27,484. Water rates arrears amount to $767.

Total assets amount to $1,159,208, of which $31,609 are liquid, and total liabilities are $1,031,902, leaving a surplus of $127,306 of assets over liabilities.

Receipts during the year amounted to $727,393 and expenditures were $674,381. There was a bank over-draft, as at January 1, 1921 of $58,052, and at December 31, 1921 the bank overdraft was $5,040.

The net debenture debt at the end of the year amounted to $798,701. The town guaranteed $12,180 debentures of the Quinlan Co., making a total of $810,882.

**Oakville, Ont.**—The tax rate for 1922 has been struck at 47 mills on the dollar, as compared with 42.7 mills for the previous year. The new rate will produce a revenue of about $165,000.

The total assessment is now $2,797,187, business assessment being $116,827, and income assessment $88,880, with exemptions of $438,655.

**Prince Albert, Sask.** — The tax rate for 1922 has been struck at 45 mills on the dollar for public school supporters, and 41.2 mills for separate school supporters.

**Windsor, Ont.**—The city auditor has just made public his report of the city's finances for 1921, in which he states that the total debenture debt, as at December 31, 1921, was $5,777,683. From this amount was deducted $78,286, the amount of the sinking fund, leaving the net debt at the end of the year at $5,699,396.

The total amount of taxes paid during the year was $1,415,100. The total amount of the tax collector's roll for 1921 was $1,514,898, of which $1,309,931 was collected, leaving a balance on the 1921 roll of $204,966. The city owes the bank the sum of $238,000 for bills payable on December 31, 1921, and also owes the bank the sum of $1,328,097 for loans for local improvements during the year. Debentures will be issued to cover the latter amount.

Receipts during the year amounted to $5,159,496, and expenditures were $5,111,288, leaving a balance of $48,207.

**Pincher Creek, Alta.**—The rate of taxation for the present year has been set at 43 mills on the dollar, made up as follows: municipal purposes, 15 mills; debenture, 10½ mills; supplementary revenue, ½ mill; school, 17 mills; school outside of town 8 mills.

## HYDRO RESULTS IN ONTARIO TOWNS

### Official Reports Show Decline in Power Rates—Most Towns Have Financial Surplus

Summarized official reports of the Hydro-electric operations during 1921 in five Ontario towns situated between Hamilton and London were issued on July 12 by the Ontario Hydro-electric Commission. Waterloo, Elmira, Baden and New Hamburg are served from the Kitchener station. Milton is served from Cooksville.

Waterloo, with a population of 5,886, is 97 miles from Niagara Falls, and has been taking Hydro power since December, 1910. Before that the price of electric service was 12 cents per kilowatt hour, with 25 cents a month meter rental. The first Hydro rate schedule cut that price in two.

### Drop in Power Rates.

Owing to the operation of the system, subsequent reductions in rates have been made from time to time by the authority of the Provincial Commission, until now the average rates are 2.2 cents for domestic, 2.3 cents for commercial, and $18.47 per horsepower per annum for industrial energy. The cash value of these reductions to consumers has been $106,819, which sum exceeds the present total liability by over $9,000.

The load has mounted from 322 to 1,296 horsepower and, although generating costs at Niagara, have increased in recent years, the commission delivers power to Waterloo today at $21, as compared with $26 ten years ago. The operating statement for 1921 showed a revenue of $56,496, and ordinary expenses of $50,127. Since the amount placed to plant renewal reserve was $7,176, there was a loss of $807 on the year's business, about 1.43 per cent. on the revenue. As Waterloo has an accumulated surplus of $43,262, the deficit of 1921 is insignificant. The assets of the system are $206,843; the liabilities, $97,779. Surplus and reserves make a total of $109,064.

### Saving in Elmira

The first Hydro rates in Elmira quoted in 1914 averaged 9.5 cents per kilowatt hour for domestic lighting and 7.1 cents for commercial lighting. Successive reductions authorized by the Provincial Commission have brought the average rates to 3.1 cents and 3.2 cents respectively. Industrial energy is now $19.27 per horsepower per annum, as compared with $22.31 in 1917. By reduced rates the consumers have saved $49,129. The load has increased from 74.1 horsepower to 296.7 and the rate for delivered energy has remained at $38, despite increased generating costs during recent years.

Last year the revenue of the Elmira system was $19,179. After placing $1,417 to plant renewal reserve, there was a net surplus of $2,717. The assets of the system are $42,449, and the liabilities $17,496. Reserves and surplus funds make $24,953. Elmira is 108 miles from Niagara Falls and has a population of about 2,500.

Prior to 1914 Baden, 104 miles from Niagara Falls, had no electrical service. The first Hydro rate averaged 10 cents per killowatt hour. That has been reduced from time to time until the rates now average 3.7 cents for domestic lighting, 4.3 cents for commercial. The industrial energy rate has dropped from $29.96 to $25.94 per h.p. As the records of consumption are not complete the actual cash value of the saving to consumers cannot be given, but it has been a considerable amount. The system began operations with a load of only seven h.p. Last year it was 187.4 h.p., and the price of delivered energy has declined from $37 to $32. The revenue for 1921 was $8,006. The expenditure, which included a contribution to plant renewal, was $7,495, leaving a net surplus of $507.56. Assets are $16,262, of which $8,632 represents the value of the plant. The liabilities are $4,053. The reserves and surplus funds are $12,309—almost equal to the plant value and the outstanding liabilities taken together.

### Good Record at New Hamburg.

New Hamburg, 107 miles from Niagara Falls, has enjoyed progressive rate reductions since 1914. The average rates today are 3.5 cents per kilowatt hour for domestic lighting, 3.9 cents for commercial lighting and $20.28 per h.p. for industrial energy, as compared with 7.7 cents, 7.2 cents and $22.87, respectively, eight years ago. The money saving to consumers by the reductions authorized by the Provincial commission has been $20,331. The load has increased from 99 to 226.2 h.p., and the price for delivered energy has remained constant at $32.

The operating statement for 1921 showed a revenue of $13,478.44 and an expenditure of $13,221.65, leaving a surplus of $256.79. The expenditure included $1,306 applied to plant renewal reserve. The assets are $41,059.59, and the liabilities $14,547.71, while reserves and surplus make a total of $26,511.88.

### Milton's Continued Success.

Milton, with about 2,000 population, is 100 miles from Niagara Falls, and has been taking Hydro power since April, 1913. Before that date electric service cost the consumer 10 cents per kilowatt hour. The first Hydro rates averaged 6.6 cents and 5.4 cents for domestic and commercial lighting, respectively. The present average is 3.5 cents and 4.1 cents. The industrial energy rate had declined from $25.79 to $23.64. All these reductions have had a money value to consumers of $26,110.08. The load has increased from 251.3 to 658.2 h.p., and the commission's price for delivered energy has remained unchanged at $28, despite increased generating costs.

Revenue in 1921 was $26,714.19; expenditure, $24,315.61, leaving a surplus of $2,398.58. The accumulated surplus is $17,414.65, nearly one-half the total value of the plant. Assets stand at $54,600.85; liabilities, $14,085.41. The sum of the surplus and reserves accounts is $40,515.44.

## WILL SPREAD KNOWLEDGE OF TAXATION

### Canadian Tax Conference Organized By Horace L. Brittain—Seeks Membership to Defray Costs.

More people are paying more taxes of more different kinds than ever before. More governments are devising more new forms of taxation than ever before. But no more people than before, either taxpayers or taxlevyers, understand either the practice or the theory of taxation. Taxes are planned without adequate knowledge or study and are payed usually without protest and as a duty, but in dazed resignation and with hazy understanding. Public taxation is a public matter and problems of taxation cannot be solved without public discussion and widespread public information. Recognizing these facts, the Citizen's Research Institute of Canada, a citizen organization supported by voluntary contributions, has added to its existing bureaux, a bureau of research in taxation, to be known as the Canadian Tax Conference.

It is called a conference because the Institute will be in continuous conference with the taxation departments and authorities on taxation and will conclude each year's work with a national convention of the members of the Canadian Conference on taxation at which the results of the year's work will be reviewed, leading students of taxation will be heard, and the fullest opportunity will be given for discussion. A report of the proceedings of this convention will be forwarded to every member. Throughout the year, 12 progress reports will be issued covering the following topics, among others:—

A. Municipal Taxation.
  1. Ontario; 2. Quebec; 3. Saskatchewan; 4. Alberta; 5. British Columbia; 6. Nova Scotia, New Brunswick and Prince Edward Island.

B. Provincial Taxation..
  1. Succession duties; 2. Corporation and companies taxation;
  3. Real Property taxation; 4. Personal property taxation; 5. Income, poll and service taxes; 6. Assessment taxes; 7. Automobile taxes.

C. Dominion Taxation.
  1. Income tax; 2. Business profits tax; 3. Sales tax; 4. Excise taxes; 5. Customs—(with no reference to the theories of free trade and protection); 6. other Dominion taxes.

D. Income Taxation.
  1. In Britain; 2. In the United States; 3. Co-operation between State and National authorities in the collection and distribution of income taxes.

E. Business Taxation in General.
F. Real Property Assessment and Taxation in General.
G. Taxation of the Unearned Increment.

H. Personal Taxation in General.
I. Tax Limits.

Dr Horace L. Brittain, of Toronto, director of the bureau is now organizing the tax conference. Memberships are being sought from business men from coast to coast. The annual fee is $10 to defray the cost of printing and distributing to members the various papers mentioned and a report of the annual meeting.

What Per Cent. Does Your Money Earn?

You can safely increase the earning power of your money by investing in the 7% First Mortgage Bonds of Canadian Paperboard Company, Limited.

The Company — the largest concern of its kind in Canada—manufactures a product absolutely essential in modern business. Fixed assets are over 2½ times the bond indebtedness. Average earnings for the past four years available for interest are more than three times requirements.

Price, 95.50 and Accrued Interest, to yield over 7½%. *Write for full particulars.*

## LARGE LUMBER ORDERS

### British Columbia Has Prospects For Export Orders—Ontario Demand Continues Fair

About a month or so ago reports from British Columbia stated that lumber exports were not so heavy as formerly, and that the lumber manufacturers were not expecting any large amount of business for some time.

During the last week or so several reports have been received which state that some sizeable export orders are in prospect for the manufacturers. Three large inquiries for dockyard material were reported from Vancouver last week. Eastern Canada has been taking a moderate amount of lumber, and the Middle Western States have been productive of fairly good business. There is a tendency to slacken off in the domestic markets, but, all things considered, the demand in Ontario for British Columbia forest products is fair.

### Car Construction

Some nice business is in prospect in connection with a large refrigerator car order secured by National Steel Car Company of Hamilton from a Southern railway. This is likely to be allocated almost immediately.

Two million feet of 18 x 18's are required for Portsmouth for dockyards, and it is virtually certain that Douglas fir will be purchased for this work. Japan needs 2,000,000 feet for dockyard construction, and early delivery of half that amount will be required. Japanese interests have been trying to force prices down in the last two or three months, but it is noteworthy that the new prices bring substantial advances into effect.

An inquiry from India has been posted for 1,500,000 feet. Japan has placed orders for 8,000,000 feet of piles.

## COST OF UNEMPLOYMENT

The liabilities of the Federal government in regard to unemployment relief during the last winter are estimated approximately at $1,300,000. About half of this amount, as closely as it can be approximated at present, is on account of direct relief, and the remainder is the Federal share of the excess cost of public relief works undertaken by the local authorities during the Winter. These figures are contained in a statement which has been given out by the Minister of Labor, Hon. James Murdock.

## LARGE RAIL CONTRACT

The Algoma Steel Corporation has been advised that the Candian Pacific Railway has accepted its figures for a rail contract for 48,000 tons. Two of the blast furnaces at Sault Ste. Marie, have been in operation and a third will be blown in as soon as the ore docks are in readiness to handle necessary ore.

It is expected that the rail mill will start operations immediately. As the general steel business is now improving, it is expected enough business will be secured to keep the plant running steadily, and the whole plant will likely go on double shift with a full force.

# *Government and Municipal Bonds*

Features of the government and municipal bond market during the past week were the sale of British Columbia's $2,000,000 issue to Miller and Company, New York, at 99.14, a figure substantially higher than any of the bids presented when the sale was postponed some weeks ago and the announcement that Nova Scotia is coming into the market for a like amount. Ontario, it is understood, has arranged the refunding of $5,000.000 notes which fell due on July 15, but no definite information is forthcoming.

In the municipal field there are several issues of substantial amounts forthcoming. Several important sales were made during the week, though Kamloops decided to refuse all traders received.

The market is now and will for some time be overshadowed by the coming issue of the Dominion government. It is the intention of Hon. W. S. Fielding, finance minister, to make the loan, if possible, a domestic one. In spite of the success of the loan recently floated in New York and the satisfactory conditions thereof, the minister believes that it is better to pay interest to Canadians than to send it out of the country. While the patriotic stimulus which helped to make the Victory loans a success is now lacking it is anticipated that very few of those who subscribed to the Victory loan of 1917, which matures in December, will decline to convert bonds held even should the non-taxable features be eliminated which it undoubtedly will.

The amount of the maturing loan is $180,000,000. In addition $100,000,000 worth of temporary borrowings must be met. But inasmuch as $100,000,000 was raised in New York, the proposed domestic loan will, it is believed, be for $200,000,000 only.

It is doubtful whether the new loan will be floated under the same methods as were employed in underwriting former loans namely through the financial houses on a commission basis. It is probable that public subscriptions will be called for through the banks, and bond establishments instead.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders Close |
|---|---|---|
| North Bay, Ont. ...... | $ 47,000 | August 1 |
| Nova Scotia .......... | 2,000,000 | |
| Vancouver, B. C. ..... | 600,000 | August 1 |
| Toronto Twp., Ont. .... | 40,000 | August 4 |
| St. Pierre-aux-Liens .. | 128,000 | July 24 |
| Authier, Que. ....... | 12,000 | July 24 |
| Drummondville, Que. . | 100,000 | August 1 |
| Stayner, Ont. ........ | 67,000 | July 25 |
| Peel County, Ont. .... | 80,000 | Sept. 1 |
| Bridgeburg, Ont. ..... | 60,000 | July 24 |

**Nova Scotia**—The Government of Nova Scotia is asking offers for five per cent. coupon twenty-five year debentures, interest payable semi-annually, to the extent of $2,000,000.

**North Bay, Ont.**—Tenders will be received up to 12 o'clock noon, August 1, 1922 for the purchase of $47,000, 5½ per cent., 20-instalment school debentures. Wm. N. Snyder, town clerk.

**Vancouver, B. C.**—The Vancouver and District Joint Sewerage Board will receive tenders up to August 1, 1922 for the purchase of $600,000 debentures. Alternative bids are asked for the whole issue or any portion thereof, for various maturities and interest rates. The bonds are guaranteed by the province. See advertisement elsewhere in this issue.

**Toronto Township, Ont.**—Tenders will be received up to August 4, 1922 for the purchase of $40,000, 5½ per cent., 30-year school debentures. J. R. Kennedy, clerk, Dixie.

**St. Pierre-aux-Liens, Que.**—Tenders will be received up to 12 o'clock noon, July 24, 1922 for the purchase of $128,000, 6 per cent., 5-year school debentures. J. F. Moulin, secretary-treasurer of school commission.

**Authier, Que.**—The school commission will receive tenders up to 12 o'clock noon, July 24, 1922 for the purchase of $12,000, 6 per cent., 20-year debentures. J. F. Poitras, secretary-treasurer.

**Drummondville, Que.**—Tenders will be received up to 8 p.m. August 1, 1922, for the purchase of $100,000, 6 per cent., 35-instalment debentures. W. A. Moisan, town clerk.

**Stayner, Ont.**—Tenders will be received up to noon July 25, 1922 for the purchase of $67,000, 5½ per cent., 30-instalment school debentures. John Hood, town clerk.

### Bond Sales

**Prescott & Russell Counties, Ont.**—Gairdner, Clarke & Co., were the successful bidders for the $200,000, 6 per cent., 20-instalment debentures, paying a price of 101.528, which means that the money will cost the counties about 5.81 per cent. The following is a list of tenders: Gairdner, Clarke & Co., 101.528; Wood Gundy and Co., 101.3915; National City Co., 101.14; C. H. Burgess & Co., 101.13; R. C. Mathews & Co., 101.00; Dominion Securities Corp., 100.64; and Housser, Wood & Co., 99.479. A bid of 100.07 was received from MacNeil, Graham and Co., but was too late for consideration.

Gairdner, Clarke & Co., the purchasers exercised their option and took up an additional $100,000 of the same issue at the same price of 101.528. The announcement was made that the original issue had been all sold, and a large portion of the $100,000 block as well.

**British Columbia.**—Bondmen from New York, Toronto and Seattle on July 13 afternoon bid for the $2,000,000 British Columbia issue offered by John Hart, Minister of Finance. The issue is the same as that offered little than a month ago and on which bids were thrown out as being too low. The new bids showed that as a result of holding the sale over, the province profits by a price of nearly two points higher. The issue went to Miller and Co. of New York, for a two-year issue at 99.14. The bonds are five per cent and at that price will give an interest yield to the purchaser of 5.44. The money will be used for irrigation and land settlement board enterprise.

The bids were asked for two, five and twenty year terms, and were as follows:

| | 2 Yrs. | 5 Yrs. | 20 Yrs. |
|---|---|---|---|
| Miller & Co., New York .. | 99.14 | 98.29 | 93.18 |
| Dom. Securities Syndicate | 99.118 | 97.98 | 92.886 |
| Miller & Co., et al ...... | 99.41 | 97.61 | 92.31 |
| Wood, Gundy & Co., et al ............ | 99.116 | 98.349 | 93.31 |
| Ames & Co., et al ...... | 99.081 | 97.981 | 92.414 |
| Seattle National Bank .. | 98.565 | 97.758 | |

**Midland, Ont.,**—The town has sold $30,000 5½ per cent. 20- payment debentures to the Municipal Bankers' Corporation, at 97.47 and interest. The following were the tenders received:—

| | |
|---|---|
| Canada Bond Corporation .......... | 96.061 |
| Harris Forbes & Co., .............. | 96.612 |
| McLeod, Young Weir & Co., ........ | 97.11 |
| Gairdner, Clarke & Co., ........... | 97.13 |
| R. C. Matthews & Co., ............ | 97.25 |
| Wood Gundy & Co., ............... | 97.39 |
| Municipal Bankers Corporation Ltd., .. | 97.47 |

**Moose Jaw, Sask.**—Moose Jaw Council at a special session on July 15 accepted a tender from Wood Gundy & Co., Toronto, for three issues of bonds of a total value of $182,470. The bonds were disposed of in American funds. The tenders were as follows:

Wood, Gundy & Co., $150,000 five year 6 per cent. bonds (Canadian bonds) 95.08.

$30,000, six per cent, thirty year bonds, 94.71.

$2,470.07 six per cent., ten year bonds, 96.29.

Wood, Gundy & Co., (American bonds,) tenders for same amounts as above set forth, 97.08; 97.34; 96.8, New York funds.

Ames and Company, Toronto, on the same bonds, New York funds, 96.52, 94.51 and 95.02.

Alger and Company, for Morris and Company, Portland, New York funds, on same bonds, 96.50, 93.43 and 95.65.

Miller and Company, New York, Canadian funds for American bonds. This company bid on the first block $96.50, and divided the second block bidding 91.84 and 91.94. For the final block their bid was 95.50.

Edward Brown and Company, of Winnipeg, submitted a bid of $97.256 in American bonds, Canadian funds.

**La Tuque, Que.**—An issue of $75,000, 6 per cent., bonds redeemable from 1923 to 1927 has been sold to Provincial Securities Ltd., at a price of 98.25. The Provincial Securities Ltd. offered to defray the expenses of printing the debentures. The following is a list of tenders: Provincial Securities, Ltd., 98.25; Credit Industriel, Ltd., 98.23; L. G. Beaubien & Co., 98.05; and Municipal Debentures Corp., 97.77.

**Summerland District, B.C.**—The Royal Financial Corp. has purchased $55,000, 6½ per cent., 15-instalment debentures.

**Point Edward, Ont.**—The Municipal Bankers' Corporation has purchased privately an issue of $17,200, 6 per cent., twenty annual instalment bonds of the village, guaranteed by the province. The issue was made for housing purposes.

**Moncton, N.B.**—The Moncton school board on July 17, accepted the tender of H. M. Wood, Sackville, for $85,000 fifteen-year bonds, bearing 5½ per cent. interest, Mr. Wood's offer being 99.77.

**Saskatoon, Sask.**—City commissioner Andrew Leslie advises The Monetary Times that Wood, Gundy and Co.'s tender for the $491,500 bond issue was as follows:—

| Amount | Term | Rate | Price offered |
|---|---|---|---|
| $101,800 | 30 years | 6% | 95.84 and int. |
| 30,000 | 30 " | 5½ | 89.04 " " |
| 13,700 | 30 " | 5 | 82.18 " " |
| 12,000 | 15 " | 6 | 95.12 " " |
| 125,000 | 30 " | 5½ | 89.04 " " |
| 209,000 | 5 " | 6 | 95.43 " " |

All for payment in Saskatoon funds and delivery in Saskatoon.

A. E. Ames and Company offered 97.475 and accrued interest for the whole issue the interest and principal to be payable in United States gold coin as well as in Canadian currency. This price included the premium on New York funds and the city was offered the alternative of a price of 94.298 provided payment was made in New York funds the city to be given the advantage of whatever premium there was at the time of delivery.

Aemilius Jarvis and Company offered to purchase $280,500, 30 and 15 year bonds payable in Canada and United States funds at the holder's option, 92.37 and accrued interest, provided the city gave an option on the $209,000 5 year bonds at 98.50, the bonds to be payable in Canada and United States. This price of 98.50 included premium on New York funds.

In deciding to accept Wood, Gundy and Company's offer the Council felt that the spread of 2.35 between their price and A. E. Ames and Company's price was not sufficient to warrant the bonds being made payable in the United States.

**Saskatchewan:**—The following is a list of debentures reported sold by the Local Government Board from June 24 t o30, 1922.

School Districts: Codette, $500, 8 per cent., 5-years, to G. Tait, Nipawin; Sydenham, $1,500, 7 per cent., 10-years, to A. I. Hill, Guernsey; Hebden, $4,500, 7½ per cent., 15-years, to C. C. Cross & Co.; Murray Lake, $2,000, 8 per cent., 10-years to H. J. Birkett & Co.; Regina Public School, $13,000, 6½ per cent., 30-years, to C. C. Cross & Co.; Superior, $1,000, 7½ per cent., 10-years, to C. C. Cross & Co.

### INVESTMENT BANKERS' ASSOCIATION

Representatives of investment banking houses in North America meet in Toronto today and on Saturday for the quarterly meeting of the Board of Governors of the Investment Bankers' Association of America. The meetings of the board are held each quarter in one of the larger American cities and this quarter the meeting is being held in Canada for the first time. The Board of Governors have come to Toronto on the invitation of J. A. Fraser of the Dominion Securities Corporation, Limited, the Canadian member of the board. The association has a membership of more than 400, including practically all the large bond-selling organizations in the United States and Canada.

## MUNICIPAL TAXES NOT PREFERRED CLAIMS

### Appeal Involved Ontario Assessment Act and Dominion Bankruptcy Act.

An appeal involving the conflicting sections of the Dominion Bankruptcy Act and the Ontario Assessment Act has recently been decided by the Ontario Supreme Court. Chief Justice Mulock in a written judgment said that the company (Cecilian Co. Limited) was carrying on business in the City of Toronto and on the 15th August 1921 made an assignment under the Bankruptcy Act. At that time it owed the city corporation for business taxes $1,110 which amount was then overdue but no levy had been made for it. The company was then also liable to the city corporation in a further sum under the business tax assessment in 1921; and for those two sums the corporation filed a claim in bankruptcy against the estate of the company, claiming priority over unsecured debts. The trustee disallowed the claim to priority and Justice Orde dismissed an appeal from the disallowance.

By sec. 51 (4) of the Bankruptcy Act it is declared that all debts proved shall be paid pari passu. It was contended that under sec. 51 (6) claims for taxes are taken out of the class of debts which are paid pari passu. But subsec. 6 does not determine the manner in which claims for taxes are to rank on the assets of the estate; it merely provides that they are not to be prejudicially affected by the assignment in bankruptcy and that they may be realized in accordance with any law of the Dominion or Province.

### Municipalities' Rights

Under the combined effect of subsec. 6 of sec. 51 of the Bankruptcy Act and subsec. 2 of sec. 109 of the Assessment Act, the municipal corporation is entitled, notwithstanding the assignment or bankruptcy to distrain for business taxes just as it could have done had there been no assignment. In other words, subsec. 6 does not interfere with the collection of such taxes or prejudice the corporation's lieu on the particular goods and chattels exigible under the collector's warrant, nor does it enlarge the corporation's rights by giving it priority. As regards such fund the corporation remains an unsecured creditor and must rank pari passu with other creditors.

It was contended that sec. 11 of the Bankruptcy Act prevents a municipal corporation from levying a distress for taxes and reliance was placed on the words of that section that the assignment takes "precedence over all other attahcments, executions or other process against property etc," but the section does not declare such attachments, executions or other process to be void nor that a municipal corporation may not exercise the right of distress given to it by sec. 109 (2) of the Assessment Act which right has been preserved by sec. 51 (6) of the Bankruptcy Act

---

## ENLARGES PLANT

The C. Turnbull Company, of Galt, Ont., manufacturers of underwear, have purchased a building adjoining their No. 1 plant, which will provide them with 8,000 feet additional floor space.

**Advice That Was Good!**

A year ago, with plenty of emphasis, we urged investors to buy Government and Municipal bonds while prices were low and interest rates high.

Those who acted upon this advice have seen their bonds advance from, say 5 to 10 points.

Yet, even now, the advice to buy bonds is excellent. Interest rates are still high and everything points to a further increase in principal value and a decline in interest yields.

The wise investor is investing his cash balance now and is also selling his short term bonds to buy long term securities at present prices.

Write for a good list of long term bonds and let us advise you again.

# *Stock Markets*

The week under review was a dull one on the stock exchanges. The previous week, ended July 12th, produced sales on the Montreal and Toronto exchanges totalling 57,640 shares of stock and $903,800 of bonds. On the closing day, July 12th, Consolidated Mining and Smelting was the most active stock in Montreal, the turnover for the day being 680 shares, making a total of 5,485 shares sold on the Montreal exchange during the week; the net result, however, was only an advance of 2¾ in the price.

The present week, commencing July 13th, opened with dull sessions on both the Montreal and Toronto exchanges. Consolidated Mining again lead the trading on the Montreal exchange with a slight decline in price. Toronto Railway was the most active on the Toronto list. Friday's session found Asbestos featuring the Montreal exchange, reaching 67, a new high level for the year, with a turnover of 695 shares. Brazilian was second in activity with a turnover of 600 shares and a slight decline in price. The Toronto exchange was again inactive, Toronto Railway being still in the lead in respect to activity. Saturday's trading was featureless on both markets.

Monday was the first day of normal activity on the Toronto exchange. Toronto Railway was active with a turnover of 447 shares, realizing a net gain of ⅝. Mining stocks were also active. Quebec Railway and Toronto Railway featured the Montreal list.

### Kanadda Biscuit Co.

The Kanadda Biscuit Co. of Canada, Ltd., Hamilton, is offering stock in the company, which has an authorized capital of $1,000,000, $700,000 being 8 per cent. preferred, par value $100, and the remainder, $300,000, being common stock.

The company plans to erect a factory in Hamilton for the manufacture of biscuits. The estimated gross profits for the year are placed at $1,200,000, with estimated expenditures of $900,000, leaving a net profit of $300,000.

### United Lines, Ltd.

The United Lines, Limited, of Hamilton, has been incorporated with a capital of 2,500 preferred shares, par value $100, and 35,000 shares of common stock, par value $10. The stock is being offered through the company's financial agents, the Motor Lines Development Co., of Hamilton, Ont.

The company has been organized for the purpose of operating fast freight and passenger busses daily between Hamilton, Caledonia and various other centres including Toronto, Burlington, Guelph, etc.

### Canadian Salt Co.

The Canadian Salt Company, of Windsor, Ont., has sold to the Royal Securities Corp., $140,000, 7 per cent., general mortgage bonds of the company. It is understood that the Royal Securities Corp., will offer the bonds privately.

The authorized amount of general mortgage bonds due May 1, 1941 is $1,000,000. About a year ago the Royal Securities Corp., purchased and distributed $400,000 of the bonds, and the additional amount now issued will bring the total amount of bonds outstanding to $540,000.

The company is the largest producer of salt in Canada, as well as being the only producer for sale in Canada of chloride of lime and caustic soda. The physical assets of the company have an appraised value of $2,397.348, and the total funded debt amounts to $883,000. Net current assets are $400,000.

## LOBSTER INDUSTRY BUSIER

The lobster industry in Prince Edward Island has shown a marked improvement over 1921. The catches are larger, with a greater demand and better prices ruling. The fishermen also report good catches of herring for bait. These improved conditions, with the lower cost of fishing gear, have resulted in a strong revival of the lobster fishing industry.

## EKERS, CUSHING AND CO.

Ekers, Cushing and Co., members of the Montreal Stock Exchange, announce the admission of Paul F. Mellinger to partnership in the firm.

# *Unlisted Securities Market*

In their report on the unlisted market of last week, A. J. Pattison Jr. & Co. say that the dullness which commenced about the beginning of the month still continues. Very little money appears to be coming into the market for investment purposes, all requirements having been previously anticipated and traders are for the time being leaving the market alone. Contrary to what might be expected, prices have in many cases advanced slightly and in the balance have held firm, with the execption of a few specialities. The oil stocks lacked the buoyancy of the previous week. Imperial Oil lost 5 points to 110-112. International Petroleum recorded a net gain of ½ a point at 22½-23, though off slightly from the high figure. Mutual Oil eased to 9½-10 on little trading. Cockshutt Plow Preferred was offered down to 45 without being taken while Massey-Harris at 55-58 found a ready market. Small lots of Trust & Guarantee changed hands at 70-72.

Collingwood Shipbuilding Common which was in demand at 45 and even 50 before the declaration of dividend is now quoted at 40-50. Abitibi General Mortgage 6's were stronger at 88-89 but no trading resulted. Famous Players Preferred made a move of 3 points to 54 bid without meeting any offerings. This issue has been under steady absorption for some weeks at steadily improving figures. Dominion Power & Transmission common was freely offered at 23 with the best bid at 22. Whalen Debentures recorded a 4 point advance to 64-65 and were traded in to some extent between these figures. Whalen common and Preferred were not traded in though offered at slightly lower figures. Mount Royal Hotel Common was firm at 26½-27½ with but little stock offered.

## TRAINING IN THE PAPER TRADE

The effort by the paper industry of the United States and Canada to train its employes for promotion, as well as for more efficient performance of their duties has taken another step forward, with the organization of correspondence courses on both sides of the international border. Courses for paper mill employes will be handled on the United States side of the border by the University of Wisconsin, and for Canada by the Canadian Correspondence College, Gardenvale, Quebec, sponsored by leaders in the Canadian paper industry.

The two courses are being organized with the co-operation of the Canadian Pulp and Paper Association, and the Technical Association of the Pulp and Paper industry, the technical organization of the American Paper and Pulp Association, for the two countries. Governmental aid is to be given the American course as well, for the work to be given by the University of Wisconsin will be with the co-operation of the United States Forest Products Laboratory.

The paper industry has just completed the first three of the five volume series of text books for training of paper and pulp mill employes, at a cost of over $40,000 for the preparation and editing alone of these books. Several States have initiated special class instruction of mill employes through university extension departments, Massachusetts having been the first to hold actual classes through co-operation with mill officials. Wisconsin has also begun class instruction, but New York, with more mills than any other State in the Union has apparently been unable to take up this work.

The State College of Forestry at Syracuse University, which has a paper mill department, has informed R. S. Kellogg, secretary of the News Print Service Bureau, secretary of the joint American-Canadian committee which has charge of vocational education in the industry, that it cannot undertake this work, either through its extension service or paper mill department. New York, therefore, will for the present be forced to depend upon the correspondence courses furnished from Wisconsin, and to do without actual class instruction under State auspices.

## PORT COQUITLAM FIRE

At a private meeting the council of Port Coquitlam, B.C., decided to appeal to the Supreme Court of Canada against the decision of the Court of Appeals in the fire litigation case. The decision gave judgment in favor of one of the victims of the fire who brought a test case and claimed negligence on the part of the city.

## NEW RADIO COMPANIES

Although there has been a little slackening off lately, the issue of charters to radio companies week by week is evidence of rapid development in the new industry. Practically every issue of The Canada Gazette contains the record of a Dominion charter granted to a new radio company. In one week recently charters were granted to no less than three companies for the manufacture of radio equipment and supplies.

## SUN LIFE PRODUCER

P. C. Hart, of the Montreal agency of the Sun Life of Canada, has been elected president of the Macaulay Club, an organization of the assurance company for agents writing more than $100,000 of paid for business in one year. Mr. Hart produced more than one million dollars of business in the year of the club which has just ended. For the first six months of the year he produced on an average of one hundred thousand dollars of new business every month.

## MINING PRODUCTION AND DIVIDENDS

### Silver Mines of Ontario Led in Dividend Payments in 1920—Gold Comes Second

Value of the mining industry to the province of Ontario was set forth in an illuminating tabulation presented to the Ontario Mining Association by its secretary, Balmer Neilly, when that body opened its annual meeting at Porcupine on July 6. The figures are perforce in the nature of estimates but they have been carefully compiled from Government returns and other reliable sources and may accordingly be regarded as reasonably close to the mark.

| | |
|---|---|
| **Disbursements.** | |
| Gross value of metallic production | $48,281,553 |
| Gross value of non-metallic production | 24,795,194 |

| Total | $10,820,037 |
| Balance | $52,256,710 |
| Deduct amount estimated to cover net increases to surplus account of the metallic mines and profits earned and taxes paid by non-metallic mines | $6,000,000 |
| Amount remaining for compensation of labor and purchase of supplies, etc. | 56,256,710 |
| Amount actually provided for wages | 25,764,461 |
| Amount provided for supplies, etc. | 30,492,249 |

## BROKER ON TRIAL

A. S. Thurber, manager of Valley Brokers, Limited, Moose Jaw, elected for trial by jury in the city police court on July 3, when arraigned on a charge of theft of flax, alleged to be the property of H. Worthley.

L. Creery, representative of the firm of Smith, Murphy and Co., Winnipeg, gave evidence at the preliminary hearing. He testified that his firm received 3.400 bushels of flax last April from the Valley Brokers, Ltd., receiving instructions to hold the flax until pending instructions regarding selling. He declared that on May 15 the firm received instructions from the Valley Brokers, Ltd., to sell the flax. They complied with the instructions, selling at 2.48 a bushel.

Mr. Creery stated that a draft was drawn on his company by the Valley Brokers, Ltd., bearing the signature of A. S. Thurber, for $3,000. This draft, drawn through the Bank of Nova Scotia, was honored by his firm. He stated that the flax in question was obtained from Dominion Elevator Company on orders signed by H. Worthley.

East Kootenay Power Co.
Limited

*7% First Mortgage Bonds*

Company operates in the rich zinc, lead, and coal field of British Colombia.

A valuable contract was recently closed with Consolidated Mining and Smelting Co.

Now supplying power to the cities of Cranbrook and Fernie, B.C., and a number of Coal Companies.

Earnings from these contracts alone will show substantial amount earned on common stock after payment of bond interest.

Price to yield about 7¼%, with a bonus of common stock.

A most desirable long-term security.

## UNEMPLOYMENT DECREASES

### Marked Improvement Shown by Government Bureau Report and By Trade Unions

Marked improvement in the employment situation is reported by the Employment Service of Canada. Employers' reports reflecting conditions at the end of May show a gain of six points in the index number of employment during that month. This is the most pronounced expansion registered during any month of the records of the office and very greatly exceeds the gain during May of last year.

An aggregate payroll of 735,439 persons was reported by the 6,352 firms making returns, 723,157 of these employes being actually at work at the end of May as compared with 675,321 workers at the end of April. The index number rose to 89.2 for the month, as compared with 83.3 at the close of April. For the corresponding date last year the index number stood at 86.6.

The level of employment as indicated by the manufacturers making returns at the close of May was higher than at any time since the end of March, 1921. The improvement since the preceding month was especially marked in iron and steel and lumber, the gains in the former indicating recovery from the shutdown in the railway car shops reported at the end of April. Sawmills were very much more active, causing practically all the gains in the lumber group. In addition, a distinctly favorable movement was evidenced in fish canning, pulp, paper, biscuit, rubber, glass, brick, cement, electric current, nickel tin, and petroleum factories. The only noteworthy contractions occurred in the leather and textile groups, and, as mentioned before, these were largely of a seasonal character. Reports for the month under review were received from 4,169 manufacturers employing 411,963 workers, as compared with 386,728 on April 30, the difference representing a gain of 6.5 per cent. The tendency indicated at the end of May, 1921 was downward and employment was about 3 points lower than for the period under review.

**In Trade Unions.**

An upward trend is also shown in the returns made by the trade unions. Reports were furnished by 1,423 labor organizations, representing 150,505 workers, and the index number stood at 92.6 for the end of May of this year as compared with 89.6 at the end of April and 84.5 at the end of May of last year. Trade unions in all provinces except Quebec reported more favorable conditions than in April.

## WILLIS AND CO., LTD.

A. P. Willis, president of Willis & Co., Limited, Montreal, piano manufacturers, announces the reorganization of the Willis Piano & Organ Company, at Halifax, into a limited liability company, registered under the Nova Scotia Companies Act with a capital of $100,000. The new company is known as the Willis Piano Co., Limited, and has the following officers: President and general manager, J. F. Willis, sr.; vice-president and Treasurer, J F. Willis, jr.; secretary, A. S. Willis. The Directors of the company are J. F. Willis, sr.; J. F. Willis, jr.; A. S. Willis, John H. Willis, and C. D. Patterson. The company has already established itself in its new quarters in the Majestic Building, Halifax.

THE BELL TELEPHONE COMPANY OF CANADA
LOCAL
LONG DISTANCE TELEPHONE
Mr Brown

Save Unnecessary Expense in Telephoning

"He's not in his office just now!"

How often have you put in a call for — say Mr. Brown of the Robinson Machine Company — and when connection was made, learned that he was out?

Because you asked for Mr. Brown, it cost you — because of the extra service we rendered — about 20% more than if you had asked simply for the Robinson Machine Company.

The majority of Long Distance users find that if they put in a call for a firm — not for an individual — at the lower Station-to-Station rate, they can always get in touch at once with the particular person they prefer to talk with, or with a deputy who will answer the purpose.

Our gain will come when you appreciate the speed and economy of Station-to-Station service. After 8.30 P.M. the evening rate on Station-to-Station calls is only about **one-half** the day rate.

## MONTREAL EXCHANGE COMMISSIONS

There is a movement on foot by the members of the Montreal Stock Exchange, and will be voted on at the expiration of two weeks, to increase the present commission rates. The advance would amount to approximately five cents a share, and the feeling is that this has been necessitated by the increased cost of operation in the last seven years and will also cover the new cheque tax, which will be borne by the brokers if the motion carries.

The Montreal Exchange, notwithstanding the increased cost of doing business, is believed to be the only Exchange that has not raised its commissions charges in recent years.

## BIG PROFIT ON LIQUOR

### Quebec Government Sold Over Fifteen Million Dollars Worth And Has Four Million Profit

Net revenue of $4,000,974 on total sales of $15,212,801 is shown by the Quebec Liquor Commission in its first annual report, covering the year ended April 30, 1922. This report was presented to the cabinet on July 12, and in announcing the results Provincial Treasurer Nicol pointed out that heavy expenditures caused by the installation of officers, warehouses and stores had also been met.

The report is given below:

**The Quebec Liquor Commission Revenue and Expenditure Account For the Year Ending 30th April 1922**

| | | |
|---|---|---|
| Sales ........................................ | | $15,212,801 |
| Deduct cost of sales purchase of liquor .. | $15,632,335 | |
| Less inventories of liquor at 30th April 1922 | 5,540,790 | |
| | $10,091,545 | |
| Warehouse expenses including wages, bottling, wrapping and sealing .......... | 987,770 | 11,079,315 |
| Deduct ........................................ | | 4,133,485 |
| Stores: Rent, salaries and other expenses | 418,698 | |
| General: Administrative and over head expense, including Head Office and Quebec Office salaries, rent, insurance, advertising, printing, stationery, heating, etc. .......................... | 565,436 | |
| Bank and other interest ................ | 192,340 | 1,176,474 |
| | | $ 2,957,010 |
| Organization expense written off and reserve for depreciation of plant and equipment, etc ................ | | $ 97,000 |
| Net trading profit ........................ | | 2,860,010 |
| Add other revenue for fines, duties, permits and seizures, less enforcement expenses ........................ | | 1,140,963 |
| Net revenue ........................ | | $ 4,000,974 |

"Shooting" the 7 Rapids of the St. Lawrence

*Do You Long for Restful Nature— Do You Seek Adventure's Thrills?*

FOR those who respond to the appeal of nature in all her varying moods no scenery in the world can compare with that of Canada's vacationland.

For those who are lured by the spirit of Romance and Adventure, this cruise unfolds the fascinating story of Canada's earliest days.

Among the Thousand Islands you picture Hiawatha counselling the alliance of the Six Nations. Shooting the roaring, plunging St. Lawrence Rapids you feel the exciting thrill that came to the first adventurers on these unknown waters.

At Montreal and Quebec you are greeted by quaint surroundings that take you hack to the dim, distant past.

NIAGARA TO THE SEA

Boarding a luxuriously appointed steamer at Toronto, you travel through the Thousand Islands of entrancing beauty. On through the whirling, tossing Rapids of the St. Lawrence to historic Montreal and Quebec—then up the famous River Saguenay, where, giant, cloud-wrapped cliffs, tower so high above you that the whirling eagle is a speck against the blue.

Send 2c postage for illustrated booklet, map and guide, to John F. Pierce, Passenger Traffic Manager, Canada Steamship Lines, 221 R. and O. Buildings, Montreal, Canada.

No tender necessarily accepted.

(Sgd.) J. R. KENNEDY,
Township Clerk,
998 Dixie P.O., Ont.

# Corporation Finance

**Brazilian Traction, L. & P. Co.**—Although the earnings for the year ended December 31 last as expressed in terms of milreis, exceeded by a wide margin the returns for the previous year, yet when reduced to Canadian funds, a large decline is shown. The average rate of the milreis for the year was 12.51.

The report shows gross earnings of subsidiary companies in Brazil of 170,867,353 milreis, as compared with 134,905,832 milreis for the preceding year. Net earnings at 95,105,553 milreis compare with 69,990,657. This considerable increase is largely accounted for by the fact that depreciated exchange prevailing had the effect of enhancing in milreis the receipts derived from the services which are payable wholly or in part on a gold basis. On the conversion of the earnings into dollars the decline in exchange has the opposite effect, so that the combined value of the net earnings has fallen from $14,286,039 to $11,898,523, being a decrease of $2,387,516, or 16.71 per cent.

From earnings there is applied the sum of $4,534,038 on account of bond interest and general expenses; $3,224,578 as reserves for depreciation, leaving a balance of $4,410,057, being the revenue of the Brazilian Traction, Light & Power Co. This return compares with $7,036,824 for the previous year. Total gross revenue, including interest on investments, etc., stands at $4,537,714. The distribution of the past two years compares as follows:

| | | |
|---|---|---|
| Brazilian revenue ..... | $4,410,057 | $7,036,824 |
| Interest on invest. .... | 127,657 | 206,619 |
| Gross revenue ..... | $4,537,714 | $7,243,443 |
| Administration exp. ... | 1,000,033 | 988,320 |
| General amortization .. | 300,000 | 260,000 |
| Net revenue ....... | $3,237,681 | $5,995,123 |
| Preferred dividends ... | 600,000 | 600,000 |
| Surplus ........... | $2,637,681 | $5,395,122 |

The surplus account for the year, as indicated above, amounted to $2,637,681, which, with the balance of $3,082,131 brought forward from 1920, gives a total of $5,719,813, which has been carried forward to profit and loss account. Out of the year's revenue the sum of $2,745,410 has been set aside by the subsidiary companies for depreciation of physical properties, and the sum of $2,643,680 was expended on meeting the capital requirements of the various enterprises.

The consolidated balance sheet shows a strong working position with floating assets of $19,003,492, compared with floating liabilities of $5,415,958. Cash on hand totals $7,940,836; reserves for depreciation and amortization amount to $33,857,419, which, with general reserves of $21,857,419 and profit and loss balance of $5,865,225, brings the total to $51,020,557. Assets are valued at $249,715,723.

Regarding the dividend situation the report makes the following reference: "While the exchange value of the milreis continues considerably lower than was anticipated and it is difficult to forecast the future, there are clear indications of such improvement in general conditions as to justify the resumption of the payment of dividends. The present cash position of the company is satisfactory, and it is expected that with the improved financial conditions now prevailing it will be possible to provide for necessary capital requirements through the sale of securities. These requirements will include the sums necessary for the development of the new hydro-electric installation on the Parahyba River and the funding of $7,500,000 6 per cent. gold notes of the company."

**Ford Motor Co. of Canada**—The company has declared a 15 per cent., cash dividend payable July 20 to stockholders of record July 15. This equals the dividend paid last year, although it comes about a month later.

**Canadian Western Lumber Co.** — The gross production for the month of May stood at 9,065,900 feet of lumber manufactured, compared with 11,006,098 in May, 1921. Lumber sold amounted to 11,957,650 feet, compared with 8,042,570, and the price realized $255,247, as against $222,569. Aggregate lumber manufactured from January 1 to May 31 amounted to 37,444,984, against 35,199,880, and lumber sold 43,444,984 compared with 33,703,821. The price realized for the sales this year totalled $970,863, against $1,004,170 for the corresponding period of last year, or a decline of $33,307.

**Tooke Bros. Ltd.**—At the annual meeting on July 13, the annual report was presented in which is reflected the uncertainties through which the company passed during the past year.

For the fiscal period which ended May 31, last, the company reported a trading loss amounting to $58,682 as compared with a profit of $93,524 in 1921 and $238,230 in 1920. There is also a charge of $174,982 covering "depreciation on inventory of merchandise written off" which further reduces the showing for the year to a deficit of $233,664. After paying preferred dividends and taking in $25,830 "dividend from investment" total loss for the year was $242,309 as compared with a surplus of $24,574 shown in the 1921 report and of $119,805 reported for the 1920 period.

This reduced profit and loss balance to $102,572 as compared with $344,881 a year ago and with $320,307 two years ago.

The balance sheet shows the company in fairly good financial position as at the end of the year. For the first time the new bond issue made by the company is shown in the report, this being $350,000. Depreciation reserve remains unchanged at $74,228. Property and plant account stands at $521,775, as against $549,720 a year ago; goodwill unchanged at $720,035; investments largely increased at $136,100 compared with $55,000 a year ago, while a new item of bond discount $35,000 is shown.

As indicated in the balance sheet, net working capital at the end of the year amounted to $748,890 which compares with $729,354 indicated in the previous report. Current assets amounted to $1,218,550 against $1,887,555 a year ago, and current liabilities to $469,660 as compared with $1,158,201 a year ago.

Working capital compares as follows:

| | 1922 | 1921 |
|---|---|---|
| Current assets ....... | $1,218,550 | $1,887,555 |
| Current liabilities .... | 469,660 | 1,158,201 |
| Net working capital . | $748,890 | $729,354 |

Among current assets inventories have been scaled down from $1,183,618 a year ago to $622,320. This is the chief change. Other items are: Cash $11,762 against $3,104 a year ago; bills receivable $22,084 against $76,184; accounts receivable $550,740 against $601,597; and unexpired insurance $11,644 against $23,052. An item of Victory Bonds $7,365 appearing a year ago is now shown in the current accounts. Current liabilities reveal a reduction in bank loans from $554,000 to $271,000. Bills payable s and at $1,127 against $215,977 a year ago; accounts payable $193,439 against $370,986.

The board of directors was re-elected.

**Maritime Telegraph & Telephone Co.**—Gross earnings for the month of May, 1922, amounted to $124,651, and net earnings after operation, maintenance, depreciation and taxes were $34,571. Deduction of $13,333 for bond interest left surplus for the month of $21,238, an increase of $5,478 over April figures.

The considerable improvement in the company's earnings position for the current year to date is shown by the following comparative statement for five months ended May 31st:—

| | Five months Ended —May 31st— | |
|---|---|---|
| | 1922 | 1921 |
| Gross earnings ......... | $593,644 | $603,875 |
| Operation, maintenance, depreciation, and taxes | 458,760 | 483,104 |
| Net for interest ....... | $134,884 | $120,771 |
| Bond Interest ......... | 66,666 | 66,666 |
| Surplus ............... | $ 68,218 | $ 54,105 |

**Ottawa Light, Heat and Power Co.**—Figures covering earnings of the company for the five months' period ended May 31st, 1922, indicate satisfactory increase in revenue combined with decrease in operating expenses as compared with the same period of 1921. Net earnings cover bond interest 2.6 times, and the balance available for common stock dividend is equivalent to the annual rate of 9.1 per cent. to meet the dividend of 6 per cent.

Detailed statement with comparison for 1921, follows:

| | Five Months Ended May 31st. | |
|---|---|---|
| | 1922 | 1921 |
| Gross earnings ......... | $689,034 | $671,272 |
| Oper. exp. .............. | 475,754 | 480,355 |
| Net earnings ........... | $213,280 | $190,917 |
| Bond interest .......... | 79,414 | 77,358 |
| Net surplus ........... | $133,866 | $113,559 |
| Earned on common ..... | 9.1 | 7.7 |
| Operation to gross ..... | 69.4 | 71.5 |

**Atlantic Sugar Refining Co.**—It is reported that at the annual meeting of the shareholders on July 15, an internal reorganization plan was considered. The company will sell $1,000,000 of new bonds to shareholders.

**Russell Motor Car Co.**—At a meeting the directors announced the declaration of the regular quarterly dividend of 1¾ per cent. on preferred and a 1¼ per cent. distribution on common, both payable August 1 to shareholders of record July 20. It will be recalled that at the last dividend meeting it was decided to defer action on the common until the end of the next period. The dividend record of the common stock has been irregular during the past year. With the ending of the first period in 1922, the directors decided in view of the unsettled conditions in business to reduce the distribution from the nsual rate of 1¾ per cent. to 1 per cent. Action was deferred at the next meeting, and the distribution of 1¼ per cent. just announced, brings the total disbursement to common stockholders in the past twelve months to 5 per cent.

**Porto Rico Railways Co.** — The authorized capital of the company has been increased from $4,000,000 to $5,000,000, the increase consisting of 10,000 shares of $100 par value. It is understood that this action was taken in order to permit the directors to finance extension of service needed at any time in the future.

**B. C. Electric Railway Co.**—Gross earnings during the month of May stood at $827,701, as compared with $826,039. Working expenses amounted to $622,204, compared with $623,318, and net earnings increased from $203,835 to $204,383.

During the period from July 1 to May 31, gross earnings were $9,417,543, as compared with $9,293,353, and net earnings were $2,591,216, against $2,589,955, an increase of $1,260.

## Annual Meetings

**Tyre Investment Trust, Ltd.**—The Tyre Investment Trust, Ltd., of London, which holds a majority stock interest in the Dunlop Tire & Rubber Goods Company of Canada and Dunlop Rubber Co. (Far East), held its annual meeting in London a few days ago, and affairs of the two operating companies were reviewed. Explaining the experience of the last fiscal year, Chairman A. L. Ormond explained that, in view of the crisis through which industrial concerns the world over had to be piloted, and which had hit all tire companies in particular through the abnormal fall in raw material, with which they in greater or less degree were stocked, he was glad "to have got through with our concerns safe and sound."

Returns of business received from Canada, the chairman pointed out, show that for this year February was an improvement on January, March on February, April on March, and May on April, and the aggregate for the period in excess of the similar period for 1919, although substntially below the same period for the bumper year of 1920, and slightly lower than 1921.

Both the Far East company and the Canadian company were well supplied with raw materials, he continued, and had no unusual or high-priced forward commitments, so that in the course of trade their financial position must consolidate and strengthen.

The Investment Trust holds $3,150,000 fully-paid common stock of the Canadian company, out of a total issue of fully paid common stock capital of $4,962,000. The dividend on the preferred shares has been paid to due date, with a balance left to credit of profit and loss account.

**BUILDING YOUR BUSINESS**

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

ESTABLISHED 1905

In view of recent happenings in financial circles, it is altogether likely that greater scrutiny will be exercised by Banks and other financial institutions in respect of the affairs of their customers, as well as of the securities offered to them for Loans.

An appraisal affords just such evidence of financial standing and of values as is required for these purposes. Being independent and disinterested it commands confidence, particularly when accompanied by the certificate of an experienced and reputable firm.

**SECURITY REVIEW PROFITABLE**

This is one of the times of the year when holders of securities have occasion to clip coupons, receive dividends and handle many of their investments.

A careful review of all the investments at present, therefore, is more than usually opportune. Such a review almost invariably results in discovering some profitable exchange, sale, adjustment or new investment. Then too accumulating funds for new investment may be available from:

1. Incoming funds from sale of property, etc.
2. Money now drawing a low rate of interest.
3. Bond or mortgage interest.
4. Bank interest.
5. Stock dividends.
6. Early maturing bonds, etc.

Such funds may be safely and profitably employed and adjustments and exchanges made, at present, to excellent advantage. Suggestions on request.

*We shall be glad to consult with those having investment problems.*

*BANKING INVESTMENT INSURANCE INDUSTRY*

# Should Companies' Act be Abolished?

By A. B. BARKER

It is interesting to speculate on what constitutes the value behind the common shares so freely offered as a bonus with the usual issue of bonds or preferred stock in industrial flotations. They are not offered in this way by the corporation itself, but by the vendor, from whom the corporation has purchased the assets against which the senior security is issued.

In the ordinary flotation, it may generally be said, that the bonds and preferred shares represent the tangible assets of the concern, while the common shares are issued to cover the cost of the flotation, including the promoters' profit. If this were actually the case there would not be the same grounds for criticism, as it would indicate that he and his friends had some faith in the enterprise.

In all offerings of securities there are expenses to be met, advertising, legal expenses, and commissions to salesmen on sales of securities, these latter in some cases being 20 or 25 per cent. All must be paid in cash, and the general vague understanding is that the promoter or underwriter pays these and looks to the common stock to be reimbursed.

### The Promoter's Profit.

Generally however he takes no such chances, but makes certain that these expenses will be paid from the receipts from the sale of the senior security, and only looks to the common stock for his profit. In many cases his profit also is ensured in cash from this source, the common stock coming to him being additional. His is simply the salesman's interest in his wares. He wants to dispose of his stock of goods to the public in order to get hold of something else to sell, his profit like the dealer in groceries coming from the volume of turnover.

In two big flotations which came to grief shortly after their issue, it was stated that the corporation which brought them out demanded 25 per cent. of all receipts from the sale of securities, presumably in addition to its share of common stock, whatever that may have been. Had this been suspected at the time the issues would have been left on their hands, and much loss saved the public.

The promoter as well as the underwriter is entitled to a fair return for his services, but this hardly includes secret arrangements by which the working capital of the company is impaired in order to ensure a profit on the sale of its securities to the public. It may be said of course that the public need not buy unless they want to, and this is quite true, but this is no reason why anyone should be permitted to issue a prospectus which does not disclose the essential facts necessary to make the prospective investor to size up the chances. The granting of a charter under either the Dominion or Provincial Companies Act gives valuable powers, and it is only fair that adequate details should be insisted on. It is not suggested that most offerings are not made in good faith, but, as is well known, this faith is sometimes based on very slender grounds. Also in every prospectus there is a clause to this effect that, while the statements are believed to be accurate from the information available they are not guaranteed."

### Common Shares in Control.

One point about common shares not generally realized is that they carry the control of the operations of the company, in that they alone give voting power to the holder. Theoretically of course the interest of the men in control is to increase the business, and thus make these shares of value. In practice however it means that those in control of the common stock elect the board of directors, and fill all the positions to which there is any salary attached, and in this way are able to see that their services are adequately remunerated while waiting for the price of the shares to advance. This feature is also responsible for the tendency to pay out too much of the earnings in dividends, in order to give value to these shares on the market instead of conserving the working capital of the company.

The practical effect is that the holders of the preferred shares and bonds provide the capital for the owners of the majority of the common shares to operate with. Some think that it would be in the interests of the community to do away with the Companies Act altogether, and to make any member of a trading or manufacturing concern responsible to the extent of his holding. This however would be a backward move, but, at the same time, the fact that it is suggested indicates a growing belief that there is a serious weakness in the present system, in that the regulation seem to be so framed as to permit the promoter to make sure of his profit, and at the same time to escape personal responsibility.

---

## BANK OF NOVA SCOTIA

The semi-annual meeting of the board of directors of the Bank of Nova Scotia was held in St. John, N.B. on July 13, with morning and afternoon sessions, presided over by G. S. Campbell, of Halifax. Other directors present were: Lieut.-Governor McCallum Grant, of Nova Scotia, who is on his way to Europe; Hector McInnes, Halifax; Dr. W. W. White, St. John; Senator N. Curry, Montreal; James Manchester, St. John; A. MacLaren, Buckingham, Que.; S. J. Moore, Toronto; and Hon. R. M. McGregor, Halifax. General Manager H. A. Richardson, Toronto, also attended.

## COLONIAL SECURITIES, LTD.

The organization of the Colonial Securities, Limited, with the head office in Moncton, N.B., has been completed and the company has opened its doors for business at their office, 773 Main street.

The officers of this concern are W. F. Fergusson, President; Reid McManus, Vice-President, and W. H. Price, Secretary-Treasurer.

The directors are:—W. F. Fergusson, A. E. Reilly, K.C., Reid McManus, M.P.P., Herbert M. Wood, Sackville; Chas. W. Fawcett, Sackville; and Albert E. Trites, Salisbury.

## NON-MEDICAL INSURANCE

At a recent meeting of the Board of Directors of the Excelsior Life Insurance Company, Toronto, the following changes were authorized in connection with non-medical insurance:—

(1) The age limits were changed so as to include males and unmarried females or widows who have passed their fifteenth birthday and who are not over 45 of age nearest birthday.

(2) The amount of insurance which will be entertained on this plan on male lives within the above ages has been increased to $1,500. The limit on female lives remains at a $1,000.

(3) Insurance on a term plan will not be granted on a non-medical application.

## FINANCE DEPT. EMPLOYEE ARRESTED

Charged with stealing $4,500 from the Dominion Government, Walter J. King, aged 30, a former employee of the currency branch of the Department of Finance, was arrested in Windsor on Friday and brought to Ottawa on July 16.

## REPORT ON WORKMEN'S COMPENSATION

### Decrease in Payments Due to Slackening in Industrial Activity, Says Ontario Board

During the year 1921 the Workman's Compensation Board for Ontario distributed $6,189,263 in settlement of 45,191 accident claims, according to the 1921 report of the board. The statistics show a decrease from 1920, when $7,780,145 was paid on 54,851 accidents. Fatal accidents were 386 last year, as compared with 452 in 1920.

During its seven years of operation the Workmen's Compensation Act has dealt with 271,807 claims, for which a total of $27,947,653 was awarded in compensation and medical aid benefits. According to the workings of the act, the employers pay the cost and the board acts as a distributor of the claims funds. For every hundred dollars of payroll the employer pays the board $1.12.

One of the reasons for the decrease of accidents is 1921 was the decrease in industrial activity and consequent unemployment.

Concerning the system of collective liability for industrial accidents the report states:

"The board feels there is no doubt as to the general superiority of the collective liability system. Individual liability, uninsured, would often ruin the employer and leave the crippled workman or his dependents without compensation. Individual liability, insured with private companies, is very much more expensive than collective liability administered as are the Ontario and other Provincial acts. This is plain from a comparison of our rates with those of neighboring States."

### Malingering Evil

Although one of the greatest problems confronting the board was to deal with cases of malingering, in the following extract from the report, it is stated that malingering does not exist to any serious extent:

"Charges and complaints by employers of malingering and of claimants being improperly kept upon compensation by doctors were never before so frequent, and, upon the other hand, claims and applications for more compensation than if felt to be justified were never so insistent, the good offices of persons supposed to have influence being frequently called into requisition. Neither influence or favoritism, nor pressure or threats can be permitted to affect the board decisions, any more than any of these things should be allowed to prevail with a court or a jury or arbitrator. Nor are they any more justifiable. It would be easier to grant requests which are not felt to be justified than to refuse them, but such a course would be a gross violation of duty, and would soon bring discredit and disaster upon the operation of the act.

"Every care is used to avoid malingering, and, as has often before been stated, the board does not believe that malingering prevails to any serious extent. The accident frequency and the average time loss have varied but little since the act first came into operation."

Of the 1,187 widows drawing pensions in 1920, 168 have remarried. In these cases it was found that the average perod of widowhood was 2.88 years. Fifteen remarried inside of a year, 35 during the second year, 55 during the third, 24 during the fourth, with a decrease each year to 7 in their seventh year of widowhood. The age of widows at the time of remarriage shows the largest number, who gave up single blessedness was between the ages of 30 and 35, who numbered 47, as compared with 34 between 20 and 25, and 33 between the ages of 25 and 30.

## NATIONAL LIFE

The National Life, Toronto, have taken over an additional floor in their present building to meet the demand of constantly growing business.

## EXPECT DEVELOPMENTS IN OIL

### Announcement of Discovery by Imperial Oil Company at Fabyn, Alta., is Received With Interest—Outlook for Dominion Borrowing.

(Special to The Monetary Times)

New York, July 26.—New York oil men close to the Standard Oil interests are inclined to regard the report received here that oil had been struck by the Imperial Oil Company outside of Fabyn, Alberta, as very important. For while there have been a great many reports of this kind emanating form different points in Western Canada received in New York since the Imperial undertook its oil drilling campaign in the Canadian West, this report is apparently so well authenticated and comes from such trustworthy sources that it has created quite an impression among those who follow Canadian Oil decelopments.

The effect of this report is emphasized by the fact that the recent statement of the Western Superintendent of the Grand Trunk Pacific Railwap in regard to the progress of the oil development work now being done in the West which appeared in a number of Canadian newspapers, has been widely circulated in the United States. The optimism developed by the reading of this report has more recently found support in a very enthusiastic article which appeared over the name of a well known American oil geologist in the Oil City Derrick, one of the authoritative oil journals.

While, of course, all these reports must be read with the fact clearly in mind that unofficial reports of the kind bandied about by interested parties must be accepted with the greatest caution, there is in this case some reason for believing that important oil developments are to be expected shortly in the Canadian West. The belief here is that the discovery of oil in paying quantities outside of Kevin in Northern Montana, just south of the Sweetgrass district of Alberta, is an indication of what may be expected.

### Bankers Visit Canada.

Banking circles have been evincing a great deal of interest during the past few days in the fact that within a fortnight two important delegations of American Bankers have found their way to Canada. Canadian bank men regard this fact as important from the viewpoint of those who look for a closer understanding between Canada and the United States in regard to problems and difficulties of mutual interest. The fact that the American Bankers' Association and the Investment Bankers' Association of America, have, within the week, sent very representative groups of their respective members to Montreal and Toronto, will, it is believed, do much in the long run to bringing about a more complete understanding between the bankers of the United States and Canada, and will it is hoped, at least have the effect of drawing to the side of Canada in the discussion of the various international problems which now affect both the United States and Canada alike, the influence of some of the most powerful members of the American banking associations.

### Government Loan

The report that the Dominion Minister of Finance seems to have decided to float the forthcoming Dominion Loan in Canada has been received with a sigh of relief by most Canadian financial men in New York. Judging from reports published in some of the Canadian newspapers, there seems to be a number of Canadians who feel that the Government ought to be able to borow money on a five per cent basis. To carry such an idea out in floating another loan in the United States would, it appears to be more or less generally believed here, only produce another problem such as that created by the last Dominion $100,000,000 loan. To have this happen again would, it is being pointed out, injure Canada's credit in the United States. If a loan at five per cent. is to be attempted it is better that the attempt should be made at home.

## FIRE INSURANCE RATES

After considering a complaint from the Employers Association of Vancouver, that fire insurance rates in the province are exorbitant, the Vancouver Board of Trade, on June 29, authorized R. Kerr Houlgate, its president, to appoint a subcommittee of the council of the board to give full consideration to the matter of fire insurance rates.

## Bank Clearings

The following are the bank clearingfs for the week ended July 20, compared with the corresponding wek of 1921:—

### Eastern Bank Clearings

| | Week ending July 20 | Increase over 1921 |
|---|---|---|
| Toronto | $101,986,976 | $14,997,242 |
| Montreal | 92,541,153 | *14,002,793 |
| Ottawa | 7,156,723 | 340,819 |
| Hamilton | 6,742,344 | 627,166 |

*—Decrease.

## BRYANT, ISARD PAYMENT

Creditors of the defunct brokerage house of Bryant, Isard and Company, received the first paymnet on their claims on July 17. Cheques were mailed for 20 per cent. of the amount due. Norris P. Bryant said that 30 per cent. still remains to be paid by September 1, according to the agreement, which provides that by that date the total of 50 per cent. be paid to debtors of the company now being liquidated. The distribution was made by John L. Thorn of Toronto, trustee. The payment was made following notice that the agreement between trustees J. L. Thorn and N. P. Bryant had been approved by the referee in bankrutcy, province of Ontario.

## Exchange Quotations

Closing rates in Toronto Wednesday, compared with the preceding week, were as follows:—

| | July 19 | July 26 |
|---|---|---|
| Sterling | 449.50 | 449.50 |
| France | 8.45½ | 8.36 |
| British W.I. | .94⅛ | .94 |
| Jamaica | 4.51¼ | 4.50¾ |
| Belgium | 7.97 | 7.95 |
| Denmark | 21.82 | 21.69 |
| Germany | .19½ | .19¼ |
| Greece | 3.28 | 3.21 |
| Holland | 39.24 | 39.15 |
| Italy | 4.65 | 4.62 |
| New York | 15/16 | 29/32 |

## Railroad Earnings

The following are the approximate gross earnings of Canada's transcontinental railways for the first two periods in July:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| July 7th | $3,168,000 | $3,440,000 |
| July 14th | 3,185,000 | 3,397,000 |
| July 21st | 2,991,000 | 3,363,000 |
| **Canadian National Railways** | | |
| July 7th | 2,075,360 | 2,106,984 |
| July 14th | 2,096,455 | 1,943,164 |
| July 21st | 2,046,830 | 2,106,984 |
| **Grand Trunk Railway** | | |
| July 7th | 2,233,202 | 2,669,013 |
| July 14th | 2,167,649 | 1,998,504 |
| July 21st | 2,152,005 | 1,889,699 |

## Business Conditions

Dispatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities of the Dominion of Canada report that current business has been measurably stimulated by recent favorable weather and that a noticeable feeling of confidence in the future prevails in practically every section. Expectations of large yields are becoming more general as the chief crops approach maturity under encouraging conditions, and, with the maintenance of activity in the building, iron and steel, lumbering, paper and pulp, mining and other important industries, prospects for a good fall and winter trade are considered bright. The sharp depletion in stocks is thought to be clearly reflected in the large number of small orders that cover a wide range of commodities and are accompanied by urgent requests for prompt shipment, and this condition is expected to result in heavy buying later on. Orders for heavy dry goods, clothing, footwear and other requirements for the coming season are being placed in gradually increasing volume, reflecting the confident feeling that seems to be developing in many quarters, and collections occasion somewhat less complaint.

Montreal reports that wholesale business is reasonably satisfactory for the season in most lines, and that all indications point to active buying with the termination of the vacation period and the advent of cool weather. Collections are inclined to drag.

Business at Quebec, due to good fishing reports, fair prices for farm products and the presence of numerous tourists, is showing an improving tendency and sentiment generally among merchants is cheerful. Collections remain slow.

Although the usual summer quieting down is perceptible in some lines at Toronto, business generally is in well sustained volume for this period, and all indications point to a considerable increase in activity with the approach of fall. Collections are about fair.

Business prospects in the Far West and Northwest have been perceptibly improved by generally favorable weather and satisfactory crop progress in most sections. Retail buying shows a moderate improvement at a few points, but reports from Winnipeg, Saskatoon, Calgary, Regina and other centres state that, while wholesalers are encouraged by the receipt of a growing number of inquiries, buying is still confined mainly to current needs, and not much change is anticipated until after the crops are harvested. Collections are still slow.

## CANADIAN FAILURES

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended July 14, in provinces, as compared with those of the previous weeks, and corresponding week of last year, are as follows:—

| | July 14 | July 7 | June 30 | June 23 |
|---|---|---|---|---|
| Ontario | 18 | 13 | 17 | 12 |
| Quebec | 18 | 21 | 31 | 13 |
| Manitoba | 6 | 3 | 7 | 15 |
| Alberta | 4 | 1 | 5 | 5 |
| Saskatchewan | 2 | 6 | 3 | 4 |
| British Columbia | 2 | 2 | 0 | 6 |
| Nova Scotia | 5 | 2 | 3 | 0 |
| New Brunswick | 2 | 2 | 3 | 3 |
| Prince Edward Is. | 1 | 0 | 0 | 0 |
| Newfoundland | 1 | 0 | 6 | 0 |
| Total | 59 | 50 | 75 | 58 |
| 1921 | 49 | 35 | 27 | 39 |

## IMMIGRATION DECREASED

Below is a statement of immigration to Canada for the quarter ended June, compared with last year:—

1921-22

| | British | From U.S.A. | Other Countries | Totals |
|---|---|---|---|---|
| April | 8,476 | 5,035 | 1,541 | 15,052 |
| May | 7,083 | 3,710 | 3,350 | 14,143 |
| June | 6,899 | 3,086 | 2,292 | 12,277 |
| Totals | 22,458 | 11,831 | 7,183 | 41,472 |

1922-23

| | British | From U.S.A. | Other Countries | Totals |
|---|---|---|---|---|
| April | 2,048 | 3,268 | 1,282 | 6,598 |
| May | 5,972 | 2,866 | 2,361 | 11,199 |
| June | 3,675 | 2,291 | 1,329 | 7,295 |
| Totals | 11,695 | 8,425 | 4,972 | 25,092 |

# June Trade Was Well Ahead of Last Year

### Favorable Balance of $10,000,000, Compared With $1,000,000 in June, 1921 —Adverse Balance for First Quarter of Fiscal Year is Reduced from $30,000,000 to $3,000,000—Decline in Coal Imports Reflected in Statement

Total Canadian trade in the month of June was $134,775,784 an increase of over $17,000,000 compared with June of last year. Imports increased from $57,000,000 to $61,000,000 while exports increased from $58,000,000 to $71,000,000, so that while there was only a small favorable balance in June last year there was a balance of over $10,000,000 in June of this year.

Practically all classes of imports show an increase excepting Non-Metallic Minerals and Products which decreased from $5,736,325 to $3,523,450; this is due chiefly to the falling off in coal purchases. The largest increases are shown in agricultural products and in fibres and textiles.

Exports of Non Metallic Mineral and Products also decreased considerably, as did those of miscellaneous commodities, but large increases are shown on the other hand by agricultural products, wood and wood products, iron and its products and of non-ferrous metals and their products.

The first quarter of the fiscal year is now completed and resulted in total trade of $351,701,373, compared with $355,958,706 for the first quarter of last year. Imports decreased by about $16,000,000 while exports increased by $11,000,000, so that while there was an adverse balance in the first quarter of last year of $30,000,000, the amount this year is less than $3,000,000.

Details of the trade for June and for the three months ending June compared with similar periods in 1921 are given herewith. The figures are prepared by the Customs Department.

## IMPORTS ENTERED FOR HOME CONSUMPTION

## CLAIMS AGAINST GERMANY

### Only Small Proportion of Amounts Owing Have Been Admitted By Authorities

It is now over three years since the treaty of peace was signed. Yet, up to the end of the last fiscal year, out of $8,725,085 of claims filed against Germans only $364,488 have been admitted by the German government. This is shown in a statement made by the Department of the Secretary of State at Ottawa on July 10.

So great has become the difficulty in getting action by Germany that the deputy custodian of enemy property in Canada, Thomas Mulvey, K.C., is proceeding to England to endeavor to expedite the settlement of claims. Mr. Mulvey is being accompanied by O. Biggar, K.C., who has been appointed an officer for the purpose by order-in-council. Unless the German authorities are prepared to make a satisfactory settlement of these debt claims, the Canadian representatives will present the matters in dispute to the Mixed Arbitral Tribunal which has authority to deal with them under the treaty.

### Claims Total $7,580,494

The Canadian clearing office under the direction of the custodian of enemy property has control of the settlement of debts contracted between Canadians and Germans before the war. There have been filed by the German Government claims for $7,580,494, to offset the debt claims made by Canadians, and of these $1,661,257 have been admitted by Canada. These claims are all settled between the governmental clearing offices, and payment is made only when the claim has been admitted by the German or Canadian government, as the case may be. If there is a surplus due by Germany, it must be paid in cash; if there is a surplus due by Canada, it is credited to Germany on the accounts between the two governments. The payments to Canadians are made by the Canadian government, and to Germany by the German Government.

In addition to the claims made by Canadian creditors against German debtors on pre-war transactions, there are claims made by Canadians for property which was sequestered in Germany during the war. The claims made by Canadians on this account amount to $5,089,345, of which $1,509,973 have been admitted by Germany. On the other side of the account the Canadian government has given to Germany credit to the amount of $1,115,104 from the proceeds of German property in Canada liquidated by the Canadian authorities.

### Claims for Return

Many millions of German owned securities and German owned property were seized by the Canadian government, but in a large number of cases claims have been made for the return of this property. Claim for return has been made on the ground that the property belonged to Allies or neutrals at the date when Canada's law against trading with the enemy came into force. The value of the property returned under this head is $9,327,000; and in addition property valued at $225,000 has been returned to Canadian women who were wives of Germans but who proved their Canadian citizenship.

The sum paid to Canadian creditors by the custodian of enemy property in Canada up to the end of the last fiscal year was $391,149; and in addition he paid to Canadian claimants on account of property sequestered in Germany the sum of $1,516,302.

These claims for debts and for the sequestration of the property of Canadians in Germany stand on quite a different footing from what are known as "reparation claims," which arise out of losses occasioned by ilegal methods of warfare. No claims of this sort on the part of individuals have been recognized by the Imperial government, though £5,000,000 was set aside for exceptional cases where there is a moral claim.

### No Claim of Reparations

"No individual," the Rt. Hon. Austen Chamberlain has stated in the Imperial parliament, "will have any claim in law for any sum which the British government may receive from Germany in respect to reparations."

The Canadian claims made under this head were collected for the purpose of fixing the total amount of reparations payable by Germany, and the amount of those reparations was later fixed at 132 milliards of gold marks on another basis.

The total amount of the Canadian reparation claims filed up to the end of the last fiscal year was $30,724,977 of which $25,275,977 was against Germany, $57,499 against Austria, $110-220 against Bulgaria, and $5,283,280 against Turkey.

The amount to be received by Canada by way of reparations is quite uncertain. The share of whatever sum may be paid by Germany which comes to the British Empire as a whole is 22 per cent; and of this 22 per cent. Canada is entitled to receive 4.35 per cent. The latest request of the German authorities for a moratorium of two years is regarded as adding still further to the uncertainty as to the amount which may come to Canada. So far no payment on this account has been made to the Dominion, though the government has received six million in payment of the cost of the operations of the Canadian troops which participated in the occupation of Germany.

## APPEAL ON LUMBERMEN'S CASE

An appeal from the decision rendered on July 8, by Judge Mulligan in the action of the Ottawa Lumbermen's Credit Bureau against G. H. Swan, former secretary-treasurer of the bureau, is to be taken. Announcement to this effect was made by George F. Henderson, K.C., counsel for the bureau.

The judgment found that the return of certain commissions in connection with insurance secured by members of the bureau through Swan, constituted a rebate, contrary to the provision of the Insurance Act. For this reason, his honor held that the agreement arrived at between Swan and the bureau was not binding.

Swan some time ago desired an increase in salary, but instead of it being granted by the members of the bureau an arrangement was made whereby Swan was to secure an insurance agency. Any insurance which he received from the members of the bureau, he was to return the commission. Any business that he picked up outside of the members of the bureau, he was to keep the commissions for himself.

The action was brought by the bureau to recover an amount in excess of $600 which the bureau claimed Swan, owed it as office rent. Swan, on the other hand, set up that under the agreement he was to be given the use of the office and telephone and also whatever tife he needed in connection with his insurance business.

The chief point on which the appeal will be taken is that the return of the commissions did not constitute a rebate, as Swan was at the same time in the employ of the bureau as well as acting as an insurance agent.

## WESTERN MUTUAL POLICYHOLDERS MEET

A mass meeting of the policy holders of the Western Mutual Fire Insurance Company, which went into liquidation February last, was held on July 7 at Didsbury, Alta. About seventy policy holders attended. T. Reist was elected chairman, and C. F. Rennie secretary.

The main question in dispute was—Could the policy holders be made to pay the balance of their notes. A discussion lasting about two hours was carried on, the principal speakers being W. J. McCoy, F. Hyde, D. Dippel, J. L. Chandler and H. Erb.

A letter was read from the deputy minister of finance stating there was a test case going through the courts re the payment of a mutual note, and until this test case was decided no decision could be given regarding the liability of the policy holder under the mutual system.

T. Reist, who was formerly treasurer of the Western Mutual, was assisted by P. R. Reed, the former manager, in answering all questions regarding the reasons for the company going into liquidation.

Heavy losses, amounting to $75,000 in 1921, and the inability of the company to collect premiums which were due, were the two main reasons given. It was pointed out that 1921 losses amounted to $75,000, while in former years the loss was around $25,000. Assessments were levied in October, 1921, amounting to $51,000, and only $18,000 was collected.

P. Dalziel, of Calgary, who was appointed liquidator last February, answered satisfactorily all questions regarding the winding-up of the company's affairs. The policy holders seemed to be well satisfied with the results of the meeting. A few seemed to think they had not received a square deal but that it would save law costs if they paid their notes, and all liabilities could then be paid.

## DECLINE IN REVENUE OF RAILWAYS

### Due Chiefly to Seasonal Falling off in Traffic, But Change is Greater Than Last Year

The most prominent feature of the report, for April, of the railways as a whole was the sharp decline in revenues from March. This was due almost entirely to seasonal decrease in freight traffic although the decrease was much greater than for either 1921 or 1920. For 1922 the decrease in freight revenue was 21.5 per cent., in revenue ton miles 29 per cent., for 1921, in freight revenue 8.7 per cent., in revenue ton miles 17.1 per cent., for 1920, in freight revenue 6.1 per cent., in revenue ton miles 3.8 per cent. During 1921 and 1920 the decline in revenue ton miles continued through to June when the curve took an upward trend and continued ascending till it reached a peak in Ooctober.

Compared with April 1921 revenues showed a decrease of 12.6 per cent. although revenue ton miles decreased only 1.7 per cent. Passenger revenues and passenger miles increased over March but were both about 12 per cent. below last year. The decrease is evidently in the long haul traffic as the average passenger journey continued to decrease being 55.9 miles for April 1922 61.7 miles for April 1921 and 69.9 miles for April 1920.

### Operating Expenses.

Operating expenses were reduced 13 per cent. giving an operating ratio of 95.51 per cent. as against 96.25 per cent. for last year. Maintenance of way and structures showed a reduction of 11 per cent. while transportation expenses were reduced 21.5 per cent. Revenue ton miles were reduced 1.7 per cent. with a reduction of 6.5 per cent. in freight train miles but an increase of 2 per cent. in loaded car miles. This gave a decreased car loading of 1.3 tons but an increased train loading of 21.9 revenue tons. The total pay roll was cut $2,144,190 or 11.3 per cent. with a reduction in the number of employees of 4,163 or 2.9 per cent.

Canadian National Railways showed a decrease of $1,491,092 or 16 per cent. in total revenues, compared with April 1921. This was due to decreases in rates but also decreases in freight and passenger traffic. The decrease in freight traffic from March was much greater this year than last, being 38 per cent. for 1922 as against 22 per cent. for 1921. Expenses were reduced $2,778,215 or 23.3 per cent. giving an operating loss of $1,349,516 as against $2,636,-639 last year and an operating ratio of 117.29 per cent. as against 128.37 per cent. for 1921. Train loading was increased an average of 45 tons per train and with a decrease of 9.4 per cent. in ton miles, there was effected a decrease of 17.5 per cent. in freight train miles. The pay roll was reduced $1,150,258 or 16.7 per cent. with a reduction in the number of employees of 4,023 or 7.5 per cent.

### The Canadian Pacific

Canadian Pacific Railways showed a decline of 10.5 per cent. in revenues and a reduction of 3.5 per cent. in operating expenses, which increased the operating ratio from 81.09 per cent. 'for April 1921 to 87.37 per cent. for April 1922.

Revenue ton miles increased 8.5 per cent. but freight revenues decreased 8.5 per cent. while transportation expenses were reduced 12.8 per cent. Freight train miles showed practically no change while passenger train miles decreased 2.3 per cent. with a decrease of 1.7 per cent. in passengers carried and a decrease of 16.5 per cent. in passengers carried one mile, the average passenger journey showing a decrease of 12.9 miles. The pay roll was reduced $241,285 or 3.7 per cent. with an increase in the number of employees of 1,603 or 3 per cent.

Grand Trunk Railway showed an increase in passenger revenues over both last year and last month, but freight revenues decreased, tho decrease from April 1921 being $807,000 or 19.5 per cent., with a decrease of 4.2 per cent. in revenue ton miles. Total revenues decreased $774,971 or 13.6 per cent., while expenses were reduced $697,400 or 13.2 per cent., giving an operating ratio of 93.78 per cent. compared with 93.27 per cent. for April 1921. Maintenance expenses for way and structures continued considerably below last year, while for equipment there was little change. The pay roll was reduced $498,457, or 13 per cent. with 315 less employees.

## CALGARY'S CIVIC INSURANCE

### Commissioners Dissatisfied With Companies' Tenders and Now Have Plan to Carry Risk Themselves

When the city of Calgary found itself without sickness insurance for its employees, due to retirement from the field of the National Benefit Insurance Company of London, Eng., it decided to call for tenders from other companies. The experience of the National Benefit was not satisfactory, the losses totalling $29,000 against premiums of $15,200 in the first year of the operation of the scheme.

Tenders were received from ten companies, but the city commissioners considered the premiums too high, and are considering the city carrying the insurance itself, increasing the employees' monthly contributions from 50 cents to 75 cents, and slightly reducing the benefits. The proposal is as follows:—

### City's Proposal

The city to continue the protection as outlined below for another year commencing July 1. To make this insurance possible each employee will contribute 75 cents per month.

Benefits:—

(1) All sickness.

(2) 80 per cent. of salary for 10 weeks in one year, deduct the first two days from every claim.

(3) Hospital expenses not to exceed $100 or $3.50 per day.

Conditions:—

Immediate notification should be made by the employee to his office.

Doctor's certificate will be required in all cases stating:

(a) That the employee was continuously under his care.

(b) Nature of sickness.

(c) The correct dates of disability as the certificate will govern payment.

### Companies' Tenders

In calling for tenders from private companies the city laid down the following specifications:

First proposal:—

1. Non-occupational accident at death, $1,000, with the usual dismemberment features.
2. All sickness.
3. Payment for 70 days, deduct first two days on every claim.
4. 80 per cent. of present salary.
5. Medical, surgical, hospital, limited to $100 on each. Clauses 3 and 5, amount payable in policy year. A mutual selection of doctors with a possible cut in rates. Hospital rate not to exceed $3.50 per day. Refund 4 per cent. of premium to cover operation expenses. Any case covered by the Workmen's Compensation Board no claim will be made on the company.

Second proposal:—

1. Non-occupational accident $1,000 at death with usual dismemberment features.
2. All sickness.
3. Payment for 70 days, deduct first two days on every claim.
4. 80 per cent. of present salary.
5. Medical $35. Refund 4 per cent. of premium to cover operation expenses. Any case covered by the Workmen's Compensation Board no claim will be made on the company.

The tenders of the various companies on the above specifications were received in accordance with the following tabulation. The bids were made on the basis of 1,000 employees and an annual payroll of $1,500,000. The first column of figures shows what each company figured was necessary to charge for each individual on the 1,000 employee basis against the $1,500,000 payroll on the basis of proposal No. 1 by the city, the second column showing the aggregate premiums necessary to be paid annually.

| | Proposal No. 1 | Annual Prem. | Proposal No. 2 | Annual Prem. |
|---|---|---|---|---|
| General Accident .... | $1.90 | $28,600 | $1.25 | $18,750 |
| Yorkshire .... ........ | 1.84¾ | 27,700 | 1.79¾ | 26,900 |
| Imperial .... ............ | 3.25 | 48,750 | 3.00 | 45,000 |
| London Guarantee | 2.25 | 33,750 | 2.10 | 31,500 |
| Union Ins. Co. ........ | 2.25 | 33,750 | 2.00 | 30,000 |
| Continental Cas. .... | 1.98 | 29,700 | 1.62 | 24,300 |
| Globe Indemnity .... | 3.44 | | | |
| Travelers .... ............ | 1.20 | 18,000 | | |
| London & Lancas. .. | 1.85 | 27,750 | 1.75 | 26,250 |

Travelers $1.20—2-3 indemnity, limit $100 per month.

No. 1 quotes $1.90 with the same benefits as last year.

$1.25 is straight indemnity only.

## UNION BANK MEMORIAL

Perpetuating the memories of 120 officers of the Bank who gave up their lives in the Great War a memorial of the Union Bank of Canada, done in Tyndall stone, was unveiled by Sir James Aikens, Lieutenant-Governor of Manitoba on July 11, at McElheran, Man., 25 miles from the city of Winnipeg. Coincident with the ceremonial, W. R. Allan, President,H. B. Shaw, vice-president and General Manager, gave over to the Lakeside Fresh Air Camp Association, the deed to 18 acres skirting Lake Winnipeg, as a permanent site, the gift of the Union Bank of Canada. "We thus conjoin the memories of the Bank's heroic officers with the highest type of service to humanity," were the words of the Union Bank President.

## MAY TRY TO COLLECT INSURANCE

### Delorme Case Recalls Previous Cases Where Insurance Was Taken Out Just Prior to Death

Father Adelard Delorme, who was indicted by the Grand Jury at Montreal recently for the murder of his half-brother, Raoul Delorme, but who was committed to the asylum without being tried on the charge of murder, secured $25,000 of insurance on the life of his half-brother just a few days before the crime occurred. The insurance policy was issued by La Sauvegarde Life Insurance Co. part of the risk being reinsured by the Sun Life Assurance Co. It is regarded as altogether likely that an attempt will be made to collect this insurance, and the outcome will be awaited with interest in insurance circles.

Apart from the question whether there was any material misrepresentation made when the policy was taken out which would have the effect of voiding the contract at its inception, the law seems to be clear enough with regard to the recovery of insurance on the life of a murdered person. Porter's Law of Life Insurance states it as follows: "If the life on which the policy is granted is feloniously taken by the person who would otherwise receive the insurance money, the insurers are discharged and the money cannot be recovered from them by the felon himself or by any person claiming through him; but this principle does not bar those who claim with clean hands themselves and as executors of the innocent assured."

### Former Case in Quebec

The law was also clearly set forth in a Quebec case, that of Trudeau v. Standard Life Assurance Co., which was carried by the insurance company to the Supreme Court of Canada in the year 1900. The assured in this case had two policies of insurance on his life, payable to his wife should she survive him, otherwise to his legal representatives. Assured was murdered by his wife and her lover, who were both convicted and executed for the murder. Assured left a will by which he bequeathed all his property to his wife; he left no children. By a judgment of the Superior Court, District of Terrebonne, the wife was deprived of all her rights as a beneficiary under the policies and will, thus leaving the mother and collateral representatives sole beneficiaries, and they claimed the amount assured under the policies. The insurance company brought action against the mother and collateral representatives for the cancellation of the two policies, charging them with endeavoring to take advantage of fraud and felony committed by the murderess of the assured. The Superior Court, District of Montreal, dismissed the action, and the Court of Queen's Bench affirmed this decision. The judgment, which was appealed from by the insurance company to the Supreme Court, held that as there was no evidence that, at the date of the policies, assured was aware of the evil intentions of his wife, nor that she was acting as his agent in effecting the insurance, the fact that she might then have had the intention to murder and did subsequently murder her husband would not have the effect of discharging the insurer from liability upon the policies towards the legal representatives of the assured. The Supreme Court of Canada dismissed the insurance company's appeal for the reasons stated by the Court below.

## INSURANCE AGENCIES IN CANADA

### Views of an American Underwriter on Conditions Here as Compared With United States

A. G. Chapman, Louiseville, in an address to Texas agents on the subject of the National Association of Insurance Agents made the following reference to conditions existing in Canada:—

"For comparative purposes, I want to cite you the conditions existing in Canada toward which the business in the United States was drifting before the National Association of Insurance Agents was organized.

"What follows is general in its scope because there are exceptions, but it sums up, broadly, the situation.

"Being British territory, covered only by British companies with British managers, the English system was naturally followed in Canada as closely as circumstances would permit. This in no way follows the American Agency System as we know it and to the perpetuation which we are so earnestly striving.

"In Canada they have salaried branch offices and the public deals with the company. The allowance of a commission to the assured, rebating, being universal, the local managers come and go and the public is none the wiser.

"Further, no agent has any pecuniary interest in the expirations and there is no such thing as sale value of an agency. At first there were none except what might be called application agents in Canada, the policies being written in the office of the Canadian manager. Is it at all unnatural that these managers had inbred in them the English idea as to overhead writing ownership of expirations and sale value of any agency? Beginning with the real American invasion of 20 years ago, the policy writing agency was extended and in the rush of American companies into Canada within ten years it became the custom rather than the exception to have policy writing agents. Nevertheless, the attitude of the manager (and this isn't a knock at our British friends) changed not at all.

### Sample of Situation

"Just as a sample of present conditions, Ontario—the greatest premium producing province of Canada—carries under the tariff, graded commissions to agents outside of Toronto and yet any number of companies will allow a broker or solicitor or agent in Toronto or Montreal a higher rate of commission on a risk outside of Toronto than they will allow their agent at the point where the risk is located.

"I know of one American company that annually foregoes a hundred thousand dollars in premiums in Canada simply because it is trying to follow certain agency practices that ought to be as universal and ethical there as they are here.

"For example—and I could give you dozens of instances—in a certain important city the companies organized a local association, or company local board, and adopted certain rules, one of which forbids the payment of brokerage to non-residents on locally owned property. One of the companies, members of this board was offered some business by a non-resident broker, accepted it and had the policy written in another city. The first knowledge the local agent had of the line was a bold request from the company to arrange an appointment with the assured and the adjuster for the adjustment of a loss which had occurred.

### Invasion by Banks

"The huge banks of Canada are not permitted to act, nor are their managers, as agents of insurance companies. You are doubtless familiar with the banking system of Canada in that there are less than a dozen banks there, all of tremendous size, with hundreds of branches doing both what we know as National and Savings banking. It was an easy matter to overcome this by organizing subsidiary corporations, which was done. These corporations are now acting as brokers, agents and even as managers of companies and are using their powerful banking interests and connections in competing with the local agents.

"Unless and until the Canadian agents organize as agents have here, and until they classify their companies as we are so strongly urging, overhead writing will continue to flourish and agents will have no interest in expirations; consequently, an agency will have no permanency for its work in a recognized sale value."

BUSINESS INSURANCE

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

## OUTLOOK FOR COAL

From day to day the prospects for coal supply during the coming winter grow more serious. The United States has established machinery for emergency distribution, including the appointment of a central committee of departmental heads. Immediately after being named chairman of the government committee Secretary Hoover, at the request of the President, asked State governors to set up the necessary organization in each State for insuring equitable distribution and the maintenance of fair prices for coal under the administration's plan. This organization, he said, was to assume responsibility for all distribution with the boundaries of each State except to railways.

At the same time the co-operation of the several transportation regulation bodies was requested by Interstate Commerce Commissioner Aitchison, another member of the committee, in facilitating operation of the priority orders for shipments of coal and necessities. While the Government thus prepared to distribute to the best advantage the coal supply which continues to fall under the combined effect of the coal and rail strikes. President Harding, in restating the government's policy toward the industrial disturbance again suggested that those on strike in such industries return to work under conditions already proposed by him, while the reasonableness of their demands was being threshed out by agencies set up for that purpose.

With retail coal dealers in New York predicting that coal will cost $25 a ton this winter with substitutes unless the strike is settled or the Government steps in and regulates prices, a new angle developed after a meeting of officers of the Longshoremen's Union, where the question of handling coal shipments from Great Britain was discussed. Anthony J. Chopek, president of the union, declined to indicate whether a plan of action had been decided upon. Coal dealers said that public utilities are supplied for a short period, as are gas and electric companies, but with no new supplies coming in anxiety for the future is developing. Large sizes of anthracite coal are reported exhausted with very little other grades in stock. Dealers refuse to quote prices except at the time of delivery.

## RAILWAY STRIKE BEING FORCED

An announcement that Canadian railway shopmen were being practically forced to declare immediate strike because engines and cars from United States railroads, whose shopmen are on strike, were being repaired in Grand Trunk shops in the Dominion, was made on July 27 by R. J. Tallon, president of Division No. 4 Railway Employes' Department of the American Federation of Labor. Mr. Tallon said that he had received a reply from the Minister of Railways at Ottawa in reference to his telegram of yesterday acquainting the Minister with the desire of the men to down tools because of a tentative reduction of wages imposed by the railways on the shopmen. The reply, Mr. Tallon said, stated that the position was being discussed at Ottawa.

Mr. Tallon's announcement follows: "A reply has been received from the Department of the Minister of Labor, Ottawa, stating that the position of the Railway Association of Canada in respect to participating in a board of conciliation for the shopmen was the subject of present discussion. A protest has been forwarded by the division regarding the apparent reluctance of the railways to comply, and pointing out the attitude of the Grand Trunk Railway in particular, which system is practically forcing our men strike over their determination to have more United States engines and cars repaired in Canadian shops. This glaring discrimination which is being practised, is made apparent by orders repeatedly issued by the United States Labor Board relieving other employes from doing work formerly done by shopmen. Such action is making it impossible for the committee to induce the men to remain at work."

If a strike call is issued it will affect 49,000 boilermakers, machinists, carmen, electricians, blacksmiths and sheet metal workers now employed in Canadian railway shops.

## BUSINESS IN THE UNITED STATES

Figures so far received by the United States Department of Commerce on commercial and industrial movements during June indicate that the improvements in business noted in earlier months continued; however, further advances were not so great as in the preceding months. A part of this was no doubt due to seasonal slackening, but more especially to the effects of the long continued coal strike and the uncertainty connected with the railroad difficulties.

The coal strike, which has now been in effect nearly sixteen weeks, has so far caused but little disturbance to industry. The reason for this lies in the very heavy stocks which were built up in the early months of this year. As a matter of fact, bituminous production for the first half of the present calendar year has been less than 5 per cent. below the output in the corresponding period a year ago. In recent weeks some of the smaller industrial plants have begun to experience a fuel shortage. This, together with the realization that even after mining has begun it will be some time before an even distribution can be established, has had a deterring influence on industry.

If a satisfactory settlement of the present labor difficulties can be reached in the future, says the Department of Commerce, there is every reason to believe that business will continue on its present level, or even to increase in volume. The failure to re-establish European economic equilibrium may continue to limit American foreign trade in that direction, but domestic conditions as well as those in many other parts of the world are favorable further expansion.

Consumption of cotton by textile mills in June showed a further increase with a total of 507,869 bales. Exports of cotton totalled 491,079 bales, an increase of about 22,000 bales over May and, with the exception of April, exceed any other month of the year. Stocks of cotton showed a further marked decline both in mills and in warehouses.

Consumption of raw silk as indicated by withdrawals from warehouses amounted to 29,529 bales in June, which was less than in May but higher than for any month since January.

The production of pig iron and steel ingots managed to hold its own during June in spite of the fuel difficulties which are beginning to make themselves felt in this industry. There was a slight increase in the production of pig iron over May and a small decrease in the output of ingots. Unfilled orders of the United States Steel Corporation increased 382,000 tons over the condition at the end of May.

Production of gasoline in May, the latest figures available, showed another new record for the industry, with a total of 513,659,000 gallons. Consumption also increased from 385,564,000 gallons in April to 499,240,000 gallons in May.

Building contracts awarded in the twenty-seven Northeastern States during June were valued at $343,440,000, a decline of about $19,000,000 compared with May. This is largely accounted for by the very heavy activity in the preceding month.

## STANDARDIZE ACCOUNTING

Ten out of eleven union hospitals in Saskatchewan have adopted a standard method of bookkeeping, as a result of the employment by the provincial government of an accountant to check up the business systems of the institutions, and to plan a uniform system.

Some months ago a hospital accountant was taken on the staff of the bureau of public health, and he has toured the province studying the methods in vogue.

Dr. M. M. Seymour, commissioner of the bureau, declared that hospital secretaries are highly satisfied with the new arrangement, and besides the union institutions, three non-union establishments have adopted the standard system "There is unlimited scope for studying hospital bookkeeping," Dr. Seymour said, "with a view to pointing out how economies may be effected in every branch of operation expenses."

### WHAT IS A LIVING WAGE?

The attempt to discover what is a "living wage" and to obtain that and more, if possible, is now a regular feature of wage adjustments. In the anthracite wage controversy the labor side has gone further and, expressing its dissatisfaction with a living wage, is contending for a "saving wage."

Most of the discussion of this subject ignores the fact that there is no such thing as a determinable living wage which could, with reason or justice be uniformly applied to all workers in a given class in all parts of the country. Obviously, a living wage for a single man would not be a living wage for the head of a family in a given section. But it is easily possible, for example, that a living wage for a single man where living costs are highest might balance that of the head of a family where costs are lowest though both perform the same kind of work. Nor even as to individuals without regard to their responsibilities to support others, is it possible to arrive at a definite figure which can be said to represent the necessities of living.

Aside from the fundamental impossibility of arriving at what is a living wage there has arisen in this connection a disposition on the part of the spokesmen of labor entirely to ignore the question as to how much an industry can pay. A number of these spokesmen have in fact stated quite emphatically that they have no interest in that phase of the matter. It is, nevertheless, a very practical consideration for those who must find the money to pay the wages and for the public, out of whose pockets the costs of all industry eventually come.

In the recent cases before the Labor Board the contention was made that the cost-of-living budgets of workers showed that it was necessary that each one of them should have annual earnings of $2,636. Later this figure was changed to $2,133, or at least the higher budget was laid aside and the claims of railroad labor's advocates were concentrated upon the demand that rates of pay should be established that would provide an annual income of $2,133.

Examining these claims, the majority opinion of the Labor Board in its last decision pointed out that if every one of the 25,000,000 families in the United States were guaranteed an income of $2,636.97 it would require a sum of $25,000,000,000 in excess of the total income of all individuals and industries in the country. If all families were guaranteed an income of the smaller amount ($2,133), the total income of the country would be exceeded by the sum of $13,225,000,000. To pay the lower wage demanded by the rail workers alone would have wiped out the entire net revenue of the carriers and shown a loss of hundreds of millions of dollars.

### BANKER'S UNUSUAL RECORD

R. Y. Hebden, first agent of the Bank of Montreal's agency in New York, last month completed a record seldom equalled in the annals of Canadian banking. Recently he ended his sixtieth year of service with the Bank of Montreal. Mr. Hebden was born in January, 1846, and was the son of the late Reverend John Hebden, Hamilton, Ontario. He entered the service of the Bank of Montreal in that city on the first of July, 1862. He was subsequently transferred to the Stratford, Ottawa and Montreal Branches. In the latter office he rose to the rank of assistant accountant in 1868. Two years later he went to New York as acting accountant. From there he was transferred to Chicago as accountant. In 1879 he was appointed assistant manager at Toronto, after having served for a short period at the head office in Montreal. Early in 1880 he again proceeded to Chicago, as assistant manager, and in 1888 he was appointed assistant inspector and attached to head office. Four years later he proceeded to New York as second agent, and since February, 1897, he has been in charge of that agency.

# Personal

NORMAN P. LAMBERT is resigning from the post of secretary of the Canadian Council of Agriculture, and is to take an executive position with the Maple Leaf Milling Company.

LOUIS LACOURSE LANG, of Galt, has been appointed a director of the Mutual Life Assurance Company of Canada, Waterloo, Ontario. Mr. Lang is vice-president and managing director of the Lang Tanning Company, Kitchener, and has been elected a director of the Mutual Life of Canada to succeed the late W. J. Kidd, of Ottawa.

D. McIVER, has resigned his position as Treasurer of the Public Utilities Commission, Port Arthur. F. D. Jackson, in addition to acting as secretary, will assume the position of treasurer.

HUGH W. MURRAY, who has been manager of the Toronto office of the National City Company, has resigned his position. Mr. Murray will remain in the investment banking business and will open offices in Toronto in September.

F. C. T. O'HARA, deputy minister of Trade and Commerce, Ottawa, has been appointed to represent Canada at the Pan-Pacific Commercial Conference to be held in Honolulu in October.

C. B. POWELL of Toronto has been elected to the directorate of the Northern Mexico Power and Development Co.

ALFRED PRICE, general manager of the Canadian Pacific Railway eastern lines, is retiring on the advice of his physician.

JAMES ROBINSON, vice-president of the Saskatchewan Co-operative Association of Regina, has been appointed a member of the Board of Grain Commissioners.

# Obituary

RUFUS SAWYER HUDSON died at his home in Toronto on July 18th. The late Mr. Hndson was born in Chelsea, Que., on Dec. 17, 1843, and his education was completed with his graduation from Toronto University. He was a silver medalist of Ottawa Grammar School and a leading prize man at Upper Canada College. As well as being joint general manager, vice-president and director of the Canada Permanent Mortgage Corporation, and a director of the Canada Permanent Trust Company, he was a director of the Otto Higel Company, Limited. He was also the honorary president of the Land Mortgage Company Association.

C. B. MONTIZAMBERT, resident partner and manager of the Hamilton office of Messrs. Watt and Watt, died recently in his thirty-sixth year. Prior to going into the brokerage business, Mr Montizambert had been a banker.

AVERN PARDOE, until about a year ago Parliamentary Librarian at the Ontario Parliament Buildings, and a former well-known newspaper man of Toronto, died on July 23rd, at his summer home, Fairy Island, Lake Joseph, Muskoka, aged 77 years. The late Mr. Pardoe was born at Stratford-on-Avon, England, in 1845. He received his early education at King Edward the Sixth's Grammar School there, coming to Canada a few years later. In 1875 he joined the staff of The Globe, Toronto, of which he was the Agricultural Editor, as well as an editorial writer. Mr. Pardoe remained on The Globe as Managing Editor until 1888. From 1888 to 1895 he was engaged in private business and in the latter year became Assistant in the Legislative Library, becoming Chief Librarian in 1898.

HARRY CROFT RAE died at his summer home, Bobcaygeon, on July 21st. The late Mr. Rae was born in Toronto 62 years ago, and was educated at the Model School and Upper Canada College. For 35 years he had been a member of the staff of the Bank of Commerce, and was for a number of years attached to the head office.

EDWARD MAITLAND SHADBOLT died at his home in Toronto on July 24th. Mr. Shadbolt was 71 years old and had spent most of his life in the service of the Bank of Montreal. He entered the London, England, branch in the early seventies as a junior. In 1879 he came to Montreal office as teller and later became Assistant Inspector, afterward going as Assistant Manager to the Chicago branch. He was manager of Brantford office and later at St. John, New Brunswick, where he was also manager of the Royal Trust Company. He retired in 1914.

## THE MANITOBA LEADER

(From the Montreal "Gazette")

The United Farmers of Manitoba have selected Mr. John Bracken as the leader of their party and in the course of events he will be called on to form a government for the province. Mr. Bracken's career heretofore has been useful rather than spectacular. He, like many others who have risen to political prominence, was born on a farm; and he has won his place by farming. He holds the degree of Bachelor of Scientific Agriculture, which his case may help to bring to the public notice as evidence of attainments as well won and as promising of usefulness as any that involve the study of how to increase the value of Nature's gifts to man. His new position will call for the exercise of new qualities and of processes that neither college nor farm can teach. The premiership of Manitoba in the immediate future will be a man's job. The United Farmers of the province have practically for the present destroyed the older parties, Liberal and Conservative; but they have not won a clear majority of the seats in the Legislature. Mr. Bracken, when he forms his government, will be fortunate if he can count upon the support of one-half of the Legislature. He will be in a position but slightly better than that which Mr. Norris held in the lately dissolved assembly, and from the first may have to depend upon the support of independent members of other groups to carry his important proposals. He may in the connection do better than his predecessor. The election just held suggested that neither the Liberal nor the Conservative party has anything to hope from hastening another election. Their representatives, if not the independents and the Socialists, can afford to aid the Government in its wholesome policies; and they will probably do so. The new ministers, like their leader, are likely to be new men in politics, but this may not be so serious a drawback as might seem. The mess practised hands have made of Canada' financial and railway positions might reasonably suggest that new men may do better than the old.

### NATIONAL RAILWAYS DIRECTORS

To give the Dominion Government a free hand to appoint a Board of Directors for the entire sysetm of nationally owned railways, including the Grand Trunk, the present board, which has directed the Canadian Northern, the Grand Trunk Pacfic, the Transcontinental and the Intercolonial—known as the Canadian National Railways—resigned on July 20.

The board met at the National Railways offices in Toronto. Those present were: D. B. Hanna, president; Sir Hormisdas Laporte, Montreal; Major G. A. Bell, deputy Minister of Railways, Ottawa; E. R. Wood, Toronto; R. Riley, Winnipeg, and A. J. Mitchell, Toronto. Two other members of the board, Robert Hobson, Hamilton, and A. P. Barnhill, St. John, N.B., were not present. Mr. Hobson is in Europe, but cabled his resignation, and Mr. Barnhill wired his.

### GRAND TRUNK DIRECTORS

Another step was taken in the preparations for the reorganization of the board of management of the Government Railways when the Minister of Railways on July 21, received the resignation of most of the members of the board of management of the Grand Trunk. The resignations received were those of Sir Joseph Flavelle, chairman of the board; President H. G. Kelley, and A. J. Mitchell. E. L. Newcombe, K.C., deputy minister of justice, who is also a director, is overseas, and will probably send his resignation by cable. The resignations of J. N. Dupuis, Montreal, the fifth director, was announced on July 22 .

The resignation of the directors of the Grand Trunk, like those of the Canadian National directors, do not take effect immediately, it is stated. It is said to be quite possible that some members of the old board will be reappointed. In the meantime the present directors of both Grand Trunk and Canadian National carry on until their successors are appointed. The purpose of the resignations is to give the Minister of Railways a free hand in the selection of the new board.

# Synopsis of New Federal Stamp Taxes

### Come Into Effect On August 1—Apply to Banking Instruments, Receipts, Cables, Telegrams, and on Stock, Share and Bond Transfers—Table of Taxes on Cheques

Stamp taxes of the Dominion Government come under the new law starting on Tuesday, August 1. They apply on banking instruments, overdrafts, receipts, cables, telegrams, also stock, share and bond transfers. A synopsis of the latest enactment of the Government in this regard has been prepared by the Bank of Montreal, the taxes being set forth as below.

*Bank cheques.

Receipt for money paid by a bank chargeable against deposit.

Express money orders or traveller's cheques.

Postal money orders.

If the amount of money involved
(1) does not exceed $50 .... 2c
(2) exceeds $50, but does not exceed $5,000.00, for every $50 or fraction thereof .... 2c
(3) exceeds $5,000.00 ....... $2.00

*In connection with cheques, the Minister may make regulations under which there may be impressed on a cheque words indicating that stamps to the requisite value in respect thereof have been duly paid, together with such further regulation as may be necessary, and to provide that only persons licensed by the Minister shall be entitled to the benefit of such regulations.

*Bills of exchange.

†Promissory notes.

§Documents or writings in respect of an advance made or to be made by a bank.

§Bank overdrafts.

If the amount of money involved
(1) does not exceed $50 ..... 2c
(2) exceeds $50, for every $50 or fraction thereof ....... 2c

*In the case of Bills of Exchange involving sums of money in excess of $5,000 and when such bills are payable on demand or at sight or on presentation or within three days after date of sight, stamps to the value of $2.00 only will be required to be affixed.

†Promissory notes payable on demand and given to a bank for an advance by the bank, a stamp to the value of 2c. only is required whatever the amount of money for which the note is made. The banks will prepare quarterly statements showing the maximum amount of advances represented by such notes outstanding at close of business on any day during the period, and will affix thereto stamps to the value of 2c. for every $50.00 or fraction thereof by which the maximum amount of advances exceeds $50.00, which shall be payable by the person to whom the advance was made.

§Whenever a document or writing containing a promise to pay, or a pledge of securities to secure payment of an advance made by banks, and no promissory note or bill of exchange in respect of such advances is transferred or delivered to the bank, the bank will prepare quarterly statements showing the maximum amount of advances represented by such documents outstanding at close of business of any day during the period, and will affix thereto stamps to the value of 2c. for every $50.00 of such maximum advances, or fraction thereof. The foregoing regulations also apply to bank overdrafts, except that statements shall be prepared monthly instead of quarterly.

***The foregoing stamp taxes to become effective August 1, 1922.**

Stock, share and bond transfers:

For every $100 or fraction thereof of the par value of the stock, shares or bonds sold or transferred .............................. 3c

The first delivery by a corporation or company of such shares or debenture stock, in order to effect an issue, or the first issue of a bond or a sale or transfer of any bond between any recognized dealers or brokers, shall not be subject to this tax.

This tax becomes effective August 1st, 1922.

Receipts amounting to $10 or upwards ... 2c

Stamp shall be cancelled by the person by whom the receipt is given, by writing or impressing his name or initials across the stamp, together with the date.

Any person who refuses to give a duly stamped receipt, or who, upon a payment to the amount of $10 or upwards gives a receipt for a sum not amounting to $10 or separates or divides the amount paid with intent to evade the duty, shall be liable to a penalty not exceeding $100.

Exceptions. Stamp duties shall not apply in the following cases:

(a) A receipt is given for money deposited in the bank.

(b) A receipt or document in the nature of a receipt which is taxable under any other section of the Special War Revenue Act.

(c) An acknowledgment by a bank of the receipt of a bill of exchange or promissory note for the purpose of being presented for acceptance or payment.

(d) A receipt for or upon the payment of any money paid for any purpose for or out of the Consolidated Revenue Fund of Canada, or the General Revenue Fund of any province of Canada.

(e) A receipt endorsed or otherwise written upon or contained in any instrument liable to stamp duty and duly stamped acknowledging the receipt of the consideration money therein expressed.

"Receipt" shall mean any note, memorandum or writing whereby any money or any bill of exchange or promissory note for money amounting to $10 upwards is acknowledged or expressed to have been received, deposited or repaid, or whereby any debt or demand or any part of a debtor demand of the amount of $10 or upwards is acknowledged to have been settled, satisfied or discharged, or which signifies or imports any such acknowledgment, and whether the same is or is not signed with the name of any person.

This tax becomes effective January 1st, 1923.

Cables and telegrams:

Upon each despatch or message ........ 3c

This tax becomes effective August 1, 1922.

## FARMERS WIN IN MANITOBA

The standing of the five groups resulting from the Manitoba election on July 18, outside of Winnipeg, is as follows:

| | |
|---|---|
| Progressives | 26 |
| Labor | 1 |
| Independent | 6 |
| Liberals | 5 |
| Conservatives | 4 |

Under the proportional representation system which obtains in Winnipeg the ten city seats are expected to divide as follows:

| | |
|---|---|
| Liberals | 3 |
| Labor | 3 |
| Conservatives | 2 |
| Progressives | 1 |
| Independents | 1 |

A final summing up when the results in Winnipeg are announced and the returns from deferred elections are all in should be approximately as follows:

| | |
|---|---|
| Progressives | 30 |
| Labor | 4 |
| Independent | 7 |
| Liberals | 8 |
| Conservatives | 6 |
| Total | 55 |

## NEW TRUST BUSINESS IN JUNE

### Several Appointments as Registrar and Transfer Agents—Toronto General Gets Hedley Shaw Estate

The Royal Trust Co., was appointed trustee for the $6,000,000 bond issue of the Consolidated Mining & Smelting Co. of Canada, Ltd.

The Trusts & Guarantee Co., has been appointed trustee under a trust deed from the Northern Alberta Natural Gas Development Co., to secure an issue of bonds amounting to $4,000,000.

For the $2,500,000 bond issue of Stetson, Cutler & Co. Ltd., the Montreal Trust Co., was appointed trustee.

The Quebec Savings & Trustee is trustee for the $1,000,000 bond issue of the Transportation Building Co. Ltd.

The Montreal Trust Co., was appointed transfer agent for the $400,000 stock issue of Bird & Son, Ltd.

For the bond issue, amounting to $275,000, of Professional Offices, Ltd., the Chartered Trust & Executor Co., was appointed trustee.

The Trusts & Guarantee Co., were appointed trustee for the $150,000 bond issue of the Canada Flour Mills Co.

### Individual Estates

Probate of the will of Thomas C. Johnson, Halifax, has been granted to the Eastern Trust Co. The estate is valued at $65,000. The same company was also granted probate of the will of George A. Crathorne, Dartmounth, N. S., who left an estate of $50,000.

The Chartered Trust & Executor Co., was appointed administrator of the will of Frank Wilbee, Toronto, who left an estate of $32,000.

The Royal Trust Co., has been granted probate of the will of Ed. N. Bell of Montreal, who left an estate of $82,731.

The Western Trust Co., has been granted administration of the will of H. A. Lambert, Edmonton, whose estate is valued at $30,000. The same company was also granted administration of the estate, valued at $24,864, of Mr. Rogan. Regina.

Probate of the will of W. H. Stevens, Dartmouth, N. S., has been granted to the Eastern Trust Co. The estate is valued at $35,000.

Under the terms of the will of Hedley Shaw, Toronto, the Toronto General Trust Corp., was appointed administrator. The estate is valued at $1,117,981.

The London & Western Trusts Co., has been appointed administrator of the will of T. A. McMahen, who left an estate of $400,000.

Probate of the will of Matthew Stanley, Toronto, has been granted to the Toronto General Trusts Corp. The estate is valued at $10,577.

The Trusts & Guarantee Co., has been granted probate of the will of Joseph Pindler, Toronto, who left an estate of $53,005.

The Toronto General Trusts Corporation has been granted probate of the will of George T. Scheibe, of Toronto, amounting to $79,014.

The Canadian Guaranty Trust Company, Brandon, is trustee of the estate of W. F. Armstrong, of Minto, Man., amounting to $11,500; and of the Manitoba estate of E. W. Jones, of Hoylake, Cheshire, Eng., totalling £221,000, most of the assets being in England, however.

## PARKER MOTOR CAR CO.

The Parker Motor Car Company, who have this year been operating a plant for the construction of a high-class all-Canadian car at a price within the reach of the average buyer, are now working to capacity and have established show rooms in Phillips square, Montreal, in addition to their plant on Notre Dame street east.

## STAMP TAX

**In effect 1st August, 1922**

On cheques not exceeding $5,000 the tax is 2c. for each $50 or fraction thereof.

Example—to find the tax on a cheque for $2,866 follow the $2,000 line until the $900 column is reached—result tax $1.16.

Taxes on all chequess of $5,000 and over—$2.00

| Not exceeding | .00 | $50 | $100 | $150 | $200 | $250 | $300 | $350 | $400 | $450 | $500 | $550 | $600 | $650 | $700 | $750 | $800 | $850 | 900 | 950 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 000 | ... | .02 | .04 | .06 | .08 | .10 | .12 | .14 | .16 | .18 | .20 | .22 | .24 | .26 | .28 | .30 | .32 | .34 | .36 | .38 |
| 1000 | .40 | .42 | .44 | .46 | .48 | .50 | .52 | .54 | .56 | .58 | .60 | .62 | .64 | .66 | .68 | .70 | .72 | .74 | .76 | .78 |
| 2000 | .80 | .82 | .81 | .86 | .88 | .90 | .92 | .94 | .96 | .98 | 1.00 | 1.02 | 1.04 | 1.06 | 1.08 | 1.10 | 1.12 | 1.14 | 1.16 | 1.18 |
| 3000 | 1.20 | 1.22 | 1.24 | 1.26 | 1.28 | 1.30 | 1.32 | 1.34 | 1.36 | 1.38 | 1.40 | 1.42 | 1.44 | 1.46 | 1.48 | 1.50 | 1.52 | 1.54 | 1.56 | 1.58 |
| 4000 | 1.60 | 1.62 | 1.64 | 1.66 | 1.68 | 1.70 | 1.72 | 1.74 | 1.76 | 1.78 | 1.80 | 1.82 | 1.84 | 1.86 | 1.88 | 1.90 | 1.92 | 1.94 | 1.96 | 1.98 |

### NOTES AND DRAFTS

Notes and drafts not exceeding three days date or sight—tax is the same a son cheques (see above).

Notes and drafts of longer term than three days date or sight—tax is 2c. for each $50 or fraction thereof without limit. To calculate the tax use the above cheque scale if under $5,000—if over $5,000, calculate $2.00 for each $5,000, and use the cheque scale above for balance.

Example—on draft for $9.744, calculate tax $2.00 on $5,000 and tax per scale on $4,744—result $2.00 plus $1.90—$3.90

Promissory notes payable on demand if transferred to a Bank as security for an advance—tax 2c. only.

## CANADIAN BONDS LINGER BEHIND

### Have Not scored Advances Shown By Those of United Kingdom and United States

In their latest circular, Wood, Gundy and Co., Toronto, pointed out that the advances in Canadian bond prices has been comparatively small. They say:—

"Bond prices in Canada have not advanced as rapidly nor as substantially as in the United States and Great Britian. Since April, 1920, when the Bank of England reached its post-war maximum of 7%, and when money was considered to be abnormally tight, the comparison of advances in Canadian, English and United States 'gilt-edged" market is as follows:

| | |
|---|---|
| English prices | 15 points |
| United States prices | 19 points |
| Canadian prices | 3 to 5 points |

"The rise and fall of Bank of England rate, reflecting as it does a scarcity or abundance of money, has a significant bearing upon the prices of "gilt-edged" securities. In April, 1920, the Bank rate was 7%. Now, after eight reductions, it has for the first time reached its immediate pre-war level of 3%. Reductions on a large scale have also occurred in the Federal Reserve discount rate in the United States. These reductions in rates in the World's leading financial centres indicate a universal easing of money.

"Since April, 1920, the following changes have taken place in the prices of leading securities of the three markets under discussion.

"British War 5% Loan due 1929-47, the market leader, was then quoted at 85 3/16. Today it is at 100.

In 27 months, this loan has therefore advanced 15 points.

"In April, 1920, Canadian Provincial bonds in the United States were selling on a 7% basis as compared with a 5.30% basis today. In the case of 6% 20-year bonds, this represents a price increase from 89 to 108, or 19 points.

"In April, 1920, City of Toronto 20-year bonds were selling on a 6% basis, which in the case of 4% bonds, represented a price of 77. Today, such bonds are selling at 82, or a 5½% basis. Victory Loan Bonds of the 1934 maturity were selling at 97 in April, 1920, as compared with a price of about 100 today.

"Canadian Victory Loan bonds of the 1934 maturity have, therefore, in twenty-seven months, advanced but three points, while City of Toronto bonds of an average maturity have advanced only about five points. As already pointed out, these slight gains compare with advances of fifteen points and nineteen points respectively in the English and United States markets, in a corresponding period.

"The question naturally arises therefore 'what should be the future of bond prices in Canada?" Compared with markets in United States and England, the advance of bond prices in Canada has not been drastic. However, conditions in these markets usually reflected themselves in the Canadian market. Consideration of the facts outlined above suggests the feeling that notwithstanding daily fluctuations in price, investors who wish to place their money advantageously for a period of years will do well to take advantage of today's attractive interest rates."

## VANCOUVER STOCK EXCHANGE

At the annual meeting of the Vancouver Stock Exchange the election of officers resulted in the appointment of J. T. McGregor as president; G. S. Rothwell, vice-president; C. Polson, treasurer; and John A. Jukes, secretary. The new advisory committee will be composed of A. N. Wolverton, G. F. Hartley and W. H. Nansen.

In his annual report C. G. Pennock, the retiring president, stated that the year had been one of the most successful in the history of exchange, a total of 38,994,315 shares being dealt in as against 9,212,404 during the preceding year. This was the largest sales volume in the history of the exchange. He said that in its efforts to properly carry on the business of the exchange and to curb any illegal practices, forty-seven meetings of the committee of management had been held.

Mr. Pennock told of the precautionary measures adopted to safeguard the public and that trading in futures have been curtailed. He referred to the increase in mining activity and the possibility of locating oil in the Fraser Valley.

# *Bank Branch Notes*

The Bank of Montreal has decided to close the customhouse branch, London, and transfer the business to the city hall branch at the corner of Dundas and Wellington Streets.

The Bank of Montreal announces the following:—

H. D. Suckling, manager at Cherry & Villiers Sts., Toronto, appointed manager at Chatham, N.B. E. W. Jarvis manager at Chatham, N.B., appointed manager at Chatham, Ont. W. J. Smithers Pro manager at Killam, Alta., appointed acting manager at Davidson. R. Argo appointed acting manager at Ethelbert, Man. F. W. Warren manager at Rhein, Sask., appointed manager at Kinistino. P. H. Horton appointed acting manager at Mimico. W. R. Belcher manager at Royce Ave., Toronto, appointed manager at Niagara Falls. E. Stonbam manager at Douglas St., Victoria, appointed manager at Oak Bay. C. M. Roche manager at Maisonneuve, Montreal, appointed acting manager at Petite Cote. R. T. Baxter acting manager at Ethelbert, appointed acting manager at Rhein. H. C. Chapin appointed acting manager at Senlac. D. L. Wilson appointed acting manager at Tara. E. Garvie manager at Tara, appointed acting manager at Tilbury. C. M. W. Fothergill appointed acting manager at Tupperville. J. A. Favreau manager at St. James & Chamberlain Sts., Grand Mere, appointed manager at Vaudreuil.

S. B. Chamberlain, manager of the Bank of Toronto, Fort William, has been appointed an inspector, with headquarters in Winnipeg. L. D. Lindsay, formerly of Kitchener, Ont., has been appointed manager at Fort William.

The Royal Bank of Canada, now housed in the Smythe block, at he corner of Kent and Cambridge Streets, Galt, expect to move to a new building at the corner of William and Kent Streets.

D. M. Rae, manager of the Royal Bank at Sao Paulo, Brazil, who with his family is spending a furlough at his former home in Scotland, recently visited New York and Montreal. Previous to joining the Royal Bank in 1919, Mr. Rae was employed by the London & River Plate Bank, Ltd.

A. R. McInnis, accountant of the Royal Bank at Charlottetown, is being transferred to Cuba. J. W. L. McKay, accountant at Halifax, Buckingham St. branch, becomes accountant at Amherst. J. W. Bradshaw, accountant at Port of Spain, becomes temporary manager at Plymouth, Montserrat branch. G. H. Purdy, of the accountant's department, St. John, N.B., goes to Bridgetown branch.

## JUNE LIFE BUSINESS LOWER

### Falling Off in New Policies From A Year Ago—Death Payments Show an Increase However

New life insurance issued in June was below that of June last year, according to reports received by The Monetary Times from representative Canadian companies. June is generally regarded as a good month, but evidently conditions are not so favorable as they were a year ago. Six companies wrote a total of $17,980,027 against 18,237,877 last June. Two of them show increases. Death claims paid by these companies were higher totalling $387,422, against $350,135 for June 1921. Details are given below.

**New Business**

| | June 1921. | June 1922. |
|---|---|---|
| Company A. | $5,183,078 | $4,621,001 |
| Company D. | 3,147,915 | 3,422,798 |
| Company E. | 1,042,500 | 996,000 |
| Company F. | 817,278 | 1,002,020 |
| Company G. | 5,864,841 | 6,150,857 |
| Company H. | 2,182,265 | 1,787,351 |
| Totals | 350,135 | 387,422 |

**Death Claims Paid**

| | June 1921. | June 1922. |
|---|---|---|
| Company A. | $143,135 | $202,792 |
| Company D. | 21,814 | 29,215 |
| Company E. | 20,264 | 11,142 |
| Company F. | 14,300 | 3,347 |
| Company G. | 100,370 | 99,411 |
| Company H. | 50,252 | 41,515 |
| Totals | $18,237,877 | $17,980,027 |

## MONTREAL EXCHANGE COMMISSIONS

At a special general meeting of the Montreal Stock Exchange members on July 20, the long-mooted advertising by-law was adopted, and several changes were made in commission rates. The new ruling having to do with advertising by stock exchange houses is in the form of an amendment to by-law 19 by the addition of the following:

"That no member of the exchange and no firm represented thereon shall publish any advertisement unless either it is in a general form as outlined in Section No. 13, or it has been submitted to the governing committee and approved by them."

With regard to the interpreation of Section 13, the committee offers the following explanatory note:

"It is the opinion of the committee that at this time such advertisements as syndicate offerings of securities and circulars or a simple and direct offering of a particular security by a firm or individual, or ordinary business cards come within this general description. In order to expedite the work of the committee, all other proposed advertisements must be submitted in duplicate, one copy to be retained by the committee for its files and the other to be returned with their decision."

Chief among the changes in commission rates is the decision to charge 30 cents per share instead of 1-4 of one per cent. on the par value of stocks as hitherto has been the case. The new commission rates, it is understood, go into effect on August 1st.

The new schedule, which goes into effect August 1st, reads as follows:—

"On stocks with a par value of $100 selling at $5 and under, 6¼ cents per share, selling over $5 and under $10, 12½ cents per share. Thirty cents per share on all such stocks selling at $10 and over, and 30 cents on each $100 bond or debenture, excepting stocks which are selling at and over one hudred and twenty-five dollars ($125), in which case a minimum charge of ⅜ of one per cent. shall be made, and on all such stocks which are selling at and over two hundred dollars ($200), in which case a minimum charge of ½ of 1 per cent. shall be made, and excepting Dominion of Canada loans which may be dealt in for ⅛ of one per cent. commission. Stocks of no par value and stocks of less par value than $100 selling at $10 per share and over are subject to the same commission as shares of $100 par value. The minimum commission on transactions in stocks, bonds or debentures shall not be less than one dollar ($1), except upon stocks selling below $10 and upon orders in Dominion of Canada loans aggregating $400 par value when the minimum commission shall be fifty cents. Such minimum commission shall not apply to mining stocks, nor on partially completed orders."

The new commissions on mining shares are as follows:—

| | |
|---|---|
| Stocks selling under $1 | ½ of 1 cent |
| At $1 and under $2.50 | 1 cent |
| At $2.50 and under $4 | 2 cents |
| At $4 and under $5 | 4 cents |
| At $5 and under $6 | 5 cents |
| At $6 and under $7 | 6 cents |
| At $7 and under $8 | 7 cents |
| At $8 and under $9 | 8 cents |
| At $9 and under $10 | 9 cents |
| At $10 and under $50 | 12½ cents |

At $50 and upwards, ¼ of 1 per cent. on the amount of money involved.

## AMERICAN BANKERS VISIT MONTREAL

Twenty-one leading bankers and banking officials of the United States arrived in Montreal on July 23, these being members of the administrative committee of the American Bankers' Association.

They came on the invitation of the Canadian Bankers' Association which met to tranact business and to see something of the city, the port and surrounding country. The party represents all the large American banking centres in the eastern section of the United States.

## NEW TOWN PLANNED

A new town of about 1,500 population will be established between Elko and Waldo, B.C., in the Crow's Nest Pass country, if plans of a syndicate of Chicago newspapers for establishment of pulp mills on the Elko River materialize, according to C. D. MacNab of Waldo. An expenditure of about $3,500,000 is involved.

Our Bond Department

This Bank has a complete Bond Department always at the service of clients. Constantly in close touch with financial markets, this service is invaluable to anyone contemplating investment of large or small amounts.

We deal in strongly protected securities, such as Government and Municipal Bonds.

# Net Debt Shows Increase in June

### National Obligations Continue to Mount Still Higher—Expenditures Exceeded Revenue, But Summary for First Quarter of Fiscal Year Shows Surplus—Customs and Inland Revenue Higher

Total gross debt of the Dominion Government at the end of June stood at $3,006,890,023, a decrease of $22,000,000 from a year ago. Active assets, however, are $70,000,000 lower than what they were a year ago so that the net debt is nearly $50,000,000 more. Compared with the previous month, the net debt shows an increase of $6,794,136.

Revenue for the month totals $28,525,463, compared with $25,107,350 in June 1921. This increase appears to be due to the Customs revenue which is two and one-half million higher, and to Inland revenue which is over one million higher. On the other hand the business profits tax and the income tax together, account for a reduction of nearly two and a half million.

Against this substantial increase in revenue, there is a reduction of three million dollars in expenditure. While interest on the public debt is higher, substantial decreases are shown by the department of Soldiers' Civil Re-establishment and on accounts of pensions and soldiers' land settlement. "Other expenditure accouts' are nearly two million below what they were a year ago.

The first quarter of the fiscal year has now been completed and shows total revenue of over $110,000,000, a slight increase over the same quarter last year, while expenditure is $75,774,474 or about the same as last year. This makes a surplus of nearly $35,000,000 on account of the first quarter.

STATEMENT

Of the Public Debt and the Revenue and Expenditure of the Dominion of Canada, as by Returns furnished to the Finance Department to the night of the 30th June, 1921 and 1922.

## RE-INSTATEMENT OF POLICY-HOLDER

### Payment of Note After Assured's Death Did Not Continue Insurance

In the case of Young v. Northern Life Assurance Co. before the British Columbia Supreme Court, the facts were that Young was drowned on May 17, 1921, a policy of insurance having been taken out in February, 1919. The premium for the third year was payable on February 20, 1921. For this premium a note was given which fell due on May 13, 1921. The note was paid on May 19, 1921, by the widow, the beneficiary, and the company's agent gave her the usual official receipt. The Court found that the insured had died two days before, of which fact the agent had no knowledge. The policy contained the following clause: "Reinstatement: if within the first three years that this policy is in force, default be made in the payment of any premium due, or obligation given in settlement thereof, then this policy shall ipso facto, become void, but it may be reinstated within two years from the date of lapse, upon the production of evidence of insurability satisfactory to the company and the payment of all overdue premiums and any other indebtedness to the company under the policy, together with compound interest at the rate of 6 per cent. per annum."

### Not Re-instated

On the facts together with the clause in the policy the Court held that the giving of a note for the amount of premium due was "an obligation given in settlement" of the premium, but that payment of the note after the death of the assured of which the company had no notice, could not entitle the beneficiary to recover, it being impossible to produce evidence of insurability, a necessary condition to reinstatement under the policy.

## NEWFOUNDLAND TAX CASE

The Judicial Committee of the Privy Council has rendered a decision in the appeal of the Nova Scotia Steel Company against a finding of an arbitration in regard to taxes for which the company was liable. The company through their lawyer L. E. Emmerson, held that under act taxing their ore, they were not liable to any other taxes. An arbitration board was appointed, consisting of Sir William Lloyd, H. E. Knight and P. J. Summers, the finding being that the company was liable for the business profits tax. The decision was appealed to the Privy Council, with the result that the decision of the arbitrators was upheld.

## CANADIAN FAIRBANKS-MORSE

Thomas McMillian, Montreal, president Canadian Fairbanks-Morse Company, W. E. Miller, Chicago, vice-president, and K. N. Forbes, Winnipeg, manager of the branch of the company there, made an inspection of the Regina plant of the company recently.

Mr. McMillan stated definitely that the company would launch out for bigger business in Western Canada in the near future. Staffs in branches of the company in the three prairie provinces would be considerably increased to meet the needs of business, he stated.

Mr. McMillan declared it as his opinion that business conditions were decidedly on the up grade. "Businessmen everywhere are getting over the fright caused by depressed trade a few months ago," he said.

## LARDER LAKE REPORT

A report on the Larder Lake district, Ontario, by Dr. H. C. Cooke, has been published by the Geological Survey. This presents the results of a detailed study of the geology of McVittie and McGarry townships including the auriferous belt lying to the north of the lake. The report is accompanied by a geological map on a scale of 2 inches to 1 mile. Bound with the report on Larder lake is a report by Dr. Cooke on the Kenogami Lake and Round Lake areas. Maps of Holmes, Burt, Eby, Otto and Boston townships and of parts of Dunmore, Bompas, Grenfell, Flovelle, Gross, Blain, Marquis and Pacaud townships accompany the report. Copies of the report or of the separate maps may be had by applying to the Director, Geological Survey, Ottawa.

## Are You Master of Your Business

or is your business master of you?

Many business men have entrusted to this Corporation the care of their *personal* property, collection of interest, dividends, rents, investment of funds. Relieved of these duties, they have now more time to spend with their families and for necessary recreation. They have become in a real sense the masters and not the slaves of business life.

Can we furnish you with a similar service? It is fully described in our Booklet *"Your Financial Agent."* Send to-day for a copy.

**Kingston, Ont.**—July 9th. The building occupied by the Monarch Battery Co., Art Furniture Co. and Kingston Broom Co. was destroyed by fire. The loss was $16,000 and the fire was caused by defective wiring.

## CANADIAN CASUALTY UNDERWRITERS

Tariff casualty insurance in Canada has hitherto been controlled by a number of underwriters' associations, namely, the Western Casualty Underwriters' Association, the Guarantee Underwriters' Association, the Casualty Insurance Managers' Association, the Burglary Underwriters' Association of Canada, the Canadian Glass Underwriters' Association, the Eastern Casualty Underwriters' Association and the Province of Quebec Glass Underwriters' Association. These seven are now to be consolidated and merged into one association under the name Canadian Casualty Underwriters' Association. There are to be separate departments for each class of insurance, with committees to handle the ordinary business affairs, and offices at Toronto and Montreal.

The preliminary crganization meeting of the new association was held at Montreal June 26th, when twenty-nine companies were represented. At this meeting the following officers were elected:—President, W. T. Perry (Ocean); vice-president Toronto, E. Williams (Imperial G. and A.); vice-president Montreal, Alex. Hurry (Northern).

Department Chairmen and Vice-Chairmen:

Accident and Sickness: Chairman, Alex. McLean (London & Lancasrihe); vice-chairman, R. E. P. Patterson (Globe Indemnity).

Burglary: Chairman, R. Welch (Dominion Gresham); vice-chairman, C. A. Withers (Dominion of Canada Guarantee).

Plate Glass: Chairman, W. A. Gray (Yorkshire); vice-chairman, C. C. Paull (Norwich Union).

Guarantee: Chairman, W. H. Burgess (Canadian Surety); vice-chairman, R. J. Bond (Royal Indemnity).

Workmen's Compensation and Employers' Liability: Chairman, James Allan (Employers'); vice-chairman, H. C. Wright (London Guarantee).

Public liability: Chairman, F. J. Lightbourn (Maryland Casualty); vice-chairman, E. F. Hussey (Travelers' Indemnity).

In accordance with the conditions the Governing Council consists of the above officers.

# *Annual Reports*

## GENERAL FIRE INSURANCE CO. OF PARIS

In a statement covering operations for the year 1921, the General Assurance Company of Paris, France, shows net premiums of 68,121,785 francs, and 873,826 francs was realized from foreign exchange. After paying losses of 28,637,018 francs and expenses, commissions, re-insurance premiums, taxes, etc., there was an underwriting profit of 1,159,836 francs.

The assets of the company at the end of the year totalled 68,671,317 francs, an increase over the preceding year.

The company was founded in the same year as the Phoenix of Paris, 1819, and entered the Canadian field in 1912. Thomas F. Dobbin of Montreal is chief agent here. The Canadian business of the General in 1921 produced net premiums of $140,727 and losses of $96,669, or close to 78%.

## PHOENIX ASSURANCE CO. OF PARIS

Net premiums in 1921 of the Phoenix Assurance Co. of Paris, France, totalled 43,478,330 francs. In addition there were 18,538,858 francs of premiums reserved for risks on account of 1920. These, with other items of income, made a total of 74,024,050 francs. General expenses were 5,537,308 francs, and 12,372,842 francs were paid to re-insurers as premiums. Adjusted losses were 23,680,112 francs, and 4,797,490 francs were reserved for unadjusted losses. Commissions were 8,790,104 francs and 982,757 francs were written off the value of investments. The amount of premiums reserved for unexpired risks is now 17,192,331 francs, a decrease from the amount at the end of 1920. The result of operations is a balance of 671,104 francs remaining as underwriting profits.

These figures indicate the extent of the operations of this French company, which commenced business in 1819. In 1915 it entered the Canadian field, the chief agent for Canada being T. F. Bobbin, Montreal. Its premium income in this country has grown from $24,238 in 1915 to $176,455 in 1921. Losses last year were $112,116, so that operations here yielded a profit, though a high loss ratio was experienced.

# *Insurance Licenses and Agency Notes*

Louis Bouvier, who has been inspector for the Ggeat West Assurance Co. for the province of Quebec for some years has now received the appointment of manager for the province of Quebec for the Crown Life Insurance Co.

H. L. Kearns, has recently been appointed Inspector for Toronto for Shaw and Begg Agency, Ltd.

W. S. Penny has been appointed instructor of agents of the Sun Life (Toronto Branch).

R. G. Harvey has resigned the chief agency for Canada at Vancouver of the Fire Association of Philadelphia.

A. T. Walley, who severed his connection with the firm of Emory & Walley, a short time ago, has entered the insurance field, and has purchased from Hugh W. Robertson an interest in his insurance business. The new firm will be known as the Nelson Insurance Agencies, and will be located at Nelson, B.C.

The Cornhill Insurance Company, Limited, has been registered to transact, within the Province of Quebec, the business of fire insurance and insurance against damage to any kind of property caused by the explosion of natural or other gas.

The Home Insurance Company has been licensed to transact in the province of British Columbia the business of burglary insurance, property damage by rain or flood, and inland transportation inscrance, in addition to automobile, explosion, hail, sprinkler leakage, and tornado insurance for which it is already licensed.

The Imperial Underwriters Corporation of Canada has been licensed to transact the business of accident, automobile, guarantee and sickness insurance, in the province of British Columbia.

The Sun Insurance Office has been licensed to transact in British Columbia the business of accident, automobile, guarantee and sickness insurance.

The Boiler Inspection and Insurance Company of Canada has been granted a license authorizing it to transact in Canada the business of insurance against damage to property and liability for damage to the property or person of others caused by the breakdown of any Electrical Machinery, in addition to the class for which it is already licensed.

The Indemnity Insurance Company of North America, has been licensed to ransact the business of Accident, Automobile, Burglary, Plate Glass and Sickness insurance in Canada.

A license has been granted the Liverpool and London and Globe Insurance Company, Limited, authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

The Essex and Suffolk Equitable Insurance Society, Limited, has been granted a license authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the class for which it is already licensed.

A Dominion license has been issued to the Atlas Assurance Co. Ltd., authorizing it to transact in Canada the business of insurance against damage to property of any kind, caused by the explosion of natural or other gas, in addition to the class for which it is already licensed.

## FOREIGN LOANS

Greece it is understood is again meeting interest payments on the loan of seven and a half millions advanced by Canada in the form of credits in 1919. When the credits were first granted, interest payments were met regularly, but following government changes in Greece there was a lapse.

Rumania is still in default in interest payments on the loan of twenty millions, but there is hope that they will be met eventually. On March 21, 1922, Rumania owed to Canada in interest alone, the sum of $2,606,652.

## COBALT ORE SHIPMENTS

The following were the shipments of ore from Cobalt for the week ended July 14th:—Mining Corp., 173,897: La Rose Mine, 65,319: total, 242,216. The total since January 1st is 2,062,333 pounds.

# New Industries

C. W. Kirkpatrick, industrial commissioner of Hamilton, states that a small industry, that will manufacture fine crushed stone, has decided to locate in Hamilton. The new concern is operated by two former Hamiltonians, H. S. Johns and W. A. Wood, and will be known as the Johns & Wood Co. The crushed stone company will have its plant on Hilliard and Brant Streets on the G.T.R. right-of-way on the Beach line. The new company's product will be of particular interest to the building trades, as its stone will be imported from the north country, and the product is used particularly for stucco walls and granolithic floors.

The Dodds Canadian Iron Works, Limited, with a share capital of $250,000 and its head office in Welland, Ont., has been incorporated. An option has been obtained on a piece of land near the Metals Chemical for the erection of the plant. Building operations probably will not commence until next spring, although there is a possibility of their being under way this fall. Temporary quarters have been secured in the Morwood Building on North Main Street, where an office has been established and machinery for pattern and experimental work is being installed. Several lines of machinery will eventually be produced by the new incorporation, but its main output on the start will be flour milling machinery, manufactured under patents held by members of a family who are well known throughout the milling trade for the number of their inventions in that line.

Kingston, Ont., has closed an agreement with the Coco Cola company to open a branch of its manufacturing business there. Arrangements are being made for the rental of the old Cataraqui street school building on Rideau street, and the company wishes a sixty-day option for its purchase. The price set upon the building by the Board of Education was $6,500. The Coco Cola company's United States headquarters is at Atlanta, Georgia, and its Canadian head office is at Toronto. The company had a capitalization of twenty-five million dollars. It is asking no concessions from the city, merely wishing to get established through the civic industries committee. It has branches in various places in Canada, and Kingston is to be added to its points of manufacture. The company will employ from twelve to fifteen men at the start and gradually increase the number.

### RADIO HEATING SYSTEMS, LIMITED.

A Company under the name of "Systeme De Chauffage Radio, Ltd.," has been organized with head office at Montreal, with a view to developing a new heating invention which it is claimed has all the advantages of coal without its disadvantages. The invention is being patented in Canada, United States and 10 other countries.

The principal officers of the Company are Joseph Vigneault, inventor, president; Arthur Laforce, contractor, vice-president; and J. A. Coulombe, general manager.

The Company has an authorized capital of $250,000, made up of 25,000 8% preferred shares and 225,000 common shares both with a par value of $1.00. The address of the Company is 700 DeMontigny St. E., Montreal.

## GENERAL ELECTRIC EXPANDS

---

Effective August 1st next, the Canadian General Electric Company, Limited, of Toronto, will acquire all the interests in the Canadian Edison Appliance Company, Limited, of Stratford, and the latter company ceases to exist as a separate corporation. The Stratford factory will continue to manufacture all lines of electric household appliances, including ranges, and with the large selling organization of the Canadian General Electric behind it, it is expected that the output will be greatly increased. The Stratford plant will be known as the "Hotpoint" Division of the Canadian General Electric Co., Ltd.

The controlling interest in the Canadian Edison has been held by the Canadian General Electric Company since its inception, the present change merely being that the share held by the Edison Electric Company, of Chicago, has now been acquired, and the plant becomes an entirely Canadian concern.

# Wholesale Prices Still Decline

### Index Number for June Stands at 224.3, Compared With 226.1 for May—Most Commodities Show Stability, However, While a Few Advance

The index number of wholesale prices during the month of June, 1922, declined from 226.1 to 224.3, according to the index number compiled by the Department of Labor. This number is lower than for June, 1921, and June, 1920, but is higher than for the same month in 1913.

With the supply of fish becoming more plentiful each week the price of it is bound to come down, and this is shown in the index number which is down from 197.6 to 177.4. The supply of fruits and vegetables is also becoming more plentiful, and the index number of these commodities also shows a decrease from the preceding month.

Several commodities show a tendency to increase, which is most noticeable in textiles, hides and leather and fuel. Details of the June statement, with comparisons, are given herewith:—

**INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES**

**For June 1922, May 1922, June 1921, 1920 and 1913.**

(Average prices 1890-1899—100).

## PIG IRON PRODUCTION

### Six Months' Total Higher, But June Output Shows Increase

The production of pig iron during June showed an increase of 23 per cent over the output of the previous month, according to a report issued by the Dominion Bureau of Statistics. A tonnage of 28,763 was returned for the month under review, as compared with an output of 23,636 gross tons in May. The basic pig manufactured for the use of the reporting firms increased over the previous month's record by 8,449 tons. The malleable iron produced for sale also presented the substantial increase of 149.5 per cent. On the other hand, the production of ferro-alloys in blast furnaces decreased from 2,680 tons in May to 2,051 tons in June, involving a reduction of 23 per cent.

The pig iron and ferro-alloy production for the first six months of the present year presents a decline of 118,129 tons, or 31.9 per cent from the output of the corresponding period of 1921. At the end of June last year six furnaces were in blast, as compared with the four furnaces in operation at the close of June last. One furnace at Sydney was blown in during June.

### Prices of Pig Iron

It may be of interest in this connection to quote the price of basic pig iron as given by one of the steel companies. The rates were $24 per ton in April, $26 in May, and $27 in June. The Labor Department index of iron and steel wholesale prices, including eleven commodities, reached in April the lowest point since 1916. The index for the month was 182.5, as compared with an advance to 184.2 in May.

The increases in pig iron production in the United States, as reported in the "Iron Age," have been well maintained. The daily output during June increased by 4,292 tons over the record of the previous month and 15 additional furnaces were in blast. The June increase in Canadian production, when considered in connection with American conditions, may be taken as an omen of greater activity.

## KAMINISTIQUIA PULP

The Port Arthur Utilities Commission devoted a session on July 13 to a discussion of the future industrial expansion of a local industry, the Kaministiquia Pulp Mill, which was lately acquired by the Consolidated Waterpowers and Paper Co., of Wisconsin, and which has been in operation now for several weeks. Mr. Youngman, recently appointed manager of the plant and representing his company, together with A. J. McComber, legal adviser, appeared before the Commision and unfolded some of the plans the company has in view for enlargement. It was the desire of Mr. Youngman to secure from the Utilities Commission the promise that it would extend to the concern the co-operation necessary in respect to the supply of power and other utilities.

Mr. Youngman assured the Commission that it would be but a matter of a short time before enlargements at the Kam Mill would be undertaken which would make it one of the best equipped industries of its nature at the Head of the Lakes.

**TWO THOUSAND LIFE UNDERWRITERS TO MEET IN TORONTO**

This great gathering of life men from all points in Canada and the United States, to convene in August, will be representative of the Grand Army of Life Insurance Agents who have placed nearly Fifty Billions of Life Insurance protection over Canadian and American homes. Life Insurance is the most useful commodity in the world because it represents food, clothing, shelter and education for those who without it might be hungry, naked, homeless, or ignorant. The Mutual of Canada aims to distribute this great commodity at net cost of the consumer, being among Canadian companies the only one organized on a purely mutual co-operative basis. Mutual benefits actually paid, in the aggregate amount of $37,000,000. So that the mutual has had substantial share in the beneficent work of the Canadian life companies.

Assurances in Force $235,000,000.

## WOULD FINANCE LOCALLY

A possible new industry for Niagara Falls was outlined at a meeting of the Chamber of Commerce and Industrial Association in that city on July 17. Ald Wilkinson introduced Mr. Coltard, who described a new process for the making of high-class woolen goods. The new concern has a dominion charter under the name of the Elton Knitting Mills, Limited. Mr. Coltard pointed to the great market for the product in Canada and stated that two million dollars' worth are at present imported into Canada, much of which would be made here under the new process.

Mr. Elton, the inventor of the process explained the points of the new fabric, claiming that although wool, it would not irriate the most sensitive skins.

J. W. Charles asked about the possibility of stock-selling. It was explained that the capitalization is $300,000, a hundred thousand dollars of which would be sold of eight per cent. preferred with a forty per cent. bonus.

## WOULD FINANCE VANCOUVER DRY-DOCK

Taking the view that if the federal government persists in its attitude that it cannot see its way clear to grant assistance for the construction of a third drydock on the Pacific coast, the municipal and business interests of Greater Vancouver should get together and finance the project in some way as a joint municipal enterprise, Mayor C. E. Tisdall called a meeting of representatives of the various boards of trade, municipal councils, manufacturers' associations and leading business men to meet on July 18.

The plan proposed by Mayor Tisdall is for the placing of a joint municipal bond issue, similar, he pointed out, to the plan adopted in Seattle and Portland. "It is up to the port of Vancouver to provide the facilities we so badly need, whether we get the government to assist us or not," he said. "Dollars are going out of this port through the absence of a dry-dock and it is about time we made a definite move to meet the needs of shipping, if we are anxious to see the port develop."

## ABITIBI TRANSPORTATION COMPANY LIMITED

Announcement of the incorporation of a company to build a logging railway for the Abitibi Power and Paper Company, records the result of the settlement of the dispute between the latter concern and the Temiskaming and Northen Ontario Railway over franchise rights in the Iroquois Falls section. Objection was made by the T. and N. O. that the new company sought to carry general freight. The charter granted by the Government to the Abitibi Transportation and Navigation Company, Limited, contains a proviso, however, which confines the company's railway building activities to a line between Iroquois Falls, and Hughes, and states that the railroad in question is to be used only for logging purposes, and that all deliveries of freight must be made to the T. and N. O. lines.

The company has an authorized capitalization of two million dollars, and its provisional directors are G. H. Kilmer, H. H. Davis, J. R. Rumball, L. A. Landriau, and A. A. Lewis, all of Toronto.

## HARDWOOD SUPPLIES

The K. & S. Tire Rubber Goods, Ltd., Toronto, has disposed of its western factory to the Satin Finish Hardwood Flooring Co., Ltd., at a price understood to be between $40,000 and $45,000. The property is a one-story solid brick building with between three and four acres of land, and lies between Main street and the G.T.R. tracks, north of the subway. It was used by the vendors until about 18 months ago, when the company purchased a plant in Toronto. The purchasing company is a new company and will manufacture hardwood supplies.

# *Municipal Finance*

**Outremont, Que.**—A financial statement of the city and of the sinking fund commission as at October 31, 1921 has just been issued. Receipts for the year were $1,529,780, of which $509,319 was from the sale of bonds. Current taxes were higher than the preceding year. Disbursements for the year were $862,613. and $596,033, of notes were retired. There was a debit balance of $31,853, brought forward from the preceding year but there is now a credit balance of $39,279.

The city's balance sheet shows net assets of $4,002,710. The balance sheet shows that approximately $300,000 was expended upon capital during the year. This amount was for the greater part financed by the sale of bonds and the balance out of sinking and reserve funds investments.

During the year the city was successful in floating a bond issue of $750,000. The bonds were issued for a period of 10 years—from 1st. May 1921 at a rate of interest of 5½%, interest and principal payable in Canadian funds only. The sale by public tender yielded the price of 94.15 per 100.

An unspent balance of bonds issued, but not yet delivered, amounting to $250,000 is available for future financing. It is expected that this sum will be amply sufficient for the coming year.

On the 1st. November 1922 matures a bond issue by the city of $1,500,000, which will require to be financed by a refunding loan.

**Hamilton, Ont.** — The sum of $167,352 was deposited with the tax department by ratepayers on July 15, bringing the sum total of collections to date, $1,517,788. Total collections up to this date last year amounted to $1,437,920. It was pointed out by Mr. Kerr that there is still approximately one million dollars in taxes outstanding, but considerably more than the half payment on the sum total was made up to July 15. The various banks at which payments may be made have not as yet furnished returns, and the tax collector expects that from this source the revenue will be swelled at least $300,000.

The statement on local improvement collections is made out in a comparative form. In 1921 the levy on that account was $490,204, less $106,500 for tax sale lands, or $383,704. This year the levy was $403,150, less $96,000, or $307,150. The amount paid on the current year's levy up to June 30, 1921, was $257,498; in 1922, $206,657. The percentage paid last year was 67.11; this year, 67.28 on a considerably smaller sum. The percentage of the levy paid during the whole of last year was 75.1 or $288,154.

Only ten per cent of the arrears to January 1, 1922, have been paid so far, that is to say, up to June 30. In 1921 the percentage was 15. The arrears outstanding at the commencement of last year amounted to $349,769, and $51,846 was paid. At the beginning of this year the arrears were $277,386, but so far only $27,036 has been paid.

Another statement given out shows details of arrears of taxes and current levy on general revenue account. The general tax arrears up to December 31, 1921, for 1920 and 1921, were $390,849 less the amount paid on account during the first six months of this year, $53,383, leaving total arrears at $337,460. The balance of the capital sum of the consolidated arrears is now $948,393, of which the sinking fund proportion is put down as $284,518, leaving a net total of $663,875. The amount so far paid on account from January 1 to June 30 this year is $24,628.

The levy for the current year (32.06 mills on land and on one-third of the improvements as assessed) is $1,484,235. Service taxes will add to the amount payable to the city to the extent of $104,337, according to present estimates. When the sinking fund proportion is subtracted, $175,268, the net amount estimated as available as the city's levy for this year will be $1,413,303, a sum further reduced by $140,938, the amount paid in advance on current taxes to June 30. Tax arrears, consolidated arrears and levy make the grand total of $2,249,071 as the city's tax assets.

**Oak Bay, B.C.**—Oak Bay, up to July 1, had collected a greater percentage of its current taxes than it did during the same period in 1921. At the beginning of this month the usual 5 per cent penalty was added to unpaid 1922 taxes. The amount of taxes levied for in 1921 was $211,209, and of this $175,151, or 82.9 per cent was received by July 1. The amount of taxes levied for in 1922 was $196,210, and of this, $165,026, or 84.1 per cent was collected by July 1. Last year on January 1 there was $52,025 outstanding in arrears and delinquent taxes, and of this, 25.1 per cent was collected by July 1. At the beginning of this year $42,667 was outstanding in arrears and delinquent taxes, and at the beginning of this month 25.9 per cent had been received.

**Calgary, Alta.** — Additional license fees are being imposed on branches of business in Calgary for the purpose of creating revenue for the city. These new taxes were endorsed by the city council and they are now due so that the amendment to the by-law enforcing the licenses has been completed and the license department is starting to check up. The new fees include:—Auctioneers, $10; master bakers, $5; beauty specialists, $10; bath house operator, $15; transient canvassers, $25; local canvassers, $10; cleaners and dyers, $10; spongers and pressers, $5; messenger services, $25; real estate agents, $25; rooming houses, $5; transient contractors, $100.

**Calgary, Alta.**—Up to June 30 tax collections for 1922, including both arrears and current taxes were about $172,000 less for 1922 than for 1921, according to figures in the office of the city treasurer. The records show that up to June 30 the total tax collections for 1922 were $2,619,977. For the same period of 1921 the total collections were $2,792,000, or $172,023 more last year than this. Since June 30 of this year further tax payments made bring the total tax collections for 1922 to date up to $2,678,000, of which $216,995 was arrears of taxes, and $2,461,005 current taxes.

**Victoria, B. C.**—Collection of the current year's local improvement charges up till June 30 was slightly better than last year, but collection during the same period of arrears accumulated to January 1 was considerably less, according to a statement made public by city treasurer Edwin C. Smith. It was also announced that the city has so far received $181,663 under the early tax payment plan whereby depositors are drawing interest on their money, and that 799 separate receipts. Treasury officials state that the Reverted Lands Committee's plan for selling back property to former owners and extending the time for payment of arrears has met with practically no response. Only about a dozen applications for relief on that basis have so far been received, it being stated that the burlen of unpaid taxes on most of the property is too great to induce resumption of ownership.

**Moncton, N. B.**—Tax payments at city office are considerably in advance of last year's payments of corresponding date.

Below is a comparison of last year's receipts and those of this year including July 17:

| | |
|---|---|
| 1921:— | |
| To July 15th incl. .... | $ 83,965 |
| July 16 .............. | 17,650 |
| July 18 .............. | 45,543 |
| July 19 .............. | 56,623 |
| July 20 .............. | 116,600 |
| 1922:— | |
| To July 15th incl. ...... | $ 87,569 |
| July 17 .............. | 24,987 |

**Toronto**—A gross surplus of $645,519 for the year 1921 is shown in the annual report of the local Hydro-electric system. After setting aside $431,166 for depreciation, the net surplus is $214,353, which is available for rate reduction. The total earnings were $3,588,118, and the expenditures were $2,942,598. Assets are given as $13,112,842, and liabilities, including debenture debt, $10,737,923. Reserves are $4,167,272.

The number of domestic consmers is now 67,019, using 38,662,078 k.w.h. per year. Commercial consumers number 12,401, using 24,954,872 k.w.h. Power consumers number 2,488, with an average monthly load of 58,880 horsepower.

**Hamilton, Ont.**—Hamilton's net debt at the end of 1921 was $12,320,421, this being an increase over the previous year of approximately one million dollars, it was shown in a report furnished by W. H. Davis, city treasurer, on July 14. The city's gross debt at that period was $15,646,549, but a sinking fund of $3,326,218, lessened this total accordingly. The slight growth in population over the previous year, amounting to approximately 2,000, was accountable for the big increase in municipal deficit over 1921, according to the treasurer.

---

## REBUILDING LAKEFIELD MILL.

The Canada Cement Company is proceeding with the reconstruction of its mill at Lakefield, Ontario. The alterations are extensive and when they are completed the company will have practically a new mill with a capacity of more than double the old plant.

---

## MUST PAY OTTAWA TAXES

### Civil Servants Come Under Income Tax Levied By City, Judge Rules

Civil servants at Ottawa have to pay their income taxes for the year 1920 and nine of them against whom the city recently took action in the first division court have to make their payments within the next fifteen days. Such is the effec of a judgment delivered by Judge Colin G. O'Brien, who on June 22nd heard the case of the city of Ottawa against W. S. Edwards and eight other civil servants, who believed they were not liable for taxation and who disputed the city's rights to collect.

### Previous Decision

At the opening of his judgment his honor says: "I think there can be no doubt but that I am bound by the decision of the Appellate division in the Nantel case, where all the facts now presented were before the court."

The action on which the decision was given today was brought largely on the ground that some facts affecting the status of civil servants as to liability for income were not brought out in the Nantel case. Judge O'Brien finds they were.

His honor calls attention to the Nantel case having been based on a ten-year period of exemption contained in an agreement between the city and the federal government, dated July 1st, 1909. R. V. Sinclair, counsel for the defendant civil servants, argued at the time of trial that the city in making the agreement with the government had put itself apart from the provisions of certain acts.

### New Agreement

The latest agreement with the government was made on March 30, 1920, and cancelled all other orders and agreements regarding exemption of civil servants from taxation.

In 1909 the city entered into a ten-year agreement whereby exemption from income taxation was agreed upon. It was contended that the city could not assess in 1919 for 1920 taxes. The judge finds that the civil servants really enjoyed six months more exemption from taxation than was intended by the agreement and that exemption under the 1909 agreement ceased on July 1st, 1919.

Another reason for holding the civil servants liable was that the Ontario statutes would over-ride any different agreements made prior to their enactment, if any such agreements for exemption had in fact been made.

In conclusion the judgment says that without confirmation by the Ontario legislature, the exemption clause of the agreement, however it might be interpreted, was ultra vires of the city council and could not be enforced. His honor then directs the nine defendants to pay the cost of the action and their income taxes within fifteen days.

---

## TRADE WITH MEXICO

The Canadian Government will shortly appoint a Trade Commissioner and an Assistant Trade Commissioner to report upon and investigate openings for Canadian trade in Mexico. The Order-in-Council containing the authority for the appointments says: "Mexico offers a field for organizing and extending healthy trade relations between that Republic and Canada."

Increasing Your Income 33%

Investors who carefully examine their securities at the present time will find it to their profit to sell short-term Victory Bonds and other issues that are nearing maturity, and to reinvest the proceeds in long-term Government, Municipal and Corporation Bonds.

In many cases the income return can be increased by as much as 33%.

We would appreciate an opportunity to discuss this with you.

## LONDON HYDRO HAS SURPLUS

### Paid Expenses and Applied $58,898 to Plant Renewal Reserve

Some official figures relating to the Hydro-Electric business of London, Ont., and four local systems served from London, were issued on July 19 by the provincial commission.

Pre-Hydro service in London cost nine cents per kilowatt hour, with a meter charge of 25 cents per month. The first rate-schedule put in force by the Hydro-electric power commission of Ontario gave an average price to London of 4.5 cents for domestic lighting, and three cents for commercial. That rate remained until 1915, when it was reduced to 3.3 cents for domestic lighting. From that time there were reductions to consumers every year. In 1921 the rate for domestic lighting averaged 1.9 cents per kilowatt hour; for commercial lighting, 1.5. The industrial energy has fluctuated according to the demand from $20 to $25. The price charged by the provincial commission for delivered energy has dropped in ten years from $28 to $20, mainly because the load has increased from 2,100 h.p. to 12,365 h.p. The increased cost of generating at Niagara has not been reflected in either the delivery rate or the rates to consumers.

### Revenue and Expenses

The operating report for 1921 showed revenue of $589,889. Ordinary expenditures were $530,484, and $58,898 was applied to plant renewal reserve, leaving a net surplus of $506. The balance sheet taken on December 31st, last, showed assets of $2,071,186. The liabilities were $1,087,906, 52% of the assets. The reserves and surplus funds taken together are $983,280. Had there been no rate reductions in London from year to year the accumulated surplus would exceed the outstanding obligations. London has a population of about 60,000.

Similar reports are issued in respect of Strathroy, Ailsa Craig, Lucan and Exeter.

## BRITISH AMERICAN OIL

"Thanks to Our Consumers" is the title of a pamphlet recently issued by the British American Oil Co. Limited. It contains 22 pages and is devoted to a historical sketch of the development of the company since its founding in 1906 to the present day. Numerous illustrations add to the interest of the pamphlet.

## MUNICIPAL TREASURER SENTENCED

G. Robert, ex-secretary treasurer of the municipality of St. Georges de Windsor, Quebec, pleaded guilty on July 15 before Judge Lemay in the Magistrate's Court to a charge of misappropriation of the municipality's funds, amounting to about $3,000. He was sentenced to one month in jail. The court held that there were extenuating circumstances which called for a moderate sentence. It was claimed that the accused was formerly a well-respected and well-to-do citizen in the municipality where he carried on a personal business. He allowed his business accounts to become mixed up with the municipal accounts. He subsequently failed and the municipal funds went the same way as his personal savings.

# *Government and Municipal Bonds*

Municipalities are not planning much financing for the next few months, owing to the coming federal issue. The Toronto Finance Commission on July 20 advised the board of control to postpone approval of a $1,000,000 local improvement issue on this account, at the same time expressing the opinion that conditions would be favorable to borrowing next year. E. R. Bowser, assistant city treasurer of Hamilton, also referred to this matter in a statement a few days ago. "There is no doub that municipalities will experience some difficulty in disposing of city debentures in the fall or spring, should the government loan be floated in Canada," he pointed out. "It is impossible to state, however, whether this will be done or not, because it cannot be judged if there is a sufficient surplus of funds for investment purposes available in the Dominion at present to justify floating the loan here."

In the event of the government disposing of the loan on the New York market, which action will be taken if financial conditions in Canada are not favorable in December, municipalities will have no cause for worry respecting the sale of city debentures, he maintained. The extra one-half per cent. interest yielded by local bonds would prove a sufficient inducement for investors to patronize civic debentures.

Of the issue of $229,000 in city of Hamilton 5½ per cent. debentures which are being sold over the counter, but $85,000 remains to be disposed of.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues of The Monetary Times:—

| Borrower | Amount | Tenders close |
|---|---|---|
| North Bay, Ont. | $47,000 | August 1 |
| Nova Scotia | 2,000,000 | July 26 |
| Vancouver, B.C. | 600,000 | August 1 |
| Toronto Twp., Ont. | 40,000 | August 4 |
| Drummondville, Que. | 100,000 | August 1 |
| Peel County, Ont. | 80,000 | Sept. 1 |
| Cochrane, Ont. | 75,000 | July 31 |
| Mountain Twp., Ont. | 32,518 | August 1 |
| Saltfleet Twp., Ont. | 35,000 | July 31 |

**Cochrane, Ont.**—Tenders are invited up to and including July 31 for $75,000. Housing bonds, with interest at 6 per cent., repayable in 20 years. W. R. Warrell, town clerk.

**Saltfleet Twp., Ont.**—Tenders are asked up to noon of July 31 for the following issues:—$17,000, 25 years, equal annual instalments; $13,000, 20 years, equal annual instalments; $5,000, 20 years, equal annual instalments; The interest rate is 5½ per cent., and interest is payable at the Royal Bank, Stoney Creek. Erland Lee, treasurer, Stoney Creek, Ont.

**Mountain Twp., Ont.**—Tenders are invited up to August 1, for $32,518 6 per cent. 20 instalment bonds. S. Fetterly, treasurer, Consolidated School Board, Hallville, Ont.

**Newmarket, Ont.**—Tenders are invited up to August 7 for $44,000 6 per cent. 25 year sewer debentures, and for $16,000 6 per cent. 25 year waterworks debentures. See advertisement elsewhere in this issue.

### Coming Issues

**Ford City, Ont.**—The town will issue $11,790, 6 per cent., 10-year debentures in order to meet the expenditure of opening a new street.

**Yorkton, Sask.**—The ratepayers passed two by-laws, one for $24,500 for electric light purposes and the other for $3,900 for reservoir.

**Guelph, Ont.**—J. Orr Rose, city treasurer, informs the Monetary Times that the two debenture by-laws passed by the city council, one for $36,475 and the other for $17,920, referred to in these columns on June 30, that the debentures will be deposited in the city's sinking fund.

**Hull, Que.**—At a meeting of the council on July 10 the council passed a by-law for the issuing of $147,000 debentures to pay off a 5-year debentures debt maturing on November 1, 1922.

**Midland, Ont.**—A by-law to provide $35,000 for additions to school was defeated by the ratepayers.

**New Toronto Ont.**—The town will raise $21,000 by issuing debentures for 20 years at 5½ per cent. to cover New Toronto's share in the cost of moving the radial tracks along the lake shore road. This work was completed three years ago and this is the first money by-law to be passed regarding it.

**Kamloops, B. C.**—Tenders received for the city's $32,500 6 per cent. 20-year sinking fund debentures were not satisfactory, and the sale was deferred.

**Stamford Twp., Ont.**—At a meeting of the council on July 11 they passed a by-law to borrow $60,000 for additions to schools.

**Barton Twp., Ont.**—Ratepayers on July 14 authorized the issue of $120,000 debentures for school section No. 3.

**York Township, Ont.**—Debentures to the amount of $60,000 were authorized on July 17 by the York township council for S.S. No. 26 for the completion of a 24-roomed school. The council also passed the total sum of $280,493.77 for local improvements.

**Brampton, Ont.**—The by-law granting $25,000 bonus to the Baby Carriage company, with other concessions was passed on July 17, by a majority of 204 of a total of 324 votes polled in the four wards.

**Galt, Ont.**—On June 19 the council passed a by-law for the issuing of $100,000 debentures for the erection of a school.

### Bond Sales

....**Moncton N. B.**—Six tenders were received for the $85,000 5½ per cent. 15-year school bonds, sold to H. M. Wood. They were as follows:

| | |
|---|---|
| Eastern Securities Co. | 99.2⅞ |
| Royal Securities | 97.51 |
| Colonial Securities | 98.62 |
| Johnston & Ward, Thomas, Armstrong & Babbitt | 99.48 |
| J. M. Robinson & Sons | 99.216 |
| H. M. Wood | 99.77 |

**British Columbia.**—The tenders for the province's $2,000,000 5 per cent. issue dated July 15, 1922, were for two year, three year, or twenty year maturities. The complete list of tenders was as follows:—

| | 2 yrs. | 3 yrs. | 20 yrs. |
|---|---|---|---|
| Miller & Co., New York, Brandon, Gordon & Waddell, N. Y. | 99..14 | 98..29 | 93.18 |
| Dominion Sec. Corp., Tor. | 99..118 | 97..98 | 92..886 |
| Ferris & Hardgrove, Spokane, Miller & Co., N. Y., Cyrus Peirce & Co., San Francisco, Wells-Dickey, Minneapolis, A. Jarvis & Co., Toronto, Continental & Commercial Bank, Chicago | 98..41 | 97.61 | 92.31 |
| Wood, Gundy & Co., Toronto, Guaranty Company of N. Y., Blyth, Witter & Co., Seattle, Ladd & Tilton Bank, Portland, Ore. | 99..116 | 98..349 | 93..31 |

| Seattle Nat. Bank, Seattle | 98..565 | 97..758 | ........ |

Bonds sold to Miller & Company, two-year maturity.

**Trenton, N. S.**—An issue of $11,000, 5½ per cent. bonds, due May 1, 1932, interest and principal unconditionally guaranteed by the province, has been sold to Eastern Securities Company.

**North Sydney, N. S.**—An issue of $20,000, 6 per cent. bonds, dated August 1, 1922, and due August 1, 1942 has been sold to Eastern Securities Company.

**Bathurst Township, Ont.**—The sale is reported of $4,000, 6 per cent. 10-instalment debentures to Tom Farmer, of Perth, Ont.

**Victoria, B.C.**—The sale is reported of $210,000, 5½ per cent. 30-instalment bonds to Pemberton and Son and the British America Bond Corporation, at 97.25 and interest.

**Ontario.**—The province has sold $5,000,000, 6 per cent., 6 months' notes to Aemilius Jarvis & Co., Toronto. The issue was made to refund a similar amount of treasury bills maturing on July 15.

**New Glasgow, N.S.**—The following tenders were received for the towns' issue of $34,000, 5½ per cent., 10-year bonds, that of the Eastern Securities being accepted:—

J. C. Mackintosh & Co., 98.14.

Eastern Securities 99.03.

Johnston & Ward, 99.22 for 1500, balance on option for 15 days.

**Collingwood, Ont.**—An issue of $37,350 ½ per cent., 20-year debentures of the town was awarded on July 22 to R. C. Matthews & Co., Ltd. The price paid was 97.60, which is equivalent to a basis of 5.78 per cent. Other bids included W. L. McKinnon & Co., 97.54; Wood, Gundy & Co., 97.43; C. H. Burgess & Co., 95.75; Aemilius Jarvis & Co., 95.33.

G. Blenkhorn, 2,000 at par.

**Dutton, Ont.**—The Molsons' Bank has purchased the issue of $18,000 town hall debentures, at $100 premium. The following were other tenders received:—

| | |
|---|---|
| Graham, Clark & Co. | 98.79 |
| Dominion Securities | 99.031 |
| Municipal Banks Corporation | 98.52 |
| C. H. Burgess Co. | 97. |
| R. C. Matthews & Co. | 98.25 |

The Molsons Bank bought the issue at $100 premium.

**Harwick Twp., Ont.**—An issue of $28,642 6 per cent. debentures payable in 10 equal annual instalments has been sold by tender to Harris, Forbes and Co., Toronto, at 101.27.

**Bridgeburg, Ont.** — Sixty thousand dollars' worth of local improvement debenture bonds were sold by Bridgeburg Council to Gardiner, Clarke & Company, Toronto, for 99.7. The bonds are for a term of 20 years.

**Niagara Falls, Ont.**—The bid of McLeod, Young, Weir & Co. for a block of debentures to the amount of $256,932.36, was accepted at a price of $243,109.40, or a general rate of 94.62. There were eight tenders, ranging from the successful bid to $239,647. The issue is as follows: $11,000 six per cent. ten years, $40,000 six per cent. five years, $100,000 five and one-half thirty years, $117,735.36 five and one-half per cent. twenty years.

**Grimsby, Ont.**—The town on July 25 awarded bonds to the amount of $15,000 to W. L. McKinnon & Co. The bonds bear interest at 6 per cent. repayable in 15 equal annual instalments principal and interest. The price paid was 99.54 and interest, and at this price the bonds will cost the municipality about 6.06 per cent. Other bids included: Dominion Securities, 99.03; & Co., 98.85; McLeod, Young, Weir & Co., 98.15; Weir & Co., 98.15; Aemilius Jarvis & Co., 98.03; C. H. Burgess & Co., 98.

**St. John, N.B.**—The tender of 100.781 per cent. made by the Eastern Securities Company, Limited, for an issue of bonds amounting to $235,000 by the St. John School Board, was accepted on July 25, at a special meeting of the Finance Committee of the board. The tender of the Eastern Securities was the highest of the five tenders received, and made a record for tenders for school bonds in recent years. The other tenders were as follows: Wood, Gundy & Co., Toronto, 96.68; J. M. Robinson & Sons, St. John, 100.55; Thomas, Armstrong, Bell, Ltd., 99.11; Royal Securities Corporation Ltd., St. John, 99.06.

Of the $235,000 issued, $200,000 is for a new school. The issue is for 25 years at 5½ per cent.

**Port Hope, Ont.**—An issue of $21,000, 10-year 6 per cent. bonds of the town of Port Hope was sold on July 25 to W. C. Brent & Co. at a price of 100.27. Other bids were: Harris, Forbes & Co., 99.83; MacNeill, Graham & Co. 99.57; Housser, Wood & Co., 99.42; McLeod, Young, Weir & Co., 99.37; R. C. Matthews & Co., 99.35; Wood, Gundy & Co., 98.85; McLeod, Young, poration, 98.12.

**Wetaskiwin, Alta.**—Two issues, $8,000 20-year 7 per cent. electric debentures, and $3,000 20-year 7 per cent. waterworks debentures, both payable in equal annual instalments, have been sold to the Northern Investment Company, Edmonton. The following were the bids received:—

| | |
|---|---|
| A. F. Berstein & Co., Seattle | 84.09 |
| O. C. Arnott Co. Ltd., Calgary | 91.40 |
| Northern Investment Co. Ltd., Edmonton | 95.23 |
| W. Ross Alger Corp., Ltd., Edmonton | 95.00 |
| Fred Glennes Co., Portland, Ore. | 90.50 |
| Niblock & Tull Ltd., Calgary | 92⅝ |

**York Township, Ont.**—An issue of bonds was on July 18 awarded to Aemilius Jarvis & Co The issue was for a total of $306,000 bearing 6 per cent., and at the price of 100.06 obtained, will cost the township 5.99 per cent. The bonds run as follows: $230,080 for ten years, $42,000 for 30 years, $21,000 for 25 years and $13,000 for 20 years. It is understood that a large proportion of the total issue was taken up shortly after the award was made. Bids were as follows: Aemilius Jarvis & Co., 100.0604; National City Co., 99.857; R. C. Matthews & Co. and U. F.O., 99.65; C. H. Burgess & Co., 99.37; Housser, Wood & Co., 99 27.

## NEW NIAGARA BRIDGE

The Niagara River Bridge Company has been granted authority by the Privy Council to construct a bridge across the Niagara River, just below the Falls, to replace the old cantilever bridge built in 1882, over which the Michigan Central Railroad now operates. As the structure will be international the authority is only so far as the jurisdiction of the Dominion of Canada extends.

## SHARE IN LIQUOR PROFITS

### Municipalities Share in British Columbia's Successful Business Venture

British Columbia municipalities are to share in the profits of the provincial liquor board, and the minister of finance issued a statement on July 13 showing how the distribution to date would work out. The statement issued by the minister shows that profits for the period ending March 31 last aggregated $1,772,971, being made up of profits for the period June 15, 1921, to Sept. 30, 1921, of $541,606, and for the period from Sept. 30, 1921 to March 31 last, of $1,231,365. The total amount allotted to the reserve fund in that period has been $172,929. In September last $200,000 was distributed and with this sum the total now has reached $800,021.

The full statement showing the amounts received by the sixty-two municipalities among which the distribution has been made is as follows:

| | Population | Amount Now Due |
|---|---|---|
| Alberni | 700 | $ 1,118 |
| Armstrong | 983 | 1,277 |
| Chilliwack | 1,767 | 2,653 |

## LIME CRUSHING PLANT

New Glasgow, N.S., may have a limo crushing and fertilizer plant, with a capital of about $40,000. D. P. Brown is organizing the project. The site practically decided on and most favored is the land on the east side of the river immediately adjoining the Riverbank Manufacturing Co. and owned by that firm. It is proposed at first to use a building at present on the property and now vacant. The scheme is a large one embracing a diversity of products. Rock would be shipped from either Bridgeville or Lorne to New Glasgow and there crushed. It is also proposed to secure slag and put it through a process for the production of fertilizer. Many other by-products are planned.

**Advice That Was Good!**

A year ago, with plenty of emphasis, we urged investors to buy Government and Municipal bonds while prices were low and interest rates high.

Those who acted upon this advice have seen their bonds advance from, say 5 to 10 points.

Yet, even now, the advice to buy bonds is excellent. Interest rates are still high and everything points to a further increase in principal value and a decline in interest yields.

The wise investor is investing his cash balance now and is also selling his short term bonds to buy long term securities at present prices.

Write for a good list of long term bonds and let us advise you again.

# *Stock Markets*

Total sales of stock on the Montreal and Toronto Exchanges for the week ended July 19, were considerably less than for the preceding week while bond trade was also lighter. The last two days, however, brought considerable activity on the Montreal Exchange, over 10,000 shares being traded in on the 19th.

The week commencing July 20 opened with a showing of strength on the Montreal market. Montreal Power leading in activity with no change in price, while Asbestos preferred advanced 7 points. The Toronto Exchange continued inactive with Toronto Railway in the lead.

Friday's trading in Montreal showed a decrease with Detroit Railway and Quebec Railway leading in activity; Dominion Bridge however, scored the greatest advance. Brazilian was the most active stock in Toronto but trading continued light. Both exchanges were closed Saturday.

On Monday the Montreal Exchange was quiet with prices weakening. Detroit Railways, Mackay and Brompton were the leaders in point of activity. The Toronto market was also dull.

### McArthur, Irwin, Limited

Offering is being made by the Sterling Bond Corporation, Limited, Montreal, of $225,000, 7%, first mortgage sinking fund gold bonds of McArthur, Irwin, Limited. The company was incorporated in 1912, succeeding McArthur, Corneil & Company, established in 1842, and carries on manufacturing and distributing of paints, dyes, white lead and allied products. Sales for the past six years have averaged $5,590,122 per annum. The fixed assets of the company have been valued at $450,000 and net current assets are valued at $301,985.

The purpose of the bond issue is to refund bank indebtedness, to pay off real estate mortgage and to increase working capital. The bonds are offered at 97.25 to yield over 4½ %.

### To List Sea Sled

Sea Sled Co., Limited, Montreal, has completed its financing through the sale of the balance of the stock to a London financial house. Application to list the stock on Montreal Exchange will be made.

### Textile Company Shares

Offering is being made of $175,000 of 8 per cent. preference shares of the Wear-Rite Textile Company. The company has been organized to erect a cloth factory in Toronto. The directors are H. Edmundson, a Yorkshire textile manufacturer, who is president of the new company and J. H. Hoare, T. H. Barton, and A. Jones of Toronto and C. W. Pitt of Collingwood.

The authorized capitalization is $175,000 of preferred and $200,000 of common and the stock is being offered by the British Industrial Corporation of Toronto on the basis of par or the preferred with a bonus of 40 per cent. of common stock.

### Brunette Sawmills, Ltd.

A bond issue of $150,000 recently placed on the market by the Brunette Sawmills, Ltd., has now been withdrawn, as the property has changed hands.

### Goldale Mines, Ltd.

Shares in Goldale Mines, Ltd., which owns fifty mining claims in the Porcupine area, are now being offered for sale by a syndicate of Toronto Stock Exchange brokers. It is expected that application will be made shortly to have Goldale shares called on the unlisted department of the Toronto Stock Exchange. The total holdings of this company comprise 1,904 acres. and the majority of the claims are in Tisdale township, including a large acreage in the Dome Mines area. The development work, consisting of shaft sinking, drifting, cross-cutting and diamond drilling, shows the property to contain a continuation of the same rock formation which in adjoining mines has been very productive. The development work is being financed by the Kerr Lake Mining Co. Ltd., controlled by A. Lewisohn & Sons, New York.

### Bond Issue for Great Lakes Company

Announcement is made of the issue of $1,000,000 7% First Mortgage Bonds of the Great Lakes Transportation Company, Limited, of Midland, Ont. This company has been operating for over eight year, and is now one of the largest steamship companies on the Great Lakes doing a general carrying trade. It operates a line of steamers chiefly between Fort William and Midland, and owns a modern grain elevator, with a capacity of 3,000,000 bushels, and a coal dock at Midland. Principal commodities carried are grain, coal and iron ore.

The company's directorate includes James Playfair. president and managing director; James Richardson, of Kingston, Ont., who is the head of the large grain firm of James Richardson & Sons, Limited; W. J. Sheppard, of Waubaushene, James M. Paisley, of Cleveland, D. L. White, Jr., and D. S. Pratt, of Midland.

The bonds which the company is issuing are ten-year serial bonds secured by a first mortgage on the company's coal dock and grain elevator and ten of its vessels, with a combined tonnage of 48,000 tons, the whole being valued at approximately $4,000,000.

The company does not publish any statement of earnings, the stock being held privately, but net earnings are reported to have averaged for the past five years over five times the amount required for bond interest.

The bonds have been purchased by Newman, Sweezey & Company, Limited, Montreal, and it is understood that they will shortly publicly offer them, jointly with Messrs. McLeod, Young, Weir & Company, Toronto, Ont.

# *Unlisted Securities*

The weekly report issued on the unlisted market by A. J. Pattison, Jr. & Company, states that trading continued to be at a minimum with but little evidence of public interest. It was generally expected that during July the market would sell off to slightly lower figures from which the advance would be continued to higher figures than those prevailing in May and June. Such has not been the case. Prices have with few exceptions held firm and what few declines have occurred were of little importance to the general market. played a large part in absorbing the offerings which came into the market. This type of buying commenced earlier this year than usual and from present indications the buying power of the small centres will, in the fall, be greater than for some years.

The oil stocks did little of interest. Imperial Oil on small amount of trading shows slightly altered figures at 111-114. International Petroleum sold off ¾ to 21¾-22¼. Mutual Oil was unchanged at 9½-10. Abitibi General Mortgage 6's 1940 under steady demand moved up to 89 bid but with none offered. Ontario Pulps were repeatedly asked for but no offerings were obtainable. The Pulp and Paper Bonds as a whole have made steady improvement during the last few months and appear to be held in strong hands. Offerings are few and as a rule quite wide from the bid price. King Edward Construction Preferred was quoted at 76-80 without changing hands. Whalen Pulp Debentures moved up 3½ points to 63½-66½ and appear to be headed for higher figures. Whalen Preferred has been neglected in the upward movement of the Whalen Securities but can be expected to make a turn in the next few months, should the company continue to improve its position. Robert Simpson Preferred eased slightly to 85½-87. Cockshutt Plow Preferred was quoted 44-45¼ in narrow market either way.

## BURDICK, LOGAN AND COMPANY

Burdick, Logan & Company, Limited, composed of N. T. Burdick, W. H. Logan, Jr., and C. W. Erlebach, has been incorporated to take over the Vancouver business of Burdick Brothers Limited. N. T. Burdick will continue in the business but will have actively associated with him Messrs. Logan and Erlebach.

W. H. Logan, Jr., is a son of Captain Logan of Victoria and, since coming to British Columbia in 1911, has been active in the shipping and ship construction business. For the last few years, however, he has been actively engaged in the financial business in Vancouver.

C. W. Erlebach has been a long time resident of Victoria. He went overseas from Vctoria and was later attached to the staff of General Currie, holding on his discharge the rank of Major. Before going overseas, he was connected with R. V. Winch & Company of Victoria.

## EMPLOYMENT OFFICIAL RESIGNS

The resignation of Bryce M. Stewart, director of the Employment Service of Canada, has been received by the Minister of Labor. It is understood that Mr. Stewart is leaving to take charge of the unemployment office in Chicago of the Chicago joint board of Amalgamated clothing workers.

## QUEBEC RY'S RELATIONS WITH CITY

### Gas Contract Expired Recently—Decision of Public Service Commission Was Unsatisfying to Council

Commencing November, 1920, the Quebec Railway, Light, Heat and Power Company supplied the city of Quebec with gas under an agreement which authorized the company to charge $1.75 net for 1,000 cubic feet, with a minimum charge of 75 cents per month per consumer. This rate was to hold good up to November, 1921, and thereafter, unless three months' notice were given. Since last November the company's relations with the city have been unsettled, and this was one of the questions brought up at the directors' meeting last week. W. J. Lynch, general manager, describes the situation in the following statement to The Monetary Times:—

"Under date of the 12th November, 1921, the Company did receive notice from the city of Quebec cancelling the contract with reference to prices charged for gas, effective 11th February, 1922, or three months from the 11th November, 1921. The city of Quebec then stated that they wished to have a reduction in the price of gas and notwithstanding the fact that the contract was cancelled, this company offered to put into effect a sliding scale of rate based as follows:—

$1.65 net per 1,000 cubic feet for the first 10,000 cubic feet consumed per month.

$1.55 net per 1,000 cubic feet for the second 10,000 cubic feet consumed per month.

$1.45 net per 1,000 cubic feet for all gas consumed in excess of 20,000 cubuc feet per month.

A minimum charge of 75 cents per consumer per month.

### City's Position

"The city of Quebec positively refused to agree to this proposed scale and sent us a resolution of the Council of the City of Quebec, which was passed on the 24th March, 1922, requesting us to establish a net rate of $1.45 per 1,000 cubic feet, on the understanding that the company would be willing to undertake gas extensions wherever required.

"We notified the city of Quebec that we could not entertain a proposition of this nature and we suggested that a committee of the city council be appointed to meet the officials of the Quebec Railway, Light, Heat & Power Company, Limited, with a view of discussing the gas situation, it being the company's desire to be most reasonable in connection with any revision of rates to be made.

### Referred to Commission

"We further explained that we felt that the members of the city council did not realize the seriousness of the gas situation, with the coal miners' strike and the uncertainty of receiving the necessary supply of coal we could not undertake any obligations which perhaps we would not be able to fulfil, due to conditions absolutely beyond our control. The city, however, did not agree to our suggestion but instructed the city lawyers to place the matter before the Public Service Commission for adjustment. This application was filed and on the 27th June last, the Public Service Commission at their sitting in the city of Quebec, granted a delay of three months during which time the necessary data would be compiled to ascertain the actual conditions pertaining to the operations of our gas department as regards cost of production, etc., and during which time there would. in all probability be some definite arrangements arrived at, which we trust will be satisfactory. having particular reference to the coal strike situation.

"This decision of the Public Service Commission apparently not meeting with the approval of the city council, they have made a study of all previous contracts entered into between the city and the company an are now endeavoring to insist upon increased car services in certain sections of the city and an street railway extensions which they claim have not been fulfilled in accordance with terms of contract. These are all questions which we are in a positon to very satisfactorily defend, should no satisfactory arrangements be arrived at in connection with existing differences."

## JOHNSTON & WARD

Johnston & Ward, members of the Monteral and Toronto stock exchanges, announce the opening of branches as follows:—

London, Ont., Royal Bank Bldg., D. B. Weldon, acting manager.

Toronto, Ont., Canada Trust Bldg, Donald Macleod, manager.

Kingston, Ont., Bibby Block, W. W. Anglin, manager.

7¼% Return

## MANITOBA COMPANIES ACT

### Extra Provincial Corporations Act —Court Held That no License Was Required.

On appeal from an order staying the action between Pacific Trust and Produce Co. v. Dingle, until the company should abtain a license to carry on business in Manitoba under the Manitoba Companies Act, the Court held that no license was required.

The Plaintiff company was incorporated under the laws of Oregon and was doing business in the United States. It sold to the defendants a car of peaches f.o.b. Yakima, Washington, but on arrival of the car at Winnipeg, the defendants rejected it and the company then sold it at the best price obtainable. The company was not shown to have an agent or place of business in Manitoba. The transaction was a sale by correspondence thru a broker and was an isolated act. The Court held that the company was not prohibited by the Manitoba Companies Act from maintaining an action for damages for the loss sustained by reason of the rejection of the goods by the defendant.

## VALIDITY OF ASSIGNMENT BY COMPANY

### Prior Assignment to Bank—Justices Differ in Opinion on Inverness Railway Case.

The Inverness Railways and Collieries Limited was incorporated under the Nova Scotia Joint Stock Companies Act for the purpose of carrying on a railway and mining undertaking. The purpose of the incorporators was to operate the railway and mines of the Inverness Railway and Coal Company which was incorporated by a special Act of the Nova Scotia Legislature, but in 1920, the Inverness Railway and Collieries Limited made an assignment under the provisions of the Bankruptcy Act to the Eastern Trust Co.

On the application of the Eastern Trust Co., two questions were raised in a stated case which in effect were 1. Whether the Inverness Ry. and Collieries Limited could make an assignment under the Bankruptcy Act. 2. Whether an assignment made by the Company to the Royal Bank of Canada is void as to bad debts not paid at the date of the subsequent assignment in bankruptcy.

It was held by Justices Russell and Mellish that the Company was not in business as a railway company and it was therefore competent for it to make the assignment. Justices Chisholm and Ritchie held that the company fell within the definition of "railway company" in sec. 2 (r) of the Nova Scotia Railways Act and therefore it was not competent for it to make the assignment. As to whether an assignment made by the company to the Royal Bank was void as to back debts not paid at the date of the subsequent assignment in bankruptcy, Justice Russell held that such assignment was not void and that the equitable rights of the bank by virtue of the assignment had priority over the rights of the creditors as represented by the trustee in bankruptcy. Justices Chisholm, Ritchie and Mellish held that such an assignment was void under sec. 30 (1) of the Bankruptcy Act.

## CONDENSED ADVERTISEMENTS

### POSITION WANTED

Gentleman, single, several years thorough bank training credits, etc., desires position with Trust Company or Manufacturing Concern with chance of advancement. Available August. Box 459, Monetary Times, Toronto.

### ALGOMA STEEL MILL

Construction will be commenced shortly at the steel plant of the Algoma Steel Corporation in Sault Ste. Marie, of a building adjoining the Merchant mill for heat treating splice bars. The bars will, in the tempering process, he heated and quenched in oil. The work will cost in the neighborhood of $50,000, it is understood, and the plant is expected to be ready in October. The contract has not yet been let for the erection of the building.

### LIABILITY FOR LOCAL TAXES

The Privy Council has reserved judgment on the appeal of the city of Montreal in the case against the Dominion Government, with the Quebec provincial Government as intervenant, on the point as to whether a tenant of Dominion Crown lands is liable to local taxation.

In the case a Montreal firm had rented from the Dominion Government for business uses, some land on the bank of the Lachine Canal. The city of Montreal assessed the land for local property tax, but the tenant refused to pay. The city entered suit against the Dominion Government, but the latter's contention that the property was not subject to levy was upheld successively by the Superior Court and the Court of Appeals. The city then carried the case to the Privy Council, with the Quebec Government, as intervenant, supporting the Dominion Government's contention. It is this appeal upon which judgment has been reserved.

### VENEER FACTORY

Pembroke, Ont., is to have another industry. E. B. Reed, who has lately severed his connection with the firm of Maguire, Patterson & Palmer, Ltd., of the match factory, has leased a section of the Pembroke Iron Works and with three local associates, whose names will shortly be given out, will start a plant for the manufacture of veneer, panels and plywood. The machinery has been purchased, but no men will be taken on until the plant is ready to operate.

### LINCOLN PAPER MILLS

Announcement was made in St. Catharines, Ont., on July 24 of the completion of the amalgamation of the Lincoln Paper Mills Company, Ltd., of Merriton and the Canadian Pulpwood Corporation, with office at Little Cascapedia, Quebec, and timber limits in the Gaspe district. The new concern will be known as the Lincoln Mills, Ltd. This amalgamation includes both the Lincoln and the Lybster Mills. The continuous supply of high-grade pulpwood is assured and operations will be carried on as usual in the pulp and paper mills at Merriton.

### RUSSIAN TRADE

The Government has authorized the appointment of a permanent Canadian Trade Commissioner, together with an assistant, to Russia, to investigate openings for Canadian trade. This step is taken under the Anglo-Russian trade agreement. It is understood that the Russian Government contemplates establishing a trade agency in this country.

### BRUNETTE SAWMILLS, LTD.

The Brunette Sawmills, Ltd. New Westminster, B. C., has been sold to the Westminster Mill Company, which pays $300,000 for the mill site, buildings and stock of lumber, and takes over also some 25,000,000 feet of timber at Harrison Lake, at a price to be decided later.

The new owners of the property will re-build those portions of the plant destroyed by fire last January, and generally rearrange the plant, with the object of making it a modern and efficient sawmill. Work which had already been started by the former owners has been stopped, pending consideration of building plans by the new owners.

The Westminster Mill Company is in a position to operate a sawmill on the Fraser River to advantage, by reason of the fact that it owns considerable timber at Cultus Lake, which enables it to bring logs to the mill down river when the freshet prevents logs being brought up river.

The ownership of the Brunette mill has changed frequently in the past few years. In 1920 it was taken over by Thurston & Flavelle, of Port Moody. These gentlemen later sold an interest to Peers & Anderson of Vancouver. The present change puts the control in the hands of G. W. Beach, C. J. Culter and their associates.

### HAMILTON'S NEW INDUSTRIES.

Thirteen new industries have located in Hamilton since the first of the year, it was announced on July 21 by C. W. Kirkpatrick, industrial commissioner. This was highly gratifying, he stated, in view of the fact that present conditions were of such a nature as to occasion some pessimism respecting the general business outlook.

The Firestone Tire & Rubber company is expected to begin operations on September 1. It was stated that the plant would not operate under its full quota of workmen until a later date, and as yet it is not known just how many men will be absorbed in September.

That there is every indication that better conditions industrially Mr. Kirkpatrick. Although he did will exist this winter was stated by not predict a boom in the trades, he contended that the ever-increasing volume of business in the majority of local plants was a healthy augury of better times in the near future. Manufacturers do not anticipate that normal conditions will be reached within the next few months, he remarked, but the general feeling appears to be that business is slowly, but surely, on the upgrade.

### BIG LOGGING CONCERN

Bloedel, Stewart and Welch Corporation, Ltd., has been incorporated under British Columbia charter with head office at Vancouver and authorized capital of $1,000,000. The corporation will continue the logging business of Bloedel, Stewart and Welch, Ltd., the assets of the latter having been transferred to it on July 1. The ownership of the business remains the same.

### TORONTO PLANT MAY MOVE

Stanley and Aylward, who conduct the Norman plate manufacturing plant in Toronto, are negotiating with the Kingston Civic Industries Committee with regard to moving to Kingston.

H. L. DOBLE,
Secretary.
Montreal, July 17th, 1922 7

# Corporation Finance

**Alabama Traction, Light and Power Co., Ltd.**—The annual meeting was held at the company's office in Montreal on July 12th, when the ninth annual report of the board of directors, for the year ending December 31st, 1921, was presented.

The operations for the year resulted in an increase of $366,686 in gross income, and, after payment of interest and providing for all other charges, an amount of $221,426 was carried to surplus account.

Statement of income and expenditure for 1921, with corresponding figures for previous year follows:

| | 1921 | 1920 |
|---|---|---|
| Oper. Rev. | $4,515,919 | $4,149,233 |
| Oper. exp. (includ. taxes) | 2,268,884 | 2,160,248 |
| Net. oper. inc. | 2,247,035 | 1,988,985 |
| Other earnings | 88,692 | 112,777 |
| Net income | 2,335,727 | 2,101,762 |
| Int. on bond. debt | 1,471,654 | 1,351,121 |
| | 864,073 | 750,641 |
| Pfd. dividends | 35,136 | 9,664 |
| | 828,937 | 740,977 |
| Reserves amort. | 242,154 | 234,332 |
| | 586,783 | 506,645 |
| Depreciation, etc. | 365,357 | 262,201 |
| Surplus | $221,426 | $244,444 |

**Coastwise Steamship and Barge Company, Ltd.**—Notice is given that the capital stock of the company has been increased from $250,000 to $500,000, by the issue of 2,500 shares of $100 each.

**Red Star Refiners, Ltd.**—Notice is given that the capital stock of the company has been increased from $3,000,000 to $6,000,000, by the issue of 300,000 shares of $10 each.

**Lake Shore Mines, Ltd.**—Net profits of $51,723 for the year ending November 30, 1921, as compared with $104,992 in the previous year, are shown in the seventh annual statement now going forward to shareholders. Accompanying the annual statement is the balance sheet for the half year ending May 31, 1922, and this shows net profits of $169,167, as compared with $30,486 in the same period last year.

Bullion production for the year amounted to $486,186, compared with $483,701 in the previous year. This was the largest item in the income of the mine, which amounts to $526,936. Expenses are given at $345,212, and the profit, before providing $130,000 for exhaustion and Dominion taxes, amounts to $181,723.

In his remarks to shareholders, President Harry Oakes points out that the production of the mine is now approaching the $2,000,000 mark, with a reduction of probably not more than 20 per cent. of the ore indicated about the 600-foot level. He states that future plans include enlarging the shaft, sinking to the 800-foot level and installation of more air capacity in preparation of an increase in the milling capacity.

"Since beginning development work on the 600-foot level last year," President Oakes points out, "580 feet of drifting have been done on the No. 1 vein, of which about one-half was in ore, and 1,600 feet on the No. 2 vein, with about 1,200 feet in ore. The result of this work has shown a decline in ore in the eastern section of the property, which has been more than offset by the improvement in the remainder; there remains about 400 feet to the west and about 450 feet to the east on this level as yet untested."

The report of R. C. Coffey, mine manager, shows that 21,681 tons were milled during the year, and that the average recovered per ton was $21.22, with total bullion production amounting to $460,186. Broken ore amounts to 28,298 tons, valued at $700,730.

Bullion production for the six months period ending May 31 1922 amounted to $309,637, and was the big item in income which totalled $323,908. Operating expense amounted to $131,133, administration expense $3,327, and depreciation of buildings, equipment, etc., $20,280, leaving profits before providing for exhaustion or Dominion taxes, at $169,167. Assets total $1,448,872.

**Ontario Steel Products Co., Ltd.**—A substantial decline in profits is reported for the year ending June 30, 1922, the figures being $142,083, compared with $223,446 last year. The liquid position of the company, however, remains strong, working capital being very slightly less than a year ago. The unsatisfactory showing of the company as regards earnings reflects the general conditions which have prevailed in industry to a large extent during the past twelve months.

"During the first half of the year sales continued to decline," states W. Wallace Jones, president, in his report to the shareholders, "and, while the volume of business for the past six months showed a substantial increase, such business was done under keen competition, at very much reduced prices, and in many cases at little or no profit. Inventory depreciation, which had been fully provided for up to July 1, 1921, was more pronounced during the current year, involving us in larger losses than had been anticipated or provided for, the decline in New York exchange being an unforeseen factor in this connection. Manufacturing earnings for the current year were affected to the extent of about $40,000 by losses of this description."

In an effort to guard against any further losses on the present stocks having to be absorbed inventories in the present statement have been priced at replacement value or lower. In addition to this, however, the directors have decided to transfer the sum of $50,000 from surplus account as an inventory reserve. This sum will be increased from time to time, as conditions permit, but will be available in future for unusual inventory losses in times of unexpected or violent market fluctuations. Special attention is called to additional plant and machinery depreciation deducted for last year and this year, amounting to nearly $30,000 per annum more than appropriated during the past two years, the total sum set aside for depreciation this year being $104,069. Bad debts are placed at $48,193. Partial operations, which were resumed at the Central Spring Works at Oshawa in March last, have been carried on since that time, and the continuation of work at this plant will be governed by the demand for motor cars during the coming autumn and winter. During the year the directors purchased $19,500 par value of the company's bonds for sinking fund purposes. Working capital shows little change from last year. The directors have authorized the expenditure of approximately $60,000 during the coming year for the installation of modern and improved methods of manufacture.

The regular quarterly dividend of 1¾ per cent. on preference stock has been declared for the current quarter. During the year, however, owing to unsatisfactory business conditions, the dividend on the common stock was cut to 1 per cent. for the third quarter, and omitted altogether for the final quarter. The resumption of the common dividends will depend upon future developments.

Current assets are slightly higher, at $806,136, against $778,103 last year. Current liabilities also show a slight increase, the figures being $199,750 for the year under review, compared with $164,604 for a year ago. Inventories are lower at $271,903, compared with $369,544. Total assets are $3,026,614, against $2,995,809 last year.

**Dominion Telegraph Co.** — The company's statement for the year ended June 30, 1922, shows the following changes in comparison with the preceding year:—

| **Assets** | 1921 | 1922 |
|---|---|---|
| Capital expenditure | $1,281,819 | $1,281,819 |
| Toronto, Grey and Bruce bonds | 1,595 | 1,557 |
| Cash on hand | 16,101 | 13,220 |
| Suspense | 3,749 | |
| Total | $1,303,266 | $1,296,597 |
| **Liabilities** | | |
| Capital paid up | $1,000,000 | $1,000,000 |
| Dividends unclaimed | 269 | 220 |
| Dividend payable July 15 | 15,000 | 9,001 |
| Reserve | | 918 |
| Balance in profit and loss | 287,997 | 286,457 |
| Total | $1,303,266 | $1,296,597 |

At the annual meeting in Toronto on July 12, the following were elected directors: G. W. E. Atkins, J. C. Willever, E. Y. Gallagher, Sir John M. Gibson, D. B. Hanna, Aemilius Jarvis, Sir Henry M. Pellatt, and H. H. Macrae.

**Demerara Electric Co., Ltd.**—The following are the earnings for May, 1922:—

| | | | |
|---|---|---|---|
| Railroad, gross | $ 9,240.31 | Net | $ 303.64 |
| Light & Power, gross | 12,029.40 | Net | 5,986.07 |
| Miscellaneous | | | 50.97 |
| | | | $6,340.68 |

**Prince Rupert Pulp and Paper Co.**—Legal proceedings have been entered in Vancouver on behalf of the J. S. Emmerson estate, looking to foreclosure on the assets of the Prince Rupert Pulp and Paper Company, for themselves and other holders of first mortgage bonds totalling $800,000. The plaintiffs ask the appointment of a receiver for the company, which is alleged to have defaulted in payment of interest this year. The Montreal Trust Company, as second mortgage bondholders, are named as co-defendants.

A. F. Sutherland, of Vancouver, and George W. Gay, of Texas, are the only directors still holding office in the firm. Its annual meeting called for July 19 was adjourned for lack of attendance and no officers could be elected for the company.

**Porcupine V. N. T. Gold Mines.**—At a special general meeting of the shareholders of the Porcupine V. N .T. Gold Mines, Ltd., held on July 22, a new offer of 50 cents a share for a large block of stock in the new company, which is to be formed was received. The offer was made at the meeting by Hugh Sutherland of F. C. Sutherland &Co., and it exceeds the previous offer by A. E. Moysey by 10 cents a share. The new offer resulted in the adjournment of the meeting after the shareholders had passed a resolution authorizing the directors of the company to request the directors of the new company, the Vipond Consolidated Mines, Ltd., to sell the remainder of the stock not subscribed for by the shareholders, to the highest bidder, offers to be received up to August 4.

The shareholders had been asked to meet to consider the sale of the assets of the V. N. T. to the Vipond Consolidated Mines, Ltd., a new company to be incorporated. One-third of the unissued treasury stock, namely, 333,334 shares, were to be offered to the shareholders at 40 cents a share in proportion to their present holdings. The balance was to be bought by A. E. Moysey at 40 cents a share, and he was to get an option on the balance of the treasury stock—666,666 shares—for a period not exceeding 24 months at the same price.

**Montreal Tramways Company.**—A surplus is shown in the annual report for the year ended June 30, 1922, given out on July 24 by J. F. St. Cyr, chairman of the Tramways Commission. Gross receipts show an excess of $187,947 over expenditures, and this, the report points out, is in face of the fact that there were fewer passengers carried than last year. The surplus is attributed to lower operating expenses, even though revenues were considerably less, the commission states, in presenting its full statement to the city, as required by the contract, at the end of each fiscal year, which ends June 30.

A total of 2,625,226 passengers were carried in the period covered by the report, of which 73,851,859 were on transfer. This latter number is shown to be nearly 40 per cent. of the total passengers carried. The density of traffic for the year, or the average number of passengers carried per mile of travel, was 8.7. The average number of passengers per day was 717,954, of whom 515,621 were cash and the rest transfers.

Additions to physical assets during the year were $408,469, including the new sub-station constructed on Cote street.

The gross receipts for the year were $11,712,525. Total expenditures were $5,832,844. The company kept its expenditures within the allowance to which it is entitled, its operating profit of $47,959 being ⅛ of 1 per cent. of the average value of the capital during the year of $38,367. The maintenance and renewal fund, which the commission allowed at the rate of 12.01 cents per car mile for motor cars and 10.64 cents for trailers, amounted to $2,579,200. Actual expenses were $2,368,235, out of which sum $210,946 was credited to maintenance and renewal fund. Under the heading of "Remuneration of Capital Values and Additions to Physical Assets" the physical value which was set at $36,286,295 on January 1, 1918, has had added to it a net value of $269,211. Interest on capital value is placed at $2,329,457.

## HUDSON'S BAY SALES.

The Hudson's Bay Company announces that its land sales for quarter ended 30th June last were as follows:

| | 1922 | 1921 |

# Grand Trunk Appeal is Dismissed

### Judgment of Privy Council is Announced, But Reasons Will Be Given Later—Review of the Case—Only Hope for Shareholders Now is Voluntary Action on Part of Government

The Grand Trunk Railway shareholders' appeal to the Privy Council failed. The appeal was dismissed on July 28 by the Judicial Committee of the Privy Council. Lord Cave, who announced the judgment, said: "Their Lordships have considered this case and think it convenient to state their decision at once, giving the reasons later. They have fully considered the arguments for and against the appeal, and have come to the conclusion that the appeal fails and should be dismissed. They will humbly advise his Majesty accordingly." Lord Cave added: "I apprehend there is no question as to costs." Counsel on both sides intimated that there was not. This closed the proceedings.

The appeal was brought by the shareholders of the Grand Trunk Railway Company from the decision of the majority of the members of the Board of Arbitration created to ascertain the value of the preference and common stocks of the appellants upon the acquisition thereof by the Canadian Government. The main question involved in the appeal was the correctness of the decision of the majority of the arbitrators in excluding as inadmissible the evidence of the value of the physical assets of the Grand Trunk Railway Company and its subsidiary companies which was tendered by the appellants.

#### Arbitrators' Award

The majority of the arbitrators, Sir Walter Cassels, Chairman, and Sir Thomas White, decided that the preference and common stocks had no value. Hon. W. H. Taft, former President of the United States, the other member of the Board of Arbitration, dissented from the award, and made an appraisement of the whole of the preference and ordinary stocks at the sum of $48,000,000.

The appeal was heard by Lord Birkenhead, the Lord Chancellor; and Lords Shaw, Cave, Parmoor and Carson. The decision means that 30,000 investors, nearly all British, will be deprived of their holdings without compensation unless the Dominion Government volunteers it.

The opening fire of a big battery of legal guns was on July 10, and the argument continued for more than three days. The counsel were: Sir John Simon, K.C., W. A. Greene, K.C., and A. W. Atwater, K.C., for the appellants; A. C. Clausen, K.C., E. L. Newcombe, K.C., Deputy Minister of Justice, Ottawa, and W. N. Tilley, K.C., Toronto, for the Canadian Government.

In the course of Mr. Clausen's argument on behalf of the Dominion Government he said that the debenture stock of the Grand Trunk Railway Company amounted to £31,000,000 (approximately $140,000,000), and the shareholders' capital was fifty millions. The agreement between the company and the Government was this:

#### Government's Position

The Government said: "We agree that there is enough value in the concern to cover the debenture stock, and, therefore, we will take that over. As to the shareholders' capital, we say that it is of very trifling, if of any, value. We therefore, will guarantee interest at 4 per cent. on the £12,500,000 of guaranteed stock. We say that is ample to represent the shareholders' equity of redemption in this property."

Thus, Mr. Clausen continued, the first class of shareholders was covered. The Government said that the total value of the shareholders' equity of redemption did not exceed £12,500,000 (approximately $56,135,000), and, accordingly, the preference stock and the common stock, which had never paid dividends—and nobody had ever been bold enough to prophesy that it ever could—had no value at all.

The Government admitted, Mr. Clausen said, that there was £12,500,000 of value in the concern, and the company was going to get 4 per cent. on that, whether it earned it or not. The Government said: "We will give the first-class shareholders something which makes them as good as debenture holders, and we say that that exhausts the whole of the value." The value of the remaining stock, Mr. Clausen added, was left to the determination of the arbitrators, and they decided that it was valueless.

#### Stock Market Values

Grand Trunk shares remained nominal on the London stock market on July 28, following the dismissal of the Grand Trunk Railway shareholders' appeal to the Privy Council against the arbitrators' award. London press comment on the failure of the appeal was wholly in the direction of declaring that the directors persuaded the stockholders to enter very costly litigation, which has now ended adversely. The Canadian Government, it is suggested, may still offer compassionate allowance, but it is admitted that this cannot be much for the common stock.

#### Directors Criticized

Grand Trunk Railway stocks are very largely held in the northern part of England, and it is significant that two leading papers on July 31 remarked that there is an apparent disposition to blame the directors of the railway for refusing to accept the Canadian Government's last offer before arbitration was decided upon.

The Yorkshire Post says that it was the best offer made by the Government and might be reasonably satisfactory to the holders of the first and second preference stocks, although it would mean the virtual extinction of the greater part of the third and common stockholders. The directors, the paper says, would not have had the remotest chance of getting the shareholders to ratify this scheme.

The Manchester Guardian says that the Government was willling to take over the Grand Trunk Pacific obligations as well as those of the Grand Trunk, which meant, the newspaper says, that the Grand Trunk 4 per cent. debentures would be receiving their full interest. No explanation, The Guardian continues, has yet been given how or by what right the directors thus sacrificed the Grand Trunk Pacific debenture interest without consulting them. This point, however, it declares, deserves more attention than those now representing the debentures seem so far to have given.

The Daily News remarks that it is the feeling that the Grand Trunk Railway Board gave away their position in statements made before arbitration.

#### Meeting of Debenture-holders

A meeting of the 4 p.c. Debenture stockholders of the Grand Trunk Pacific Railway, called by Sir Francis Harrison-Smith, K.C.B., in London on July 19, to hear a statement from him. Henry J. Thomas presided, and briefly introduced Sir Francis Harrison-Smith.

Sir Francis Harrison-Smith, in the course of a long address, said that as the holder of £900 worth of Pacific Debenture stock he became interested in the position of the investment as long ago as November last, and as a result of letters addressed to certain papers he received communications from a large number of stockholders, many of them living in reduced circumstances owing to the loss of their dividends. They had regarded this Debenture stock as an absolutely secure gilt-edged investment, and in many cases had invested in it the whole of a lifetime's savings. By the end of January he had dispatched his memorial to the Canadian Government, and by May had received a reply, wsich had been published. A further letter, in which he said that the position was ripe for consideration at a general meeting, resulted in a guarantee of the expenses, and that meeting had now been called.

#### The Late Directors

One of the matters they had to consider was their relations with their late directors. Some might wonder whether the directors were justified in consenting to build the Grand Trunk Pacific, in view of the circumstances which had decided the Canadian Pacific Railway to decline that undertaking. Some might think the directors were not justified in yielding to the pressure of the Canadian Government to go beyond the more modest programme of Mr. Hays, their general manager, who wished only to build extensions to the wheatfields of Alberta, and so forth. Others might feel that the directors were not justified in issuing such glowing invitations, headed "Dominion of Canada," to the subscribing public. Others might be concerned with the allegations of extravagance in constructing the line, but for the moment he wished to restrict himself to saying that the line never reached the earning stage which would have enabled it to pay the interest on its own Debentures before war overtook them. The point which interested them most, and demanded immediate consideration, was that in order to obtain the stockholders' approval for the sale of the parent company, the directors stipulated with Canada for the payment of the interest on the Grand Trunk 4 p.c. Guaranteed stock without securing the responsibility for the interest on the Pacific Debentures, which was a prior charge. The consequence was that the Guaranteed holders were receiving their interest, and the Debenture Stockholders, alone of all stocks entitled to a prior charge, were not. That was the pivot of the situation they were met to deal with. A great deal had been said and written about the repudiation of liabilities by Canada, but he hoped the time would never arrive when it would be possible to make such a charge against a great self-governing Dominion.

#### Debenture-holders' Case

Sir Francis proceeded to show that their case for interest against the Canadian Government was one which the Canadian Government themselves had constructed for the stockholders. The Pacific line having proved a financial burden which the Grand Trunk could not bear, the Canadian Government consented to relieve the Grand Trunk of it on condition that the Grand Trunk Company transferred its own line to the Canadian Government. One of the conditions was that the Canadian Government should assume all the liabilities of the Grand Trunk Company. By paying to a junior security and withholding from a prior security a dividend which in neither case was being earned, and thus subordinating the senior to the junior, the Canadian Government had altered absolutely the relative rank of two sets of stockholders to the gross comparative disadvantage of the one which was entitled to any advantage there might be. If the Canadian Government would not pay their interest, neither had they the right to pay it to the Guaranteed stockholders, because they were altering the order of precedence which was part and parcel of the contract under which they were induced to subscribe. The Canadian Government had been led into a mistake, which it was their duty in the name of justice to rectify, and he had enough faith in the Dominion of Canada to hope that if their cause could be put in a proper way Canada would either rectify the mistake or give a better reason for not doing so.

#### Sir Robert Borden's View

Sir Francis continued: Hear what Sir Robert Borden, then Prime Minister of Canada, said in the Canadian House of Commons on May 15, 1918, when the Grand Trunk Pacific had touched the depths of its misfortunes as a business investment. He said: "I regard it as inevitable that for many reasons the Grand Trunk

Pacific should be taken over by the Federal Government. It is a national enterprise to which the credit of the Canadian people has been committed—(hear, hear)—and in my judgment it is expedient to sustain it and not permit it to go into liquidation." After discussing the need for acquiring also the Grand Trunk are showing how the Government of Canada had the Grand Trunk directors in its power to do precisely what it insisted upon, he reminds the house that "Canada is a country which for many years to come will require to borrow large amounts of capital from other countries. If the Federal Government, or any provincial Government in Canada, lays itself open to the reasonable charge of acting unfairly towards those who in good faith invested in business enterprises of this character in Canada the country in the end will pay much more than it will gain by any such injustice—(hear, hear)—there is absolutely no doubt of that in my mind." We have every reason to believe that the present Prime Minister would endorse those sentiments, and we may, therefore, confidently hope that when he is fully informed he will act in accordance with them, though at this moment could any impartial observer assert, in view of our situation, that the Canadian Government is not by the reply of its Assistant Deputy-Minister and others, laying itself open to the charge of acting unfairly towards those who invested in good faith?

### Taxpayers' Point of View

In regard to the Assistant Deputy-Minister's suggestion to us that in asking for unearned dividends we should consider the unenviable position of the Canadian taxpayer, we may reasonably reply by saying that the Canadian taxpayer has got our railway with all its possibilities for the future development of his country, and that as taxpayers we English are in no way in a better position than the Canadians. (Hear, hear.) As to the future it seems to me that this meeting, through its committee, must consider the desirability of obtaining from the Canadian Government a new arrangement, because the position has been so absolutely altered by the change of ownership of the entire Grand Trunk system that old conditions as to guarantees and almost every other thing are no longer applicable. Further, as a writer in The Manchester Guardian pointed out, when the Guarantor Company ceases to exist by reason of being incorporated in the Canadian National Railway system, the condition limiting its liability under the guarantee will cease to have any meaning, since if the company ceases to exist it cannot have any net earnings, and the liability of its successor, the Canadian Government, must be the subject of a fresh interpretation if that Government continues to take a purely legal view of the situation. I have dealt with the interest question at great length, I fear, but it is not only the main part of our case, but one on which there seems to have been a great deal of misunderstanding on the part of many of my late correspondents in regard to the nature and effect of the guarantee, which misunderstanding has resulted in a great deal of possibly premature abuse of Canada and the Canadians. Meanwhile, it is most desirable to press for the accounts of the Grand Trunk Company to be kept separate from those of the Grand Trunk Pacific, and all other railways of the Canadian National System.

### Method of Negotiating

It is on some such lines as these that I suggest that a further representation should be made to Canada. Many correspondents have urged personal negotiations with the Canadian Ministers, and I think that this suggestion should be imbodied in any communication which may be made. There is, however, an alternatve to sendng a mission to Canada, and that is if the Canadian Government would authorise its High Commissioner in London to meet one or two chosen representatives of the stockholders and carry out these negotiations in this country. (Hear, hear.) It has been suggested to me that it would be a seemly course in any case to send our representation through the High Commissioner in London, as he would be able to transmit it to his Government with such remarks and recommendations as his knowledge of affairs from the English point of view might impel him to make. (Hear, hear.) In conclusion, I would urge that this meeting should appoint a committee with authority to act generally on the lines which I have discussed, and which are set out in my circular letter to the stockholders of the 10th inst.

### A Committee Appointed

After a few questions had been answered, the Chairman said it was proposed to appoint a committee consisting of the Rt. Hon. Sir Harry Samuel, P.C., Sir William Acworth, K.C.S.I., and Sir Francis Harrison-Smith, K.C.B., with power to add to their number, and that stockholders should be invited to agree to contribute towards the expense which must necessarily be incurred by the committee up to a maximum sum of 5s for every £100 of stock held. He moved that resolution.

Sims Williams seconded the resolution.

Sir William Acworth said that, personally, he fully believed the Canadian Government would sooner or later accept this as a liability. He fully believed that if they had had a separate body of directors for the Grand Trunk Pacific, concerned primarily with the interests of the Grand Trunk Pacific, things might have been different. He did not doubt that if the matter was put to the Canadian Government fairly and squarely, without attempting to reproach them—for he was quite sure that, though the Canadian side of it had not been put forward in this country, they had an answer which he believed if made at that meeting would satisfy the stockholders—he believed that the Canadian Government would meet them. They did not want to fight legal claims. The speech of Sir Robert Borden, he believed, expressed the feelings of Canadian statesmen that, as honorable men and in the interests of Canada, they were bound to treat the stockholders, he would not say with generosity, but certainly with equity. He did not doubt that if the matter was properly represented, and it never had been until Sir Francis Harrison-Smith took it up—if it was represented not as enemies, but as business men trying to reach a reasonable settlement, he believed such a settlement could be reached. He believed that when the report of that meeting and the enthusiastic support that Sir Francis Harrison-Smith had received reached Canada, the next letter would be not from the Assistant-Deputy Minister, but from the Minister himself.

The resolution was carried unanimously and the meeting terminated with votes of thanks to Sir Francis Harrison-Smith and the Chairman.

## ONTARIO HYDRO DEVELOPMENT

Speaking at Galt, Ont., on July 28, Sir Adam Beck, chairman of the Ontario Hydro-electric Power Commission, said:—"We are quite ready to finance a new 80-foot canal from Niagara to Queenston. That would be double the Chippawa canal. It would make available one million horse power to the people of Ontario. We have most of the property bought. Then we would have a million and three quarters horse-power. The next canal would cost a hundred million. Don't let that figure frighten you. We have 285 millions liabilities now and we have no defaults, but there is always propaganda against us and always misrepresentations."

## DOMINION GOVERNMENT SAVINGS BANKS

In the June statement of the Dominion Government Savings Banks it is shown that deposits have increased and withdrawals have declined, as compared with the previous month.

Deposits during June amounted to $112,138, as compared with $128,491 during the same month last year. Withdrawals during the month show a decline of about forty thousand dollars, or from $209,001 to $169,881. This year's total is lower than for the same month last year, when withdrawals totalled $189,503.

The following is a comparison of balances as at the end of May and June:

| | May 31 | June 30 |
|---|---|---|
| Victoria | $1,063,110 | $1,052,924 |
| Charlottetown | 1,722,867 | 1,716,652 |
| St. John | 4,270,084 | 4,247,424 |
| Barrington | 61,357 | 61,353 |
| Halifax | 2,251,803 | 2,238,004 |
| Kentville | 232,350 | 227,609 |
| Sherbrooke | 54,848 | 54,711 |
| | $9,656,423 | $9,598,680 |

## *Exchange Quotations*

Closing rates in Toronto, Wednesday, compared with the preceding week, were as follows:—

| | July 26 | August 2 |
|---|---|---|
| Sterling | $449.50 | $ 4.46¾ |
| France | 8.36 | 8.19 |
| British W. I. | .94 | .93⅝ |
| Jamaica | 4.50¾ | 4.48½ |
| Belgium | 7.95 | 7.75 |
| Denmark | 21.69 | 21.56 |
| Germany | .19¼ | .12¼ |
| Greece | 3.21 | 2.95 |
| Holland | 39.15 | 38.77 |
| Italy | 4.62 | 4.56 |
| New York | 29/32 | 7/16 |

## BANK CLEARINGS REDUCED TEN PER CENT

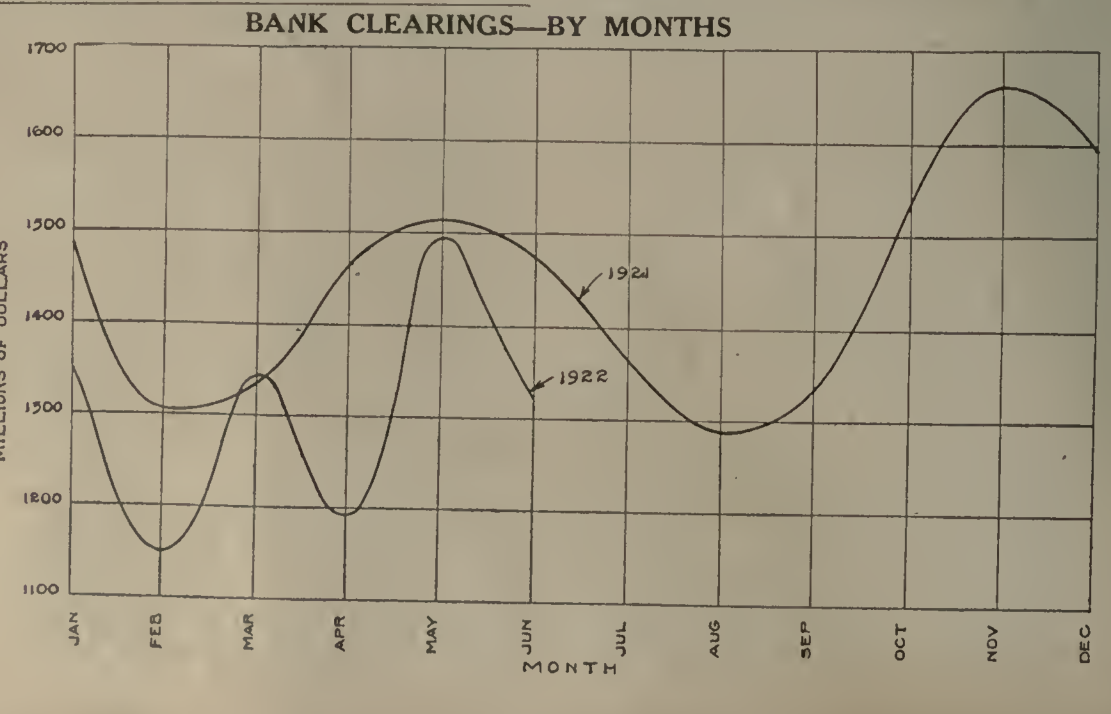
### Last Year's Figures Equalled Only by March of This Year—Six Months' Total About Ten Per Cent Below 1921.

Bank clearings for the first six months of 1922 totalled $7,856,438,188, compared with $8,582,128,600 for the first six months of 1921. Each month has been lower excepting March, when the clearings were nine millions above the total for March of last year. As the total for the last half of 1921 was just about the same as for the first, it is likely that clearings this year will continue in about the same ratio.

Considering the extent to which prices have declined, the decrease of about ten per cent. in the bank clearings seems small. Wholesale prices are just about 8 per cent. lower than they were a year ago, so that after allowance is made for this, a very small decrease in business activity is indicated.

The clearings for 1921 and for 1922 to date are given below, and illustrated graphically herewith.

BANK CLEARINGS—BY MONTHS



# Railway Management is Critical Point

## Board of Directors of Canadian National Will Probably Follow Advice of Management in Any Case—Good Executives Hard to Secure — Attitude on the Coal Situation

(Special to The Monetary Times)

Ottawa, August 2.—The capital is enjoying the longest and most complete holiday it has had in many years. It was but natural that following the strenuous session, the ministers should take a few weeks off when the opportunity presented itself; but the vacation seems to be getting a bit lengthy in view of the importance of several problems that await solution.

The delay in the appointment of the new National Railway board, together with the attendant delay in the co-ordinating of the Grand Trunk with the toher roads in the Government system has conveyed the impression that to secure the services of certain persons considered desirable has not been as easy as had been thought. The impression has been that the Government had so far completed its arrangements that when Parliament prorogued the announcement of the personnel of the new Board would follow within a very short time.

But the personnel of the new Board is secondary to that of the new management and changes in directing generally that will follow the inclusion of the Grand Trunk and the co-ordinating of the managements. As far as the public is concerned, one Board will probably look just about as good as another; it is the management that counts. For the Board will do pretty much what the management advises it to do.

The truth is that to secure the order of ability that is necessary for the thorough reorganizing and successful administration of 22,000 miles of railway, in such a state as the National system is, is about as difficult a task as can be imagined. There never was a time when first class railway executive brains were more in demand on this continent that they are today. The reason is quite obvious, for never before were transportation problems more acute. The dislocation that attended the taking over by the United States government of the railways of the Republic, together with the equally difficult task presented in the readjustment consequent upon their return to private ownership, has called for executive ability of the highest order, and to this has been added the diffficulties attendant on a very perplexing labor situation.

...

### Positions Hard to Fill

But the problems do not end here; it is quite generally agreed that the United States, and to a certain extent Canada, is on the eve of a period of marked industrial and commercial development, the demands of which on the railways will, or themselves, create another big problem, in the form of making provision for the expeditious handling of traffic. So it is quite evident that first class railway executive officers are not kicking their heels outside of railway offices looking for a job.

The fact of the matter is that neither the Government nor the country quite realizes how big an undertaking it has assumed in taking over and trying to adminster 22,000 miles of railway that has been in anything but good shape, and which is runing behind at the rate of $6,000,000 month. It is not difficult to secure the services of men who probably would find it rather difficult to get placed anywhere else, but the public demands the best ability, and men of this order holding good positions are not eager to take on such a job as the Government offers.

### Prospects Uncertain

Such men naturally hesitate, because, for one thing, they do not know how long the job will lst. nor are they certain of the extent of their powers. The Government has promised that the Government roads will have a fair trial; but who knows what that means. It might really mean ten or twenty years, and yet if the deficits continue to mount up at anything like the present rate, the financial strain may become so great that radical changes in policy may be forced. This might mean a general lopping off of heads, or a serious curtailment of the powers exercised by the executives. When first class ability has no need to look for a job, it is unlikely to take on one that is attended by such risks.

Then there is the natural desire of a really able man to be at the head of a successful concern; for while the salary is naturally an important consideration, it is not the only one. Such a man is fired by a strong ambition to make a name, to leave the mark of success on his work; for if he does no more than draw his salary, he feels that he has failed to achieve success. The best that the ablest railway director procurable could expect to do with the National roads would be to gradually reduce the deficit in the hope that with a marked increase in population and consequently traffic, the corner might bt turned within a decade or two. Such a prospect holds out little attraction for a man of spirit and genuine ability, which is another reason why it is difficult to secure ability of the highest order. Of course, if the salary is put high enough it might outweigh the considerations.

To those well-informed on the activities of the United States government, the comparative apathy of our own government with respect to the coal situation is surprising. One does not need to be across the boundary line very long to realize that the prospect of a coal scarcity is taken very seriously. If this is true of a country that even now produces so much as does the United States, it is even more true of Canada. But the opinion here seems to be that the coal will come from somewhere. Hoover's intimation that Canada had better import coal is as straight a tip as could be got as to what the situation is. Even if the strike were settled right away, it would take a long time for production to catch up with the demand.

Incidentally it may be observed that the coal miners' strike and the so-called railway shopmen's strike, for the latter is not a very serious matter, are not preventing the revival of business. Indeed, that in spite of these untoward developments business continues to improve is a certain indication that matters are definitely on the upward trend. As much as anything this is explained by the fact that both Canada and the United States are this year producing a vast amount of new wealth in the form of large crops. In both countries agriculture is still the most important factor in the creating of prosperity, and, if for no other reason business will improve when the farmer has a fair amount of money, for he spends freely. Moreover, in a country of such magnificent distances, as are to be found in both this country and the United States, huge grain crops create a vast amount of business for a great industry, rail transportation, a benefit which small countries do not experience to nearly the same extent.

---

## VALIDITY OF CITY CHARTER

The case of City of Halifax v. Lyall & Sons Construction Co. has recently been decided by the Nova Scotia Supreme Court. The case was stated for the opinion of the Court as to the liability of the defendant company to pay a license fee to the City of Halifax under sec. 540 of the City Charter.

Section 540 is as follows: "Every person, firm or company, not a resident in the Province, who enters into any contract for the construction or alteration of any building in the city shall before beginning any work under such contract, pay to the city a license fee equal in amount to one half of one per cent of the total sum payable under such contract provided however that the provisions of this section shall not apply to any such person, firm or company which at the time of entering into any such contract is assessed for purposes of taxation by the city in the sum of five thousand dollars or upwards."

The Court held that the above recited section was ultra vires and could not be enforced against a company incorporated under an act of the Parliament of Canada with power to do business in any part of Canada and one of whose objects is the construction of buildings, although it has no place of business in Nova Scotia except a temporary office in connection with work to be done in the City of Halifax.

---

## INCREASED USE OF TRADE ACCEPTANCE

### Canadian Example Made Use of in United States—The Coal Situation—Nova Scotia Loan Criticized—Call Loan Market in Canada

(Special to The Monetary Times)

New York, Aug. 2.—Organized efforts to promote the use of the trade acceptance in the United States have been so successful during the past three or four years that it is now estimated that of the five billion dollars' worth of business said to be transacted annually in the United States about twenty per cent. is being done on the basis of trade acceptances.

And the main argument now being used by those behind the so-called acceptance movement in the United States to promote the further use of trade acceptances is the fact that very careful statistics kept by a number of bodies during the past two or three years by such organizations as the National Acceptance Council and the National Credit Men's Association and to a limited extent, some of the Federal Reserve banks, indicate that collections made through trade acceptances are much more satisfactory than those made on open accounts. According to statistics kept by the American Acceptance Council the percentage of collections made at maturity when trade acceptances are used is not less than ninety per cent., good times or bad. When collections are made of open accounts, the percentge very seldom exceeds fifty per cent., and usually is as low as forty-five per cent.

In view of the fact that the trade acceptance is universally used in Canada and that this fact has been widely used by trade acceptance propagandists in the United States, this situation should be gratifying to Canadians. It at least indicates that the Canadian system for the collection of commercial accounts is much superior to that of the United States.

### Coal Supplies

The commission which the President recently appointed to supervise the distribution of American coal supplies is said to have officially warned Canada that it must not depend upon American coal any longer. In other words, it has told Canadians that the American consumer is going to be given the preference over the Canadian consumer and that if the Canadian consumer wishes to keep his plant going or his home warm this winter he must look to other sources of supply than the United States.

The belief is as a result prevalent in coal circles here that those Canadian who have in the past been accustomed to obtaining their coal in the United States will be forced to import coal from Wales. Canadian buyers, it is believed, will hereafter be active bidders against Americans in the English and Welsh coalfields for the exportable British surplus.

### Nova Scotia Loan

Some criticism is heard in the financial circles regarding the tactics of the the Province of Nova Scotia in conducting negotiations for the placing of the $2,000,000 loan floated in this market during the past week. It is said that the excellent terms the province obtained for its short term loan were due to the fact that bids were in the first instance obtained on a twenty-five year issue and that later in the course of the negotiations the term was cut to two years. Be this as it may, however, the announcement of the terms upon which the province obtained its money came as a distinct surprise to those who keep in close touch with the Canadian bond market in this country.

The campaign being conducted in Canada in favor of a Canadian call money market in the sense that such a market exists in New York is not taken very seriously by Canadian bankers in New York. Some of them point out that there have always been people in Canada who felt that there was something wrong about the fact that Canadian banks lend money in the New York call money market. While perhaps justifiable from the point of view of a somewhat shortsighted patriotism, New York bankers point out now as they have done so often in the past that so long as economic conditions governing the financial relations of Canada and the United States are as they are today, Canadian banks will continue to lend money on call in New York and the New York money market will be the dominant money market in the Western hemisphere.

# Banks' Current Loans Abroad Increased

### Thirty Million Above Previous Month—Current and Call Loans in Canada Both Decrease—Considerable Reduction in Savings Deposits — Demand DepositsUp — Circulation Decreased

| | June 1922 | May 1922 | June 1921 | Yrs. Inc. or Dec. | Mths. Inc. or Dec. |
|---|---|---|---|---|---|
| Deposits on demand .... .... | $ 505,757,856 | $ 494,185,496 | $ 562,194,316 | —10.04 | + 2.34 |
| Deposits after notice ........ | 1,181,404,188 | 1,197,789,747 | 1,308,778,473 | — 9.73 | — 1.36 |
| Current loans in Canada .. | 1,117,844,707 | 1,140,425,500 | 1,256,642,883 | —11.05 | — 1.98 |
| Current loans elsewhere .. | 174,613,672 | 144,896,130 | 155,846,239 | —12.07 | +20.63 |
| Loans to Mun. Canada ...... | 83,701,008 | 81,255,650 | 84,657,919 | — 1.13 | + 3.01 |
| Call loans in Canada .... .... | 99,804,892 | 101,239,899 | 110,775,140 | — 9.97 | — 1.42 |
| Call loans elsewhere .... .... | 174,613,572 | 186,546,931 | 165,860,689 | + 5.30 | — 6.41 |
| Circulation .... .... ............... | 166,085,839 | 155,652,145 | 195,675,217 | —15.17 | + 6.73 |

Although the May bank statement indicated that there was a plentiful supply of funds, this report has been brought out more strongly in the June statement, in which it is shown that current loans abroad have increased by thirty million dollars over the previous month. The increase during May over April amounted to ten million. The June total of current loans elsewhere than in Canada, is the highest since December, 1921, when the total was $184,540,917.

With the exception of the above interesting item and several other minor changes, the June bank statement varies but little from the previous month.

The following is a comparison of changes in holdings of coin and notes during the months of June and May:

| | |
|---|---|
| Gold and sub-coin in Canada .... | — $282,460 |
| Gold and sub-coin elsewhere .... | + 252,813 |
| Total changes ............... | — $ 29,647 |
| Dominion notes in Canada .... | + $11,944,043 |
| Dominion notes elsewhere .... | — 3,576 |
| | + $11,940,467 |

With an increase of eleven million in Dominion notes, and an increase of six million in money due from banks elsewhere than in Canada and the United Kingdom, the ratio of quick assets shows a considerable increase over the previous month. The ratio during June was 25.01 per cent., as compared with 18.98 per cent. in May and 22.70 per cent., in June of last year.

The ratio of liquid assets to liabilities to the public continues to show an increase, the ratio during June standing at 49.92 per cent., as compared with 49. 23 per cent., during the pevious month. The ratio during June, 1921, stood at 48.30 per cent.

Both current and call loans in Canada show a decrease from the previous month, the decrease in the former amounting to twenty-three million, and in the latter two million dollars. The following table shows the trend of both these accounts for the past thirteen months:

| Loans<br>1921 | Current in Canada | Call in Canada |
|---|---|---|
| June .......... | 1,256,462,883 | 110,775,140 |
| July .......... | 1,237,093,871 | 107,552,690 |

| May .......... | 1,140,425,500 | 101,239,898 |
| June .......... | 1,117,844,707 | 99,804,892 |

From the above table it will be seen that current loans are lower by about one hundred and forty million dollars from June last year. Call loans are lower by about eleven million from the same month last year. The June total of current loans is the lowest since October, 1919, when it was $104,940,160. Call loans in Canada have reached the lowest level since September, 1919, when the total during that month was $96,912,709.

Loans to municipalities are again on the increase, the increase during the month amounting to slightly over two million dollars. The amount loaned to municipalities during June. 1921 was $8,657,919, which was the highest total since January, 1917.

Canadian municipal securities have increased by six million dollars during the month, no doubt due to the banks purchasing portions of some of the provincial issues floated during the month.

There was an increase of eleven million in deposits on demand, as compared with the previous month, but deposits after notice show a decrease of sixteen million from May. The following is a record of deposits for the past thirteen months:—

| 1921 | Deposits on demand | Deposits after notice |
|---|---|---|
| June .... .... ............... | 562,194,316 | 1,308,755,473 |
| July .... .... ............... | 525,085,166 | 1,295,226,768 |
| Aug. .... .... ............... | 527,362,713 | 1,279,830,731 |
| Sept. .... .... ............... | 534,307,452 | 1,263,763,852 |
| Oct. .... .... ............... | 565,650,636 | 1,251,323,839 |
| Nov. .... .... ............... | 555,901,712 | 1,252,227,394 |
| Dec. .... .... ............... | 540,942,522 | 1,240,807,268 |
| 1922— | | |
| Jan. .... .... ............... | 487,153,169 | 1,233,208,401 |
| Feb. .... .... ............... | 488,079,674 | 1,231,349,001 |
| Mar. .... .... ............... | 484,233,074 | 1,230,628,840 |
| Apr. .... .... ............... | 502,370,799 | 1,218,195,262 |
| May .... .... ............... | 494,185,496 | 1,197,789,747 |
| June .... .... ............... | 505,757,856 | 1,181,404,188 |

Although overdue debts show a slight decline from the previous month, the June total is still higher than for the same month last year, when it was $6,276,091.

With the opening of navigation and various other seasonal activities, the notes in circulation during the month of June each year show an increase over the previous month. There was an increase of eleven million dollars in circulation during June. The amount of notes in circulation is decidedly lower than during the same month of 1921, when the total was $195,675,217. The June total, however, is the highest since the first of this year.

Balances due to both Dominion and Provincial governments show a decrease from the previous month, although this is to be expected during the construction months.

Details of the June statement are given elsewhere in this issue.

## NEWFOUNDLAND BOAT SERVICE

The Government of Newfoundland will open an all-year freight and limited passenger steamship service between St. John's and the West Indies in October, if steamers can be procured at a reasonable figure, it was announced in St. John's on July 28. One boat would leave St. John's every six weeks under the plan, and, should conditions warrant, another would be added in October, 1923, and a three weeks' service maintained. The southern ports of call would include Havana, San Juan, Jamaica, Porto Rico, Martinique, Barbadoes, Trinidad and other West Indian points.

Tenders are being asked for two suitable steamers of about two thousand tons deadweight capacity, and with first-class accommodation for twenty passengers; their speed to be about twelve knots.

Newfoundland fish exports to the West Indies are carried chiefly in wooden bottoms, with the result, it is stated, that there is often a glut on the market and seldom a continuous supply. Fish shipped by steamer goes via Nova Scotia. Last year Newfoundland exports to the West Indies totalled $1,378,212, and the Government believes this figure could be doubled, and that least year's imports, valued at $796,698, could be increased. They anticipate, under a direct steamship service, direct importation of bananas and other fruit, as well as molasses, with a great saving to transportation costs and intermediary profits. Importation of raw sugar cane with a view to refining if hero is also suggested.

## STAMP TAXES NOW IN EFFECT

### Official Statement Issued By Minister of Customs And Excise—Excise Stamps Are Preferred

An official statement has been made by the Minister of Customs and Excise, Hon. Jacques Bureau, explaining the increased taxes which come into effect on August 1. The statement of the Minister is as follows:

"The increased stamp tax on bills of exchange, bank advances, over-drafts, cheques, sales and transfers of stocks and bonds, express money orders, travelers' cheques and post-o....ce money orders, travelers' cheques and post office money

"The tax on bills of exchange, promissory notes and advances or overdrafts is payable at the rate of 2 cents for every $50 or fraction thereof.

"Cheques, money orders and travelers' cheques for amounts of $50 or under require a 2 cent stamp. If the amount for which they are issued exceeds $50, but does not exceed $5,000, a 2 cent stamp for every $50 or fraction thereof is required to be affixed thereto. Cheques, money orders and travelers' cheques which exceed $5,000 in amount require a $2 stamp.

"The tax is to be paid by means of excise tax stamps in preference to postage stamps, affixed to the face of the cheque or money order. Regulations have, however, been issued whereby the tax on cheques may be paid monthly in place of affixing such stamps to the individual cheques. Under these regulations, the cheques are embossed with a stamp stating that the excise tax has been paid. Special licenses are issued by the Department of Customs and Excise to firms who desire to pay the tax monthly."

## BANKER UNDER ARREST

D. W. Nado, formerly manager of the Merchants Bank at Tupperville, Ont., was arrested in Toronto on July 27 on a charge of stealing $3,000 from the Bank of Montreal. The warrant for his arrest was sworn out by Medland Bros., agents for the Guarantee Company of North America. Nado was for six years connected with the Tupperville branch of the Merchants Bank. When the Merchants Bank was absorbed by the Bank of Montreal he was retained in his capacity as manager. Afterwards when Bank of Montreal inspectors were making an examination of the books at the Tupperville branch, they discovered, it is alleged, that accounts were badly tangled.

No suspicions were voiced at the time; but early in July Nado was quietly transferred to the West Toronto branch to "help out" as ledger keeper over the holiday period. This move, it was intimated by a bank official, was made to enable the inspectors to complete their investigations. Afterwards, stated the same official, they found that they needed Nado's help at Tupperville to straighten out certain accounts. At that time they had discovered an alleged discrepancy which is said to have amounted to about $8,000.

After his return to Tupperville the suspected man gave all possible assistance to the inspectors. When confronted with the alleged discrepancy he is said to have made restitution of $5,000 and promised the remainder. His arrest followed. He was taken back for trial.

## GEOLOGICAL WORK

The Summary Report of the Geological Survey for 1921, Part D, has been published. This contains the results of geological investigations conducted by Dr. T. L. Tanton in the Thunder Bay district, by E. Thomson in the Goudreau gold area, Michipicoten district, by Sir S. Brunton in the vicinity of Sault Ste. Marie, by Dr. T. T. Quirke in the Wanapitei Lake area, Ontario, and by Dr. F. J. Alcock in Gaspe peninsula, Quebec, where a deposit of lead and zinc minerals has been developed. It also presents the results of investigations of certain peat bogs in Ontario by A. Aurep, of radium-bearing pegmatites of Ontario by Dr. H. V. Ellsworth, and of the possibilities of finding oil or natural gas at Edmundston, New Brunswick. The report may be had by applying to the Director, Geological Survey, Ottawa.

First Things First

Is it better to take one's limited salary and live for all the immediate pleasure that can be got out of life, or, perhaps at the cost of some self-denial, to make adequate provision for the safety and welfare of one's dependents? There is no question which should come first, yet thousands of men are content to drift along leaving the risk of a heavy and unwarranted burden upon their wives and children.

We have an interesting leaflet touching upon this matter, entitled "An Unpardonable Crime." It will be sent to anyone upon request. Write:—

## EASIER MONEY AND BETTER TRADE

The reduction by the New York Federal Reserve Bank of its rate on all rediscounts and advances from 4½ to 4 per cent. on June 22 brought the rate to the level prevailing in 1915-16-17. Bankers' acceptances, 90 days, were offered at 3 per cent., the lowest since 1917, this rate standing in practically the same relation to the Federal Reserve Bank rate as the open market rate to the Bank of England rate in the London market. The selling rate for acceptances has since been further reduced, heralding another reduction in the rediscount rate of the Federal Reserve ank. For commercial paper, four to six months, the prevailing commercial bank discount rate to customers has been 5 per cent., a rate not touched certainly in the last four years. A further indication of the lower level of interest rates is afforded by the fact that an offer of 12 months' Treasury Certificates of Indebtedness, made in the early part of June, was placed at 3¾ per cent., as compared with 4¼ per cent. on similar certificates issued three months previously. These low rates are a reflection of easy credit conditions and of a reduction in the element of risk that was an unpleasantly prominent feature in the period of sharp price recessions that followed on the beginning of a policy of deflation by the Federal Reserve Board.

Rediscount rates are not of such importance to member banks now as in ordinary times, since credit expansion has not been proceeding to any great extent. Just as credit was slow to contract after the boom period in business had passed, so it is now slow to expand, despite increased business activity. Last month the total loans and investments of the New York City banks averaged about 9 per cent. below the 1920 figure, while deposits were about 3 per cent above the average for that year. Banks in New York and throughout the country are able to meet practically all credit requirements out of their own resources, without having recourse to the central institutions. According to the weekly statement issued on July 14 by the United States Federal Reserve Banks, the bills discounted for member banks amounted to only $429,940,000—a decline of approximately $69,000,000 on the week. The total at the corresponding date last year was $1,703,980,000, the decline on the twelve months thus amounting to nearly 75 per cent. Reductions in the rediscount rate by the New York or other Federal Reserve banks are thus likely to have no immediate influence. Banks in the interior, as well as in New York, have been endeavoring to find employment for their surplus funds in acceptances.

The readiness with which American investors have taken up the large loans placed in the United States by foreign Governments, municipalities and individual companies, though due largely to the attractive terms offered, is the more remarkable in view of the "lonely furrow" policy of the Government. It shows a confidence in the future and in the ultimate settlement of European affairs which the Administration would do well to share. In June the Governments of Norway, Yugo-Slavia, Chile, Brazil (Central Railway Electrification Loan) and Bolivia made issues in New York. The state of Santa Catharina, Brazil, the City of Montevideo (Uruguay), and the City of Greater Prague also applied for funds. The preponderance of South American financing is noticeable. Up to June 21 the volume of foreign issues placed in New York, converting issues payable in foreign currencies at current rates of exchange, was $673,801,900, as against a total for the whole of last year of $695,204,225.

## UNITED STATES FARM POPULATION

The United States Census Bureau has just made public the results of its enumeration of the distinctive farm population of the country on the last census date (January 1, 1920),—i.e., the number of persons actually living on farms, in contrast with the so-called rural population as a whole, which includes not only the farm population proper but also all persons living in communities having less than 2,500 inhabitants. This is the first time the census bureau has undertaken to segregate the farm population from the general rural population.

It appears that on January 1, 1920, out of a total rural population of 51,406,017 there were 31,614,269 persons actually living on farms,—this number, however, including 255,629 persons living on farms situated within the limits of cities and other incorporated communities having a population of 2,500 or more and hence comprised in the urban population of the country from a census standpoint. The farm population proper, as found on January 1, 1920, represented 29.9 per cent. of the entire population of the United States and 61 per cent. of the so-called rural population. For the several States the ratio of the farm population to the total population ranged from 2.5 per cent. in Rhode Island to 71 per cent. in Mississippi. More than half of the total farm population was located at the census date in the States of Mississippi, Arkansas, South Carolina, North Carolina, Georgia, Alabama Tennessee, Kentucky, Oklahoma, among the southern tier of States, and North and South Dakota in the Northwest. Speaking generally, the smallest proportions of farm population were found in the States lying north of the Ohio and Potomac Rivers and east of the Mississippi and in the Pacific Coast States.

## CONTINUED LOSS BY STRIKES

Six strikes involving 426 workpeople were reported as having commenced in Canada during June. There were in existence at some time or other during the month twenty-five strikes, involving 10,155 workpeople and an estimated time loss of 254,134 working days, as compared with 30 strikes, involving 13,186 workpeople and 278,160 working days in May, 1922; and 50 strikes, 10,239 workpeople, and 188,020 working days in June, 1921. The time loss occasioned by the six new strikes which began in June was 3,300 working days, while a loss of 250,834 days is charged to the 19 strikes which commenced prior to June. Two of the strikes commencing prior to June and all of those commencing during une terminated during the month leaving the following 17 strikes, affecting 9,609 workpeople on record on June 30; coal miners, District 18, Alta., and B.C.; painters, Toronto; employees of steel and coal companies, Sydney; gauge men, Sydney; moulders, Guelph; photo engravers, Montreal; photo engravers, Ottawa; compositors, Hamilton; compositors, Montreal; compositors, Toronto; compositors, Vancouver; compositors, Winnipeg; compositors and pressmen, Halifax; compositors and pressmen, Ottawa; clothing workers, Montreal; and theatre employees at Calgary.

## BUSINESS CONDITIONS

Although there has been no material change in business conditions in the Dominion of Canada, midsummer quietness still prevails in numerous lines, the crops continue to make satisfactory progress, and, with the recent industrial recovery fully maintained, a generally optimistic tone is the feature of the dispatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities. Current business is largely confined to small orders for seasonable staples, upon which prompt shipment is requested, but merchants at most wholesale centres report the receipt of an encouraging number of inquiries for fall and winter requirements and a fair volume of orders for heavy dry goods, clothing, footwear, furnishings, hardware, etc. Collections continue to drag, but the monetary situation is gradually easing, and it is confidently predicted that business will develop great activity with the advent of cool weather if the crops suffer no serious setback between now and harvesting.

Montreal reports that there is a seasonable slowing down in most lines, but that the quietness is less pronounced than usual and that quite a satisfactory volume of orders for the principal staples continues to be received. Collections are about fair.

### WORLD'S MERCHANT SHIPPING

Lloyd's Register gives some interesting figures regarding the state of the merchant marine throughout the world, which incidentally show the supreme position occupied by the United Kingdom in this respect. There is evidently little danger of Great Britain losing her leadership, in spite of the challenge and rivalry of other lands. At the end of June there was an actual total tonnage under construction in the United Kingdom of 1.439,000 tons, excluding 481,000 tons on which work had been suspended for some time. The average total tonnage under construction during the twelve months immediately preceding the war was 1,890,000 tons, or 451,000 tons more than the present figures.

The total merchant tonnage building abroad is given as 1,315,926 tons. Of this work on about 290,000 tons has been suspended, leaving about 1,026,000 tons actually under construction. There has been a substantial decrease in the tonnage building abroad within the last quarter, especially in France, Holland and Italy. The figures for the leading countries are: Italy, 285,671 tons; France, 243,290 tons; Holland, 226,318 tons; United States, 150,623 tons, and Japan, 115,512 tons. These figures, it is explained, do not take into account the tonnage building in Germany and Danzig, for which no returns are available, but it is estimated that the tonnage under construction in Germany at the present time is about 500,000 tons, and at Danzig about 45,000 tons, as compared with a total of 547,000 tons in June, 1914.

There are at the present time 82 steamers and motor-vessels, each of over one thousand tons, with a total tonnage of 529,911 tons, under construction in the world for the carriage of oil in bulk. Of the total, sixty of 383,221 tons are under construction in the United Kingdom. The tonnage of vessels now building which are to be fitted with internal combustion engines amounts to 251,328 tons. Of the total tonnage given as being under construction in the world, excluding vessels the construction of which has not been actually commenced and also all vessels of less than 100 tons, 2,010,912 tons are under the inspection of the society's surveyors, with a view to classification in Lloyd's Register book.

### NATIONAL RAILWAY APPOINTMENTS

It was recently reported that Hon. Phillipe Paradis was proposed as a member of the new board of directors of the Canadian National Railways. His appointment was urged by Quebec interests, obviously for political reasons. In this connection the London 'Free Press says:

"The news from Ottawa and Montreal that Hon. Phillipe Pardis is likely to be placed on the new board of directors of the Canadian National Railways is most disconcerting and discouraging. Mr. Paradis has been for years a political organizer of the Liberal party in Quebec and a dispenser of patronage. If he is named a director, it means that the board of business men, who have been running the Canadian National as a business proposition, have been dismissed to give place to a board of politicians. All the good work of the Union and Meighen governments to build up a public-owned railway system will have been lost if the patronage-mongers are given license to meddle with the operation of the railways. The 'trial' which Hon. W. C. Kennedy has promised the system will end in spedy disaster."

Such an appointment would be widely at variance with the principles laid down in various official statements, that the operation of the Canadian National should be free from political influence.

# *Personal*

JAMES G. WILSON, manager of the St. Lawrence Underwriters, is back in Toronto after several weeks in the Old Country.

JOHN BRACKEN, president of Manitoba Agricultural College, has been offered and has accepted the leadership of the United Farmers of Manitoba, the party which has just been returned to power in the province. Mr. Bracken is only 39 years old, and will be the youngest man ever to be a provincial premier, with the exception of the late Sir Richard McBride. He was born and raised on a dairy farm in the county of Leeds, Ontario, and while he was still in his teens became warden of the county. After four years of farm management Mr. Bracken took the B.S.A. course at the Ontario Agricultural College, and graduated with honors, taking three scholarships and one proficiency medal. Very shortly after graduating Mr. Bracken went to Manitoba as representative of the Dominion Seed Branch. On the formation of the Province of Saskatchewan in 1905 he was invited to take the superintendence of institutes and fairs, and, after two years, combined with that work the position of Live Stock Commissioner. When the University of Saskatchewan was opened he accepted the Professorship of Field Husbandry, having supplemented his work at Guelph and his practical training with a year of post-graduate work in United States universities.

S. R. NOBLE, general inspector of foreign business for the Royal Bank, has returned to head office in Montreal after spending the winter and spring in Cuba.

ALLEN CAMERON, former superintendent of the Lands Branch of the Canadian Pacific Railway, department of national resources in Calgary, has been appointed Oriental manager of the Canadian Pacific with headquarters in Hong Kong.

# *Letter to the Editor*

### MANITOBA PUBLIC ACCOUNTS

Dear Sir:—

In your issue of the 21st. inst., I notice an item under the heading "Manitoba Public Accounts" which reads as follows:—

"Report of a special audit of Manitoba Government finances made by a firm of chartered accountants to the Provincial Treasurer on July 11 states that the actual deficit for 1921 was $30,000 less than the amount stated by Hon. Edward Brown in his Budget speech, to be $765,486."

The amount which you mention is slightly in error as the deficit for 1921 was $601,034 and the deficit for the seven years of the Norris administration, which is the item which the auditors in question (Messrs. Price, Waterhouse and Co.) confirmed was $565,468. Of this amount, $448,718 was incurred by our predecessors in office during the first six months of the year 1915, so that the net deficit of the present administration during their seven years of office is $116,750 as at the 30th of November last.

It should be further borne in mind that at the date in question there was outstanding in deferred revenue and not taken into account $776,701 and further, during the present Government's term of office, there has been invested in prime securities, $1,081,000 arising out of the sale of provincial assets, which amount under the late Government would have been treated as ordinary revenue. This investment is a result of the enactment of the Capital Revenues Bill of 1918 and forms part of the $15,000,000 in cash and securities held in uor own Treasury as at the date heretofore mentioned.

I would feel greatly obliged if you would give this correction publicity in your next issue.

Yours truly,
Edward Brown
Provincial Treasurer
Winnipeg, July, 27, 1922.

### GAIRDNER, CLARKE AND CO.

Gairdner, Clarke and Company, bond dealers, have moved their offices to 130 Bay St., Toronto.

### IMPERILING TRADE WITH CANADA

(From "Trust Companies")

The stupid and ostrich-like attitude of the "farmers' bloc" in Congress threatens to seriously break down the mutually satisfactory trade relations which have been preserved for many years between the United States and Canada. Because of the Emergency Tariff which has virtually cut off the American market to the Canadian farmer, the Canadian Government has put into effect a new fiscal policy which will unquestionably result in diverting Canadian purchases from our country to other markets which recognize the wisdom of the axiom, "Where you sell there you must also buy."

The handwriting is already on the wall, and unless Congress approves the principle of reciprocity in dealing with our northern neighbor, we shall have to reckon with the loss of important markets in Canada. The folly of this is quite apparent when consideration is given to the exceptional opportunities for developing closer commercial and financial relations with Canada. The Canadian Government and people have been most friendly and willing to enter in reciprocal arragnements, but the "farmers' bloc" in Congress has compelled Canada to adopt a policy in which it is entirely justified. Heretofore Canada has obtained 75 per cent. of its imports from the United States, but the tendency of Canadian trade with the United Kingdom and other countries already shows that our business with Canada is rapidly slipping away In 1920 Canadian imports from the United States were six times greater than from Great Britain, and in 1922 they were only four times greater. In 1921 Canadian exports to the the United States were 250 millions more than to Great Britain. In 1922 Great Britain is Canada's chief foreign customer. This change must be attributed entirely to the artificial barriers created by our Congress.

Canada seeks closer financial as well as commercial ties with the United States. American investors have shown an increasing aptitude for Canadian investments. Banking relations between the United States and Canada have been rendered much more intimate by the consequences of the war. With our dominant creditor position, and considering geographical proximity, there is every reason for adopting a more enlightened trade policy toward Canada, as expressed recently by the Executive Council of the American Bankers' Asosciation, as follows:

"We declare our faith in the value of a closer community of interest between the United States and our great neighbor, Canada. These two countries constitute the greatest geographical union of English-speaking people in the world. There is a natural unity of purpose, unity of nolitcial ideals, and unity of business interests between the two peoples that should be emphasized rather than obscured by the border lines between them. We bespeak from American business, American banking and the American public the continued development of friendly relations between the two nations."

Congress should also give immediate attention to objections of Mortgage Loan Associations of Canada which protest against the Denison Blue Sky Law now under consideration in Washington, on the ground that it unfairly discriminates against first mortgages on Canadian farms. Free flow of capital as well as unhampered commercial relations with Canada must be encouraged.

### AMERICAN BANKERS' ASSOCIATION

A Committee on Canadian Relations has been appointed by President Thomas B. McAdams of the American Bankers' Association pursuant to a resolution of the Administrative Committee of that organization adopted as a result of its recent visit to Montreal. Conferences were held there with representatives of the Canadian Bankers' Association with a view of bringing about close co-operation between banking in the United States and the Dominion.

The committee, as named by Mr. McAdams, is as follows: David R. Forgan, President the National City Bank, Chicago, Ill.; Daniel G. Wing, President the First National Bank, Boston, Mass.; E. C. McDougal, President the Marine Trust Company, Buffalo N.Y.: Frank W. Blair, President the Union Trust Company, Detroit, Mich., and W. D. Vincent, President the Old National Bank,Spokane, Washington. It is expected that a committee will also be appointed by the Canadian Bankers' Association to consider with the American committee commercial and financial matters of common interest between the two countries.

# Western Crops Suffer From Drought

## Edmonton District and Some Parts of Saskatchewan Were Short of Moisture at End of July—Manitoba Crops Recovered from Hail Damage, and Rye and Barley Harvesting is Under Way

Crops are suffering for the want of moisture throughout the Edmonton district and in all territory as far south as Red Deer and north beyond Peace River and Grand Prairie, according to a general survey of present conditions made by the Edmonton Journal's correspondents in all sections. There will be more than an average crop in the most favored districts, while in others farmers have already become reconciled to the thought that if they can garner fifty per cent. harvest they will be lucky. Rain is needed everywhere both for hay and grain crops.

Reports from the Peace River country and the stretch of rich territory around Waterhole, Spirit River and other points, predict a shortage in the general hay and feed yield. The natural growth of grasses in the north this year, which hitherto has neve been known to fail, is standing short and listless, due to the excessive heat and dryness during the past few weeks.

To the East of Edmonton and in some of the districts south, a few slight showers were enjoyed at intervals during the past ten days. But these, the correspondents say, came too late to be of any material assistance. Rain in soaking quantities, if it came immediately, might prove a salvation. It would do good, without doubt, and perhaps would mean the turning of harvests from a point almost nearing the border line of failure to that nearing an average yield.

### Southern Alberta

The Calgary Herald's seventh crop report from its correspondents in various sections in southern and central Alberta is altogther very encouraging and in line with that of the Grain Growers' latest returns. Rye-cutting has commenced in the Lethbridge and Taber districts and it is expected that as much as 4 bushels to the acre will be harvested in the first mentioned locality. It is stated that there is difficulty in securing harvesters at $3 a day.

At Cardstone the crop is 25 per cent. better than in 1921. Throughout the south, conditions remain most favorable, and in a number of centres there is sufficient moisture to carry the crops to maturity. Carmangay is figuring on a yield of 15 to 25 bushels, while Lacombe is figuring on 20 to 30 bushels to the acre, and from 15 to 30 bushels at Duchess.

A favorable crop report for the Province of Manitoba was issued by the Provincial Department of Agriculture on July 24. Correspondents in many districts comment that the outlook is the best since 1915. Wheat harvesting is expected to commence about August 1, with the general date about August 10. The crops appear to be ripest in the eastern side of the Province. In the Emerson and Morris districts harvesting will begin almost ten days earlier than in the southwestern parts of the Province. Considerable fall rye has been harvested, and barley cutting is expected to start before the end of the month. Crops which suffered from hail damage in June, especially coarse grains, have made a remarkable recovery.

According to the weekly crop report issued by the C.P.R., in Saskatchewan the weather has been clear and warm, with no rainfall over any portion of the Province. From Saskatoon west to the Alberta boundary the crops are suffering severely from the long-continued drouth. Rain is also badly needed in many districts between Regina and Colonsay and Macklin, south of Outlook, as well as in scattered sections east of Bulyea. Other parts of the Province, central southern in particular, are in a favorable condition.

There have been light showers in the northern part of Alberta and locally around Macleod. Districts at present in need of rain are Calgary to Edmonton, east from Lacombe and Westaskiwin to Saskatchewan boundary, Medicine Hat to Bow Island and Medicine Hat to Tilley. The west of the large southern area has received ample rain, and present indications promise a crop approaching, and in some districts even exceeding, that of 1915. Some local losses, particularly between Lomond and Suffield, are due to cutworm, but the Dominion entomologist states this pest is much less evident than last year. The alfalfa crop, on the other hand, is good, rye harvesting is now general, and wheat practically all headed out.

### Saskatchewan Crop Reports

Drought conditions continue to cause anxiety in many districts of Central, West-central and North-western Saskatchewan. No rain has fallen during the present month and crops are suffering for want of moisture. The wheat crop is headed out with short straw and small heads and in some cases tip burn has been noticed. The only crops that give any promise of an average yield are those of well worked summer-fallow, even these, if rain does not come within a few days, will fall below the average. Oats in general are a light crop.

In the southern areas (crop districts 1, 2, 3, 4) conditions are better, although rain would be welcomed. Crops in these districts are more promising than has been for years and with suitable weather should give at least an average crop. Rye cutting has commenced in all parts of the province and promises a good yield. This crop is coming well to the front as one of the leading grains and a large increase in the acreage is estimated for this year. Haying is in full progress and a good return is looked for, especially in the southern areas.

Flax, being a later sown crop is suffering from the drought and this is expected to be below the average.

In summarising the present conditions, it is felt that rain would in many cases save much of what otherwise would be a complete failure, if received within the next few days.

### Bank of Montreal Report

In its latest crop summary the Bank of Montreal says:—

Crop prospects in the Prairie Provinces on the whole are satisfactory, unfavorable conditions in some districts being offset by promise of good yields over large territories. In Ontario warm, clear weather for ripening and harvesting is all that is needed to ensure bumper crops. All crops in Quebec and Maritime Provinces are making excellent progress. In British Columbia the drought has been partially broken by local rains, but field crops are below average, while fruit is fair to good.

### Prairie Provinces

Edmonton District.—Wheat headed out. Straw short. Crop below average. Rain urgently needed. Light hay crop. Calgary District.—Light crop expected northern section. Conditions favorable southern section where average crop practically assured. Lethbridge District.—Southern section conditions favorable. Wheat heading well. Pasture good. Hay fair. Rye being harvested. Northern section.—Oats will only make feed. In vicinity of Bow Island and Medicine Hat prospects only fair. Rain required badly. Only seed and feed expected at Macleod. Saskatoon District.—Dry weather has continued and wheat generally will be a short and light crop. Coarse grains and stubble wheat particularly poor. Regina District.—Rye cutting commenced and good yields expected. Rain needed for wheat and coarse grains, but indications still point to fair average crop. Conditions best in southern part of district. Winnipeg District.—Crops in Manitoba, except south and west of Brandon, good. Rye harvesting general and wheat cutting will commence in week or ten days.

### Province of Quebec

Recent favorable weather has been very beneficial to all crops. Cereals are looking well. The hay crop everywhere is reported good and is now being harvested under favorable conditions. Root crop and grass pasture are in good condition and doing well.

### Province of Ontario

Fall wheat nearly all harvested—good yield of excellent quality. Spring wheat, barley and oats ripening fast—little evidence of rust, good crops assured. Rye cutting has commenced—good crop. Corn in good condition, promises an average crop. Most fruits above average, but apples only fair. Roots very promising. Pasture everywhere in excellent condition.

### Maritime Provinces

New Brunswick and Prince Edward Island—Weather favorable for all crops and prospects look good. Nova Scotia—Recent rains have interfered with haying and fine weather needed for root crops. Conditions for apple crop continue favorable.

### Province of British Columbia

Drought still general though local rains reported at Vernon, Ashcroft and Kamloops. Haying completed—crop very light, but good quality. Pasturage conditions very poor. Grain being cut for feed. Grain half average crop, heading out rapidly, but short in straw. Hops in good condition. Roots showing effect of drought. In the Okanaga Valley apple thinning is well under way—expect Duchess crop to move second week in August. Stone fruits ripening well. Cherry shipment tonnage slightly over last year—quality good. Fall wheat is being cut, crop light. Fraser Valley apples and pears good average. Stone fruits fair. Small fruits much below average.

---

# PLANS LAID FOR INSURANCE CONFERENCE

## All Sessions Will Be Held in Vancouver—Commissions on Uniformity of Legislation Also Meeting

(Special to The Monetary Times)

Vancouver, July 29.—The annual convention of the Association of Superintendents of Insurance and Canadian Fire Marshalls will be held in Vancouver on August 9 to 12 inclusive. The delegates originally planned to hold part of their sessions in Vancouver and part in Victoria but owing to the Commission on Uniformity of Legislation having decided to hold all its sessions here at the same time, the superintendents changed their plans and will not convene in Victoria. All sessions will be held in the Court House at Vancouver.

A joint committee composed of representatives of all local insurance organizations, acting with Superintendent J. P. Dougherty, has arranged to provide entertainment for the visitors, including an auto trip to the Capilano Canyons and dinner at the Hotel Capilano on the evening of August 9th and another automobile trip around the Marine Drive and Shaughnessy Heights on the afternoon of Aug. 10, to be followed by a dinner at the Hotel Vancouver, at which motion pictures of British Columbia industries and wild life will be shown.

V. Evan Gray, superintendent of insurance for Ontario, will address the members of the Vancouver Association of Life Underwriters at a luncheon to be tendered him on Friday, Aug. 11, at the Hudson's Bay dining room.

The conference sessions will probably be opened by an address from Attorney-general A. M. Manson. The agenda covers a comprehensive range of subjects, including consideration of a model fire insurance and a model life insurance act. The sessions will be open to the public.

The visitors will attend the Kiwanis Club luncheon on Thursday August 10.

The committee having in charge the entertainment features of the conference includes: Messrs. W. A. Lawson, J. Cecil Stuart, J. F. Noble, J. P. Dougherty, N. T. Truell, Thomas Paradis, Charles Dickens, C. A. Macmorran, George L. Schetky, J. A. Birmingham, H. J. Cave, J. A. Young and others.

---

# TWO WILLS OF SAME PERSON

The Quebec Superior Court has recently granted the petition for probate of a will although a former will of the testator had already been granted. Justice Bruneau in deciding the question says: "Considering that there is nothing in our law which prevents two wills of the same person to be probated, specially if they are not inconsistent with each other; that the object of the probate is to give authenticity to the copies of the will after summary proof is adduced that the formalities required by law for the making of a will have been fulfilled, without however pronouncing upon the validity of the document; Doth grant probate of the said last will of the said late Thomas Lovett, senior, dated January 2, 1917 and doth hereby order that the said will be deposited in the archives of the said Superior Court at Montreal and be registered in the register of probates of the said court."

# The Rights of Minority Shareholders

(Contributed.)

When an indignant shareholder in a company finds himself in disagreement with the majority of his fellow shareholders, what remedy has he?

Primarily his remedy is to sell his holdings and thus relieve himself of a real or embarrassing situation. But very often to sell means financial loss—perhaps not in capital but in real or patential earnings. What then can the shareholder in disagreement and in minority do? His other remedy is by recourse to the Courts in order to enforce his desired rights.

But it is only in extreme instances that the Courts will interfere in the internal affairs of a company on the application of a minority of shareholders. A minority in the ordinary, usual course, cannot and does not speak as or for the company—if any wrong is done to the company it is the company which must sue and not the individual shareholders.

### Cannot Overrule Majority

In an English case on this subject Vice Chancellor Wigram explains the matter thus: "If the act (which one or a minority disapprove) be one which a general meeting of the company could sanction, a bill by some of the shareholders on behalf of themselves and others to impeach that act cannot be sustained because a general meeting of the company might immediately confirm and give validity to the act of which the bill complains." Which means in short that the Court has no jurisdiction to interfere.

Nor on account of a mere irregularity in proceedings can be the Court interfere on the complaint of a dissatisfied shareholder. In one case, on a motion for adjournment of a general meeting, the chairman declared the motion carried. A poll was demanded but the chairman said there could be no poll on such a motion and left the room. One of the shareholders sued on the ground that the course taken by the chairman was taken to prevent discussion. In the judgement it was said: 'Looking to the nature of these companies and that they are not all lawyers who attended those meetings, nothing can be more likely than that there should be at times some thing more or less irregular done at them. Now if that gives a right to every member of the company to file a bill to have the question decided, then if there happens to be one cantankerous member, everything of that kind will be litigated; whereas if the bill must be filed in the name of the company, then unless there is a majority who really wish for litigation, the litigation will not go on. Therefore, holding that such suits must be brought in the name of the company, does certainly tend to stop litigation."

### Exceptions to the Rule

The exceptions to the rule that the Courts will not interfere in the internal management of a company are two: (1). where the act done or proposed to be done is beyond the powers (Ultra vires) of the company; (2) where there has been fraud or where the majority of a company propose to benefit themselves at the expense of the minority.

With regard to the first exception, it may be stated that notwithstanding the very wide powers conferred on Ontario Companies, it yet remains true that the company is confined within the powers stated in its charter—it being possible for the company under the Act to enlarge those powers by supplementary Letters Patent. But it is confined within its stated powers and until the Supplementary Letter Patent are obtained ultra vires acts are quite possible. And if an act ultra vires the company it is obvious that the Court can interfere and force the company, on the application of a minority, either to desist or to enlarge its powers to the desired object in the regular manner.

As to fraud, it is not fraud for a shareholder or a majority of shareholders to carry a resolution in their favor where they have an interest in the subject matter of the vote. In one case for example, a resolution of a general meeting to purchase an article at the vendor's price was held to be valid, notwithstanding that the vendor himself held the majority of shares in the company. But on the other hand, the Court will interfere where the majority of a company propose to benefit themselves at the expense of the minority. To give the minority a cause for action the majority must abuse their powers so as to deprive the minority of their rights and confiscate their interests.

With the above limitations, it may be said that the rule that the Courts will not interfere in the domestic or internal questions of the management of a company is invoilable.

---

## BANK OF NOVA SCOTIA STOCK

The Bank of Nova Scotia is making a small issue of new capital stock to the amount of $300,000. At present the issued and paid-up capital of the bank is $9,700,000 and the proposed new stock will bring the capital up to around $10,000,000, the reserve fund being $19,465,000. Notices are being sent out to the shareholders offering them the new issue in proportion to their holdings at a price of $255 a share. Issues of capital stock of the Bank of Nova Scotia in the past have been allotted as follows: Previous to 1898, $1,500,000; allotted December 28, 1898, $225,100 at 210; December 6, 1899, $104,900 at 220; February 25, 1901, $140,000 at 230; January 3, 1905, $340,800 at 260; December 1, 1905, $159,200 at $265; February 21, 1906, $500,000 at 268; December 13, 1910, $1,000,000 at 268; July 31, 1912, $1,000,000 at 240; capital of the Bank of New Brunswick, February 15, 1913, $1,000,000 issued to shareholders of Metropolitan Bank, November 16, 1914, $500,000; issued to shareholders Bank of Ottawa, May 1, 1919, $3,200,000; total outstanding at present time $9,700,000.

The new issue bears the relation to the outstanding stock of one to every 32 1-3 shares, and the new stock is being offered to shareholders on this basis. The shareholders have the option of buying the new stock at the offered price in the proportion named during the next 90 days.

The communication addressed by H. A. Richardson to the shareholders reads:—

"I beg to advise you that the board of directors have decided to issue three thousand shares of the authorized capital stock of the bank of the par value of $300,000, thereby increasing the paid-up capital from $9,700,000 to $10,000,000. The Bank Act requires that the new shares be allotted to existing shareholders pro rata, but that no fractional shares be issued. As there are 3,000 shares to be allotted, as against 97,000 already paid-up, allotment will be made in the proportion of one share of the new to every 32 1-3 of the old; notices of allotment, therefore, are being sent only to holders of 33 shares and upwards, who under the Bank Act are entitled to 90 days in which to take up or decline the allotment.

"As soon as that time has expired there will be available a certain number of shares of the new issue arising from fractions of shares unallotted and from allotments declined, and it is the present intention of the directors to offer those to the public. A further communication will be sent the shareholders in due course giving them an opportunity to acquire shares of the issue remaining after allotment. In the meantime those shareholders who are not holders of 33 shares to entitle them to any of the new issue on allotment, but who may desire to purchase shares, are requested to communicate with the secretary to the board, the Bank of Nova Scotia, Halifax, who will record their applications.

"I beg further to intimate to shareholders that this new issue is being made primarily to bring the bank's capital up to an even $10,000,000 from the odd amount of $9,700,000 at which it now stands, rather than to provide additional working capital. It is to be expected, however, that as the business of the bank develops, further new issues may be made for the purpose of providing additional capital, and all shareholders will have an opportunity of participating in those issues."

---

## ROYAL BANK LOSES ON NOTE

### Debt to Northern Crown Bank Was Expired by Statute of Limitations, According to Court's Decision

In a recent action upon a promissory note, between the Royal Bank and one Anderson, an interesting application of defence by Statute of Limitations was used. The note was for $1,195, and was payable on demand after date to the order of the Northern Crown Bank. On May 23, 1916, Anderson wrote a letter to the manager of that bank, referring to the note and saying, "I will exert myself to the utmost to raise sufficient money during the next few months to be able to make payment of $600 which you advise me will be accepted by the bank as payment in full of the note held by the bank and signed by my mother and myself." In answer to this an officer of the bank wrote on May 25, 1916, to Anderson saying, "While the bank would be prepared to take say $600 in payment for this debt, this offer is only made on the condition that a real effort is made to pay us, say by next August."

The payment of $600 was not made and no payment even was made on account. In 1918 the Northern Crown Bank assigned its assets to the Royal Bank which brought action, Anderson setting up as defence the Statute of Limitations.

### No Acknowledgment of Debt

The learned judge said that a debt may be taken out of the operation of the Limitations Act in three ways, one of which is by an acknowledgment of the debt from which a promise to pay is implied.

It was argued that the statement in the letter of Anderson, "the note held by the bank and signed by my mother and myself," was a "simple acknowledgment" of the debt. But the learned judge did not agree—it seemed to him that these words were a description of the note concerning which the letter was written.

It could not in any event be said that the statement concerning the note was such a statement that a promise to pay it could be implied from it, when Anderson in the same letter spoke of an effort on his part to raise a sum, much less than the debt itself, to wipe out the debt. There was no promise by Anderson except to do his utmost to raise the $600. The old debt is gone and "the new promise and not the old debt is the measure of the creditor's right."

It was admitted that Anderson used every effort to raise the money and his defence succeeded.

---

## *Unlisted Securities Market*

In their report on the Unlisted Market of last week A. J. Pattison Jr. & Co. say that while trading was light and limited to small transactions the public interest continues to grow and almost entirely on the buying side. Offerings now obtainable are those which have hung over the market for months at figures far above the then bid prices. The market has now moved up to a point where weak holdings are constantly being absorbed and as a whole the general list was never in better position to advance materially higher on any increase in public interest.

Mattagami 6% Bonds and Debenture stock were in demand at slightly increased figures. Whalen Debentures held firm at 63-66. The recent gain in both the Whalen and Mattagami securities is rumored to be based on the general improvement in the pulp and paper industry, which, should conditions continue as at present, will place the two companies in an excellent position. The oil stocks lacked interest, Imperial remaining unchanged at 111-114, International Petroleum easing to 20½-21½ and Mutual to 8½-9½. Offerings of King Edward Construction Preferred which were not absorbed narrowed the quotation down to 75½-78. Cuban Sugar Preferred gained 2 points to 29¼ bid none offered. Howard Smith Paper 7's eased slightly to 94-95 without creating interest. Spanish River 8's also weakened to 100½-102. Dominion Power and Transmission Preferred was in some demand while the common firmed up at the close of the week to 22¼-23 after changing hands at slightly lower figures. Durant Motors were somewhat active at 9¼-10. Massey-Harris continues in demand at 56-59 and appears to be headed for materially higher figures. Cockshutt Plow Preferred remains unchanged at 44-45¼, a large block of stock from London still overhanging the market which was of too limited a character to absorb it.

# Judicious Financing

Whether you are engaged in agricultural, manufacturing, industrial or merchandizing pursuits, your prosperity depends primarily upon the judicious handling of finances.

This Bank offers you a constructive, stabilizing service, coupled with competent advice, and is willing to foster enlargement on safe lines.

Make a banking connection conducive to sound growth. Consult our local manager.

# Canada's Interest in the Coal Strike

By A. B. BARKER.

The coal bins in this part of Canada will be harder to fill than ever this winter, as, thanks to the strike in the United States, the commodity will be scarce and dear. The dispute is apparently over wages, but the question is involved in such a mass of technicalities that none outside the industry, and only a few in it, really know the rights and wrongs of the matter. So far as the rank and file of the men and the small mine operators are concerned, they are as a rule merely pawns in the game, and have little influence one way or another, the big operators and the executive of the union being the real antagonists in the war.

### Responsibility is Divided

It is said that the blame for strikes in mines may be fairly divided between men and owners. It is comparatively easy to bring on a strike if one side or the other considers such action necessary. In the Rossland district about twenty years ago there were two strikes, one lasting two months and the other four. The first one was generally admitted to have been the work of the Western Federation of Miners, whose executive in the United States wanted to control the situation in the British Columbia mining districts.

The Rossland mines were heavily overcapitalized, and had been shipping ore at the expense of their reserves, so that for the time they were more or less "gutted." The Union knew this and figured that under the circumstances the owners could not afford to have a showdown, particularly if they were contemplating the flotation of other properties. Their reasoning was faulty as the mines had decided to fight and struck first. For one reason or another the mines were closed down for a time, and when they opened again it was under the contract system. This was accepted after considerable delay and struggle, and as a result the men's pay was increased a dollar a day but running costs were much reduced. Under the new system the output rose from 3½ to 14 tons per shift per man. This lasted for a year with unusual satisfaction when, it is said that as a spectacular operator in London the head of one of the mining companies had to have an excuse for not paying dividends, a strike was engineered. An excuse was found—it was claimed that some of the union leaders were parties to it—and a vote of the men was taken. Even then the majority was not sufficient under the rules, but a strike was called in spite of this, and the men in the other properties were called out in sympathy. The strange thing about it all was that, although the strike was illegally called, the local unions had not the power to call it off without permission from the headquarters in the United States. In this case the Canadian end of the International body was like the tail of the dog, which could only express the feelings of the animal. It was galling to Canadians, of course, that an outside body could dictate terms under which mining operations might be carried on in Canada, but that was the situation. From this standpoint of the rank and file of the Unions an independent stand was impossible as they dare not run the risk of being "scabbed" when, in the ordinary course, they might have to seek work in an American camp, and this would be out of the question if they could not show that they were in good standing in the Union.

### Our Interest in the Strike

Canadians therefore have a very real interest in the coal strike in the United States, not only because a large part of Canada is dependent for its coal supply on American mines, but because the Canadian Unions are under the jurisdiction of the international body, and may be drawn into the fight.

A new element has been introduced by a recent decision of the American Supreme Court, under which the funds of the International Union may be attacked in case of a successful suit for damages, and a movement is now under way to abolish the authority of the central body in regard to local strikes in order to avoid this liability.

## FIRE INSURANCE BROKERS' ASSOCIATION

### A. McBean Elected President at Annual Meeting Held Recently in Montreal—Protects Business of Agents and Brokers

At the annual meeting held recently of the Fire Insurance Brokers' Association of Montreal, the following officers were elected for the ensuing year: President, A. McBean; vice-Presidents, R. P. Adams and A. L. Gagnon; directors, M. J. Cairns, G. G. Fox, H. V. G. Johnson, E. J. Langlois, Walter Miller, J. F. Parisien, Pemberton Smith, A. H. Shorey, T. L. H. Saunderson, and George Tanguay.

Committees:

Executive:—A. McBean (chairman), A. L. Gagnon, R. P. Adams and W. G. MacKenzie.

Legislation:—J. F. Parisien (chairman), J. A. Savard, P. W. A. Burket, Walter Miller, Geo. Tanguay, T. L. H. Saunderson and O. LeBlanc.

Membership:—H. V. G. Johnson (chairman), G. S. Retallack, S. L. Barnard, G. Ross Robertson, Chas. T. Hare, Alfred St. Cyr, Sr., and P. J. Majeau.

Infraction:—E. J. Langlois (chairman), A. H. Shorey, Pemberton Smith, T. L. H. Saunderson, G. G. Fox, and J. J. Marchand.

Luncheon:—M. J. Cairns (chairman), W. Davison, J. M. Williams, J. J. Marchand, and L. P. Normandin.

Publicity:—A. A. Hanna (chairman), Geo. Tanguay.

General Agents Committee:—J. M. Morris (chairman), C. H. Hanson, Geo. W. Pacaud, Geo. Lyman, Jos. Rowat, H. S. Angus, Trevor A. Evans.

Agency Appointment Committee:—R. J. Wickham (chairman), Geo. W. Pacaud, R. L. Charlton, J. A. Savard, P. W. A. Burket, and F. A. Jennings.

In accepting the chairmanship, Mr. McBean said in part:—

"When this Association was first organized, the managers hesitated to support the movement, as they did not know where it might lead to, but now they are beginning to recognize the fact that after all this Association is simply fighting for what is right, in protecting our business and trying to raise the standard of the insurance broker and agent, who after all are the men the public principally judge the insurance company by as a whole, and the present practice of appointing any person an agent, whether qualified or not reflects on every man in the insurance business, and such conditions men who are making a study and profession of the insurance business, and such conditions should not be allowed to continue.

"There is no doubt that this Association is a necessity. We have had enough evidence since it was organized, that if we were not united, and were not putting up a fight our business would be raided by all sorts of organizations, that we know have no right in the business, and would eventually take our livelihood from us, and I know that I am expressing the feelings of all members, when I say that the organizers of this Association are entitled to our thanks for their foresightedness."

---

## VICTORIA AND DISTRICT FIRE AGENTS

### Third Annual Meeting Held Recently—William S. Day Elected President—Plans of National Organization Described

The Victoria and District Fire Insurance Agents' Association held its third annual meeting on July 12. William S. Day was elected president, with Mr. J. C. Bridgman as vice-president. The executive committee will consist of L. U. Conyers, S. Clegg, A. A. Meharey, C. R. Bishop and Russell B. Kerr. Mr. F. Boiston was reappointed auditor.

D. W. Campbell, retiring president, pointed out that Victoria enjoys the lowest rates of any city on the continent.

Hon. John Oliver, premier of the province, was also a speaker at the meeting.

G. L. Schetky, former president of the Vancouver Fire Insurance Association, told the gathering that the aim of the Canadian Fire Insurance Agents' Association is to have an agents' organization in every city in each of the provinces, not with the idea of fostering selfish ends, but to create great co-operation between the agents and enabling the insurance men to better serve the public.

The speaker strongly advocated the licensing of fire insurance agents in British Columbia, declaring that such a step would raise the standard of the profession as well as assist in the reduction of fire losses, for a good agent is also a fire prevention officer, Mr. Schetky said that the organization desires the agents to be licensed by the Government under a qualification test, the examinations for admittance to the profession to be set by the Government. "By such legislation the profession will be protected against the malpractice of the pirate, the man who writes insurance and doesn't know his business. Of the nine hundred fire insurance agents in the Province, I believe that forty per cent. of them do not know the meaning of insurance, while another twenty per cent. could not write a policy correctly. The public is also entitled to protection, and such a move would be a step towards righting conditions in British Columbia. Only when the agents are licensed will the public appreciate the fact that we are not pirates, robbers or sharks, but that we are giving genuine service and occupy a necessary place in the body political," the speaker continued.

---

## WILL INSIST ON PREVENTIVE MEASURES

### Government Proclaims October 9th as Fire Prevention Day, and Enjoins Citizens to Clean up

Because of the great loss of life and property damage by fire during the past decade, the Dominion Government, by proclamation, is calling upon all citizens to exercise special care and to observe October 9 as fire prevention day. According to the proclamation, citizens will be required to inspect their dwellings and remove all conditions likely to cause fire. The inspection is also to be applied to factories, public buildings, ware-houses, theatres, hospitals and other institutions. The proclamation recommends the holding of fire drills in the schools and for the employees of all large stores and factories.

Special instruction in fire prevention is recommended to be given by school teachers, municipal officers and Boy Scout leaders.

### Forest Areas

In the bush, operators of lumber camps, settlers, campers and hunters will be required to acquaint themselves with the regulations governing the prevention of fire. There is also a recommendation that all legislation and regulations dealing with fire prevention be given proper publicity.

The preamble of the proclamation sets forth that during the past decade more than 3,000 persons lost their lives in fires, and that during the same period insurable property in excess of $250,000,000 was also destroyed. During 1921 fire losses in Canada reached the unparalleled total of $45,000,000. In addition to this recorded waste of human life and created resources, says the proclamation, forest fires annually destroyed merchantable timber forest many millions of dollars and immature forest growth of inestimable potential value, thus adversely affecting one of Canada's most important branches of industry, depleting out natural heritage of forest wealth and impoverishing, if not entirely destroying, the future productiveness of large forest areas.

## LADY BECOMES CHARTERED ACCOUNTANT

Miss F. Eulalie Herkin, of Lockeport, N.S., recently passed the final examinations of the Institute of Chartered Accountants of Canada, the first lady to accomplish this. Another Nova Scotian, Miss Christena Ross, of New Glasgow, is said to have been the first lady chartered accountant in the United States.

Are You Master of Your Business

or is your business master of you?

Many business men have entrusted to this Corporation the care of their *personal* property, collection of interest, dividends, rents, investment of funds. Relieved of these duties, they have now more time to spend with their families and for necessary recreation. They have become in a real sense the masters and not the slaves of business life.

Can we furnish you with a similar service? It is fully described in our Booklet *"Your Financial Agent."* Send to-day for a copy.

Claims were £203,353, and expenses £141,135, leaving a balance of £482,988 carried down. The balance sheet shows assets totalling £3,300,757, of which investments comprise £2,513,494, cash £274,253, and accounts due the company £469,895. The liabilities are as follows: Capital, £804,000; reserve fund, £1,000,000; balance profit and loss, £223,432; balance underwriting account, £482,988; underwriting suspense and re-insurance accounts, £403,803; accounts due by the company, £386,532.

In the profit and loss account there was a balance of £298,504 from 1920, and the balance of £622,861 from the underwriting account of that year was added, along with £101,429 from the 1921 interest account, making a total of £1,022,795.

After paying claims on account of 1920, dividend, etc., there remained the balance of £223,432 previously mentioned.

The company, which was organized in 1863, has been in the Canadian field since 1888. The chief agent here is Robert J. Dale of Montreal. Inland transportation and sprinkler leakage are the lines written here.

## ALLIANCE ASSURANCE CO., LIMITED

The Alliance Assurance Company, Limited, of London, England, which was established in 1824, has now completed 30 years of business in Canada. The chief agent here is Thomas D. Belfield, Montreal. The 1921 report of the Alliance shows that 3,412 life policies were written, bringing in new insurance of £2,016,887; the net new premiums in respect of this business were £87,973. The total premium income of the combined life account, after deduction of the premiums paid for re-assurance, was £1,175,105. The combined life and annuity funds at the close of the year amounted to £18,171,302.

Premiums in the sinking fund and capital redemption account were £65,760, and the fund at the close of the year had increased to £955,362.

The fire premium amounted to £1,966,478, a slight increase over 1920. Paid and outstanding claims were £966,849, and expenses and commissions were £899,541. After adjustment of the reserve for unexpired risks, a sum of £191,198 was transferred to profit and loss account. The fire insurance fund at the end of the year amounted to £2,286,592.

In marine account the premium income amounted to £550,819, showing a considerable decrease as compared with the previous year. Claims were £855,452, of which £172,117 was in respect of the underwriting account for 1921 and the balance in respect of previous years. The underwriting account for the year 1919 has now been closed by setting aside £100,000 as provision for further claims of that year, leaving a surplus of £57,463, which has been transferred to profit and loss. The marine fund is now £1,192,110.

In the miscellaneous accounts, including personal accident, employers' liability, etc., the combined premium income was £600,817, being £22,815 over the previous year. An amount of £85,331 was carried to profit and loss and the total funds at the end of the year were £847,519.

The total funds of the company are now £26,793,690. One of the notable features of the 1921 statement is a transfer to profit and loss of £250,000, which had been carried as an investment reserve, this being no longer necessary because of the appreciation of stock exchange securities.

The Alliance has conducted a large business in fire and casualty lines in Canada in recent years. Net premiums in 1921 totalled $714,111 and losses $476,445.

## NATIONAL CASUALTY CO.

Royal assent has been given to the Act incorporating National Casualty Company. The headquarters of the Company will be in Montreal. The capital is $500,000 with power to increase to $1,000,000. The Company will write fire, accident, automobile, sickness, guarantee, and burglary insurance. The general manager of the Company is S. M. Roberts, the directorate being composed of some well known Montreal business men.

(Robert Lincourt) Saint Guillaume d'Upton, County of Yamaska, $45,000.

# New Industries

A new industry known as the Franco-American Company has been established at St. Johns, Que., where they are erecting a large plant, which covers an area of 300 by 200 feet. The company will employ 60 hands at the start and expects to have 200 working within a short time. The company is the first of its kind in Canada, the principal work being dyeing and finishing of all kinds of textiles.

London's newest industry will be Sterilized Egg, Limited, a company which has just been granted a provincial charter for $100,000. It is headed by Dr. A. Roy Routledge and has secured the Canadian rights for manufacture of equipment which it is claimed will keep eggs fresh for two years.

An exemption from taxes for ten years has been granted by the city of Lachine, Que., to the Linde Refrigerating Co. which is to build a plant in that city. The company will commence with a staff of 50 men.

A new company known as Stanley and Aylward, Ltd., will commence the manufacture of silverware at Kingston, Ontario. The company will commence operations immediately.

## BROMPTON'S POSITION

### Liquid Reserve Should Be Built Up, Says Engineer In Special Report

A special engineer's report on the physicial condition of the Brompton Pulp and Paper Company, Ltd., has just been made by R. O. Sweezy, consulting engineer for Greenshields & Company, members of the Montreal Stock Exchange. In a letter to shareholders accompanying the report, the latter firm state that, having been interested in the original purchase of Brompton common stock of the general mortgage 6 per cent. bonds, due 1939, and of the eight per cent. convertible 20-year mortgage bonds, due May 1st, 1941, they have made this independent investigation.

The report is a comprehensive affair, and is going out to shareholders of the company in pamphlet form comprising a dozen pages.

### Earning Power

Mr. Sweezy's covering letter summarized the features of his findings. He says that there is no reason to doubt the company's ability to earn from $1,250,000 to $1,750,000 yearly under normal conditions. At present working capital is depleted by shrinkage in inventory values, but only about half the working capital that was necessary in 1920 should now be ample with raw materials, as they are to-day. The building up of substantial liquid reserve should be the aim of the company during the next couple of years. Taking as a basis figures laid down by the Federal Trade Commission of the United States in 1917, showing Pulp and Paper Mills set down at $50,000, per daily ton capacity for finished paper product or for chemical pulp, Mr. Sweezy allows $40,000 per daily ton of paper instead of 1917 valuation values groundwood at $8,000 per daily ton capacity and makes the following valuations:

| | |
|---|---|
| Timberlands ...... | $10,900,000 |
| 360 tons at $40,000 | 14,400,000 |
| 50 tons at $8,000 .. | 400,000 |
| Total net value .... | $25,700,000 |

# Canada's Trade Still Declines

### Twelve Months' Total is Lower by $718,000,000 from 1921—Imports from Several Countries Increase —Comparison with Figures for Two Previous Years

Canada's trade for the twelve months ending June 30, 1922 shows a considerable decrease from the same period during 1921 and also during 1920. The 1922 total is lower by about seven hundred and eighteen million dollars from the previous year's total, and nine hundred and ninety million dollars from the 1920 total.

Exports to the United Kingdom show a considerable increase over the imports from that country, but on the other hand, exports to the United States show a decrease as compared with the imports from that country. In the import columns there are several increases over the previous year, noticeably among the following countries; Australia, Argentine Republic, Mexico, and Roumania. Imports from British West Indies show a decrease of two million from 1921. Several other countries show a decrease noticeably Cuba, which is down by about fourteen million dollars.

The only large increase in exports was that of Japan, which is up by about ten million. Hong Kong and Mexico show minor increases. Exports to Italy are down by about forty-eight million dollars from the previous twelve months.

A comparison of Canada's trade for the twelve months ending June 30, 1920, 1921 and 1922 is given below:—

**SUMMARY OF THE TRADE OF CANADA**

1.—Imports and Exports of Canada by Main Groups.

| Main Groups | Twelve Months ended June. 1920 | 1921 | 1922 |
|---|---|---|---|
| IMPORTS FOR CONSUMPTION | $ | $ | $ |
| Agricultural and Vegetable Products | 275,667,062 | 232,360,326 | 162,657,774 |
| Animal Products | 98,301,938 | 49,657,622 | 46,405,244 |
| Fibres and Textiles | 284,106,588 | 185,695,449 | 147,418,953 |
| Wood and Paper | 47,270,940 | 53,447,209 | 35,075,002 |
| Iron and Its Products | 209,223,205 | 212,122,473 | 110,837,620 |
| Non Ferrous Metals | 58,289,184 | 47,503,323 | 30,561,182 |

## THE WIRELESS FIELD

The policy of the CanadianGovernment is to get out of the commercial end of wireless telegraphy, to which it was to some extent committed as a war exigency. It will, of course, maintain such wireless installations as are an aid to navigation.

One of the largest wireless stations in Canada, that at Barrington Passage, N. S., will be closed in the near future. This follows en the similar action taken by the British Government with regard to the Admiralty medium power radio station at Bermuda, which was closed on July 1. As a consequence, the commercial service between Barrington and Bermuda has been suspended, and, as the Government has no other use for Barrington, it will be closed. Both were war stations, having been erected in 1915 as part of the chain of naval radio stations extending from St. John's Nfld., to Demerara, British Guiana, Barrington acting as the connecting link between St. John's and Bermuda.

The closing of Bermuda and Barrington marks the termination of the North Atlantic chain of naval radio stations, St. John's, Jamaica and Demerara having been closed by the Admiralty in June. The three radio direction finding stations at Cape Race, Canso and Halifax, erected during the war, will be retained as a permanent part of the "aid to navigation" service of the Department of Marine and fisheries.

## BIG CABLE ORDER

At the meeting of the Ottawa Hydro-Electric Commission held on July 29th, the contract for 23,000 feet high tension cable and 16,000 low tension cable was awarded to the Standard Cable Company of Montreal, at a price of $54,500. The tenders were in bulk and the tender price of the Standard Cable Company was $500 lower than that of the Eugene Phillips Company.

## BUY B. C. LUMBER

Five million feet of British Columbia and not Oregon or Washington lumber has been bought by the Montreal Harbor Commissioners it is announced by Premier Oliver. Reports in San Francisco newspapers stated that the Montreal order was going to American Mills and Premier Oliver immediately took the matter up with Premier McKenzie King at Ottawa.

The result is the message from Premier King saying that the Montreal Harbor Commission has contracted for the purchase of five million feet of British Columbia lumber.

## IRRIGATION CONVENTION

Problems affecting the irrigationist were discussed at the opening session of the 16th annual convention of the Western Canada Irrigation Association in Maple Creek, Sask., on July 27. Much interest was evidenced in the feasibility of pumping water from streams in Western Canada for irrigation purposes. F. W. Hanna, general manager of the Canada Land and Irrigation Company, told the delegates present he had two plants located on the Bow River which irrigated 100 and 170 acres at a cost of approximately $15 per acre. Kerosene and natural gas power is used to operate the pumps.

It was announced that $15 an acre was a cost much too high to be born by any but intensive crops, although cases were reported during the discussion where pumping at $15 an acre had produced crops worth $30 an acre when adjoining fields produced nothing.

An appeal for greater diversity of irrigated crops was made by Don H. Bark, Natural Resources Department, Canadian Pacific Railways.

Immigration problems were discussed by Robet J. Stead, director of publicity, federal Government, and an outline of soil survey as carried on in Saskatchewan was given by Prof. Roy Hanson, of Saskatchewan University.

## NEW AUTOMOBILE PLANT

The Paige Detroit Automobile Company have leased a large factory in Walkerville, Ont., where this fall they will start manufacturing a Canadian Paige car.

## OMNIBUS COMPANY FORMED

The incorporation of the Ontario General Omnibus Company, Limited, at a capitalization of $600,000, is recorded. The head office is to be at Toronto. The incorporation of the company, in addition to giving the incorporators power to control real estate, permits them to deal in motor cars, carry out express deliveries, act as warehouse operators, wharfingers, and to manufacture steam and electric engines. The incorporation also provides that subject to "any statute in that behalf for the time being in force," the company may carry on a business of running motor trucks and omnibuses of all kinds at such 'places as the company may see fit, and to acquire from any municipality, corporation or government any fanchise or right to operate motor trucks or motor busses or vehicles which can or may be operated, carrying or transporting passenges, freight, goods, waes, and mechandise for hire.

## CATTLE SHIPMENT TOO COSTLY

### Cannot Compete With Dead Meat Trade, Allege British Farmers in Recent Statement

The National Farmers' Union of the United Kingdom in a memorandum draws attention to the figures given in the British House of Commons, in answer to questions which, they state, are confirmation of figures given by them recently, showing that it costs 3d a pound to transport live meat to this country from Calgary, in excess of the corresponding charge for chilled meat. "According to these official data a vessel capable of carrying about three thousand tons of dead meat, if properly fitted, could carry from six hundred to one thousand head of live cattle. In other words, the shipping accommodation required for the transport of live meat is more than ten times that required for the transport of dead meat.

"The comparison of the actual costs of transport at current rates is equally instructive. The freight rate for chilled meat is given officially at £6 15s per ton, or less than ¾ d per lb., whereas the corresponding freight rate for live cattle, inclusive of fodder and attendance on the voyage, is no less than £14 per ton live weight, that is about £28 per ton dead weight, or 3d. per lb. of beef.

"That is to say, the cost of transporting beef on the hoof is more than four times that of transporting dead meat, and where the cattle are brought over in store condition the comparison would be still less favorable to this form of trade owing to the higher overhead charges per pound of meat."

"In the face of such facts," continues the statement, "confirmed equally by business farmers in Canada and by official inquiries in this country, it is impossible to imagine that Canada will continue to employ such uneconomic mode of shipping her produce. The attempt to divert Canadian trade into this channel by making a special exception to our policy of requiring all imported cattle to be slaughtered at the port of landing in favor of Canada, can offer no immediate advantage to the British meat consumer, but must be to his ultimate marked disadvantage owing to the disastrous effects of such a step upon the breeding industry of this country."

## ALBERTA TELEPHONES

Contracts for 1,100 miles of rural telephone line construction has been awarded by the provincial telephone department, comprising the second instalment of the government's program for the 1922 season. The mileage represented in these contracts, six in number, is spread over all parts of central and southern Alberta, and the total expenditure involved will be about $125.000.

The contractors to whom the work has been awarded are James Mohler, A. McGregor, J. S. Glover, R. Ramshaw, N. L. Campbell, and H. E. Hamel, most of whom have had previous contracts with the department. Work on the several contracts is beginning at once and will be continued into the fall until finished.

It is expected that the 1,100 miles of new lines will almost or entirely complete the work to be done this year in the way of rural telephone construction. Some 1,400 miles of similar construction has already been done on previous schemes, for which contracts were given in the early part of the season and the cost of which was about $150,000.

## WANT COAL CARGOES

Not since the war has Sydney harbor been so full of shipping clamoring for coal as it is at present. Almost every merchant flag in the world is seen among the mastheads waiting for fuel. Sydney piers are working twenty-four hours a day. Double shifts have been put on the steamshovels at the big coal bank at Glace Bay, to load coal trains for Sydney. Traffic on the Sydney and Louisburg Railway is consequently becoming heavy and railroad employees are making big time again for the first time since 1920.

# Municipal Finance

**Belleville, Ont.**—The tax rate for the city has been struck at 38 mills on the dollar. The general rate is 23 4-10 mills, while the public school rate has been increased from 8 to 9 mills. The total rate is 4-10 mills higher than last year. The estimated expenditures for the year amount to $753,000.

**Calgary, Alta.**—Deficits in both the hospital and the street railway departments amounting to approximately $30,000, for the first six months of this year, have taken place according to the semi-annual report of all departments of the city, issued by the City Comptroller W. C. Wood. A falling off in revenue at the hospital caused a deficit there of $11,911. The deficit in the street railway department, amounting to $18,073 was also caused to a large extent, to a falling off in revenue.

However, a healthy surplus in both the water works and the electric light departments is shown for the six months ending June 30th. In these two departments the city made a profit of $34,445. Although a reduction was put into effect in the electric light rates, a surplus of revenue over expenditure is shown in this department of $11,427. With a surplus revenue over expenditure of $23,017 the waterworks department made even a better showing than the other utility.

**Pembroke, Ont.**—The tax rate for the present year has been struck at 46 mills on the dollar.

**Esquimalt, B. C.**—At a meeting of the council a statement of the taxes and rates collected was presented, which was as follows: Current taxes—General rate; amount levied, $85,121; collected, $71,652; percentage, 84.17, Sewer rates and rentals: amount levied, $18,155; collected, 14,326; percentage, 78.91. Arrears: outstanding at December 31, 1921, $11,113 collected, $2,722; percentage, 24.49. Delinquent: outstanding at December 31, 1921, $8,955; collected, $2,997; percentage, 33.47.

**Burlington Ont.**—The tax rate for 1922 will be 47 mills on the dollar, a decrease of 2 mills from last year.

**Victoria, B. C.**—According to the assessment on which this year's taxes will be based, the value of improvements is approximately $27,000,000. The assessments on land alone aggregate $38,726,552. The mill rate this year is 32.06 and as one third of the improvements are taxable under the present year's policy of the city council, the total amount taxable is $47,715,102, according to figures given out by the City Treasurer, Edwin C. Smith.

The net revenue obtainable on that basis is $1,529,746 plus a frontage tax totalling $104,761 making the total amount taxable on real property alone $1,634,517.

This is, roughly, $200,000 more than was available last year, when the taxes charged amounted to $1,415,030 altogether. This result is accomplished in spite of the fact that assessments on land were reduced by the Court of Revision this spring by nearly $6,000,000.

**Wingham, Ont.**—The 1922 tax rate will be 42 mills on the dollar. This is an increase of 14 mills over last year's rate. The increase has been partly due to the fact that the town has ben carrying an overdraft of $7,081 for the past two years, and which calls for an additional 6½ mills to meet both principal and interest.

## WILL SELL GAREAU ASSETS

### Creditors' Meeting at First Favor Tender Received, Then Change its Mind

An offer of $190,000 for the business and assets of L. A. Gareau. doing business under the name of the English & Scotch Woollen Company, in bankruptcy, was rejected at a meeting of the creditors of the company in Montreal on July 24. It was decided that the security offered was not sufficient, and the business is still for sale. The trustees Gordon W. Scott, of the firm of P. S. Scott, chartered accountants, is ready to receive further offers for its purchase.

**Proposed New Company**

Gordon W. Scott, trustee, was elected chairman of the meeting. About 40 creditors were represented. The trustee informed the meeting that he had received a tender for the sum of $180,000 and that this tender had been increased to $190,000. The terms of payment were one-third cash, and the balance in two installments of six and twelve months each from date of acceptance of tender. The tenderer proposed to form a limited liability company with a closed bond issue of $250,000, and deliver the entire issue to the trustee these bonds to be repayable to the tenderer upon the following terms and conditions:

(a) Sixty thousand dollars par value of bonds to be delivered with first payment of $60,000, which meant immediately, as this first payment is a cash payment.

The tenderer adds: "With reference to the balance of the bonds. Which I am depositing with you as security, you will deliver these, or cause them to be delivered, to me or my nominees on payment by or from them of such sums as these bonds are sold for, but not in any case are you called upon to deliver a bond unless you have received $90 per $100 bond."

It was also stated by the tenderer that he was agreeable to the trustee countersigning all purchase orders in excess of $200. the purchases which were not thus to be countersigned not to be over $1,000. He further agreed that all cheques should be countersigned by the trustee.

**Favorable Vote**

After considerable discussion, it was moved by J. A. Schwartz, seconded by M. Ryan, that the offer be accepted. H. P. Charlton and C. E. Hardie were appointed scrutineers, and, on a vote being taken, it was found that of the credits present votes to the value of $265,000 had been registered in favor of the offer while claims to the value fo $107,066 were against the offer being accepted. The total of proven claims is $1,100,000.

When the question of making the vote in favor unanimous arose, one creditor for a large amount made strenuous objection on the ground that there was insufficient security entailed. The trustee, therefore, suggested that the tender be informed that the sum of $190,000 in cash, or $60,000 in cash with marketable securities for the balance must be in the hands of the trustee within one month, otherwise the trustee and inspectors would proceed to speedy liquidation of the business. This proposition met with the unanimous approval of the meeting, one creditor for a large amount stating that he was satisfied he would receive fully as large a dividend as he would have if a secured tender for $190,000 was received, and that, owing to the manner in which the trustee had run the business during the past year, he had already received more in dividends than he had expected when the business went into liquidation.

## ATLAS GOLD MINES ACTION

### Want Accounting By President and Treasurer, Following Report By Special Auditor

Through a writ issued by the Ontario Courts an action has been entered by the Atlas Gold Mines Ltd., against Alexander M. Bilski, David S. Friedman, and Simons, Agnew & Co. The action is for an accounting by the defendant, Bilski, of the moneys received and disbursed by him as treasurer and president of the company and for an order directing Bilski to make up and deliver to the company, as ordered at a meeting of the shareholders, a financial statement showing all monies received by him from and on behalf of the company and all disbursements made by him therefrom and for production of vouchers of all disbursements or payments by Bilski to the company, found by the company's auditor to have been received by him and either not accounted for, or not paid over to the company, or retained by him improperly and without authority, as per the report of Osler Wade, chartered accountant, dated May 11th, 1922, presented to the Special General Meeting of the shareholders and supplementary report of the said Osler Wade, auditor of the company, dated June 22nd, 1922. The amount claimed is $40,343.

**Allege False Returns**

A declaration is asked that Bilski made false returns and false reports to the company by reason of which he received certain moneys improperly and illegally, and for an order for payment of same.

A declaration is also asked that Bilski obtained from the company the issue to him of 100,000 shares in settlement of a claim for debt but that the company was not indebted to him but he was indebted to it and that such issues of shares was procured in violation of his duties as director and officer of the company and was fraudulent and void.

Damages are asked from the defendant for the legal expense, cost and other loss incurred by the company on account of his alleged neglect and refusal to keep account and to make up and render same and to call meetings.

The action against Simons Agnew is for an injunction restraining the defendants from transferring or causing to be transferred to defendant Friedman 60,000 shares hypothecated with Simons, Agnew & Co., alleged to be part of the 100,000 shares alleged to have been obtained fraudently, and for an injunction preventing Friedman from receiving these shares.

Action has also been entered against Alexander M. Bilski by Abraham Singer representing himself and all other members of the Atlas Gold Mines Ltd.

## AUTHORITY OF COMPANY'S OFFICIALS

### Solicitor Right in Believing They Had Power to Engage Him, Says Court

A solicitor having been retained to incorporate certain joint stock companies and to purchase timber limits, differences arose as to payment of his account, the matter being submitted to an arbitrator who found that the Company was liable for the fees of the solicitor.

On a motion to Court Justice Orde said that the sole question to be determined was, whether or not Smyth was retained by the company. It was contended for the company that the authority of its president and secretary-treasurer to retain Smyth must be strictly proved.

**Solictor Upheld**

The learned judge said that he had examined those portions of the evidence and exhibits which were relied on by counsel, and had come to the conclusion that the arbitrators' award ought not to be disturbed. In the circumstances, Smyth was entirely justified in believing that the company's president and secretary were acting with full authority and that they so represented themselves both orally and through the correspondence. Their instructions, as the responsible executive officers of the company, given to Smyth from time to time, must also be held to have been given with its full authority.

**Principle of Agency**

The principle, which has been so clearly laid down, that the burden of proof lies upon him who seeks to establish the agency and that the authority of the agent must be strictly proved, can apply fully only where the person sought to be charged as a principal is an individual. As a corporate body must necessarily act through the medium of others who represent the corporate entity merely as agents, no matter what office they hold, there must be many cases where the authority of the executive officers of a company must be assumed if the subject matter is such as would ordinarily come within the scope of their duties.

## VALIDITY OF COMPANY CONTRACT

In the case of Shaw v. Hyde, recently reported from a British Columbia County Court, it was held that goods which were sold to a company while its name had been removed from the register of companies and before its name was restored thereto, were sold to the company as such and not to the individual shareholders and directors, especially since all parties were ignorant of the fact that the company's name had been struck off the register. After its restoration to the register of companies the company went into bankruptcy and this action as stated by Judge Swanson was merely an attempt to get at the assets of the only solvent shareholder to make her pay for the company's debt.

In dismissing the action against the solvent shareholder and deciding that the insolvent company was liable, His Honor said: "It is because the plaintiff has concluded that the company in its corporate capacity is unable to pay and because one indivdual member is the only one in the whole company who is financially in a position to liquidate this debt." and therefore the company, though technically not in existence, was held liable under the circumstances on the contract

*Have You Read This Booklet?*

*"Bonds vs. Mortgages"* is an interesting summary of the merits of these two forms of investments. It shows that bonds are much superior to mortgages in such important elements as—

Quick Marketability.
Freedom from Care.
Convenience of Denominations
Duration.
Possibility of Increase in Value.

## CITY CANNOT RAISE TAXES

### Appeal of Firms is Successful Against Windsor's Effort to Tax Bonussed Industries

The action of the Windsor City Council in increasing the amount of taxation on property exempt under bonus bylaws was reversed by the Court of Revision on July 28. as it is a question of law, the city it is expected, will undoubtedly appeal the finding to County Judge J. J. Coughlin for a ruling. The amount involved totals thousands of dollars, and the case is in respect to companies enjoying total exemption. The court decided that companies enjoying fixed exemption, pay all rates on the proportionate value of business assessment covered by fixed assessment.

The decision affects some of the leading industries in the Border Cities, and will have a far reaching influence in future instances. The concerns directly interested and represented at the hearing argued their cases through their legal representatives.

When the court opened, Assessment Commissioner Alex. Black stated that the question was whether the business assessment of firms which had exemption should include all taxes. Under a ruling by the late Judge Horne, in the case of real property getting exemption, the business assessment would follow. He stated that the judical ruling of Judge Horne had been followed since it was given. The city solicitor had advised that a fixed assessment would be liable for all assessments, and the finance committee had instructed that his advice be followed.

### Question of Time

Mr. Fleming argued that the exemption bylaw was passed after the business assessment bylaw, and that it represented exemption on all taxes except for local improvements and schools.

"It is not honest for the city to come in on these people, who have spent thousands of dollars on their establishments which the people said would be free from taxes, and I submit that you withdraw the appeal of the city," said Mr. Fleming. H. L. Barnes submitted that all the corporations represented were affected similarly.

Commissioner Black asserted that it was not a question whether the council wished to deal unfairly, but whether he was wrong or not in giving the firms exemption on business assessment where they received exemption on real property.

City Solicitor Davis, who was called in, went at length into the bylaws, and remarked that "It seems to me that the business assessment was a personal tax against the owners of the business, and the amount of the tax was paid by the value of the land used in the business. The business tax is a different tax. and has nothing to do with the land, except that the rate is fixed on the value placed by the assessor."

A. Little, chairman of the courts, opined that the council should live up to its bargain, as it was the duty of the city to care for the local industrial establishments.

# Government and Municipal Bonds

The only outstanding feature of the bond market during the past week was the Nova Scotia bond sale for two million dollars. Bids were originally asked for twenty-five year bonds and although tenders were numerous and keen, the provincial treasurer decided to reject them and call for bids on two and three year bonds. Tenders for these securities were also numerous and the bidding keen, with the result that the province secured a higher price than was quoted formerly. The price which the province received may be considered good in view of the present condition of the market, and also of the forthcoming Dominion loan.

Other sales during the week were not so heavy as formerly, but prices remained strong in spite of the summer dullness.

### Tenders Invited

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders close |
|---|---|---|
| Scarborough Twp., Ont. | $311,000 | Aug. 10 |
| Prince Edward Island | 175,000 | Aug. 25 |
| Notre Dame de Granby, Que. | 100,000 | Aug. 16 |
| Peel County, Ont. | 80,000 | Sept. 1 |
| St. Stanislas, Que. | 50,000 | Aug. 15 |
| Trafalgar Twp., Ont. | 45,000 | Aug. 9 |
| Deux-Rivieres, Que. | 25,000 | Aug. 14 |
| Newmarket, Ont. | 60,000 | Aug. 7 |

**Scarborough Twp., Ont.**—Tenders will be received up to 11 a.m. Aug. 10, 1922, for the purchase of $311,000, 5½ and 6 per cent., 10 and 30-instalment school debentures. James T. Stewart, treasurer, Birch Cliff. See advertisement in this issue.

**Prince Edward Island.**—Tenders will be received up to August 25, 1922, fo rthe purchase of $175,000, 5½ per cent., 15-year bonds. The bonds are in denominations of $1,000 each, and are payable on March 1 and September 1 at Toronto, Montreal and Charlottetown .Arthur Newberry, assistant provincial treasurer, Charlottetown.

**Notre-Dame-de Granby, Que.**—Tenders will be received up to 6 p.m. August 16, 1922, for the purchase of $100,000, 5½ per cent., 25-instalment school debentures. Jos. Lemieux, secretary-treasurer of school board.

**Parish of St. Stanislaus, Que.**—Tenders will be received up to noon August 15, 1922, for the purchase of $50,000, 6 per cent., 20-year debentures. J. T. Jacob, secretary-treasurer, St. Stanislas.

**Trafalgar Twp., Ont.**—Tenders will be received up to August 9, 1922, for the purchase of $45,000, 5½ per cent., 20-year debentures. S. H. Albertson, clerk, Trafalgar, Ont.

**Deux-Rivieres, Que.**—Tenders are invited up to noon August 14, 1922, for the purchase of $25,000, 6 per cent., 15-instalment debentures. J. T. Jacob, secretary-treasurer.

### Coming Issues

**Toronto:**—It would be a practical impossibility to provide an additional million dollars for local improvement works this year, Finance Commissioner Ross told the Board of Control recently. The announcement that the Minister of Finance would float a loan of $225,000,000 in the fall had shut the bond market up tight. To raise the million asked by the Works Committee, added Mr. Ross, would add $50,000 to next year's tax bill. The question now was not one of increasing capital expenditures, but how to keep them down. To a suggestion that the city give the Toronto Transportation Commission half a million less than asked Mr. Ross replied that it would not help the situation, because all the money the Commission would need had been raised.

**Trafalgar Township, Ont.**—The council has issued debentures for $45,000 for the purpose of erecting a new public school in the village of Bronte.

**Lincoln County, Ont:**—The council on July 19 passed four by-laws to raise money, mostly for road purposes. One by-law was passed authorizing the raising of $200,000 for road building in Lincoln, a second provided $110,000 for the County's share of the cost of construction of the Q. and G. macadamized road, $184,000 for work under the Highway Improvement Act, this amount being the estimated amount to be received from the Government, and $23,000 for current expenses.

**Toronto, Ont.**—Five debenture by-laws were considered by the city council on July 27. Three call for $1,875,000 for the Metropolitan division of the York radials outside the city, and $260,000 for the Scarboro line and $244,000 for the Mimico line. The other two provide $585,000 for the section of the Metropolitan within the city limits and $7,226,295 for the purchase of the local distribution system of the Toronto & Niagara Power Co., the T.E.L., less $850,000 of notes that are being assumed. The by-law will call for an issue of debentures to the amount of $6,376,295. Another issue of $600,000 for betterments and extensions to the York radial lines will be authorized in the by-law covering the execution of the radial agreements.

**Edmonton, Alta.**—The Edmonton school board will sell $25,000 in debentures over the country following failure of satisfactory offers being made by tenders.

**Saskatchewan.**—The following is a list of authorizations granted by the local Government Board from July 1, to July 15:—

School Districts:—Dafoe, $1,500, 10 years, 8 per cent; Bannerman, $2,500, 15 years, 8 per cent; Patrick, $1,500, 10 years, 8 per cent; Kempville, $600, 6 years, 8 per cent; Elrose, $3,800, 15 years, 8 per cent; Cudworth, $7,500, 15 years, 8 per cent; Ferndale, $4,500, 20 years, 8 per cent; Birsay, $4,500, 15 years, 8 per cent; Preeceville, $16,500, 20 years, 8 per cent.

**Rural Telephones:**—Evans, $900, 10 years, 8 per cent; Neilby, $200, 15 years, 8 per cent; East Prince Albert, $9,500, 15 years, 8 per cent.

City of Saskatoon $300,000, sewer and water extensions.

The previous authorizations to the village of Balcarres for $1,500 10 year 8 per cent town hall debentures was cancelled.

**St. John, N.B.**—Tenders were invited by the Board of School Trustees, up to July 25, for debentures to the amount of $200,000, issued for twenty-five years from July 1st, 1922, for $1,000 each, or $170,000 at $1,000 each, and $30,000 at $500 each, and bearing interest at 5½ per cent, per annum, payable half yearly.

Also for debentures to the amount of $35,500, issued for 25 years from August 1st, 1922, for $500 each, and bearing interest at 5½ per cent., per annum, payable half yearly.

**London, Ont.**—The city council will be asked by the hospital trust of the Royal Victoria Hospital to pass a by-law authorizing a grant of $300,000 to the hospital for the building of a nurses home.

**Sydney, N.S.**—The ratepayers on July 18, voted to expend $132,000 on city improvements, to be distributed as follows: $45,000 for the erection of a nurses' home at the city hospital, $30,000 for permanent sidewalk construction, $25,000 for water extension, $25,000 for sewer extension, and $7,000 to be expended on the parks of the city.

**Regina, Sask.**—Ratepayers on July 13 approved six money by-laws entailing a total proposed expenditure of $64,000. Extensions to the power light, sewer and water systems are provided for under the by-laws submitted which are:

1. A by-law to authorize the construction of sewer and house connections at an expenditure of $8,000.
2. A by-law for the extension of the sewerage system costing $5,000.
3. A by-law to extend the city light and power system and to provide for the borrowing of $30,000.
4. A by-law to provide for the renewal of plank crossings costing $1,300.
5. A by-law to provide for the purchase of a tractor grader and road drag costing $2,000.
6. A by-law to authorize the extension of the city waterworks system at a cost of $17,700.

**Kitchener, Ont.**—On July 29, ratepayers will vote on a by-law to borrow $70,000 for street railway extension. The proposed by-law provides for the borrowing of $70,000 upon the debentures of the corporation. The money to be used for extensions and improvements to the street railway system by the purchase of new cars and equippment, and the erection of a new car barn. The money is to be repaid in twenty years with interest at five and one-half per cent. by an annual payment covering the principal and interest of $5857.56.

### Bond Sales

**St. Jerome, Que.**—Two bond issues of $82,500, 5½ per cent., 30-year, and $73,500, 5½ per cent., 10-year respectively were sold to Rene T. Leclerc & Co., at a price of 96.50. A bid of 97.76 was received from Versailles, Vidricaire & Boulais, Ltd., for the $73,500 issue.

**Nova Scotia**—An issue of $2,000,000, 5 per cent., 2-year bonds was sold to a syndicate headed by Wood, Gundy & Co., at a price of 99.546, the money costing the province about 5.25 per cent.

Tenders were originally called for 25-year bonds but this was later changed to alternative bids on 2 or 3-year bonds, all bearing interest at the rate of 5 per cent. Bidding for the bonds was very keen, there being just about one point difference between the highest and lowest bid. The following is a list of tenders for the 2, 3 and 25-year bonds:

### 2 and 3-Years

Wood, Gundy & Co., Guaranty Trust Co., 99.546 for 2 years.

Miller & Co. and Brandon Gordon & Waddell, 99.214, 2 years; 98.435, 3 years.

McLeod Young Weir & Co., Gairdner Clarke & Co., Aemilius Jarvis & Co., H. M. Bradford & Co., J. C. MacIntosh & Co., 99.29, 2-years; 98.80, 3 years.

Harris Forbes & Co., 99.053, 2 years; 98.307, 3 years.

A. E. Ames & Co., Equitable Trust Co., Paine Webber & Co., Old Colony Trust Co., 99.323, 2 years; 98.617, 3 years.

Dominion Securities Corp.,—99.531, 2 years; 99.022, 3 years.

R. A. Daly & Co.—99.158, 2 years; 98.468, 3 years.

Brown Bros., Amelius Jarvis & Co., J. C. Mackintosh & Co.—99.40, 2 years; 99.03, 3 years

Seaboard National Bank, McKinley & Morris, Rutter & Co., H. Noyes & Co.—99.51, 2 years; 98.76, 3 years.

National City Co., and E. R. Rollins & Co.—98.91, 2 years; 98.579, 3 years.

R. C. Matthews & Co. (Received after opening of tenders)—98.82, 2 years; 98.1, 3 years.

### 25-Years

Gairdner Clarke and Co., McLeod, Young, Weir and Co., Aemilius Jarvis and Co., H. M. Bradford and Co., J. C. Mackintosh and Co., Canadian offer, 92.42.

Kissell Kinnicutt and Co., Blair and Co., W. R. Compton and Co., McLeod, Young, and Weir and Co., New York offer, 95.03.

Dominion Securities Corporation, New York offer, 94.733; Canadian offer, 92.58.

Harris, Forbes & Co., A. E. Ames and Co., Johnston and Ward Co., National City Co., Canadian offer, 92.519.

National City Co., and E. R. Rollins and Sons, New York offer, 95.329.

Equitable Trust Co., Paine, Webber & Co., Old Colony Trust Co., 93.279 in New York; 94.065 in Halifax.

Seaboard National Bank; McKinley and Morris; Rutter & Co.; Post and Flagg; Humphill S. Noyes and Co., New York, 96.22.

Miller and Co., Brandon Gordon and Waddell, New York, 94.026.

Harris, Forbes and Co., 93.704.

Hanson Brothers; R. C. Matthews and Co.; W. A. MacKenzie and Co.; R. A. Daly and Co.; Canadian offer, 91.63.

Lee Higginson & Co.; Spencer Trask and Co.; Warner and Co.; and R. A. Daly and Co., 96.438.

Halsey Stuart and Co.; W. A. Harriman and Co.; First National Co., and R. C. Matthews and Co., 92.179.

Wood, Gundy and Co.; Eastern Securities Co., Canadian offer, 92.59.

Guaranty Trust Co.; Wood, Gundy and Co.; and Eastern Securities Co., 94.03.

Brown Bros.; Aemilius Jarvis and Co. and J. C. Mackintosh and Co., 93.398.

**Moose Jaw, Sask.**—Miller & Co., of New York. advise The Monetary Times that they did not put in any bids for the $182,470 debentures, as was stated in these columns on July 21.

**St. Laurent, Que.**—An issue of $35,000, 6 per cent., 20-year school debentures has been sold to the Provincial Bank of Canada at a price of 100.01, the money costing the commission about 6 per cent. The following is a list of tenders: Provincial Bank, 100.01; Municipal Debentures Corp., 98.27; Rene T. Leclerc & Co., 98; Nesbitt, Thomson & Co., 97.128.

**Pictou, N.S.**—The Royal Securities Corp., has purchased $11,500, 5½ per cent., 20-year debentures at a price of 100.60, the money costing the city about 5.45 per cent.

**Richmond Hill, Ont.**—An issue of $16,000, 6 per cent., 30-year debentures has been purchased by the Municipal Bankers Corp.

**Big Valley, Alta.**—Wood, Gundy & Co., has purchased $10,000, 6 per cent., various maturity debentures.

## COMMERCIAL INTELLIGENCE SERVICE

Application has been made to the Civil Service Commission for five Junior Trade Commissioners, to fill appointments in the Commerical Intelligence Service. The entry list will be closed on September 20th and applications and requests for information should be addressed to the Secretary, Civil Service Commission, Ottawa. It is expected that the written examinations will be held about October 20th, and the oral examination from a month to two months later.

Successful candidates will enter, on probation, the office of the Director of the Commercial Intelligence Service for from one to two years' training. Junior Trade Commissioners, if with three years' practical experience, will receive a salary of $1,800 per annum, or $1,500 if without the experience. On the completion of their training, Junior Trade Commissioners are promoted to be Assistant Trade Commissioners and are sent abroad to be attached to the offices of Canadian Trade Commissioners for further training and experience. Assistant Trade Commissioners commence with a salary of $1,920 per annum, and in addition will receive 75% of the living allowance drawn by the Trade Commissioner in charge of the office to which they are attached. Living allowances at present range from a minimum of $500 to a maximum of $2,000 and are granted to officers of the Commercial Intelligence Service as a compensation for the inequalities in the cost of living in the various countries.

As vacancies occur or new offices are opened, Assistant Trade Commissioners are promoted to the rank of Trade Commissioners, with a salary commencing at $3,000 a year, in addition to which they are entitled to the living allowance which goes with their post.

## CONFERENCE ON INDUSTRY

### Efforts to Stimulate Trading to Be Made—Quebec C.M.A. Takes Action

The Canadian Manufacturers' Association is making efforts to bring the financial, agricultural and manufacturing interests of the country, who are strongly in favor of an industrial conference, together to discuss ways and means of improving conditions. A conference representing the leading elements in the country according to many is considered advisable. Montreal business men strongly approve of such a step and the following resolution will be discussed at the next meeting of the executive of the Quebec Division of the Canadian Manufacturers:

"Whereas, the period of extreme business conditions will continue for some time, and in order that everything possible may be done to stimulate trading in all sections of the Dominion, be it therefore resolved that the Federal Government be asked to call a conference of agricultural, labor, financial and industrial representatives from the different provinces to discuss ways and means by which all interests may work in unity for the development of conditions and the upbuilding of our country."

If the conference is decided upon the date will be fixed by the Hon. James A. Robb, Minister of Trade and Commerce, who is now in England.

**Money Takes No Vacation**

When carefully invested it earns just as much interest in July and August as it does in November and December.

How unwise, therefore, to carry uninvested surplus just because during the so-called "dog days" you may feel lackadaisical about re-investing it. Even if *you* are taking things easy, you may as well keep your money fully employed.

Our current list of Canadian Government and Municipal bonds contains many good suggestions, returning around 5½% interest—and even more. Suppose you send for a copy.

# *Stock Markets*

With very little variation in each day's trading, the stock market still continues the same trend as that of the past few weeks, with an inclination to be slightly weaker during the past week as compared with previous weeks .

During the first part of the week under review there was an increase in activity with utility issued supplying more than half the total trading, and more particulary Brazilian on the Toronto and Montreal Power on the Montreal Exchange. Trading during this period was not so broad as formerly, but the price trend was slightly firmer than for the previous week.

Towards the latter part of the week trading again dropped off, and the market once more assumed the usual summer dullness. Practically all the stock brokers report very little business being done, due to their clients being away for their summer holidays. From recent indications it is not expected that the market will become active until some time during the Fall, and more particularly after the crops are harvested.

### To Issue Debentures

At the annual meeting of the Acadia Sugar Refineries, Ltd., at Halifax on July 26, the directors decided on an issue of second mortgage debentures which would be taken up by the present shareholders to the extent of 20 per cent., of their present holdings of preferred and common shares. The maximum of the issue was set at $1,000,000.

### New Bond Issue

Peabody, Houghteling & Co., Chicago, are making an offering of $200,000 Abitibi Lands and Forests, Limited, first mortgage 7 per cent. five-year gold bonds, being series C, guaranteed by the Abitibi Power and Paper Co., Ltd., the issue price being par and accrued interest.

The security valuation is placed at $400,100 besides which there is an additional $200,000 fire insurance. The land covered by the mortgage comprises 89 lots, already improved with 42 modern buildings.

The circular accompanying the offering states that the guarantor of the bonds is one of the leading manufacturers of newsprint in the world and has a present net worth in capital, surplus and reserves of over $15,000,000. Its earnings in 1920, available for interest and depreciation were $5,043,133 and in 1921 $4,678,172.

### McArthur, Irwin, Ltd.

In connection with the offering by the Sterling Bond Corp., of $225,000, 7 per cent., first mortgage sinking fund bonds of McArthur, Irwin, Ltd., as reported in these columns on July 28, it was stated that the bonds were being offered at 97.25 to yield 4.50 per cent. This should read 7.25 per cent. It was also stated that the sales for the past six years averaged $5,590,122 per annum. This should read $1,590,922.

### Fort William Paper Co.

Peabody, Houghteling & Co., of Chicago have purchased $2,100,000 first mortgage bonds of standing and to provide money for proposed the Fort William Paper Co. Ltd. The purpose of the issue is to redeem bonds already outextensions to the company's plant.

The company has had in operation since May, 1921, a ground wood pulp mill, situated at Fort William and having a capacity of 125 tons of ground wood pulp per day. The company is now proceeding to add a newsprint mill with a daily capacity of 150 tons of newsprint and the foundations for this are now under way. The company expects to have the paper mill in operation by December 1, 1922. The enterprise has an outstanding issue of $1,000,000 first mortgage bonds, which have been called for redemption August 1, and it is to take the place of these bonds and to provide the necessary funds for the paper mill that the company has operated the issue of $2,100,000, which has disposed of as above.

### Matachewan Power Bonds

An offering of $450,000, 7 per cent., 15-year sinking fund bonds of the Matachewan Power Co. Ltd., is being offered by the General Securities Corp., of Toronto at a price of 95, with a bonus of 20 per cent. ,of common stock.

The company has the water rights on the Montral River and it will be able to serve many of the more important camps of Northern Ontario. Within a 75 mile radius are situated camps like Porcupine, Kirkland Lake, Gowganda, Matachewan, Boston Creek, Shining Tree, Nighthawk Lake and Cobalt. Statistics show that with the development in the mining and pulp and paper industries in Northern Ontario during the past few years, there has resulted a very serious shortage of electrical power.

The common stock capitalization of the company is $1,000,000, of $10 par value, all issued and first mortgage bonds authorized $1,500,000, to be issued $1,200,000. It is estimated by the company's engineers that the two water sites obtained at Indian Chutes and Big Ben will give an ultimate capacity of 12,000 H.P. The board of Directors of the company are as follows: President, Robert Fennell, Toronto; 1st Vice-President, W. S. Westaway, Hamilton, 2nd Vice-President, Col. Robert Starke, Montreal; Directors, Lt.-Col. Sir Henry L. Galway, K.C. M.G., D.S.O., London, England, former Governor-General, South Australia; D. W. F. Caldwell, Appleton, Ont; H. W. Sutcliffe, New Liskeard, Ont.

### Welland Cotton Mills, Ltd.

An offering of $250,000, 8 per cent., cumulative and participating preferred stock, being part of an issue of 500,000, of the Welland Cotton Mills Ltd., is being ogered by Securities & Trade Corp, of Toronto at a price of $100 per share, carrying a bonus of 50 per cent of common stock.

The authorized capital of the company is $1,000,000, divided into 10,000 shares, having a par value of $100 each.

The company is erecting a plant at Welland, Ont., and the first unit of the plant will be devoted entirely to the manufacture of coarse cotton yarns, operating on a day and night shift. It is estimated that the net profits during the first year will be approximately $154,000.

## HOW MUNICIPAL TAXES AFFECT INDUSTRY

### Comparison of Per Capita Taxation With Degree of Industrialism

Has the amount of municipal taxation anything to do with the industrial standing of a city? This question is asked in a bulletin just issued by the Citizens' Research Institute of Canada. To throw light on the question, per capita taxation is compared with the industrial ratings set down for 27 cities by H. E. M. Kensit in an article in The Monetary Times of June 16.

For the purpose of this study, the ratings given in the article mentioned are accepted by the Institute and appear in the second column. The relative standing in value of per capita output, one of the elements in the standard used, is shown in the third column. In the first column the 27 cities are listed according to their per capita taxation (1920), the city with the highest per capita being placed first, that with the lowest being placed last. The cities chosen are, of course, those used in the article referred to above.

| City | Standing as to per capita taxation from highest to lowest (1920) | Standing as to degree of industrialization. | Standing as to amount of per capita production. |
|---|---|---|---|
| Edmonton | 1 | 27 | 23 |
| Calgary | 2 | 26 | 22 |
| Fort William | 3 | 19 | 16 |
| Vancouver | 4 | 17 | 17 |
| Toronto | 5 | 13 | 12 |
| Winnipeg | 6 | 22 | 20 |
| London | 7 | 16 | 19 |
| Sarnia | 8 | 9 | 3 |
| Hamilton | 9 | 5 | 9 |
| Ottawa | 10 | 24 | 26 |
| Lachine | 11 | 12 | 11 |
| Three Rivers | 12 | 10 | 18 |
| Brantford | 13 | 6 | 10 |
| Sault Ste. Marie | 14 | 7 | 8 |
| Peterboro | 15 | 8 | 7 |
| Niagara Falls | 16 | 2 | 6 |
| Halifax | 17 | 23 | 25 |
| St. John | 18 | 20 | 14 |
| Kitchener | 19 | 4 | 2 |
| Montreal | 20 | 15 | 13 |
| Kingston | 21 | 21 | 24 |
| Quebec | 22 | 25 | 27 |
| Welland | 23 | 1 | 1 |
| Shawin. Falls | 24 | 3 | 5 |
| Sherbrooke | 25 | 14 | 15 |
| Sydney | 26 | 11 | 4 |
| Hull | 27 | 18 | 21 |

By way of comment on the figures, the following facts are noted:—

1. The city with the highest per capita tax (1920) is the lowest in industrialization and fifth from the bottom of the list in per capita value of products, while the city with the next highest per capita taxation is the next lowest in industrialization and seventh from the bottom of the list in per capita production. These are, however, western and, therefore, comparatively new citiies and consequently not likely to be highly industrialized.

2. The city most highly industrialized and with the highest per capita production has a lower per capita tax than 22 cities out of 27. The city next in industrialization has a lower per capita tax than 15 cities. It is to be noted, however, that these cities are near the Niagara Falls power development. That this factor, as well as low taxation, has contributed to the high rating of these cities industrially is evident. The third industrial city has a lower per capita tax than 23 cities out of 27. It also is situated near a large water power development. These three cities are, respectively, first, sixth and fifth in per capita production.

3. A moderately high per capita tax is compatible with a high rating in industrialization and per capita production. Thus the three cities in the middle of the list as to per capita taxation, i.e., the 13th, 14th and 15th, are sixth, seventh and eighth in industrialization, and tenth, eighth and seventh respectively in per capita production, while the 16th and 19th cities in the taxation list are respectively 2nd and 4th in degree of industrialization. But a high per capita tax does not seem to be found with high industrialization and high per capita production. Thus only one of the seven cities highest in per capita taxation ranks as high as thirteenth in industrialization and twelfth in per capita production, and only two as high as seventeenth in either respect.

4. A low per capita tax does not necessarily mean a high rating industrially. One city which has a lower per capita tax than 21 cities out of the 27, is only 25th in industrialization and 27th in per capita production. But this city is a capital city and, therefore, a large proportion of its people than usual is employed outside of business and industry. Thus the per capita production and industrial capitalization, etc., are cut down. A similar influence is also undoubtedly operative in three other cities which are also capital cities. The presence of large provincial educational institutions in some of these cities also tends to give them a lower rating industrially than would otherwise be the case.

5. Cities in comparatively new parts of the Dominion naturally have not had time to build up their industries. Age is probably just as important as high taxation, as a factor in determining degree of industrialization. Making all allowances for differences in natural advantages, for differences in age, for the presence of large non-industrial institutions in some cities and their absence in others, it would seem clear that very high per capita taxation is a handicap to industry, that very low taxation accompanied by poor public services is also a handicap, and that moderate taxation when accompanied by efficiency and economy in those basal public services necessary to industry, is compatible with and even conducive to industrial prosperity.

---

## FAIRBANKS, GOSSELIN & CO.

Heavy losses on their own speculative accounts brought down the house of Fairbanks, Gosselin & Company, according to a report just made to the creditors by Gordon W. Scott, trustee. The statement of affairs shows assets of $47,000 and a deficiency of $447,420.69. The firm lost $578,371.20 by what the trustee prescribes as "fictitious accounts which they called house accounts."

The loss on Atlantic Sugar was $178,000, on U. S. Steel $101,000 and on Ames-Holden $83,000. In addition there was a loss of $153,000 on trading in U. S. funds and exchange. The firm's office building on Notre Dame street was sold by the bank, which obtained $11,000 in satisfaction of the $27,000 mortgage. "From present indications," the trustee concludes, "it would appear as if the creditors could not hope for a greater dividend than 3 to 5 cents on the dollar."

## WHEAT CONTROL AND TRADING

### Adoption of New Law Would Put Winnipeg Exchange Firms Out of Business

Grain Exchange Executives were in conference in Winnipeg on Aug. 1st, discussing the latest phase of the Wheat Board and possible counter moves. The report that Alberta had adopted the identical bill passed by the Saskatchewan Legislature, makes certain that machinery has been forged for handling this season's crop unless an injunction blocks immediate action or there is some difficulty in reference to raising $75,000,000, the minimum amount under which the Board can function.

No decision was announced as to the possible action of the exchange. That the validity of the law will be appealed ultimately to the Privy Council, however, has been intimated repeatedly. But some of the members question the ability of the Board to raise the funds to carry on business at least in time to handle this year's crop, as the Manitoba article is already coming into the market.

### Private Trading

A question of law arises as to contract obligations since millions of wheat have been sold on margin for October delivery. If it is made illegal for the private individual to deal in that grain where do those members of the Exchange who are involved on both sides of the market, get off? That is the chief subject of discussion around the Exchange quarters. Lawyers insists that no British precedent exists for declaring contracts void except possibly the peril of the nation, like war.

Exchange firms were nearly ruined by the Government Control Board. They knew, however, the prohibition would be removed when the war was over and held on, most of them losing money. If this Wheat Board becomes law and works out, the Exchange members are out of business, it is feared, since even if they were left to deal in rye and barley, those grains will next be under the supervision of the Board, it is believed.

Western finance circles are discussing this view. James Stewart estimated the Manitoba crop alone at seventy million when the normal yield of wheat in this province is but forty-five. This affords some idea of the character of the task the Public Utility Board framed to handle the crop is confronted with, but at Grain Grower headquarters the chiefs of departments insist the money will be found and the Board will function. But like the Royal Grain Commission, the Board is expected to have to fight for its existence through the courts to the last resort.

## PLAN HOTEL AT HULL

One of the most prominent hotel syndicates of the United States has made an offer of $250,000 to Lieut.-Col. J. W. Woods for the plant of the Woods Manufacturing Company on the Hull side of the river.

It is stated that the five acres owned by the company, and which comprises probably the best of the Hull side of the Ottawa River from a picturesque point of view, will be used for a big hotel. The present plant, if the deal goes through, will be torn down and a big hotel erected. It is stated that a dock will be erected in the Ottawa River, which will take the largest boats.

## INDEMNITY INSURANCE

Judgment in the case of Railway Passengers Asurance Co. vs. Standard Life Assurance Co. has recently been reported, the action arising upon a fidelity guarantee given by the appellant to the respondent with respect to the employment of the Standard Life Co.'s agent at Halifax.

The Supreme Court of Canada, in substance, held that indemnity insurance is a contract of good faith and sincerity being one of its necessary conditions the insured must make complete answers to the insurer regarding questions which the insurer requires to be answered, at the time the contract is entered into, in order to acquaint the insurer with the nature of the risk involved and where the answers are calculated to mislead and do mislead, the insured will not be allowed to defend these answers on the ground that they were true as far as they went or that they were incomplete and that the insurer having chosen to issue the policy cannot afterwards complain of their incompleteness. A policy based upon such misleading or incomplete answers cannot be enforced.

12 Years of Mail Investment Service

Because buying securities by mail is a logical and satisfactory way of investing, the Greenshields National Mail Investment Service grows steadily in usefulness and volume.

It ensures to all enquirers, without obligation, the personal attention of a staff of qualified experts. Put your investment problems up to them.

By order of the Board,
FREDERICK WILLIAMS-TAYLOR
General Manager
Montreal, 18th July, 1922. 3

Highly Promising Outlook for Toronto Suburban Debentures

The action of the Mayor of Toronto and the City Council at the special meeting held on Thursday, July 27, which put through the six bylaws, necessary for the clean-up deal, eliminates all speculative features of Toronto Suburban Debentures and raises these securities into the class of municipal obligations.

The guaranteed security will certainly result in a further and substantial appreciation in market value.

In anticipation of this development we have consistently recommended the purchase of this security, and we confidently look forward to a further vindication of our judgment.

A limited amount of these fully registered debentures is still obtainable at a very attractive price.

G. A. Stimson & Co., Limited
36-38 King St. East, Toornto

TWO THOUSAND LIFE UNDERWRITERS TO MEET IN TORONTO

This great gathering of life men from all points in Canada and the United States, to convene in August, will be representative of the Grand Army of Life Insurance Agents who have placed nearly Fifty Billions of Life Insurance protection over Canadian and American homes. Life insurance is the most useful commodity in the world because it represents food, clothing, shelter and education for those who without it might be hungry, naked, homeless, or ignorant. The Mutual of Canada aims to distribute this great commodity at net cost of the consumer, being among Canadian companies the only one organized on a purely mutual co-operative basis. Mutual benefits actually paid, in the aggregate amount of $37,000,000. So that the mutual has had substantial share in the beneficent work of the Canadian life companies.

Assurances in Force $235,000,000.

The Mutual Life Assurance Company of Canada,
WATERLOO .... ONTARIO

## TOWNSHIP OF SCARBOROUGH

TENDERS will be received by the Township of Scarborough for the purchase of Township of Scarborough Debentures, particulars of which are given in the annexed Schedule.

The debentures will be issued in denominations to suit the purchasers and will be payable at the Canadian Bank of Commerce, Toronto, with interest coupons attached.

Tenders should be addressed to James T. Stewart, Treasurer of the Township of Scarborough, Council Chamber, Birch Cliff, Ont., and all tenders will be opened on the Tenth day of August, 1922, at eleven a.m.

Further particulars may be obtained from the undersigned, or from H. E. Redman, Township Solicitor, 711 Dominion Bank Building, Toronto.

No tender necessarily accepted.

JAMES T. STEWART,
Treasurer, Township of Scarborough.

# Corporation Finance

**Russell Motor Car Co.**—The declaration of a 1¼ per cent. dividend on the common stock of the company is not to be construed as indicating the establishment of the common on a regular 5 per cent. basis, stated president T. E. Russell a few days ago. There had been some doubt on this point, but Mr. Russell declared that the distribution did not in any way reflect the future policy of the company in this regard, which would be adapted wholly to the character of business in the forthcoming year. Mr. Russell stated that, in any event, there would be no quarterly disbursements on common, the directors deciding to postpone dividend action until the close of the next fiscal year, when they could better determine the rate of distribution they would be justified in declaring in view of the company's past experiences and prospects. With the final payment of 1¼ per cent. Russell Motor has distributed a total of 4 per cent. on common in the year closing July 31, as compared with the regular rate of 7 per cent.

Referring to general conditions, Mr. Russell stated that the company was experiencing a little of the seasonable slow-up expected at this time of the year, but there were evidences of improving business, more especially in the west, where the favorable crop prospect was creating a distinctly hopeful sentiment.

**Quebec Railway, Light, Heat and Power Co.**—At a directors' meeting on July 20, president E. A. Robert expressed himself as optimistic regarding the outlook. In speaking of the earnings of the company for the first six months for the current fiscal year ending June 30th, he stated that they were very satisfactory, indicating that the comparative statement covering this period showed the surplus earnings after all fixed charges to be slightly over 12 per cent. in excess of the surplus for the entire year of 1921, and notwithstanding the unfavorable climatic conditions during the months of May and June the surplus for these months showed an increase of over 100 per cent. over the corresponding months of 1921. This increase in the surplus is due to the adoption of methods of the strictest economy in connection with a more efficient service.

The statement shows gross earnings to June 30th , 1922 at $1,346,018 as compared with $1,359,514 for the corresponding period of a year ago. Operating expenses and fixed charges for the first six months this year are $1,230,066, as compared with $1,364,996, leaving a net surplus of $115,952 as compared with a net deficit of $5,481 for the same period in 1921, showing an improvement of $121,434 for the first six months of 1922 as compared with the same period in 1921.

As the big earnings period is in the second half of the year, it is anticipated that 1922 will constitute a record in respect to net earnings and surplus profits . It is confidently expected that with the further economies anticipated in conjunction with new capital outlay, the operating ratio will go much lower than is indicated in the statement for the first six months' period.

An important matter put before the directors by Mr. Robert was that of the financing requisite for immediate extensions and improvements. He stated that negotiations with New York Bankers were in progress regarding the required capital and he was hopeful to be able to pronounce shortly a financial arrangement whereby everything would be settled satisfactorily in this connection. Mr. Robert expressed the hope that different companies operated by the Quebec Railway, Light, Heat and Power Company would shortly attain a high state of efficiency in every department, which he said will not only give improved service to the public of Quebec and district, but will also add additional equities on behalf of the owners of the property.

**Dome Mines, Ltd.**— The June production of the Domes Mines of $351,531 sets the second highest record for any one month so far in the history of the mine. The mill handled 1,036 tons of ore every 24 hours, or an aggregate of 31,991 tons for the thirty days. The grade of the ore averaged around $11.25 a ton, and resulted in a recovery of $10.98 from each ton of ore treated.

A feature of production at the Dome is that for the first six months of the current year the output has reached a total of $1,973,000. This production, along with income from interest on bonds and investments, brings the income of the Dome to well over $2,000,000 for the half year.

As a result of current achievements, the opinion is gaining ground that the next capital repayment will be $2 on each share, instead of $1. In regard to this, the larger repayment is regarded as almost a certainty.

**Hollinger Gold Mines.**—The option which the Hollinger Consolidated Gold Minees, Limited, recently secured on the Schumacher Gold Mines, Limited, which adjoins their property on the east, has been exercised as a result of the second payment, amounting to $300,000. As a result of this payment a firm contract has been entered into for the purchase of this property.

The balance of the purchase price is to be paid in four equal quarterly payments of $296,250 each, which makes the total price $1,650,000. It is intimated, semi-officially, that the first initial distribution to shareholders will be made about August 1, and that it will amount to 20c a share.

**British Columbia Refining Co.**—It is announced that creditors will be paid their claims in full. Shareholders will receive approximately 45 per cent. of their holdings.

**Canadian Pacific Railway Co.**—For the second month in succession the company, in its statement of earnings for the month of June, 1922, reports the profit consuming combination of decreased gross earnings and increased working expenses, which results in a showing as to net profits, only slightly better than that of the month of May, when a contraction of $949,037 in net earnings was shown.

Gross earnings, at $13,810,447, compare with $14,461,642 for June, 1921, this representing a decrease of $651,194. It is, however, the second largest gross of the year, March being the only month in which it was exceeded. The usual seasonal increase in business for the month of June over May is noted in the gross. This increase, however, is considerably less than it was a year ago.

Operating expenses of $11,448,134 compare with $11,356,884 for June, 1921, this being an increase.

Net earnings are thus shown to be $2,362,313 as compared with $3,104,757 for June of last year, a decrease of $742,444. While being the second largest net of 1922 to date, this is the smallest net result to be noted for any month of June in more than ten years.

Gross earnings for the six months of the year to date are $76,295,358 as compared with $84,055,671, this being a decrease of $7,760,312. Operating expenses at $66,481,287, as against $71,105,505, a reduction of $4,624,218. This leaves net earnings for the six months at $9,814,071 as compared with $12,950,166, this representing a decline of $3,136,094.

The figures for the month this year and last, are as follows:

| | June, 1922 | June, 1921 | Decrease |
|---|---|---|---|
| Gross .... .... | $13,810,447 | $14,461,642 | $651,194 |
| Op. ex. ...... | 11,448,134 | 11,356,884 | *91,249 |
| Net .... .... | $ 2,362,313 | $ 3,104,757 | $742,444 |

*Increase.

The six months of the present year to date compare with the corresponding period of 1921 as follows:

| | 1922 | 1921 | Decrease |
|---|---|---|---|
| Gross .... .... | $76,295,358 | $84,055,671 | $7,760,312 |
| Op. ex. ...... | 66,481,287 | 71,105,505 | 4,624,218 |
| Net .... ... | $ 9,814,071 | $12,950,166 | $3,136,094 |

## HAMILTON HYDRO BONDS

Sensing, he said, a motive to discredit Hydro enterprise, Ald. Morrison, of Hamilton, Ont., scored the Board of Control at a meeting of the city council on July 11 for its recommendation that the Hydro-electric Power Commission of Ontario be requested to return the $6,478,928 in debentures which it deposited as a guarantee against any deficit in the operation of the proposed Hydro-radial from Port Credit to St. Catharines.

Contrary to forecasts of anti-Hydro interests, council was sharply divided on the issue, and only after warm discussion did the recommendation of the Board of Control carry by a vote of 9 to 8.

## CANADIAN MANUFACTURERS' INSURANCE

### Agreement With Willis, Faber and Co., Terminated—No New Connection Made, But Services of Department Are Continued

An important change is made in the insurance arrangements of the Canadian Manufacturers' Association, according to the following announcement, dated July 24:—

"The Association begs to announce to members that Messrs. Willis, Faber & Company, Limited, who, since the beginning of 1914 have acted as Managers of the Association's Insurance Department, have given notice of their wish to terminate the agreement between the Association and themselves. This notice has been accepted by the Association.

"The services rendered to the Association by Messrs. Willis, Faber & Company, Limited, have been satisfactory in every particular, and it is with regret that the Association advises you of the termination of the agreement.

### No New Connection

"When it became necessary to make new arrangements for the management of the Insurance Department, the Association felt that it would be undesirable to make a new connection with any other firm or firms of brokers such as existed with Messrs. Willis, Faber & Campany. The Association has therefore arranged to engage the services of Mr. W. H. Slater as Manager of the Insurance Department, and any communications addressed to the Department will receive his personal care and attention. Mr. Slater has had practical experience in the insurance business for fifteen years and is thoroughly qualified to deal with all matters relating to insurance.

"Members are reminded that the Insurance Department will continue to give advice and information in regard to the standing of companies, policy wordings, regulations and general information free of charge.

"The Department, on request, is also prepared to arrange to have plants inspected and for other expert services to individual firms at the actual cost of providing what is required in each case.

"The Insurance Department is open for consultation on questions of every description connected with insurance, and it is hoped that members will take full advantage of its services in order to obtain insurance at the best rates and on the most favorable conditions."

## FINANCE OFFICIAL SENTENCED

William J. King, former chief in charge of worn currency in the Finance Department at Ottawa, was on July 18, sentenced to not less than one year in jail or more than eighteen months for theft of $4,500 from the department.

Gordon Henderson on behalf of King, made a strong plea for a suspended sentence, pointing to the precedent established in the Argue case, and to the previous good character of the accused, and to the fact that he had made complete restitution. Crown Attorney J. A. Ritchie could not acquiesce in the suggestion of suspended sentence. He pointed out that his case was different to that of ordinary theft in that he had been a trusted official in a high Government department where the greatest integrity was necessary. He stated that while King had only been charged with the theft of $4,500 it was possible that this did not total all that had been taken, as the accused had free access to the worn bills which were marked for destruction.

Magistrate Askwith, in passing sentence, said that while he felt with the accused and his family, he could not allow such a serious offence to go unpunished. "I have always felt sympathetic in regard to cases which come before me where the accused persons are not of the criminal class, and where they are first offenders," said the magistrate, "but in this case I must not allow my sympathy to interfere with the duty I owe the community."

## WESTERN HOMES, LTD.

Western Homes, Ltd., have declared their fourteenth consecutive semi-annual dividend at the rate of 7 per cent. per annum. Officials of the company state that the company's subscribed capital is now almost $2,000,000, the amount paid up being $445,000. At a recent meeting of the directors, B. C. Parker was appointed a member of the board.

## When You Are Among Those "Next of Kin"

When a man dies without leaving a will, the members of his family find themselves in much confusion;—What is to be done about the business? How are these securities to be divided?

If that happens to you, or to any friend of yours, remember that the shortest cut out of the confusion, is a petition to the Court for the appointment of

**The Canada Permanent Trust Co.**

as administrator of the estate. A prompt settlement follows,—as equitable to all parties as the law permits.

The fact remains, however, that no settlement of an unwilled estate can ever be satisfactory to everybody. Someone will have a lifetime of thinking,—"I know Father would have planned things so differently." The only way is to make your will, naming as your Executor

**The Canada Permanent Trust Co.**

Your family is then assured smoothness of settlement, security in your estate, and that just division which only you can make.

BANKING INVESTMENT INSURANCE INDUSTRY

# Scope and Method of Bank Audit by Chartered Accountant

By JAMES HUTCHISON, C.A.

(An address at the annual meeting of the Dominion Association of Chartered Accountants, Halifax , August 8-10.)

The time seems opportune for a discussion on bank audits, for the period is rapidly approaching when the Bank Act will be subjected to its decennial revision. One of the amendments introduced during the revision of 1913 was the section which gave power to the shareholders for the first time to appoint an auditor. At the time of the passing of the 1913 Act, it may be recalled that three forms of external supervision were considered, and it was finally decided to adopt the principle of audit by professional auditors appointed by the shareholders.

There are not wanting critics of the present system of external audit. These critics include a few business men, but for the most part, they are made up of persons with little knowledge of business, all of whom continue to misapprehend the nature of an audit. Notwithstanding continued education they perpetuate the tradition that an auditor is an insurer against error. They seem to forget that the duty of an auditor in the case of a bank audit is defined by statute. In addition, they expect that the auditor should be well nigh infallible and imagine that, once an auditor has put his signature to the balance sheet of a bank, the public are entitled to assume that the institution will continue in a sound condition. Such an assumption is obviously absurd.

In the case of bank audits, what, then, are the auditor's duties? They are clearly set forth in the Bank Act. Some are permissive and some are obligatory. In the first case, the auditor is left to determine the scope of his examination, and how far his discretion should extend, becomes naturally a question for inquiry. In the second case, of the duties which are obligatory, the methods of verification are left to the auditor.

We have, therefore, to consider the extent and method of an auditors' examination.

### Not An Unusual Audit.

Before considering this, it is important to point out that. notwithstanding uninformed opinion to the contrary. the audit of a bank presents no insuperable difficulties, and differs in no important respect from the audit of any other large corporation. The audit of a bank is simply the application of old and well-known accounting principles to a particular set of facts. Granted that a bank with its branches may be larger than most corporations, that only limits the extent of the auditor's examination and not the nature of it. On account of its size an auditor, as in the case of other large corporations, is unable for physical reasons to make a detailed audit. He must, therefore, be satisfied with a proper system of internal check. Such system of internal check is, or should be, in operation in every bank, as well as a thorough system of internal inspection. The bank's inspectors should visit each branch during the year and conduct a full investigation and audit of the affairs of the branch, verifying and reporting upon the accounts and balance sheet. I think most bank auditors will agree that the system of internal inspection, is as a rule, very carefully and thoroughly carried out. It is these inspectors' reports, together with periodical reports by each branch manager, setting forth in much detail the position of his branch, which enable the auditor to review the position of branches. In truth, a detailed audit of a bank by a professional accountant is neither necessary nor desirable.

But it is sometimes suggested: Is the professional accountant the person best fitted for the task of auditing a bank? Is it necessary that the auditor should have a knowledge of banking practice? A knowledge of banking practice may be helpful, but it is not, I believe, a sine qua non for the appointment of an auditor. The professional accountant is appointed as auditor, not for his knowledge of banking, but in a sense for his lack of it. For that very reason he can view things from the outside and in a broad and less partial manner than one whose experience is limited to bank accounting. He can, moreover, bring to bear on his task his knowledge of business conditions generally and the wide experience which a professional accountant derives from his practice of a diversified business. These constitute his chief qualifications for the task.

### Extent of the Audit.

Having said this and considering the auditor having been appointed, let us consider what the extent of his examination should be. If you will turn to the Bank Act, Section 56, particularly from Sub-section 19 onwards, you will find the duties of the auditor set forth.

I will deal with the auditors' powers later.

As I have already mentioned, you will notice that the auditors' duties are both permissive and obligatory.

"It shall be the duty of the auditors, once at least during their term of office, and at a different time, to check the cash and verify the securities at the chief office of the bank, against the entries in regard thereto in the books of the bank." These duties are obligatory on the auditors.

If, in addition to these duties, the auditor examines and checks "the returns, reports and statements and such copies of extracts from the books and accounts of any branch or agency as have been transmitted to the chief office," he will have fulfilled the minimum statutory requirements. It is then for the auditor to consider whether the performance of his task shall be the legal minimum or something more. If the law only exacts so much responsibility from the auditor, professional requirements demand more. Few accountants, I fancy, would feel that they had fulfilled their duty to the shareholders if they carried out the above bare legal requirements As a matter of practice it is understood that most auditors examine any branches where there are comparatively large portions of the bank's assets, any substantial proportion of which, if not in order or in a sound condition, might jeopardize the bank's general position. This generally means an examination of the larger branches, and for banks having their head office in Montreal would probably involve an examination of offices at Toronto, Ottawa. Winnipeg, Vancouver, New York and London, England. It will be observed that my remarks at the moment are strictly limited to the question of visiting branches or not.

### Discretionary Powers.

To avert to the auditor's duty, you will notice that beyond such checking and verification of cash and securities and the examination of certain returns, reports and statements as is prescribed, the extent of the examination to be made is left to the discretion of the auditor. Obviously it must be such an examination as will enable the auditor to state whether, in his opinion, the statement "is properly drawn up so as to exhibit a true and correct view of the state of the bank's affairs." To enable an auditor to grant such a certificate, he must make such an investigation of the affairs of the bank as will satisfy his professional requirements.

### A Bank's Assets.

I have no wish to be thought as speaking excathedra, nor have I any authority to do so, and the views submitted are purely my own. It will be well, therefore, in order to discuss the question intelligently, to look at the statement which the auditor is required to certify. The Bank Act require the banks to furnish the Government with a monthly statement in the form described in Schedule "D," annexed to the Bank Act. The annual statement to the shareholders, which alone concerns the auditor, and which will be found in Section 54 of the Act, differs from the Government return only slightly in detail. Now a rough classification will show that a bank's assets consist of:

1. Cash or the equivalent of cash.
2. Balances due by banks and banking correspondents.
3. Call or short loans. .. ..
4. Investments in sundry securities.
5. Notes of and cheques on other banks.
6. Current loans and discounts.
7. Overdue debts.
8. Bank premises.
9. Real estate and mortgages.
10. Deposit for security of note circulation.

The first five of the above headings are generally regarded as the liquid assets or assets readily available to meet calls upon the bank for any large portion of its liabilities within a limited time. The items under the heads of six and seven are also assets which are supposed to be largely capable of being liquidated or turned over within a reasonable, though longer, period. A bank's loans are to a bank what the inventory of merchandise is to a manufacturer or merchant. The bank premises and deposit for note circulation are practically fixed assets in the same manner as buildings and plant are the fixed assets in a commercial undertaking.

### Methods of Verification.

In considering the method of verification of a bank's assets by an auditor I shall refer to them very briefly in detail.

1. Cash or its equivalent need raise little question, as the auditors' duty is set forth in the Act, the only question being as to the number of branches at which verification may be considered necessary.

2. Balance due by banks and banking correspondents can be verified in the usual way by obtaining confirmation of the various balances from the respective banks.

3. Call and short loans. These should, of course, be very carefully verified by actual count of the securities held and confirmation of the amount of the loan and collateral held from each borrower. It is hardly necessary to say that it should also be seen that the value of the securities held in each case should equal the amount of the loan and show a reasonable margin of security. What is a reasonable margin would, of course, depend on the circumstances in each particular case, but where the securities pledged are of a speculative nature, the margin would naturally have to be very substantial if such securities could be considered in any respect as providing a suitable basis for a call loan by a bank.

4. Securities will be verified by actual count as far as possible, and those held at other points will be verified by obtaining certificates from the various custodians. It should, of course, be no very difficult task to see that all the bank's investments are carried to the balance sheet at an amount not exceeding their market value. In the printed form of the balance sheet it will be observed that, with one exception, the Act requires that the securities be entered at prices not exceeding market value. The exception is: "(h) Canadian Municipal Securities and British, Foreign and Colonial Public Securities, other than Canadian." These securities are not required to be stated on the face of the balance sheets as "Not exceeding market value." This omission of the words "Not exceeding market value" would not, I think, entitle an auditor to assume that such securities could be carried at an inflated valuation.

5. Notes and cheques of other banks are dealt with as cash.

### Bankers' Comments.

6. and 7. In the case of loans, discounts and overdue debts we reach what is probably the most

difficult class of assets to verify, and for that reason this class demands particular care. If you will examine the balance sheet of any bank, you will find that the item "Current Loans and Discounts" represents a very large proportion of the bank's assets. At the last annual meeting of the Royal Bank of Canada the general manager made the following observations:

"In view of the discussions which have recently taken place regarding the obligation of auditors of banks, appointed under the provisions of the Bank Act, it is proper that you should be informed that the auditors appointed by the shareholders of this bank not only certify to the correctness of the balance sheet, but they also approve of the value of the bank's assets as stated therein. The representatives of the auditors, who conduct their investigations of the bank's business throughout the entire year, have access to the statements, correspondence and inspection reports relative to all loans required, and their certification of our balance sheet is made only after a full examination of all credits granted to customers. In cases where there is any doubt as to the value of a debtor's account, the amount set aside by the bank to take care of any possible loss is approved by the auditors as being sufficient. Every facility is afforded them to examine each and every account in the bank, and they are encouraged to criticise and make the most detailed investigations of every debt due the bank, with the relative security."

The general manager of the Canadian Bank of Commerce also referred to the question of audit as follows:

"The auditors visit a number of the principal offices of the bank, and in addition to verifying the accuracy of the records and the physical existence of the cash and securities held as investments or as collateral for loans, they carefully examine the annual review of all slow or dragging loans and investments of which I have spoken, and for their own satisfaction are placed in possession of the evidence upon which our estimate of the value of such assets is based. If this does not satisfy them, they are at liberty to make such independent investigations as their judgment may dictate. In our opinion, their work is well and thoroughly done."

### Valuation of Loans.

As there seems to be some difference of opinion as to how far an auditor should assume responsibility for the valuations placed upon bank loans, it is well to devote some attention to the point, particularly in view of the public attention which has lately been drawn to it.

Whatever may be the legal responsibility of an auditor in regard to the valuations placed by a bank's officers upon its loans, it seems to me that an auditor should not accept any such valuations without due enquiry or investigation, in order to satisfy himself that a full and careful review of all the loans had been made to enable a proper and reasonable valuation to be arrived at. The basis of such a valuation and the information at the disposal of the officers in making it, should be scrutinized by the auditor to enable him to judge of whether full and adequate provision had been made to meet possible losses. Mr. Joseph Slocombe, F.C.A., in a lecture given by him some time ago, said: "The overdrawn balances due from customers should be carefully scrutinized, more particularly those which are not secured, or being secured have exceeded the limit fixed by the directors, and I need not add here that one important part of the auditors' duty, after making his examination, is to see that, in his judgment, ample provision has been made for losses likely to arise upon them."

That opinion, expressed many years ago, seems to me to contain sound doctrine with regard to an auditor's duty in reference to bank loans.

### Sources of Information.

The position of an auditor in connection with the valuation of a bank's loans is not, however, just as simple as it might appear from the various statements which have been made regarding it. It cannot be expected that an auditor, who is not a banker, should go into a bank and arbitrarily oppose his own judgment to that of the management, who are in a preferred position on account of their banking training and experience to estimate the probable outcome of any particular account. In all the best managed banks, however, an auditor should have no serious difficulty in satisfying himself as to the sufficiency of the appropriations for loans or as to the soundness of the bank as a whole.

What then, it may be asked, are the sources of information available to an auditor to enable him to satisfy himself that ample provision has been made for losses likely to arise in connection with loans. As has already been mentioned, banks carry out a very full system of internal audit or inspection, and the inspectors' opinion will be found in these reports concerning the value of advances to every customer. These opinions will be accompanied by balance sheets and other data to support the conclusions arrived at. There will also be found periodical liability returns made by each branch showing securities held as collateral, and the manager's opinion as to the advances. There will also be found a detailed report from each branch at the end of the month preceding the date of the annual statement containing full particulars of all doubtful current loans and overdue debts, with an estimate of the appropriations which they consider necessary to cover the estimated losses.

### Fluctuating Losses.

The examination of these reports involves, in the case of a large bank, a very heavy task. The duty can be lightened very considerably, however, by carefully scrutinizing loans over a specified amount, and simply seeing that the provisions recommended by inspectors or branch managers regarding small loans are duly made. In this way a reasonable opinion can be arrived at as to whether the actual appropriations set aside are adequate. In the case of large banks, whose advances amount to very large figures, it will readily be recognized that with fluctuating conditions of trade, the losses to be sustained will naturally fluctuate greatly. Admitting this situation, it follows that any bank which merely provides appropriations for actual known losses will be in a very dangerous position. Such an institution would be quite unable to face any commercial or financial crisis where sudden loss would wipe out any ordinary profits. For this reason, it is imperative that a bank should provide not only for losses which are actually known, but for losses which in ordinary course will be sustained in the realization of loans aggregating a very large total. It is readily acknowledged and realized by accountants that no large amount of debts due by people, spread over a wide area, can be realized to produce one hundred cents on the dollar. However careful a bank may be in lending its money, a certain proportion of its loans will sooner or later become fixed in character and unrealizable except over a period of years.

I might go further and say that our banks are national institutions, on the stability of which our national prosperity rests. That being so, a solemn duty rests on those who control the affairs of our banks to see that they not only provide for losses which they know they cannot escape from, but to provide liberally for all contingencies from which they are liable to suffer.

Assuming, then, that an auditor views a bank's position in this light, he will not be likely to quarrel with the management for making too large appropriations, although in saying this, it is fully recognized that a bank , as well as any other corporation, has a duty to its shareholders to represent its position fairly, and that there is a limit to the amount which it may hold in reserve against contingencies. In my opinion, however, the margin in the case of a bank is so large that an auditor will not readily meet with a case where he has to offer objections on this score.

### Provision For Losses.

The chief difficulty for an auditor, therefore, will be to satisfy himself that sufficient provision has been made for all losses and to provide for contingencies. He will, in the first place, have to satisfy himself that all appropriations called for by branch managers are fully provided for. This statement is made for the reason that, inasmuch as the loans to be provided for will, in the majority of cases, have been made by the manager making the report, he will not be likely to ask for any appropriation on that account until he is satisfied that he cannot expect to collect in full. It will next be the duty of the auditor to see that some independent official has reviewed the statements of appropriation in the light of the most recent facts available and of the information and opinion expressed by the inspector when he made his report on the branches. These reports and reviews should be finally revised by the general manager and approved by him, and finally submitted to and approved by the board of directors. If an auditor sees that appropriations have been carefully and intelligently carried out in this manner, it is confidently believed that he will not have much difficulty in acquiescing in the result.

Assuming that the provisions made do not appear to the auditor to be reasonably adequate to provide for expected and probable losses, what alternatives are open to him? He can, of course, qualify his certificate to the shareholders, but in the case of any company, that is generally a serious step, and in the case of a bank, it might be very serious indeed. Before taking any such drastic action, it seems to me that an auditor would at least, in the first place, see that the situation was fully appreciated by the president. Assuming that the president agreed with the general manager, and that the auditor still felt that he disagreed so seriously that he could not acquiesce in passing the accounts, he should then endeavor to have the whole position discussed with the board of directors. Should this appeal also prove abortive, the auditor would still have an opportunity of placing the matter before the Minister of Finance. It is thought with all these possible opportunities of discussing a bank's position before issuing a qualified certificate, an auditor can hardly complain that the door is too tightly closed against consideration of any reasonable objections he might have to the bank statement.

### Overdue Debts.

In considering the question as to what are overdue debts, some difference of opinion may arise. I am not thinking at the moment of any question as to when a time bill is overdue, but rather of the case of a demand loan or overdraft. In considering this question, it should be borne in mind that a branch manager is more likely to keep constantly before him an account which is regarded as current than one which has been transferred to overdue debts. For this reason, head office will not readily instruct a branch manager to transfer a slow, dragging account to overdue debts when they believe there is a good chance of recovering the greater portion of the debt. Such slow accounts can be dealt with in the head office by special appropriations. When accounts reach the stage of a liquidating and doubtful character, they are transferred to overdue debts, and the provisions made to meet losses in these particular accounts should naturally be on a liberal basis.

### Bank Premises.

8. Bank premises. Under the Act, a bank is entitled to acquire and hold immovable property for its own use. An auditor will generally find that a separate book is kept by a bank showing all the premises at cost, and this should be examined to see that all the assets are accounted for, and that the premises appear in the balance sheet at a figure less than cost. This figure or value should be one that is reasonable, compared with the bank's business and capital.

In order to reduce the amount of a bank's investment in premises, the plan is sometimes adopted of forming a subsidiary company. This company acquires a portion of the bank's premises at a certain price, to be paid for so much in cash and the balance in the capital stock of the subsidiary. The result of such a transaction is that the bank reduces its bank premises account and debits cash and investments. The investment, however, is really only the equity in the premises sold. While the legal ownership of the premises may be no longer vested in the bank, it can hardly be contended that any actual change has taken place. The ultimate ownership remains the same. This fact is recognized and admitted by accountants in the preparation of consolidated balance sheets of joint stock companies. In such cases accountants disregard the nominal ownership, look at the facts, and show the actual assets in a balance sheet and not the stock. There seems no reason why any other principle should be applied in the preparation of a bank's balance sheet.

A bank should not, I think, be permitted to carry bank premises as an asset, either directly or indirectly at an amount exceeding 35 per cent. of its capital and reserve. As a rule, too much of a bank's capital is invested in its fixed asset of "bank premises." Bankers do not themselves care to lend money to businesses whose capital is largely invested in fixed assets, and it might be well if bankers were to show a good example in this respect.

### Real Estate.

9. Real estate and mortgages. These are assets which the bank has acquired as security for a debt, and particulars will generally be found in

branch reports. You will remember that under Section 83 of the Act, a bank is prohibited from holding any immovable property, except such as is required for its own use, beyond a period of seven years, which period may be extended to twelve years. If held for a longer period, the property is liable to forfeiture. This provision is almost a dead letter, as six months' notice must be given of the intention to claim the forfeiture. In some instances, the real estate has been sold to a subsidiary, and cases have arisen where banks have made loans to subsidiary companies to pay for real estate sold. Leaving aside the question of the propriety of a bank owning a subsidiary company, if the principle be admitted that ownership of the stock of a subsidiary is equivalent (de facto if it is not de jure) to the ownership of the assets, any classification of such transaction as a loan disappears, for how can one make a loan to oneself? There are those who contend that such a loan should be classified as a current loan. As I have said, I am unable to agree with that point of view.

10. The deposit for security of note circulation can be confirmed by letter from the Finance Department.

So much for the assets. Now let us look briefly at the liabilities.

### The Liabilities.

A reference to any bank statement will show that by far the largest liability is "deposits". Very little verification of these is possible by the auditor, who must rely on the internal check. It is a question then of seeing that this check is being efficiently carried out.

The next liability of importance is the notes of the bank in circulation. By obtaining a certificate from the Bank Note Company showing the total notes issued to the bank, and a certificate from the directors or trust company of the notes burned, it is possible to determine the notes issued. Deducting from this total the notes of the bank on hand, the balance wil be the amount in circulation.

Other liabilities to the public call for little comment.

The liability to the shareholders, or net worth, forms the rest of the liabilities. Some points of interest may arise here. The capital stock will be verified in the usual manner. What the total of the capital stock should be may not be simple, however. A subsidiary company, of which the bank owns all the stock, may acquire stock of the bank. Further, the stock may have been acquired at a premium with funds lent by the bank to the subsidiary. If one is to be consistent, it would seem that the transaction should be disregarded and the stock treated as unissued stock.

Now, the auditor of a bank is required to certify that "All the transactions that have come under his notice have been within the powers of the bank." For this reason, he must acquaint himself thoroughly with the provisions of the Bank Act. He must study particularly those sections dealing with the issues and circulation of notes, the internal regulations of the bank, and its business and powers.

The auditor has also powers and rights, and you will find these set forth in Sub-section 17 of Section 56. You will notice that the powers conferred on auditors under the Bank Act are practically similar to those conferred on the auditor by the Companies' Act.

### Other Audits Suggested.

Thus far I have dealt with existing circumstances, but the decenial revision about to take place suggests the question whether the present system is susceptible of improvement. Two alternative systems have been suggested: (1) Inspection by Government auditors, and (2) Inspection by auditors appointed by the Bankers' Association.

It is difficult to see what warrant there is for imagining that any form of Government inspection is likely to be more thorough than the present one. The same exception can be taken on this score to inspection by the Association. There is indeed a reason to apprehend that such inspection would be interpreted by the man in the street as a guarantee of the bank by the Government or the Asociation. Indeed the error that the auditor is an insurer against error would be repeated in a worse degree. It is this idea that inspires all criticism of the present system.

It is true that our neighbors to the south have Government inspection, but the cases are not at all similar. In the United States, for instance, you have a local banking system, whereas we have a banking system which includes a widely scattered series of branches. Further, if one is to judge of any system by its fruits, we have no reason in Canada to feel dissatisfied.

Since the last revision of the Bank Act we have passed through the greatest war in history, and, in consequence, have experienced a price liquidation hitherto unparalleled. Throughout all this period not a single dollar of bank depositors' money has been lost. It can hardly be a matter for surprise that some shareholders should have suffered a loss of some part of the market value of their stock. That this should be so need not give ground for the assumption in certain quarters that the Bank Act and the Government should protect shareholders against the bad management of their own elected representatives.

### The Bank Act.

The Bank Act as it stands is a wonderfully well devised and workable enactment, and it is doubtful if it can be improved in its main features. Whatever regulations may be made for the conduct of business, there will always be the human element to consider. It cannot be eliminated by legislation. Legal restrictions attempting to control unstable management will be more likely to hamper the free and useful development of business than to serve any useful check upon unwise or unsound transactions.

There has unfortunately been one case since the last revision of the Bank Act and the appointment of independent auditors which has given rise to a good deal of discussion, and the value of an audit under such circumstances has been openly questioned. This situation calls for an expression of opinion as to the attitude to be adopted by the profession in the performance of their duties. The legal position of an auditor was very clearly set forth by Lord Justice Lindley in the London and General Bank case, and a few sentences from that judgment might well be reproduced:

"It is no part of an auditor's duty to give advice either to directors or shareholders as to what they ought to do. An auditor has nothing to do with the prudence or imprudence of making loans with or without security. It is nothing to him whether the business of a company is being conducted prudently or imprudently, profitably or unprofitably; it is nothing to him whether dividends are properly or improperly declared, provided he discharges his own duty to the shareholders. His business is to ascertain and state the true financial position of the company at the time of the audit, and his duty is confined to that. But then comes the question: How is he to ascertain such position? The answer it: By examining the books of the company. But he does not discharge his duty by doing this without enquiry and without taking any trouble to see that the books of the company themselves show the company's true position. He must take reasonable care to ascertain that they do. Unless he does this, his duty will be worse than a farce. . . . . "

"Such I take to be the duty of the auditor: He must be honest—that is, he must not certify what he does not believe to be true, and he must take reasonable care and skill before he believes that what he certifies is true."

Later on, in referring to how the auditor in this particular case viewed his duties, the Judge said:

"He did not content himself with making his balance sheet from the books without troubling himself about the truth of what they showed. He checked the cash, examined vouchers for payments, saw that the bills and securities entered in the books were correct, took reasonable care to ascertain their value, and in one case obtained a Solicitor's opinion on the validity of an equitable charge."

### Status of the Accountant.

The professional accountant should in the practice of his profession derive a wide knowledge of business and trade conditions. While it is no part of his duty as an auditor to interfere with the policy or conduct of any business, he should, I think, always welcome any opportunity which may arise whereby he can be of assistance to his clients. An auditor may be honest and conscientious in the performance of his legal obligations, but he may so perform those duties that his clients are continually in a state of irritation, so that they derive little, if any, particular benefit from the service. It scarcely needs to be said that an auditor should carry out his work with the greatest tact and lend a willing and sympathetic ear to his client, who looks to him for guidance or advice.

The fact that an auditor is not a guarantor or valuator does not mean that an auditor is freed from the responsibility of exercising a reasonable judgment with reference to the principles which have been followed in arriving at the values placed upon assets appearing in the balance sheet. In other words, an auditor is presumed to have examined all the books and collateral information obtainable before feeling satisfied that the statement he signs does in fact "exhibit a true and correct view of the state of affairs." In this way it should be the aim of every auditor to be able to claim that any balance sheet which bears his unqualified endorsement means exactly what it purports to be. As a matter of fact, if it should be misleading in any essential item which the auditor knows, or with a reasonable amount of diligence and the exercise of a reasonable amount of professional skill, should have known to be incorrect, he cannot, I think, complain if he is considered to have failed in the performance of his duty.

We must face the fact squarely; it is not enough for us to shelter all the time behind the strict letter of our legal responsibility. As I have already indicated, my conception of an auditor's duty is higher than that. We have a duty to ourselves and to our profession. Let us make it as high as we dare, so that our clients and the general public may feel that the certificate of a Chartered Accountant has behind it the guarantee of faithful work performed, combined with the exercise of a reasonable judgment and professional skill. If we adopt this attitude towards our work, we shall not have any misgivings if we are reminded of the words which Mazzini addressed to his fellow citizens: "I speak to you of your duties before speaking to you of your rights."

## *Business Conditions*

Continued satisfactory crop progress bas resulted in more confident Fall buying in some sections, but with many merchants and salesmen away on their annual vacations, business in most wholesale lines has naturally showed some quieting down, according to despatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities of the Dominion of Canada. At the same time, there is a steady run of replenishing orders in moderate amounts for seasonable merchandise, and sentiment generally is highly optimistic regarding prospects for Fall and Winter trade. Building continues active in many districts, and extensive preparations are being made for increased operations in the iron and steel and mining industries with the close of the vacation period. With the practical certainty that labor will be well employed, merchants confidently anticipate a heavy movement of all kinds of commodities when cool weather comes. Collections show moderate improvement.

Montreal reports some quieting down in business, but this is to be expected, as many merchants are away on their vacations, and a prompt revival in activity is confidently predicted with the approach of Fall. Advices from country districts are encouraging, and collections are slightly better.

Business continues quiet at Quebec, but this is usual at this period, and improvement is anticipated early in the Fall, as crop conditions in this district are reported excellent. Collections are still slow.

A fair number of replenishing orders for seasonable commodities are being received by wholesalers at Toronto, and some business is being placed for future delivery, but a full measure of activity is not anticipated until the end of the vacation period, as many merchants, both wholesale and retail, are absent from the city. Collections are not altogether satisfactory.

The crops generally throughout the Far West and Northwest continue to make encouraging progress, and, though merchants are still very conservative in their operations, advices from Winnipeg, Saskatoon, Calgary, Regina and other centres note a considerable increase in the number of inquiries, and wholesalers in these cities say that Fall and Winter trade will undoubtedly be very active, if the harvests realize present indications. Collections remain slow.

# Conference of Insurance Superintendents

(Presidential address of Charles Heath, of Winnipeg, at opening meeting on August 8.)

During the thirty-five years that I have had the good fortune to reside in Canada, I have been a member of all sorts and conditions of clubs, associations and so forth, all of which rejoiced in a more less formidable array of officers, and I think I have at some time or another been every kind of an officer except President; that honor I have studiously avoided because, although I have a decided predilection for hard work, my education was sadly neglected along certain lines, and like George Stephenson, the pioneer of railway construction and operation, I must confess to not having been blessed with "the gift of the gab," so I have always insisted on leaving that office with its attendant flights of oratory to my more fortunate confreres.

I regret to say that when the Association of Provincial Superintendents of Insurance elected their officers last year at Quebec, they had more consideration for their own amusement in watching me wrestle with the duties of President than they had for the feeling of the Conference in general, and they insisted on inflicting me upon you as President of this Conference. Heretofore, when I have found myself up against an address, I have fallen back upon what some misguided people have seen fit to call my sense of humor, but I conceive that a President is always considered to be the personification of dignity, and I happened to notice the other day one of those literary effusions by Byron Stauffer, which are so popular with the newspapers when they need padding, the burden of which was that very few reputed wits or humorists ever succeed in commanding the respect of the intellectual world, and the few who have so succeeded did so in spite of( and not because of, their humorous proclivities. I must, therefore, adjure for this occasion at least the slightest approach to wit or humor.

Realizing, as you have realized, the difficulty I was going to experience in getting started, I glanced over a number of Presidential addresses, and without exception, after the preliminary flourish, they all expressed in some form or other, the appreciation of the honor of addressing such a large and intelligent audience—gentlemen, I was born on the fourth of July, and, like George Washington, I cannot tell a lie. I recognize that honor, but in all truthfulness I cannot say that I appreciate it. I feel as though the honor was going to fall upon me and crush me. Therefore, gentlemen, I crave your kind consideration and indulgence if I fail in a measure to uphold the noble traditions of the office. The spirit is indeed willing, even if the flesh is weak.

I have, however, very much pleasure in welcoming on behalf of this Association the gentlemen here present,, many of whom have come a very long way to lend their experience and advice to the deliberation of this Conference. There are on the programme a large number of very important matters, many of which have already received very careful consideration, and which will only require a few finishing touches before being finally adopted by this Conference. There are others that will require very careful consideration, clause by clause, as, although they have alreary received very careful consideration from a number of learned gentlemen, they are comparatively new subjects to this Association.

We are indeed fortunate in being able to hold this conference on the Pacific Coast, and I have no doubt there are many here today, who, like myself, have never before had the opportunity of visiting this beauty spot on North America.

### The Eastern Provinces

Last year we visited the ancient City of Quebec, whose very cobble stones exude romances hundreds of years old. The reason for holding the Conference there last year was in the hope that we would be able to interest the Eastern Provinces in the very important work of this Association. In the past we had failed to tempt them from their fastnesses by the Atlantic Ocean, so we decided to carry the battle right into their midst, but, unfortunately, the only superintendent of Insurance east of Ontario who was able to be present was our good friend Mr. Monk, Superintendent of Insurance, for Quebec, who, we found, was a tower of strength in himself, and to whom we were indeed indebted for wise counsel and courteous suggestion, as well as lavish hospitality.

There are many reasons for holding the Conference on the Pacific Coast this year. I will not presume to suggest which is the most important one; I will leave that to you individually, and will content myself with naming a few of them.

The Canadian Bar Association are holding their Annual Meeting here, and there are many points of joint interest between this Association and the Committee on Uniformity of Laws—a sub-committee of the Bar Association—which we will have the opportunity of considering together. I have always been of the opinion that the only way to arrive at lasting Uniformity of Laws is for all those various interests to get together at the same time, round the same table, and interchange their various views, and by the exercise of common sense and forbearance, arrive at some common ground where we can agree as to what provisions will be to the best interests of all concerned. I believe that at this conference there are representatives of all those various interests; if so, we should be able to arrive at a satisfactory solution of all our difficulties and differences of opinion, all of which we are bound to have at times.

It seems to me that we will have no excuses to offer if we leave Vancouver without at least arriving at a compromise, where compromise is necessary.

I do not think we have had the pleasure of the presence of the Superintendent of Insurance for British Columbia at any of our Conferences since 1917, so "we come to him" hoping that he will reciprocate and attend all our Conferences in the future, wherever they may be held.

Without perfect health none of us can do really efficient work; it is good, therefore, for those of us who live in dry Provinces to enjoy a few days in a wet Province. I have heard those of my more fortunate friends who are sufficiently blessed with this world's goods to be able to winter at "the coast," speak of British Columbia as a wet Province, so we have come prepared to thoroughly enjoy ourselves between shifts; not that we had anything to complain of in that respect at Quebec last year. It is years since I have seen rain come down so hard or so continuously as it did while we were there; the narrow, winding, hilly streets of Quebec were veritable torrents all the time we were there, but we had some time.

Those are all good reasons, but there is one more, worthy of mention—your President happens to have a daughter married and living in Vancouver, so, of course, he voted unanimously for Vancouver for 1922, and he expected to vote for Edmonton for 1923, having another daughter there; but she is just moving back to Winnipeg, so you can have it wherever you like—I have no more daughters.

### Ontario's Leadership

Before closing these remarks, I wonder if I dare offer a few words of advice or suggestion to my very good friend, Mr. Gray. Mr. Gray is a young man of exceptional ability, being a lawyer by profession, and so peculiarly well qualified to wrestle with legal forms and phraseologies, and being located in Toronto, he has the advantage of being able to consult with some of the brightest minds in the insurance profession, men who have grown up and grown old in the insurance business. Ontario is, in so far as the insurance business is concerned, so to speak, the foster mother of the rest of Canada; therefore, it is only fit and proper that Mr. Gray, Superintendent of Insurance for Ontario, should take a prominent part in the formulation of insurance laws, laws which we hope will become uniform, as far as circumstances and conditions will allow, all over Canada.

But it has occurred to me that in his enthusiasm for the improvement of insurance legislation he may perhaps have sometimes overlooked the rights and opinions of other Provinces, and the fact that the Insurance Laws of the Province of Ontario have been adopted very largely by the other Provinces, and made the foundation of their insurance laws—altered, perhaps, to suit different conditions in some cases, I might even suggest perhaps improved in others, but they are largely the Ontario laws just the same, and by reason of this adoption, and by reason of the spread of the principles of Uniformity of Insurance Law throughout Canada, for the spread of which principles we are very largely indebted to Mr. Gray's energy and eloquence, I am not so sure that in this day and generation Ontario owns its own insurance laws altogether, nor am I quite sure that she has altogether the right to do as she likes, or when she likes, with her insurance laws; nor do I think it advisable, nor in the interests of Uniformity of Laws for Mr. Gray to get up, and before he has had breakfast tear up certain Ontario insurance provisions and substitute new ones, even with the assistance and advice of that most admirable and useful House Committee appointed by the Ontario Legislature.

This is a big country; there are many interests which are closely interlocked, and there is that most valuable Canadian asset "Uniformity of Insurance Laws." It seems to me that before any change is submitted to the Ontario Legislature, it should be submitted to this Conference of Superintendents of Insurance, and perhaps the Committee on Uniformity of Laws, and by them recommended to the legislatures of the various Provinces; then having received the seal of approval of all interests, it is eminently fit and proper that it should be submitted first to the Ontario Legislature with the unanimous recommendation that it be accepted without change. In that way we can reasonably expect that it will be accepted without change, except in minor details such as the amounts of license fees charged, and so forth, by the other Provincial Legislatures, and, further, that having been so unanimously adopted, no material change should be made by any Province, unless, or until such change has been unanimously adopted in like manner. I offer this suggestion to my friend, Mr. Gray, in all friendliness, and in the interest of Uniformity of Insurance Laws, and I am sure he will accept it in the same spirit.

Now gentlemen, you have before you the programme. I do not think it necessary for me to refer to the individual items. Allow me to again impress upon you the seriousness and importance of the work that we are gathered here together to perform, work that is of vital interest to every man, woman and child in Canada: let us give the very best that we have to these deliberations, exercising self-restraint and "give and take" for, if we cannot get reasonable unanimity of opinion amongst those most interested in the provisions of the various suggested Bills, those whose life's work has given them a wide vision of the probable results of these provisions, how can we expect unanimity of opinion amongst the members of the various legislatures to whom these provisions must be recommended, and who are largely ignorant of anything but the most elementary principles of the insurance business? Therefore, gentlemen, let our every thought be directed toward—Uniformity of Insurance Laws and Provisions.

## VALIDITY OF GIFT OF SHARES

### Privy Council Upholds Quebec Judgment on Case Dealing With Stock Transfer

The written judgment of the Board in the case of O'Meara v. Bennett, on appeal from the Quebec Court of King's Bench, has recently been reported and the facts and decision briefly are: "The holder of certain shares of the capital stock of a limited company in order to carry out her intention to give them to the appellant and that she did not want them to form part of her estate at death or to be affected by her will, but reserving to herself the dividends on the shares during her lifetime, communicated through her husband with the company and in accordance with their directions the certificates were sent to the company with an endorsed transfer on the back in the following words: "For value received I hereby sell, assign and transfer unto (the owner) in trust for (the appellant) .................... shares of the capital stock represented by the within certificate and do hereby irrevocably constitute and appoint .................... attorney to transfer the said stock on the books of the within named company with full powers of substitution in the premises," and this was duly signed by the owner and her husband. The original certificates were cancelled and new ones issued in this form: "This certifies that .................... in trust for .................... is the registered holder of .................... shares."

"Their Lordships held affirming their judgment of the Court of King's Bench for Quebec that under the Quebec Civil Code the attempted creation of the trust failed, there being no gift by delivery, the property being incapable of being so delivered under the Civil Code and there being no transfer by deed as required by art. 776."

# Model Fire Insurance Policy Act

(By V. Evan Gray, Ontario Superintendent of Insurance.

(Report of the committee on the Model Fire Insurance Policy Act, presented at the Provincial Insurance Superintendent's Conference in Vancouver, August 8-10.)

During the year a number of conferences have been held in Ontario for discussion of the provisions of the Model Fire Insurance Policy Act as revised and approved by the Conference of Commissioners on Uniformity of Legislation in Canada in September 1921. These Conferences were concluded by a largely attended meeting in the Parliament Buildings at Toronto on Tuesday, the 18th of July, at which the following interests were represented:—

(a) Certain members of the Legislature; (b) The Associated Fire Insurance Companies; (c) The Canadian Manufacturers' Association; (d) The Toronto Board of Trade; (e) Counsel for certain large buyers of Insurance; (f) The Ontario Superintendent of Insurance; (g) Various other individuals interested on behalf of persons insured.

The Conference agreed unanimously upon the recommendation to the Commissioners on Uniformity of Legislation of certain amendments to the Act proposed and urged that these recommendations should be considered and adopted by the Conference at its 1922 meeting in Victoria for recommendation to the Legislatures of the Provinces.

### Changes Recommended.

The following is the detail of the amendments recommended: —

Section 1: Approved without change.

Section 2: Approved without change.

Section 3: To be amended by striking out the words "exceeding one year" in the fourth line and inserting the same words in the second line after the word "or" and by inserting the words "if on the cash plan" in the fourth line in lieu of the words struck out.

Section 4: To be amended by inserting at the end of the first line the following words "the address of the chief agency of the company in the Province."

Section 5: This section to be numbered as sub-section 1 and amended by striking out the words "subject to the provisions of section 6" in the second line and by inserting in the third line immediately preceding the word "and" and the words "except contracts where the subject matter of the insurance is exclusively rents, charges and or loss of profits," and by adding at the end of the sub-section the following words" "and no variation, omission or addition thereto shall be binding on the insured."

Section 5 is further amended by adding thereto the following sub-sections:—

(2) "Where the subject matter of the insurance is exclusively rents, charges and or loss of profits the Conditions numbered 1, 2, 4, 5, 6, 7, 8, 9, 10, 14, 16, 17, 18, 20, 21, 12. 23 and 24. as set forth in this schedule to this Act shall be deemed to be part of every such contract in force in Ontario and shall be printed on every such policy with the heading "Statutory Conditions" and no variation or omission and no addition which is inconsistent with the said Statutory Conditions shall be binding on the insured."

Section 6: Delete this Section.

Section 7: To be amended by striking out the words "an addition to the Statutory Conditions or subject to the provisions of Section 6" in the two last lines of the Section and substituting therefor the following words "a variation or addition to the Statutory Conditions."

Section 8: This Section to be struck out and the following Section substituted therefor:

"No red ink shall be used on the face of a policy except for the name address and emblem of the company and the policy number and for the purposes mentioned in this Act."

Section 9: Approved without change.

Section 10: Delete this Section.

Section 11: Approved without change.

Section 12: To be amended fixing an appropriate date in lieu of that named in the Section.

### Schedule Statutory Conditions.

Condition No. 1. To be amended by inserting the word "fraudulently" before the word "omits" in the third line.

Condition No. 2. To be amended by striking out the words "signed by the insured" in the second line thereof and further amended by striking out the whole of the second sentence in the Condition beginning with the words "if the policy has been issued" and continuing to the end of the Condition.

Condition No. 3: To be amended by striking out the word "plans" in the second line.

Condition No. 4: (a) Approved without change.

(f) To be amended by striking out the word "earthquake."

(c) To be amended by inserting after the word "want" in the first line, the words "within the knowledge of the insured" and to be further amended by striking out the words "brick and stone" in the second line.

(d) Approved without change.

Condition No. 5: (a) Approved without change.

(b) To be amended by inserting after the word "insured" in the third line, the words "by the insured or to his knowledge" and by striking out the words "fireworks, Greek fire, phosphorus, explosives" in the fifth and sixth lines and to be further amended by adding at the end of the paragraph the words "dynamite or similar explosives."

(c) Approved without change.

(d) To be amended by inserting before the word "vacant" in the second line the words "to the knowledge of the insured."

Condition No. 6: To be amended by substituting for the words "articles themselves" at the end of the Condition, the words "articles itself."

Condition No. 7: Approved without change.

Condition No. 8: (a) To be amended by substituting the words "seventy-five" for the word "sixty" in the fifth line.

(b) Approved without change.

(c) To be amended by striking out the word "any" in the first line and by inserting after the word "insurance" in the same line the words "of the same class and character" and by inserting the word "the" at the beginning of the second line.

Note: All the persons represented at the Conference with the exception of the represntatives of the insurance companies were agreed that Condition No. 8 should be deleted entirely.

Condition No. 9: To be amended by deleting paragraph (a) entirely and substituting for the present heading "Mortgagees and other Payees", the heading "Third Party Payees" and by striking out the letter (b) so that the second paragraph becomes the whole of Condition 9.

Condition No. 10: Approved without change.

Condition No. 11: Approved without change.

Condition No. 12: Approved without change.

Condition No. 13: To be amended by striking out the words "or its value as appraised under Condition 17" in the eleventh line.

Condition No. 14: Approved without change.

Condition No. 15: To be amended by striking out the words "and as complete as the circumstances permit" in the fourth line of paragraph (c).

Condition No. 16: Approved without change.

Condition No. 17: To be deleted entirely and to have substituted therefor as a new Condition 17 the existing Condition No. 21 of the present Ontario Statutory Conditions which is in the following form:—

"If any difference arises as to the value of the "property insured, the property saved, or the amount of the loss, such value and amount and the proportion thereof (if any) to be paid by the company shall, whether the right to recover on the policy is disputed or not, and independently of all other questions, be submitted to the arbitration of some person to be chosen by both parties, or if they cannot agree on one person, then to two persons, one to be chosen by the party assured and the other by the company, and a third to be appointed by the persons so chosen, or on their failing to agree, then by a Judge of the County or District Court of the County or District in which the loss has happened; and such reference shall be subject to the provisions of The Arbitration Act; and the award shall, if the company is in other respects liable, be conclusive as to the amount of the loss and the proportion to be paid by the company, where the full amount of the claim is award the costs shall follow the event; and in other cases all questions of costs shall be in the discretion of the arbitrators."

Condition No. 18: Approved without change.

Condition No. 19: To be amended by striking out the words "within a reasonable time" in the second line and by adding at the end of the Condition a new sentence in the following words "In such event the company shall commence to so repair, re-build, or replace the property within thirty days after the receipt of the proofs of loss and shall thereafter proceed with all due diligence to the completion thereof."

Condition No. 20: Approved without change.

Condition No. 21: Approved without change.

Condition No. 22: Approved without change.

Condition No. 23: Approved without change.

Condition No. 24: Approved without change.

Note: It is also recommended for consistency with existing insurance legislation, that the word "insurer" should be substituted for the word "company" wherever it appears in the Act.

---

## AGENTS LIABILITY FOR CHEQUE CASHED

### Manitoba Court Absolves Him, When Bank Knew His Relation to Principal

The Manitoba Court of Appeal in Banque d'Hochelaga v. Marshall, has held that a person who is not the holder of a cheque in due course and who has not given value for it but who acts merely as the agent of another in cashing the cheque at the bank, and hands over the proceeds to his principal, making it clear to the bank that he is merely an agent and has no personal interest in the cheque, cannot be held liable to the bank for the amount of the cheque, upon it turning out to be a forgery.

Justice Dennistoun quotes Halsbury's Laws of England (Vol. 1 parag. 468) as the law applicable hereto: "The receipt of money from a third person by an agent on his principal's behalf, does not in itself render the agent personally liable to repay it when the third person becomes entitled as against the principal to repayment, whether the money remains in the agent's hands or not. But if a third person pays money to an agent under a mistake ot fact, or in consequence of some wrongful act, the agent is personally liable to repay it, unless before the claim for repayment was made upon him, he has paid it to the principal, or done something equivalent to payment to his principal. Where, however, the agent has been a party to the wrongful act, or has acted as a principal in the transaction, in consequence of which the money has been paid to him, he is not discharged from his liability to make repayment by any payment over to his principal."

His Lordship continues: "In the case at Bar the bank paid money on a forged cheque to an innocent agent, who before discovery of the forgery paid it over in accordance with instructions received from his principal. The agent at the time he cashed the cheque informed the bank officials that he was an agent and not a principal and his good faith in so doing is not questioned."

---

## SALE OF SHARES AT DISCOUNT

### Validity Under B.C. Law—Shares of $4,000 Par Value Were Sold for $1,000

An action has recently been decided by the Alberta Supreme Court which was brought on a promissory note given in full value for shares of the capital stock of the Princess Copper Mines Ltd., subscribed for and issued to one Trelle.

The par value of the shares was $4,000 but Trelle's note was for only $1,000 which was the agreed price for the shares. As the entire transaction took place in British Columbia, His Lordship applied B.C. law and stated that the transaction took place in 1918 and that the sale ot these shares at a discount was then prohibited by section 98 of the Companies Act of British Columbia.

His Lordship quoted sec. 139 (2) of chapter 10 of the B.C. statutes of 1921, which provides that "All shares of a company incorporated pursuant to sec. 131 of the Companies Act which have before the 17th April, 1920, been issued or agreed to be issued as fully paid and non-assessable shall at all times be deemed to be fully paid and to have been lawfully issued as non-assessable." This subsection puts an end to all question as to the right or duty of a company or anyone else to extract payment of the difference between the par value of shares sold and their sale price. but also validates an ultra vires transaction by which the company issued such shares at a discount contrary to the Companies Act of British Columbia.

ON GUARD

Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

## FOREIGN LOANS

Foreign financing in New York and London is reviewed in the August "Review" of the second Federal Reserve District, New York. Both in the United States and in the United Kingdom the volume of financing done for other countries has shown a large, and on the whole, steady increase during the past year and a half. In fact in each market sales of foreign issues in the first half of this year practically equals the sales for the whole of 1921. The following table shows by half years since the beginning of 1921 the totals of foreign issues sold in the two countries. Figures given represent par value of securities offered. Those for the United Kingdom are totals of issues reported weekly by the Economist.

| Period | Sales in N.Y. | Sales in Lon. |
|---|---|---|
| 1st half, 1921 .... | $ 291,654,000 | $238,010,000 |
| 2nd half, 1921 .. | 403,550,000 | 229,810,000 |
| 1st half, 1922 .... | 678,552,000 | 481,191,000 |
| Total ........ | $1,373,756,000 | $949,011,000 |

The extent of financing in the London market is noteworthy in view of the fact that in the last 18 months England has exported $56,805,000 net gold and silver, and has had an import trade balance in merchandise of $1,417,367,000, whereas the United States has in the same period received net imports of gold and silver amounting to $794,615,000, and has had a net export balance of merchandise valued at $2,376,607,000.

Comparisons of the sources of foreign capital flotations in the two countries shows that, broadly speaking, the United States has been engaged in financing chiefly North and South America and Europe, while the United Kingdom has been occupied chiefly with Asia and Australasia, and to a lesser extent with Europe and Africa. The direction of financing in the case of England is largely determined by the location of her colonies. In the New York market, Canada has not only led all other countries with respect to the volume of issues sold here, but has led even such large continental divisions as South America and Europe. The accompanying table shows comparatively the sources of issues sold in the last eighteen months in New York and London. About 88 per cent. of all foreign offerings in New York originated in the Americas or in Europe, whereas over 68 per cent. of all foreign offerings in London were of Asia, Australasia, and Africa.

## THE WAY OF THE CHEQUE SWINDLER

Another swindler is managing to negotiate bogus cheques, having forged band acceptance stamps. He sticks to moderate amounts being satisfied apparently that it is safer to skin a large number for small amounts rather than attempt to handle one for a large figure. Also he keeps moving so as not to wear out his welcome in one place. The two cheques reported are for $32.50 and $11.75 respectively and one was cashed at Georgetown and the other at Oshawa.

The scheme is old but it seems that no matter how many times it is exposed there are always those who will fall for a cheque bearing a rubber stamp supposedly that of the bank on which the check is issued. So long as the stamp is there a certain type of merchant does not seem to think identification necessary and will cheerfully hand over his goods to any one with a good story and pleasantly convincing manner. This habit is not confined to the small dealers although they seem to be the chief victims of this variety of swindler. A couple of years ago one merchant actually parted with a $350 fur coat and his own cheque for $250 in exchange for a cheque for $600—which had been raised from $6—and he did not know the man. Possibly it was the smile of the golden haired damsel for whom the coat was intended that was responsible but he took the phoney cheque without question. It is no doubt the chance of profit that lulls suspicion as the buyer in a case of this kind is not critical.

Banks are seldom stung in this way as they insist on a cheque being indorsed by someone known to them before negotiating a cheque whether the cheque purports to be accepted or not. There is no profit to the bank in cashing for anyone a cheque drawn on some other point. True there is usually a commission but that barely covers the cost of collection and interest on the time the cheque is outstanding and there is therefore no inducement to take a chance. In connection with the indorsement of a cheque in order to establish the identity of the payee to the bank the attempt is frequently made to endorse "for identification only." Such an indorsement of course is of no use whatever, the bank still carries all the risk in the transaction. It usually means that the man willing to indorse in this way is one of those gentry who want whatever benefit there might accrue from having introduced the payee to the bank but is unwilling to run any risk. He hopes to bluff the bank manager into taking the risk while he profits. The only way to handle these gentry is to laugh and call the bluff. They dare not squeal.

## RAILWAY LINES

When the railways which now comprise the Canadian National System were taken over by the Dominion, the people of Canada became owners of what was and is not only a large but a varied assortment of lines. These had been built or acquired by the previous proprietors under different cicumstances and not always with a view to supplying the public with better transportation facilities. Those who pieced together the Canadian Northern system had acquired something of a reputation for the capacity of their basket and their readiness to gather into it almost anything that offered. There was no respect shown for the territorial interests of established companies, nor did the policy of succeeding parliaments encourage the idea that such respect should be shown. Governments and their supporters had somewhere and somehow got hold of the idea that competition is the life of railroads, and had issued charters accordingly. What is being attempted now is, in theory at least, a negatation of the reckless policy pursued from 1900 to 1910, but the practice is not equal to the profession. The need for what is now so insistently advocated, namely, co-ordination of least, a negotiation of the reckless policy pursued has been taught by costly and painful experience, and the principle is a good one if applied impartially. Unfortunately for the railroad users, and for the taxpayers as well, the scheme of coordination is bound about by an ironclad limitation. It has been found that, here and there, the Canadian National System includes certain branch lines which, for one reason or another, had fallen into the capacious basket of Mackenzie and Mann, but which are not now and cannot be operated either with profit to the Government or with advantage to the public. It happens that some of these lines are situated in territory served by the Canadian Pacific and which owes its development principally to Canadian Pacific enterprise and efficiency. These lines might, in some cases, be disposed of by the Government by arrangement with the Canadian Pacific, which is in a position to operate them successfully. The public would thereby derive the benefit of a greatly improved service and the taxpayer would be afforded some measure of relief. If the principle of co-ordination were to be carried to its logical conclusion, the Government would not hesitate to avail itself of these opportunities for ridding the National system of what are now deficit-producing lines and at the same time insure the increasing comfort of the travelling public. When, however, suggestions to this end have been made they have been met with a flat and final refusal, not upon the merits of the proposal but on the simple ground that no part of the National system can be permitted to pass into the hands of the Canadian Pacific. It is a dog-in-the-manger policy, but it is being resolutely adhered to, irrespective of the inconvenience of the railway users and of the plight of the taxpayer. If the Canadian National were in a position to operate these lines successfully there would be some justification for the attitude adopted, but that is not the case nor is there any likelihood of any change in this respect being brought about under future conditions. The position is an unwise one on the part of the Government and unfortunate from the standpoint of the public and can hardly be reconciled with the proclaimed determination to "give the National Railways a fair chance."

## THE COST OF DISTRIBUTION

The proportion of selling price absorbed by distribution costs has for many years past been the subject of study by economists. With the growing complexity of business, there seems to be a widening distance between producer and consumer, and a growing margin between what the producer receives and what the purchaser pays. An agricultural Engineering Commission at Washington has just published what it terms the "most comprehensive and intelligent study of distributive costs ever issued," and some of the conclusions show wide margins. In bread, for instance, the producer of wheat gets 28 cents out of the consumer's dollar, The cost of production of the wheat, transportation, milling, bread manufacture, etc, is 50 cents. Selling cost including manufaturer's charges and profit, and retailer's charges and profit, are 50 cents. The production cost of corn flakes is 36 cents, the cost of distribution 63 cents. In rolled oats production cost is 30 cents, distribution cost 70 cents. In fresh beef the production cost is 73 and distributing cost is 27 cents. In a long line of products, the cost of transportation, taxes, retailer's charges and profits take up an excessive share of the ultimate price. The producer of the original commodity gets but a small part of the ultimate price. In some cases in which new brands of food products are placed on markets already well supplied, the intense selling competition leads to losses by the manufacturing houses, and the consumer pays, not less, but more.

It is worth noting that in the operation of wholesale grocery firms, an actual average loss of about half a cent on each dollar was recorded, compared with an average profit of 2½ cents in 1913. Of the consumer's dollar spent for groceries, the retailer (there were 334,000 in the United States in 1920) has 80.70 cents as cost of merchandise, 16.80 as operating expense and 2.50 as net profit. The manufacturers of eight selected food commodities had net profits of 6.09 out of each dollar received, and their raw material cost them only 43.74 cents and the cost of manufacture was only 17 cents.

The astonishing mass of statistics gathered seem to indicate that in nearly every line net profits are not excessive, but intervening charges that make up overhead and operating expense are very burdensome. High real estate rents, high delivery costs, too much competition that forces all merchants to special selling expense, very great and expensive elaboration of processes and the use of costly adornments contribute to swell the cost to the consumer, while the producer is held down to a low-profit or no-profit basis in order that the consumer may be able to pay these intervening costs.

---

## MONARCH LIFE SEMI-ANNUAL RESULTS

The Monarch Life Assurance Company's semi-annual statement indicates the completion of the greatest six months' new business in the company's history. Every month since January showed a steady increase over the same period last year. The statement also shows a marked increase in cash premiums and an even lower mortality than the company's exceptionally low record of last year, viz.: 28%. The invested funds continue to yield over 7½%, exclusive of profits on the sale of securities.

Insurance by the special inspection system in lieu of medical examination on smaller sized policies has recently been adopted by the company. The managing director, J. W. W. Stewart, says: "In view of favorable crop conditions, both east and west, it is reasonable to expect that Monarch Life totals should increase very substantially during the balance of the year."

# Operation of Savings Insurance Plan

By ELAINE CLABROU, Service and Extension Department, The People's State Bank, Indianapolis, Ind.

(From "Trust Companies")

Experience showed us that two things were essential in properly introducing our Insured Savings Plan. One was that the distribution of the account be handled by a responsible person with a competent sales staff under him and that ordinary life insurance or some form of insurance which paid a greater commission to the individual distributing the account was necessary.

We began a thorough study of the plan. From our experience we developed a plan which is now in use, and which is gaining accounts for us at the rate of about one hundred a month. We find that the greatest benefit from the plan comes by reason of the fatc that we are able to employ a staff of six capable salesmen as representatives of the bank to present the special savings plan in our city. This is a permanent organization thoroughly schooled in the details, not only of the plan but of the other services of our bank. Careful attention is given to each one of the salesmen in an effort to thoroughly instruct him in the functions, the aims and the ideals of our institution. Primarily he goes out to sell savings accounts; actually he is constantly selling our bank to all classes of people. We derive a substantial benefit from this representation because these salesmen talk to from fifty to one hundred persons every day. The word of mouth publicity gained in this way brings substantial returns.

### Requires an Experienced Sales Staff

No cost of solicitation is borne by this institution. The salesmen do not draw salaries or commissions from the bank but from a representative of the insurance company. This representative has a contract with the bank.

It has been our experience that the account cannot be presented properly, and with good results by advertising alone. There must be a personal contact with salesmen, and we are sure that whereever an attempt has been made to sell the account by advertising and without an experienced sales staff the cost to the bank has been exorbitant. When we refer to an experienced sales staff we mean a staff of men who have had at least three or four months' experience with the account.

### Description of Plan

Our plan has as its unit a monthly deposit of $10. Immediately after the account is opened a life insurance policy for $1,200 is issued by a reputable company. The regular physical examination is required. Premiums are deducted from the account at six months' intervals. Interest is added at our regular interest paying periods and dividends are credited to the account when authorized by the insurance company.

The plan works out in such a way that at age thirty a depositor, after ten years in the plan, will receive approximately $98 more than he has paid into his account if he wishes to close it and his insurance premiums over the full period will have been paid. This computation takes into account the cash and loan value of the insurance policy. By deducting this amount from the cash value of the account at the end of the tenth year the insurance may be kept in force and carried on indefinitely.

At any age under our plan a depositor pays to his account a total of $1,200 in ten years at the rate of $10 a month. Beginning at age 20 his insurance premium for ten years would total $218.40 or $21.84 annually. At semi-annual periods half of the annual premium is deducted from the account. To the balance remaining the bank adds interest in May and November. At age twenty this totals approximately $220, depending, of course, on the regularity with which deposits are made.

The insurance company issues a participating ordinary life policy. The dividends payable are added to the account. The policy has a cash value of $80 at the end of ten years, at age twenty, in the event the plan is completely discontinued at that time. This is a cash asset which has been built up, and it is treated as such.

### Example of How the Plan Works

We thus have a simple problem in addition and subtraction:

Total period—ten years—

| | |
|---|---|
| Total deposited | $1,200.00 |
| less total cost of insurance | 218.40 |
| | $981.60 |
| plus total interest | 222.00 |
| plus dividends from company | 39.58 |
| plus cash value | 80.00 |
| Total cash value of account | $1,323.18 |

The policy issued has all extended insurance features. Any type of insurance, in any amount, may be written with our plan. The cancellation or lapsation rate is rather heavy—about 25 per cent.—depending on the proper handling of the account and the customer.

We make the savings account the beneficiary under the policy. Then we make the account payable to any individual or firm selected by the depositor. This enables us to hold the policy in our vaults—potential assets of our depositors or their tstates amounting, as you wil readily see, to millions of dollars in the case of a large number of accounts.

There is considerable detail incidental to handling the account. We believe one girl could very well take care of the accounts obtained by a staff of ten salesmen. The window detail is not great. Our plan seems to be very flexible. The monthly deposit of $10 is used merely as a unit, and there is a $1,200 unit for insurance. We have depositors who are carrying accounts which range in monthly deposits up to $100.

---

## BANK CANNOT LEASE CHATTELS

### This Method of Securing Loan Held by Courts to Be Invalid

The issue in the case of the Bank of Montreal v. Hueston was as to the ownership of two Cleveland tractors seized by the Sheriff of Perth under a writ issued by Hueston upon a judgment covered by him against A L. McCredie, Ltd., and claimed by the Bank by virtue of a lease (in writing and under seal) of the tractors from A. L. McCredie and Dominion Flax Limited to the Bank.

The issue presented the novel and interesting point whether a bank, under such a form of transfer, can acquire a security and a preference as against other creditors.

Ordinarily a bank is confined to the powers given by the Bank Act as regards the power to obtain security for its loans and advances and up to the present time no case has arisen where a lease of personal property has been relied upon as a security.

The present Bank Act does not extend in any material way the powers of taking security given by former enactments. The Judge knew of no instance where an attempt had been made to obtain further security than the Act permitted by means of loans on personal property of a debtor.

### Terms of Lease

The lease in this case recited (a) that the plaintiffs had already advanced large sums to the lessors in connection with their flax manufacturing business and had acquired security under the Bank Act sec. 88; (b) that to complete the manufacture of the goods required the expenditure of further sums of money; (c) that the plaintiffs were willing to advance further moneys, but only if the lessors would grant them a lease of their horses, waggons, trucks, etc. The lease was executed on the terms specified for and during the term from its date, the 18th January, 1921, "until final completion of the manufacture and shipment of the goods."

This lease, the local manager said, was taken for the purpose of security and to enable the plaintiffs to operate the business; but the inference from the evidence was that the plaintiffs did not actually operate the flax business, but left the leased articles with the lessors for that purpose, and the lease was taken by way of security only; and after they had obtained this supposed security, the plaintiffs advanced further moneys for operating expenses, thereby increasing their advances from $87,449 to $93,408.

### Held Invalid

The Judge found that the lease was invalid as exceeding the limits of the powers given by the Bank Act.

The claim of the Bank to be the owners of the tractors at the time of seizure failed, and the issue should be found in favor of the execution creditor, Hueston.

## FIRE LOSS CONTINUES HIGH

### Total for July Higher Than for June, and Well Above July of Last Year.

Fire losses in Canada for the month of July are estimated by The Monetary Times at $3,652,000, compared with $2,612,550 in June and with $2,880,250 in July of last year.

| | |
|---|---|
| Large fires reported | $3,045,000 |
| Small fires reported | 107,000 |
| Estimate of unreported fires | 500,000 |
| | $3,652,000 |

The Monetary Times' record for the past two years shows the following monthly losses:—

| Month. | 1921. | 1922. |
|---|---|---|
| January | $2,237,900 | $3,597,500 |
| February | 2,735,500 | 4,062,400 |
| March | 2,112,200 | 4,331,750 |
| April | 2,510,700 | 2,532,100 |
| May | 3,811,350 | 2,956,450 |
| June | 2,303,400 | 2,612,550 |
| July | 2,880,250 | 3,652,000 |
| August | 3,014,860 | |
| September | 2,410,300 | |
| October | 2,199,700 | |
| November | 1,818,750 | |
| December | 2,897,200 | |
| Totals | $30,932,110 | $23,754,750 |

### List of Large Fires

The following are the July fires with a loss of $10,000 and over:—

Hanover, Ont., July 2nd; Stores, $10,000.
Kamloops B.C., July 2nd; Mill, $100,000.
Toronto, Ont., July 5th; Building, $150,000.
Kingston, Ont., July 5th; Livery, $75,000.
Kingston, Ont., July 9th; Building, $20,000.
Moncton, N.B., July 1st; Theatre, $10,000.
Ottawa, Ont., July 5th; Clubhouse, $20,000.
Port Alfred, Que., July 8th; "Mechanical" Pulp, $1,000,000.
St. Stephen, N.B., July 7th; Drying shed, $50,000.
Vancouver, B.C., July 3rd; Main ducts, $30,000.
West Hill, Ont., July 7th; Residence, $10,000.
Montreal, Que., July 12th; Building, $61,000.
Summerland, B.C., July 15th; Buildings, $70,000.
Sydney, N.S., July 13th; Building, $30,000.
Tatamagouche, N.S., July 13th; Lumber, $14,000.
Welland, Ont., July 16th; Mills, $50,000.
Niagara Falls, Ont., July 18th; Barn, $10,000.
Ottawa, July 21st; Warehouse, $14,000.
Quebec, July 21st; Business block, $15,000.
Salvador, Sask., July 20th; Buildings, $75,000.
Stoney Creek, Ont., July 24th; Business section, $10,000.
Toronto, July 25th; Boathouse, $32,000.
Vancouver, July 23rd; Manufacturing plant, $100,000.
Welland, Ont., July 20th; Barn, $10,000.
Welland, Ont., July 21st; Flour mill, $150,000.
Winnipeg, July 19th; Mining property, $11,000.
Woodstock, N.B., July 17th; House and barn, $12,000.
Ennismore, Ont., July 31st; Church, $50,000.
Lac Frontier, Que., July 31st; Hotels and houses, $100,000.
Nelson, B.C., July 27th; Pavilion, $10,000.
Ottawa, July 27th; Dance hall, $21,000.
Quebec, July 21st; Sheds, $25,000.
St. Perpetue, Que., July 28; Church, $150,000.
Stratford, Ont., July 28th; Woollen mill, $75,000.
Trout Mills, Ont., July 29th; Business section, $350,000.
Zealandia, Sask., July 31st; Business section, $35,000.

### Death From Fire

The following is a record of fatalities due to fire:—

| | |
|---|---|
| Magrath, Alta., July 3. Struck by lightning | 1 |
| Toronto, Ont., July 5. Burnt in building | 1 |
| Moreville, B.C., July 6. Forest fires | 2 |
| Winnipeg, Man., July 7. Playing with matches | 1 |
| Montreal, Que., July 12. Died of burns | 1 |
| Kingston, Ont., July 12. Struck by lightning | 1 |
| Asbestos, Que., July 16. Playing with matches | 1 |
| Victoria, B.C., July 17th. Burnt in building | 2 |
| Toronto, Ont., July 21. Died of burns | 1 |
| Charlottetown, P.E.I., July 30. Died of burns | 2 |
| Kitchener, Ont., July 27. Died of burns | 1 |
| St. Catharines, Ont., July 31. Died of burns | 1 |
| Total | 15 |

The record of deaths from fires has been as follows:—

| Month | 1919 | 1920 | 1921 | 1922 |
|---|---|---|---|---|
| January | 13 | 22 | 17 | 25 |
| February | 26 | 30 | 18 | 21 |
| March | 9 | 35 | 11 | 16 |
| April | 27 | 8 | 7 | 10 |
| May | 15 | 13 | 13 | 14 |
| June | 28 | 15 | 10 | 18 |
| July | 11 | 15 | 10 | 15 |
| August | 24 | 14 | 11 | |
| September | 23 | 13 | 4 | |
| October | 16 | 15 | 20 | |
| November | 14 | 31 | 23 | |
| December | 19 | 18 | 18 | |
| Totals | 225 | 227 | 162 | 119 |

### Buildings Burned

The principal structures destroyed or damaged were: Barns, 28; business districts, 7; boathouse, 1; stores, 17; apartments, 1; outbuildings, 2; residences, 38; poolrooms, 1; mills, 10; ice house, 1; theatres, 2; hall, 1; creamery, 1; livery, 1; manufacturing plants, 3; stable, 1; village, 1; clubhouse, 1; convent, 1; drying shed, 1; factories, 4; elevators, 2.

The principal causes were: Short circuit, 2; explosion, 6; forest fires, 1; sparks, 4; smoking, 2; lightning, 2; electric iron, 1; stoves, 4; spontaneous combustion, 4; incendiarism, 1; overheated boiler, 1.

## BEQUEST OF COMPANY SHARES

### Construction of Will Interpreted in Courts—Question of Specific Legacies

In deciding questions relating to the estate of the late W. F. Barber, Justice Middleton in his judgment said that by the will the testator gave to his widow "certain shares of common stock in the Bowes Co. of Toronto, to the extent of $1,000." To his son he also gave "certain shares of the common stock in the Bowes Co. of Toronto, to the extent of $6,000."

At the date of the will, 7th January, 1919, the testator owned more than $7,000 common stock in this company but before his death on the 31st October, 1919, he had parted with a portion of his holding and had at the time of his decease only $4,500 stock. The question was whether these legacies were specific legacies, to be met out of the holdings, in which case the legacies would have to abate pro tauto or whether they were general legacies, which would entitle the legatee to receive the value of the shortage or an equivalent amount of the stock purchased upon the market. In other words did the testator intend his beneficence to operate only upon the portion which he might have had at the time of his decease or did he intend the legatee at all hazards to receive a legacy answering the description. The legacies would be general were it not for the use of the word "certain" in each gift. This word points clearly to some specific and definite stock then in existence and this must be the stock which the testator possessed. For these reasons the gift is declared specific.

## ACTUARIES CLUB

The June meeting of the Actuaries' Club was held at the invitation of E. E. Reid, at the head office of the London Life Insurance Company. Some twenty-five or thirty actuaries from the head offices of the companies in Toronto, Waterloo and London were gathered together for the discussion of double indemnity benefits, and a revision of the present disability clause, owing to the new Dominion Legislation giving life companies the privilege of including the double indemnity benefit clause in their policies, and also permitting them to grant a benefit for temporary disability. These subjects were of special interest to the members, who desired to use uniform rates and clauses in connection with both benefits.

## PACIFIC GREAT EASTERN RY.

Parties who say they can sell the Pacific Great Eastern Railway to United states capitalists, which is to be used possibly as part of the proposed line from Seattle to Alaska, have been approaching Premier Oliver of British Columbia. So far, however, the persons who have been making the proposals have not been able to show that their connections are such that they could carry out the sale they propose.

"We would welcome anything, United States or otherwise, that could take that Pacific Great Eastern burden off our hands, but so far none has made an appearance," Premier Oliver said today. "I certainly have not been led to believe there is any immediate possibility of such."

## *Bank Clearings*

The following are the bank clearings for the week ended July 27, compared with the corresponding week of 1921:—

### Eastern Bank Clearings

| | Week ending July 27. | Increase over 1921. |
|---|---|---|
| Toronto | $89,576,773 | *$6,263,064 |
| Montreal | 83,987,288 | *35,365,671 |
| Ottawa | 5,577,281 | *25,310 |
| Hamilton | 5,132,353 | 165,264 |

# Delay in Organizing the Wheat Board

### Stewart and Riddell Hesitate to Act — Farmers Opposed Board in War-time, But Now Advocate It—Powers Have Been Reduced, and Chances of Success Are Smaller—The Canadian National Railway Board

(Special to The Monetary Times)

Ottawa, August 9.—The difficulty experienced in getting the Wheat Board under way shows that while it may be quite easy to make a certain piece of machinery, it is quite another thing to operate it. True it is that it required quite an effort to get the Wheat Board legislation through Parliament; but once a certain stage had been reached, the rest was easy. Indeed, considering the lack of faith in the measure, the surprising thing is that it went through as easily as it did.

The difficulty in securing the services of competent men to man the Wheat Board is but another evidence of the lack of faith in it.' There is no doubt that Messrs. Stewart and Riddell dislike the job, because they are either convinced that it will greatly disappoint its advocates, or else they are so uncertain as to how it will work out that they do not care to risk their reputations on it. Other men may be secured for the work, but the refusal of these two to take hold will much impair the value of the scheme in the minds of the great mass of the public.

The truth is that at the very time that the Wheat Board was first mooted, no one had much confidence in it as a means of ensuring to the farmers better prices for their wheat. The representatives of the farmers in Parliament strongly opposed it; they did not want to have anything to do with it, not was this surprising. For at that time the Board was looked on as a device for preventing the farmers from getting the maximum market price for their wheat. With some degree of reason the farmers' representatives argued, "if it were not for the Board, we might get $4, or more a bushel."

#### A Change in Farmers' Attitude.

The western farmers underwent a change of heart with respect to the Board when they received an extra 35 cents a bushel for their wheat during the year it was in operation. Only a few months before they, or at least a large number of them, had offered to sell their certificates for a few cents a bushel. Some had even talked of papering the inside of their shacks with them, but when it became known that there was 35 cents a bushel more in sight, the whole attitude of the farmers changed, and to some extent not unnaturally so. But this unexpected bonus was not due, as some have erroneously thought, to inherent excellences in the Board itself, but rather to the skilful manipulating of Chairman Stewart, who is a master of the grain trade, if any one is in this country. But there is good reason for saying that the good results in the form of a bonus were directly the result of fortunate chances, rather than to mere regulating of the flow of grain to the market.

Moreover, the chances in favor of the Wheat Board succeeding in that year were far greater than they now are, for the very good reason that, being a war measure, it was clothed with all possible powers. There was hardly a necessary thing that it could not do, for those who framed it were most concerned about ensuring that the maximum volume of grain should be available for the Allies at the lowest price consistent with cost. So the Board was all powerful.

#### Powers Are Reduced.

It is true that the new scheme possesses strong powers, but by no means as strong as those of its predecessor. Moreover, in the transfer of the compulsory powers from the federal government to the provinces, hardly anyone knows just how they will work. Most people who give thought to the subject think that the scheme can be worked; but they are not quite sure but that there has been a slip somewhere, which may result in such a serious leakage of grain as to endanger the success of the scheme generally . In this connction it must be remembered that those responsible for the legislation were not those who made a success of the last Board. The framers of the act were largely novices; it must also be taken into account that the Government and Parliament, so far from granting all the powers that the advocates of the scheme asked for, granted only as few as possible.

The Wheat Board is vitiated by the same influence that undermines many other Government creations. It has been made possible, not through the recommendations of sound business opinion, but through the pressure of mere political opinion. Many of those who supported it, did so, not through conviction, but because those back home wanted it. It was a surrender of the better judgment of Parliament to political pressure. Nor did those back home possess the knowledge necessary to enable them to come to a wise conclusion; they merely had persuaded themselves that it would do all that some claimed it would. So it is not surprising that difficulty is being experienced in getting competent men to run the Board.

#### Means War Time Powers.

There is a great deal to be said for co-operative marketing, and much that the advocates of the Wheat Board have said respecting the evils resulting from the dumping of grain on the market during the Fall of the year has recently been confirmed by one of the Armour Company's highest officials; but it is unfortunate that the farmers have felt themselves compelled to ask the Government for the exercise, during peace time, of war time powers in order that they may market their wheat. Of all things, to regulate the sale of wheat is about the most difficult, since it is so widely grown. The only sure way of getting the best price is to have a supply when other people need it badly. These, who this year, can hold their wheat for awhile are in a good way to get a good price, for there is strong reason to think that Europe is short. This, at least, is the opinion of the best grain experts just now.

#### The Railway Board

The Government is having trouble in getting a new railway management for the same reason that it has had trouble in manning the Wheat Board because the really good men are afraid of the job; they are not sure just how it will work out. Such being the difficulties in filling positions in which high executive ability is a matter of the utmost importance, the success of enterprises dependent theron is rendered problematical.

There being little actual news, a natural disposition to make some has been manifested in certain quarters, and so stories of the probable appointment of Sir Lomer Gouin as British Ambassador at Washington, and the certain fusion of the Progressives with the Liberals have made their appearance. It is impossible to account for the first, it being so utterly improbable; as for the second, it seems to be born of the wish that is father to the thought.

---

## AUTHORIZE TAX ON NEWSPRINT

### Public Opinion in United States Not Yet in Favor of it, However—Cannot Prevent Present Tendencies

(Special to The Monetary Times)

New York, August 9.—The local fire and life insurance companies interested in Canadian business are much disturbed over the possible effect of the new Canadian stamp taxes. Many of them believe that the new taxes will seriously increase the cost of doing business in Canada, and may even when considered with the new excise tax on "foreign" fire insurance premiums, force many of the American companies to curtail their operations in Canada considerably.

It is expected that a very large delegation of insurance men from New York will attend the international convention of the National Association of Life Underwriters to be held in Toronto August 22 to 25. The secretary of the Association, Everett M. Ensign, tells your correspondent that a most interesting program has been prepared and that a record attendance is expected.

#### Bankers' Committee

The committee appointed by the American Bankers Association to cooperate with a similar committee to be appointed by the Canadian Bankers Association to discuss and regulate matters of mutual interest to the two banking associations, pending the appointment of the Canadian committee is withholding any announcement of its policy and intentions While individual members of the American committee apparently have very decided opinions regarding the matters to be handled by the two committees, their opinions must await action by the Canadian Association.

While the Senate passed without debate this week that clause of the Fordney McCumber Tariff Bill which would permit the President, at his option, to impose a ten percent tax on newsprint imported from a country which restricts either the export of pulpwood, pulp or paper to the United States, there is yet no sign that preparations are being made by the newsprint interests in the United States to prepare public opinion for such a step on the part of the President. For a while it is of course still far too early for any action to be taken by the President, earlier attempts of a similar kind, notably that which was represented by the Underwood Resolution so-called, were preceded by considerable more or less concealed propaganda on the part of the interested manufacturers.

There is, however, some evidence of a change of heart on the part of those interests in the pulp and paper industry which a year or two ago would have attempted to use the "big stick" in their attempts to force the Eastern Canadian provincial governments to abandon their policy of restricting the exportation of pulpwood to the United States. The belief seems to be spreading in the industry that sooner or later Canadian manufacturers will dominate to an even greater extent than at present the newsprint industry of the continent. To fight the trend of the newsprint industry toward the other side of the international border is already believed by many of the best informed men in the industry to be more or less of a waste of time. Conditions such as the increasingly rapid decrease of the wood resources of the Northeastern United States are against the American manufacturers and the advantages are all on the side of Canada.

In any case, as one manufacturer pointed out to your correspondent in a candid moment, even if the President should act under the authority of the Fordney McCumber Bill and attempt to impose a ten percent duty on imports of Canadian newsprint, the indignation aroused among publishers would be so great that even the unpopularity produced by the Tariff Bill now before Congress would in comparison be a mere trifle.

---

## INSURANCE DIRECTOR HERE

Rt. Hon. Lord Morris, of England, who is a director of the General Accident Assurance Company of Canada, was a visitor in Montreal and Toronto during the past two weeks. Interviewed by The Monetary Times representative, Lord Morris referred to the building being erected in Toronto at a cost of around $750,000, as a tribute to the faith of the principal company, the General Accident, Fire and Life of Perth, Scotland, in the development of Canada.

Asked as to the financial and industrial position in England in its relation to Canada, Lord Morris said that he thought from his general knowledge of the investment market in England that Canada would easily be able to sustain her past record in British investments. He said:—

"The industrial situation as regards the relation of this country to Great Britain has been somewhat altered since the year before the war. In 1913 the total imports into Canada from Great Britain represented over half of her total imports. Last year it was less than 30%. This was brought about by larger importations from the United States and the well known fact that Canada is now making for herself a great deal of what, previous to the war, was made for her by England. And now this morning I notice a statement of the Prime Minister Hon. W. L. King, who is reported to have said that this country is ready to embark on a policy of reciprocity with the United States. Without giving any opinion on this policy, if it is successful it will simply mean less importations from England, which, of course, may be alright for Canada, and may be more profitable for Canada, but is bound to still further effect the relations between the Old Country and Canada."

As regards the view of British Insurance Companies towards operations in this country, he was quite satisfied that the desire was to still further extend their business. On the whole, as far as he knew, the business in the past had been satisfactory. It is quite true that Fire losses have been high the last few years, but the tendency today is to deal with so many lines that the profits of one adjust the loss in the other.

## CONSTRUCTION CONTRACTS AWARDED

### Totalled $26,694,200, Compared With $35,620,400 in June, and With $17,741,400 in July Last Year—Estimates of MacLean Buildinf Reports

During July, construction contracts awarded in Canada, according to MacLean Building Reports, Limited, amounted to $26,694,200 compared with $35,620,400 in June and $17,741,400 in July, 1921. Residential building accounted for 35.3% of the July total and amounted to $9,434,400. Business building amounted to $8,146,400 or 30.5% of the total; industrial building $1,397,800 or 5.3%; public works and utilities $7,715,600 or 28.9%. The value of contemplated new work reported during July was $30,970,600.

The figures for the different provinces are as follows:—

| | No. of Projects | Values |
|---|---|---|
| Ontario | 1370 | $15,033,700 |
| Quebec | 386 | 4,724,000 |
| British Columbia | 212 | 3,031,600 |
| Manitoba | 228 | 1,309,300 |
| Nova Scotia | 92 | 694,000 |
| Saskatchewan | 109 | 672,900 |
| Alberta | 93 | 604,400 |
| New Brunswick | 36 | 583,600 |
| Prince Edward Island | 7 | 40,700 |
| Total for Dominion | 2533 | $26,694,200 |

The Dominion figures according to classifications or types are as follows:—

| Type | No. of Projects | Values |
|---|---|---|
| Apartments | 8 | $ 87,000 |
| Churches | 23 | 504,600 |
| Factories | 30 | 1,397,800 |
| Public Garages | 53 | 392,400 |
| Hospitals | 4 | 55,600 |
| Hotels and Clubs | 13 | 100,300 |
| Office Buildings | 15 | 445,800 |
| Public Buildings | 16 | 1,268,700 |
| Residences | 1992 | 9,347,400 |
| Schools | 78 | 2,736,000 |
| Stores | 135 | 1,509,900 |
| Theatres | 3 | 33,000 |
| Warehouses | 25 | 1,100,100 |
| Total buildings | 2395 | $18,978,600 |
| Bridges | 37 | 449,300 |
| Dames and wharves | 9 | 1,872,300 |
| Sewers and watermains | 26 | 289,000 |
| Roads and streets | 48 | 1,577,200 |
| General engineering | 18 | 3,527,800 |
| Total for Dominion | 2533 | $26,694,200 |

### Prices of Materials

During June, the wholesale price index of 48 building materials advanced slightly and is now 79.7% above 1913, compared with a peak of 183.8% reached in May, 1920. Prices have now declined 36.6% from the high. The recent slight upward trend in material costs is the result of a sudden demand for material and labor at a time when material stocks were low. It is interesting to note, however, that production is increasing and that a large proportion of the building material plants are working full time, and in many cases overtime, in order to meet the demand. It is not anticipated that cost increases will be great, in fact, the cost of building will, over a long period of years, decline gradually, with here and there a brief increase as the volume of activity becomes unusually large. This is a logical prediction and indicated that the average building project may now be undertaken without fear of a too great decrease in reproduction value with a consequent shrinkage of investment and mortgage loan collateral.

It is also pointed out that we have passed the crest of the first wave of building activity represented by speculative development. We are now entering the second and sounder period wherein better types of buildings will be constructed, and there will be much greater activity in architectural offices. Many large building projects which have been held up during past years are now being rapidly developed into the contract stage, and considerable activity is in prospect in the better types of housing and the provision of a great number of educational and institutional buildings, public buildings and business buildings. Now that general business conditions have become partly readjusted, good harvests should prove an active stimulant.

## MONTREAL AND QUEBEC BANKS

The June statement of the Montreal City and District Savings Bank and La Caisse D'Economic de Quebec, while not showing any startling changes from the previous month, nevertheless shows a continued improvement in some regards. Deposits in the former bank are up slightly, but are slightly lower in the latter bank. The other changes in the statement are only minor, with a slight increase in municipal securities.

The following statement shows the important changes during the month:—

**Montreal City and District**

| | June 1922 | May 1922 |
|---|---|---|
| Dom. Gov. dem. dep. | $ 93,348 | $ 93,584 |
| Other deposits | 46,140,425 | 46,049,043 |
| Total liabilities | 46,724,053 | 46,534,911 |
| Govt. and other sec. | 14,452,936 | 14,418.229 |
| Cash | 7,214,340 | 7,173,770 |
| Can. Mun. sec. | 17,173,825 | 17,090,151 |
| Loans on bank stocks | 758,319 | 767,220 |
| Loans on other sec. | 7,405,198 | 7,299,573 |
| Total assets | 49,963,809 | 49,764,628 |

**Caisse D'Economic De Quebec**

| | June 1922 | May 1922 |
|---|---|---|
| Deposits | 10,929,337 | 11,004,464 |
| Total liabilities | 11,466,249 | 11,484,608 |
| Govt. and other sec. | 2,436,727 | 2,437,345 |
| Cash | 1,376,702 | 1,416,057 |
| Can. Mun. sec. | 3,915,628 | 3,921,088 |
| Loans on bank stocks | 319,147 | 313,686 |
| Loans on other sec. | 3,688,897 | 3,684,631 |
| Total assets | 13,474,792 | 13,493,151 |

## WEST VANCOUVER FIRE RATES

Notification has been received by the municipal council to the effect that the B.C. Fire Underwriters' Association will arrange to make a survey of West Vancouver with a view to rerating for fire insurance.

Application for re-rating was made by the council a short time ago, the fact that West Vancouver now has a waterworks system and a volunteer fire brigade being taken into consideration.

## BANKERS MEET AT WINNIPEG

The Manitoba managers of the Bank of Montreal were assembled in Winnipeg recently to meet the local officials. A. M. Peters and M. G. Chesterton, district superintendents, respectively of Alberta and Saskatchewan, were also present. The greater number consisted of former Merchants' Bank managers, all of whom were given a hearty welcome by their new colleagues.

## ACQUIRE NEW PROPERTY

The Dominion Life Assurance Company of Waterloo has acquired the Roesch property at Albert and Duke streets. This will enable it to double its office accommodation and leave ample room for lawns and flowers.

## COBALT ORE SHIPMENTS

The following were the shipments of ore from Cobalt for the week ended July 21:—Mining Corp. 87,771; O'Brien Mine 63,250; Mining Cor. of Canada 400,262; total 551,283.

The following were the shipments of ore from Cobalt for the week ended July 28th:—Nipissing Mine 660,283; Mining Corporation 391,554; Coniagas Mine 94,986; total 1,146,823. The total since January 1st is 3,770,439 pounds.

## NOTE CIRCULATION INCREASES

### Percentage of Gold Held for Redemption Decreases as Compared With May

During the month of June there was an increase of eleven million in the note circulation of the Dominion Government, as compared with the previous month. The circulation during May amounted to $221,894,062.

Although there was an increase of two million in gold held for redemption of Dominion notes, this has been overshadowed by an increase of eleven million in notes, so that the percentage is therefore lower than previously. The percentage during June was 32.43 per cent., as compared with 37.5 per cent., in May.

The position as at June 30 was as follows:

| | |
|---|---|
| Provincial | $ 27,710 |
| Fractional | 1,243,803 |
| $1 | 16,270,821 |
| $2 | 11,944,405 |
| $4 | 36,435 |
| $5 | 1,880,985 |
| $50 | 3,750 |
| $100 | |
| $500 | 2,663,500 |
| $1,000 | 4,970,000 |
| $500 Legal Tender Notes for Banks | 5,000 |
| $1,000 " " " | 917,000 |
| $5,000 " " " | 134,885,000 |
| $50,000 " " " | 57,900,000 |
| | $232,748,410 |
| Gold held June 30th, 1922, by the Minister of Finance | $ 88,824,727 |
| Gold reserve to be held on Savings Banks Deposits | 3,329,659 |
| Gold held for redemption of Dominion Notes | $ 85,495,068 |
| Dominion Notes oustanding against deposits of approved securities, under Finance Act, 1914, and Chapter 4, Acts 1915 | $ 110,034,789 |

## FIRE LOSSES SETTING FAST PACE

### Six Months' Total is $20,092,750, Compared With $15,711,050 Last Year—May Was Only Month to Show Decrease

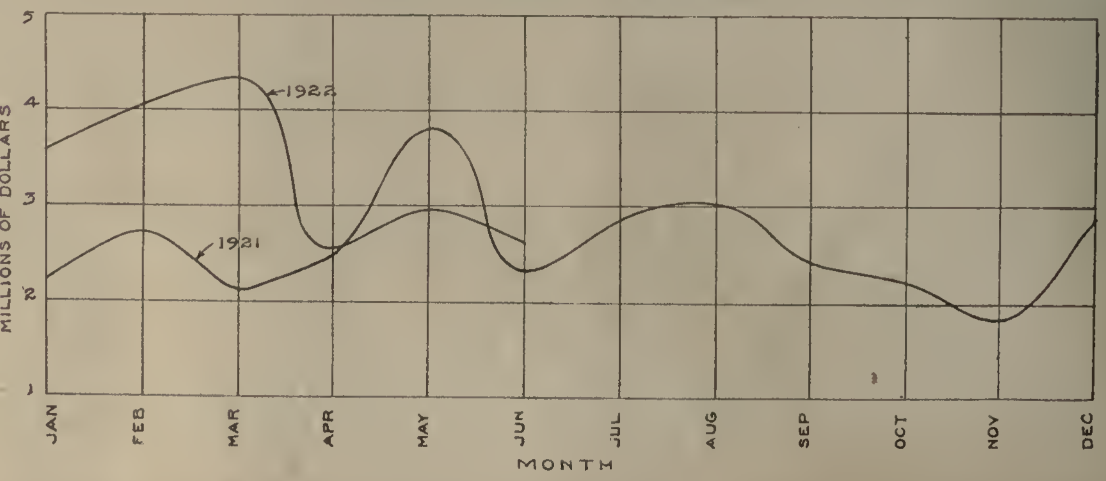
Fire losses for the first six months of 1922 totalled $20,092,750 compared with $15,711,050 for the first six months of 1921. This is two-thirds of last year's total, and if the same experience continues there will be a total of forty million, a record figure, for the year.

The losses for 1921, by months, and for 1922 to date are given below, and illustrated graphically herewith.

**Fire Losses**

| | 1921 | 1922 |
|---|---|---|
| January | $ 2,237,900 | $ 3,597,500 |
| February | 2,735,500 | 4,062,400 |
| March | 2,112,200 | 4,331,750 |
| April | 2,510,700 | 2,532,100 |
| May | 3,811,350 | 2,956,450 |
| June | 2,303,400 | 2,612,550 |
| July | 2,880,250 | |
| August | 3,014,860 | |
| September | 2,410,300 | |
| October | 2,199,700 | |
| November | 1,818,750 | |
| December | 2,897,200 | |
| Totals | $30,932,110 | $20,092,750 |

FIRE LOSSES—BY MONTHS



## Are You Master of Your Business

or is your business master of you?

Many business men have entrusted to this Corporation the care of their *personal* property, collection of interest, dividends, rents, investment of funds. Relieved of these duties, they have now more time to spend with their families and for necessary recreation. They have become in a real sense the masters and not the slaves of business life.

Can we furnish you with a similar service? It is fully described in our Booklet *"Your Financial Agent."* Send to-day for a copy.

# Annual Reports

## GENERAL ACCIDENT. FIRE AND LIFE ASSURANCE CORPORATION, LTD.

Among the British companies whose business in Canada shows a steady increase is the General Accident, Fire and Life Assurance Corporation, Limited, of Perth, Scotland. The Canadian business is managed by T. H. Hall, Toronto. In 1921, net premiums on fire, automobile and hail insurance account totalled $558,625 and losses $397,962. The company commenced business here in 1908.

The company's annual statement covering all operations for the year 1921 shows assets totalling £3,681,095 compared with £3,370,244 at the end of 1920. New life insurance placed on the books in 1921 totalled £248,062 and the new and renewal life premiums during the year amounted to £70.888. Claims by death arising under 25 policies amounted to $7,999. Claims by maturity of endowment arising.. under 26 policies amounted to £6,506. The life annuity and capital redemption funds have been increased by £54,866 to £424,838. The average rate of interest earned on the life department funds for the year was 4¼% after deducting income tax.

In the fire department, the net premium income was £376,285 compared with £394,387 in 1920. Losses paid and outstanding amounted to 54.01% as compared with 44.26% for 1920.

In the accident and general department, the net premium income was £3,167,845 compared with £2,807,279 for the previous year, losses paid and outstanding being 56.47% compared with 56.58%.

In the marine department, the net premium income amounted to £19,181 compared with £28,949 in 1920.

## EXCESS INSURANCE CO., LIMITED

Among the British Companies which are comparatively new to the Canadian field is the Excess Insurance Company, Limited, of London, England, which commenced business here in 1918. The Company was organized in 1894 and its 29th. annual report shows the following results as summaried by the directors:—

"The 1919 underwriting account is now closed with a credit balance of £177,246 which is carried to profit and loss account.

"On the 1920 underwriting account there is a credit balance amounting to £363,104 or over 33 per cent. of the premium income for that year. Your Directors have decided to transfer £55,000 of this balance to the credit of profit and loss account to meet the large sum paid away during the past 12 months in war and income taxes, part of which will ultimately be on account of the 1920 underwriting; the balance of £308,104 being carried over for third year settlements. This will, it is anticipated, be fully sufficient to wind-up the account and leave a satisfactory profit.

"'The premium income for the 1921 underwriting account is £715,119, showing a large reduction on the premiums for the previous year. This reduction is due, mainly, to existing economic conditions which are world-wide, and to the extra caution that has been necessary in the selection of risks owing to those conditions. The claims settled amount to only £198,655 or under 28 per cent.

"In past years large provision was made for the depreciation of investments. This year the sum provided for this purpose at the 31st December, 1921, was more than sufficient, and the further general rise in Government and other securities which has taken place, leaves this fund very much in excess of the actual requirements. The net result of the operations up to the end of the 1919 underwriting account will show, in the opinion of your directors, an increase, after paying the dividend in the true reserves of the company of over £50,000."

## POST OFFICE SAVINGS BANK

The outstanding feature of the May statement of the Post Office Savings Bank is the increase in deposits over the previous month. Deposits during April amounted to $209,436 as compared with $253,727 in May, and $324,738 in May, 1921.

Withdrawals during May are lower by about one thousand dollars from April, and show a large decline from May of last year, when withdrawals totalled $1,024,042.

The following is the statement for the month of May:—

| | |
|---|---|
| Balance in hands of the Minister of Finance on 30th April, 1922 | $24,396,258 |
| Deposits in Post Office Savings Bank during the month | 253,727 |
| Deposits transferred from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada | 13,930 |
| Interest allowed to depositors on accounts closed during month | 1,044 |
| | $24,664,962 |
| Withdrawals during the month | 655,378 |
| Balance at the credit of depositors' accounts on 31st May, 1922 | 24,009,583 |
| | $24,664,962 |

# Bank Clearings

## ARRANGE TRADE WITH RUSSIA

### Under Anglo-Russian Agreement, But Canadian Officals Not Yet Appointed

Canada's adherence to the Anglo-Russian trade agreement, which became effective on July 3 of this year, is expected to lead to a resumption of trading between the Dominion and Soviet Russia within a short period. Preparations are now being made for the sending of a Canadian Trade Commissioner and other representatives to Russia, and it is anticipated that the Soviet Givernment will send a representative to Canada.

### Summary of Agreement

The agreement is briefly summarized as follows:

(1) Refrain from hostile propaganda.

(2) British subjects in Russia at once free to return, and Russian nationals in Britain free to return to Russia.

(3) No blockade or obstruction to trade in legal commodities, no discrimination in trade in either country against the other.

(4) Equal treatment of ships in ports.

(5) Sea mines clearance operations to be facilitated and information given as to what has been done.

(6) Each appoint nationals to effect agreement and promote movements of traders and usual exemptions while so engaged.

(7) Each appoint agents or representatives necessary to carry out the agreemnt, with usual privileges and rights, and to have freedom of mails, telegraphs, etc.

(8) Each to renew exchanges of private, postal and telegraph communication.

(9) Exports of Russian gold, funds and other securities not to be attached if not identifiable as property of the British Government.

(10) After twelve months' operation notice to terminate six months thereafter may be given.

### Govt. Not Responsible

Hon. James Robb, Minister of Trade and Commerce, who is at present in London, is expected to take up the matter while there, and it is not likely that any Trade Commissioner will be appointed before his return. In connection with the resumption of trade with Russia, it is pointed out that the Canadian Government accepts no financial responsibility, which will lie with the Canadian exporters.

## CANADIAN COAL OUTPUT

### April Production Falls 47 Per Cent. From Previous Month's Total

As a result of the great coal strike now in progress the net amount of coal made available for consumption in Canada during April declined to 45 per cent. of the amount recorded for the preceding month, says the summary of the Dominion Bureau of Statistics coal report for April, 1922.

The output from Canadian mines fell off to 47 per cent. of the previous month's record and to 62 per cent. of the average output established for the month in the three preceding years. For the first four months of the calendar year the output from Canadian mines was 92 per cent. of the three-year average for the period.

Imports from the United States declined in April to 31 per cent. of the quantity imported in the preceding month, but were maintained at 83 per cent. of the average for April for the three preceding years and for the calendar year to date were only 15 per cent. less than the average quantity imported during the same period in 1919-20-21. Following the declining output and conforming to the domestic demand, exports of Canadian coal declined to 26 per cent. of the preceding month's record and to 55 per cent. of the average for the same month of the three preceding years.

While, therefore, the coal made available for consumption in Canada during April was only 45 per cent. of the amount made available in March, comparison with previous records showed that in April of this year, the amount provided was 72 per cent. of the average established for the month in the three preceding years. The quantity made available for consumption in Canada in the first four months of the present calendar year was 96 per cent. of the average established for the period in the three preceding years. The Canadian coal visible at the end of the twelve months ending April, 1922, comprising all coal imported or mined in Canada but excepting the tonnage of Canadian coal exported during the period amounted to 30,345,000 tons as compared with a total of 35,562,000 tons for the twelve months ending April, 1921, and 26,679,000 tons in the year ending April, 1920.

## JULY BOND SALES HIGHER

### Total Sales Amount to $20,199,105 as Against $16,622,860 for June

As the midsummer months, July and August, are not usually expected to be active investment months, bond sales during July, while showing a slight increase over the previous month, were lower than for some months past. The July total, of course, includes the temporary financing of Ontario.

Although the July total is higher than for June, it shows a substantial decrease from the same month last year, when sales were $55,464,733. The July, 1921, total includes two twenty-five million railroad issues, and also a fifteen million temporary loan of Ontario. A summary of July's financing shows the following results:

| | July 1922 | June 1922 |
|---|---|---|
| Provincial .... | $12,500,000 | $ .............. |
| Municipal .... | 3,334,105 | 4,832,860 |
| Corporation | 4,365,000 | 11,790,000 |
| | $21,199,105 | $16,622,860 |

From the above comparison it will be noticed that there was no provincial issues during June as compared with over twelve million in July. Municipal financing during July shows a decline from the previous month, as also does corporation financing, which is down by about eleven million.

With the exception of the Ontario loan, all provincial issues were sold across the line and fifty per cent., of the corporation financing was also sold there.

## PURCHASE GOLD MINE

Word received from Dryden, Ont., says that the Contact Bay Mines, Limited, has taken up its option on the Redeemer Gold Mine south of Dryden, after spending $30,000 on development work, the purchase price being $100,000, including the amount spent there.

The Redeemer shaft is down 225 feet, and the Bonanza shaft, on an adjoining property, also owned by the Contact Bay Mines, Ltd., is down 300 feet. A large amount of ore is already on the dump and it is said that the average value runs $20 per ton. On the Redeemer property is a ten stamp mill, which will be trebled in capacity at once.

## TRADE OUTLOOK IS BRIGHT

Business conditions in the West Indies are improving, according to E. H. S. Flood, Canadian trade commissioner for the islands, who is at present in St. John, N.B. In an interview Mr. Flood expressed the opinion that benefit to both Canada and the West Indies would result from the visit there last spring of the delegations from the Canadian Manufacturers' Association.

Mr. Flood expects to go to Ottawa shortly and then return to the West Indies some time in September. Regarding the market outlook for the islands Mr. Flood said:

"Conditions are getting brighter. The price of sugar has commenced to rise. Molasses prices are much better and the outlook for the sugar crop this year is most promising. The reaping season for this crop, I might say, is in January. The cost of production of sugar and molasses has decreased materially, owing to a lower rate for labor and the price of fertilizer."

## LARGE NEW PLANT

### Twelve Million to Be Expended in British Columbia

Announcement was made on August 4 by John Oliver, premier of British Columbia, that legislation for the establishment of iron and steel works in the province will be put through at the next session of the Legislature. The announcement was made following a cabinet meeting, to representatives of the Coast Range Steel Company, a $15,000,000 corporation organized a year ago, under H. J. Landahl.

According to the announcement, the provincial government will unite with the Imperial and Canadian Governments and guarantee as its share, bonds not to exceed $4,000,000.

Under plans which have been discussed by the steel people with the British Columbia government and the facilities committee of the Imperial Board of Trade, the total investment in the plant will run to $12,000,000 for the production ultimately of 120,000 tons of finished steel.

## OFFER PLANTS FOR SALE

### Lyall Construction Plant in Montreal and Munitions and Machinery Plant Up for Auction

The United States Government, War Department, announces that it will sell by auction two industrial plants in Canada. One is the Peter Lyall Construction Company plant, located in Montreal, about three miles from the centre of the city. The four buildings are of steel, concrete and brick construtcion, with a total floor area of 260,351 square feet. There is a wide waterfront, five railway sidings connecting with the Canadian Pacific, Canadian Northern and Grand Trunk Railways, and also a double track trolley system to the property.

The other plant is that of Munitions and Machinery, Ltd., located at Lachine, about seven miles from Montreal:; there are sidings to the Grand Trunk and Canadian Pacific railways, and double track street car facilities, also a concrete-asphalt highway. The building is a three story brick one, with 32,000 square feet of floor space.

The sales will be held on September 5 on the properties (separate sale of each plant). Terms, small cash payment, balance on term mortgage.

## BRITISH TRADE MISSION IS COMING SOON

### Will Arrive in Canada on Sept. 10 and Visit All Centres

Great interest is being shown by business men throughout the Dominion in the coming visit of the British mission which has the task of arousing interest within the Empire in the British Empire Exhibition which is to be held in London in 1924.

The members of this mission, whose work is of a preliminary nature, are Major Belcher, assistant manager of the exhibition; F. Hiam, agricultural adviser; Col. A. Christie, financial adviser, and F. W. Bates, secretary. They will land at Victoria September 10th and leave Halifax on October 24th, according to the present itinerary, and during the course of that time will visit practically all the centres in Canada.

The mission reaches Canada from Australia and New Zealand, and on leaving Canada will go to Newfoundland. They are visiting every part of the British Empire, meeting representatives of the business bodies, business men and others with a view towards arrangements for the exhibition for the aim of those organizing this event is that it shall be on a truly Empire scale.

It is specially desired that Canadian industrial progress shall be amply demonstrated at this exhibtion, and it is expected that manufacturers will have exhibits there representative of all lines of endeavor in Canada.

Through such efforts it is hoped that impetus will be given towards the movement for greater inter-Empire trade movements. Canadian business men are specially interested in such a proposition at present because of the situation in the United States which has made it necessary to seek other outlets for Canadian products.

By 1924 it is hoped that trade revival will have been under way for some time, and an exhibition for all the Empire at such a time will give opportunity for exchange of views, and permit the laying of plans for taking advantage of better conditions.

## VISIT NICKEL PLANT

Fifty members of the Sudbury Board of Trade were guests on August 3 of the Mond Nickel Company, at Coniston, Ont., on the fourth weekly tour of the board. The Sudburyans were met by the officials of the Mond Company, headed by Mr. C. V. Corless, manager, and were shown thorugh the company's plant. The Mond Co. is the only one in the district which has been kept running during the depression, and this gave an added interest to the visit.

# *Municipal Finance*

**Windsor, Ont.**— According to A. Black, assessment commissioner, the municipal income tax will bring approximately $1,000,000 to the city treasury this year.

**Oak Bay, B.C.**—R. H. Blandy, treasurer, has submitted a report to the council showing a comparison of taxes collected from January 1 to June 30 during 1922 and 1921. The total tax levy during 1922 was $196,210 of which $154,623 has been collected. Last year the levy was $211,209, of which $164,338 was collected. Collections from the corporation amounted to $10,402, leaving a balance of $31,184 uncollected. During the previous year $10,812 was collected, and a balance of $36,058 was uncollected.

At the beginning of the year there remained $42,666 in arrears and delinquent taxes, of which $11,962 had been collected, leaving a balance of $31,604 uncollected. Last year the tax arrears amounted to $52,025, of which $13,082 was collected, and $38,942 uncollected.

In a foot note Mr. Blandy explains that the amount collected from the corporation was chiefly on lots acquired at tax sales.

**Three Rivers, Que.**—The annual statement of the city's finances for the year ended December 31, 1921, has just been published and in which it is shown that the population of the city is 26,000.

The value of taxable property is $15,276,000, with exemptions of $5,880,450, and $8,517,415 for the value of property non-taxable making a total of $29,673,865. During the year the expenses amounted to $722,360, and the receipts were $671,006, leaving a deficit of $51,354 for the year.

The borrowing power of the city is restricted to 20 per cent., of the taxable property, $21,156,450. The city is therefore able to borrow an amount of $4,231,290. The funded debt as at the end of the year amounted to $4,702,600, which together with $49,100 for bonds to a manufacturing concern, and a floating debt of $225,440, makes a total of $4,997,140. From this amount there is deducted $1,594,137, including a sinking fund of $580,125, leaving the debenture debt at $3,383,003. This amount represents 15.99 per cent., of the borrowing power. Total assets are placed at $5,583,449.

**Edmonton, Alta.**—Total tax collections for the period ending July 28 amounted to $2,588,982, as compared with $2,521,925, for the same period of the previous year.

**Calgary, Alta.**—During the first half of this year the municipal hospitals expended $198,699, and only received $78,732 in revenue.

**Selkirk, Man.**—At a meeting of the council on July 29, the tax rate for 1922 was struck at 28.1 mills on the dollar. This is 6.9 mills lower than the tax rate for 1921. According to the last revised assessment roll for 1922, the net assessed value of property, real and personal, is $2,879,810. The total revenue for the year is estimated at $80,504.

**Hamilton, Ont.**—That the city's gross debenture debt, less the sinking fund, has increased since January 1 to June 30 of the current year, to the tune of $1,583,786, was the disquieting information submitted to the board of control on Aug. 3, by W. H. Davis, city treasurer. In view of the capital expenditure already authorized of $750,000 for the Hydro-Electric system in Hamilton and $187,000 for the mountain roadway, together with the necessary debentures for unemployment, relief, western entrance to the Highway and York street, the city treasurer warned the controllers that to add unduly to the capital expenditure would be anything but wise. He further pointed out that with the large amount of local improvement work already completed this year, and an equally large amount of such work at present under consideration, there was added need for extreme caution in this connection.

**Montreal, Que.**—A total of $3,820,029 has been collected during the current year by the tax department of the city on arrears of property taxes. This amount includes $2,473,727 due in 1921, $958,611 due in 1920, $208,583 for 1919, and $179,098 for 1918.

During July the city treasurer's department received $281,052 on the tax of 1921, $249,236 on the tax of 1920 and $13,022 on the tax of 1919. Tax collecting for the past year was slightly better than former years, said P. Collins, assistant city treasurer, and this notwithstanding the fact that people generally complain of hard times.

Firms in liquidation owe the city $21,000 of some $100,000 due to the city on arrears of water rates and business taxes, the $21,000 is assured however. Water rates since the beginning of the year have brought in $189,922, and business taxes $96,891. In July the amounts received were $1,256 for water rates and $1,272 for business taxes. The city has been fortunate in receiving water rates to an extent of more than 99 per cent., Mr. Collins remarked, and this includes an amount of some $40,000 which will be written off because of error and duplication.

The special assessment regarding pavements, sidewalks and sewers billed in October of each year has averaged over $500,000 for the past two years. These payments, as a rule, are promptly made, and arrears received during July amounted to $15,711.

## B. C. NATURAL PRODUCTS

### Production During 1921 is Greater But Value is Lower

Products of British Columbia's mines, forests, fisheries and farms for the last year show a drop in value of $53,000,000, although the quantity of production was in most instances greater.

The figures for the two years are:—

| | 1921 | 1920 |
|---|---|---|
| Mines .... .... | $ 28,066,641 | $ 35,543,081 |
| Fisheries ... | 13,953,450 | 22,329,161 |
| Forests ..... | 64,970,000 | 92,628,000 |
| Agricul. .... | 59,694,254 | 68,926,090 |
| Total ... | $166,711,345 | $219,426,382 |

The big drop in world prices of commodities from the inflated values of 1920 is responsible for decrease in values. Forest productions from Vancouver Island, which is the heaviest timber-producing section of the province, was greater last year than the year before. Agricultural output also increased, but prices were down.

Fish prices slumped badly, as many packers were caught with large supplies on their hands from the year before, which they could not get rid of at high war prices.

Metals suffered heavily in the price cutting and the European disruptien of business last year, although the production was kept up.

## HYDRO RESULTS IN HAMILTON

### Summary for City and Four Other Municipalities in the District

Figures relating to the Hydro-electric business of Hamilton and four municipalities served from the Hamilton transformer station were issued a few days ago by the Hydro-electric Commission of Ontario. In Hamilton the first rate schedule, established by the Provincial Commission in 1913, was lower by 50 per cent., than the rates formerly charged by the private company which monopolized the business. Consumers had been paying 8 cents per kilowatt hour, with a monthly meter rental of 25 cents. Hydro service cost upon an average 3.9 cents for domestic lighting and 4.1 cents for commercial.

Reductions were made from time to time by the commission. Last year the domestic rate averaged 2.1 cents and the commercial 1.2 cents. Since 1918 the industrial power rate has declined from an average of $17.13 per h.p. to $13.63. The total revenue collected from Hamilton Consumers of Hydro-electric energy since 1913 has been $2,867,718.61. If the first rate schedule had been maintained the revenue on the same consumption would have been $4,341,086. The saving by reduced rates, therefore, has been $1,473,367. Despite sharp competition the Hydro load has increased from 1,354 to 16,995 horsepower, and the present rate for delivered energy is $16.

The local rates are as near cost as possible, since the net surplus of 1921 was only $153.27 on a total revenue of $608,687.15 That term "cost" included the purchase of power from the commission, operation, maintenance, administration, interest and sinking fund on the local investment, a contribution to contingencies, and over $61,000 to plant renewal reserve. Assets of the Hamilton system are $2,179,031; liabilities, $1,400,278. Reserves and surplus funds make a total of $778,752. The population of the city of Hamilton is about 115,000.

### Hagersville.

Hagersville, with a population of about 1,200, is 54 miles from Niagara Falls. Its Hydro-electric rates have declined since 1913 from 5.4 cents to 3.3 cents per kilowatt hour for domestic lighting, and from 5.4 cents to 2.2 cents for commercial. The load has increased from 114.5 to 349.5 horsepower.

The revenue for 1921 was $18,044. After placing to plant renewal reserve $708, and meeting interest, sinking fund, and all ordinary expenditures, there was a net surplus of $3,014—equivalent to $8.62 per h.p. on the 1921 load. The assets are $28,840; the liabilities stand at $10,975; the reserve and surplus at $17,864. The accumulated surplus of $14,336 exceeds the total outstanding liability by over $3,000.

### Dundas.

In Dundas (population 5,054) lighting rates under Hydro-electric administration have declined since 1913 from 5.8 cents and 3.5 cents to an average of 2.6 cents and 2.2 cents for domestic and commercial lighting, respectively. The load has increased from 139 to 1,172 horsepower. Generating costs at Niagara were higher in 1921 than in former years, but the price of power delivered to Dundas remained steady at $17 per horsepower per annum.

Revenue last year of $42,966, permitted the meeting of all ordinary expenditures, the allotment of $4,400 to renewals reserve and the establishment of a surplus of $3,405. The Dundas system has assets of $108,912, and liabilities of $46,736. The surplus and reserves make $62,176—the accumulation of ten years.

### Waterdown

Waterdown, a village of about 800 population, 62 miles from Niagara Falls, has had a steady reduction in its rates owing to the prosperity of the local business. The rate in 1914 averaged 7.9 cents and 6.5 cents for domestic and commercial lighting. In 1921 the respective kilowatt hour charges were 4.9 cents and 4.3 cents. Industrial power has dropped from $20.92 per h.p. in 1919 to $14.77 in 1921. Since the load has been increased from 29 to 123.7 horsepower it has been possible for the commission to maintain a very moderate rate for delivered energy, namely, $31. In 1912 it was $37.50, and for five years following that touched as low a point as $26.

Revenue last year was $8,501; expenditures, $7,686 (including a renewals contribution of $1,306), leaving a surplus of $814. The Waterdown plant is worth $13,996, and total assets are $22,405. Liabilities are $5,192. The renewal reserve, the accumulated surplus, and the municipality's credit with the Provincial Commission, make a total greater than the value of the plant.

### Caledonia.

Caledonia's rates have been reduced as follows: Domestic lighting, from 5.4 cents to 4.8 cents; commercial lighting, from 5.4 cents to 2.5 cents, and power from $16.21 to $15.82. The town, which has a population of about 1,300, made a record with the Hydro-electric system in 1912, when its total load was 1 horsepower. The load today is 86.7 horsepower and the price of delivered power has declined from $29.10 to $24.50.

The revenue for 1921 was $4,728; the expenditure $3,700, leaving a surplus of $1,027—equivalent to $11.85 per horsepower on the 1921 load. Assets are $13,199; liabilities only $3,952. The accumulated surplus alone, without considering other reserves and liquid funds, exceeds the balance of liability by $1,350.

## RAILWAY COMMISSION'S TOUR

Preparations are being made for the tour through Western Canada which the Railway Commission will make, starting in September. The Commission will hold sittings in most of the large Western cities, and will proceed to the Coast. Therea re more than fifty cases on the docket at the present time, with the probability that more will be added during the present month. None of the cases are of national importance, the majority being chiefly pertinent to the localities and cities bringing them before the board.

## SECOND BLAST FURNACE

A second blast furnace may be blown in at the Sydney plant of the British Empire Steel Corporation in the near future if general labor and business conditions permit, it was officially stated on July 28th.

The second furnace will make pig iron for foundry purposes, a branch of the market which has shown much imporvement lately.

**Profitable Results**

Investors, by carefully checking over their present list of holdings, will find many opportunities to sell short-term Victory Bonds and other issues which are nearing maturity and reinvest the proceeds in long-term Government, Municipal and Corporation Bonds.

In many cases the income return can be increased as much as 33%.

## JUNE FISH CATCH

### Value Reaches Over Three Millions

During the month of June there were 934,571 cwts. of fish landed on both the Atlantic and Pacific shores valued at $3,118,376, according to a report on the fishing results for the month of June, 1922, issued by the Department of Marine and Fisheries.

The run of mackerel on the Atlantic coast this spring has been the best for a number of years. During June, 132,893 cwts. were landed, while only 70,120 cwts. were caught in June of last year. Up to the end of June, 152,792 cwts. of this fish have been landed compared with 82,474 for the first six months of 1921.

The catch of alewives, especially in some parts of Nova Scotia, was very good. There were 31,938 cwts. taken during the month compared with 7,724 cwts. in the same period last year.

The lobster catch on that part of the coast where the season has not closed was very good. Along the north shore of Prince Edward Island and in parts of Cape Breton Island poor catches were reported, but the quantity taken, 101,529 cwts., is much greater than that taken in June, 1921, viz., 62,367 cwts. The fishermen were paid more for their catches than last year, too. Since the opening of the lobster fishing season in November last 305,337 cwt., have been taken. Of this quantity 54,478 cwts. have been used fresh or shipped in shell, and 125,407 cases have been packed. During the same period last season there were 293,249 cwts. taken, of which 80,585 cwts. were shipped fresh, and the remainder packed making 106,788 cases.

## B. C. SALMON PACK

Although British Columbia still leads all the other provinces of Canada in fisheries production, the 1921 salmon pack was less than 50 per cent. of the average for the past ten years. The report of Hon. William Sloan, Commissioner of Fisheries, for last year shows that the total pack in 1921 was 603,548 cases, as against 1,187,616 cases in 1920, 1,393,155 cases in 1919, and 1,626,768 cases in 1917. The catch in every district shows a decline.

## MOTOR COMPANIES

Following the report of the expansion of the Ford Company of Canada, it is further reported that Dodge Bros., have secured a large piece of property in Windsor, and that they will shortly put up a large plant. It is further announced that the Reo Motor Car Company has purchased 15 acres of land in Sandwich for a similar purpose.

## LOSS FOR MOUNT ROYAL STEAMSHIP CO.

Judgment of $932,109, was entered on July 28, in a New York court against the Mount Royal Steamship Company, Limited, a Canadian corporation, in favor of the Guaranty Trust Company of New York, on three notes made by the steamship company in 1919 and transferred to the Trust Company before maturity.

Two of the notes were payable to Alexander Johnston and the other to Dilsizlan Bros. It was alleged that a summons in the suit was served on James McNaught, auofficer of the ship line, on June 30, 1922,

# Government and Municipal Bonds

There was not as much activity in the bond market during the past week as formerly, no doubt due to a decrease in offerings and also the fact that buyers are absent from the city on their holidays.

According to several bond dealers it is not expected that there will be any unusual activity until the forthcoming Dominion Loan is passed, or until there is some definite information regarding this loan. Whether the loan will be sold in Canada as the former Victory loans, or sold in the United States or in Great Britain remains to be seen, although if it is sold in Canada it is generally expected that it will have a depressing effect upon the market as there will be an abundance of securities. Several municipalities are reported to he holding their bonds, totalling several millions, until the Dominion loan is passed, and if the loan is sold outside of Canada there is no doubt that the municipalities will receive good prices for their securities.

### Government Loan

Hon. W. S. Fielding, Minister of Finance, gave out on Wednesday the following statement concerning Government loan operations:

"Our Loan Act, passed at the recent session, gives us authority to borrow $350,000,000. We do not require all this money immediately. A five-year loan of 5½ per cent. bonds, issued in 1917, now amounting to $178,000,000, will mature on December 1, 1922. It is our intention to provide for retiring these bonds by a domestic loan, to take the form of a convedsion loan. Any portion of the bonds that may be covered in the meantime by arrangements for conversion will be redeemed in cash on December 1.

"It is believed, however, that a great many of the holders of these bonds will desire to reinvest their money in Dominion securities. To meet what we believe to be their wishes we will issue new bonds bearing the same rate of interest, namely, 5½ per cent., either for five years, maturing in 1927, or for 10 years, maturing in 1932, as the bondholder may prefer. A further advantage to the investor will be that, while the maturing bonds will be retired on December 1, 1922, and the interest coupon of that date will be paid, the new bonds to be delivered in exchange will be dated November 1, and will thus carry one month's accrued interest.

### Holders' Privilege

"The privilege of investment on these terms will be confined to the holders of the outstanding bonds about to mature. The bonds of the Canadian Government, it is hardly necessary to say, are the very highest class of security that can be offered to our investors. In offering the terms above stated for renewal of the maturing loan we are making a substantial concession to the home investors, inasmuch as our recent loan was placed in New York at a figure that yielded a little over 5 per cent.

"We believe that this highest class of security, offered on such terms, will readily be taken up by the holders of the bonds that are shortly to mature.

"The Government will avail itself of the services of the chartered banks in effecting the proposed conversion. Holders of the maturing bonds who wish to take advantage of the offer will be asked to communicate with one of the banks as early as possible, and make their decision not later than September 30. Receipts will be given for bonds that are deposited, to be exchanged in due course for the new bonds when ready.

### No New Loan Immediately

"After the conversion plan has been completed it may be necessary to make a further loan, in which new money will be required. But that is a matter not calling for attention at present.

"Arrangements are being made with the banks for the carrying out of this conversion plan. More formal announcement will be made by official advertisements within a few days."

Asked whether or not the new bonds would be exempt from taxation, as were those issued in 1917, Mr. Fielding replied that they would not. It was not the intention of the Government to issue any more tax-exempt bonds, he said.

As far as prices are concerned there is not a very definite trend, although there was a slight strengthening during the past week. The New York Bond Market has been moving up steadily for the past few months, and some similar action should take place here shortly if no new disturbances take place.

There were several small municipal issues sold during the week and in most of the issues competition was keen. Considering the condition of the market at the present time, prices received by the municipalities may be considered good.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders Close |
|---|---|---|
| Three Rivers, Que....... | $850,000 | Aug. 21 |
| Nepean Twp., Ont. .... | 235,000 | Aug. 17 |
| Prince Edward Island.. | 175,000 | Aug. 25 |
| Barton Twp., Ont. ...... | 120,000 | Aug. 21 |
| Notre Dame de Granby, Que. ...... ........ | 100,000 | Aug. 16 |
| Peel County, Ont. ...... | 80,000 | Sept. 1 |
| Campbellton, N.B. ..... | 60,000 | Aug. 15 |
| St. Stanislaus, Que. .... | 50,000 | Aug. 15 |
| Kincardine, Ont. ...... | 43,000 | Aug. 12 |
| Deux-Rivieres, Que. .... | 25,000 | Aug. 14 |
| Athol Twp., Ont. .. .... | 4,000 | Aug. 15 |
| Weston, Ont. ... ...... | 25,000 | Aug. 21 |

**Weston, Ont.**—Tenders will be received up to 5 p.m. August 21, 1922, for the purchase of $25,000, 5½ per cent., 20-instalment electric light debentures. J. H. Taylor, clerk. See advertisement in this issue.

**Nepean Twp., Ont.**—Tenders are invited up to 2 p.m. August 17, 1922, for the purchase of $200,000, 5½ per cent., 30-instalment, and $35,000, 5½ per cent., 20-instalment debentures. John Gamble, township clerk, Westboro. See advertisement in this issue.

**Barton Twp., Ont.**—Tenders will be received up to noon August 21, 1922, for the purchase of $120,000, 5½ per cent., 30-year school bonds. A. G. E. Bryant, clerk, Hamilton. See advertisement in this issue.

**Three Rivers, Que.**—Tenders will be received up to 4 p.m. August 21, 1922, for the purchase of $850,000, 5½ per cent., 25-pear debentures. Arthur Nobert, city treasurer.

**Kincadine, Ont.**—Tenders will be received up to August 12, 1922, for the purchase of the following debentures: $20,000, 5½ per cent., 20-instalment hydro-electric; and $23,000, 5½ per cent., 20-instalment filtration plant debentures. John Scougall, clerk.

**Campbellton, N.B.**—Tenders will be received up to Tuesday, August 15, 1922, for the purchase of $60,000, 5½ per cent., 35-year debentures, dated September 1, 1922. John T. Reid, town clerk.

**Athol Twp., Ont.**—Tenders will be received up to 12 o'clock noon, August 12, 1922, for the purchase of $4,000 6 per cent., 20-year school debentures. W. Moore, township clerk, R. R. No. 3, Picton.

### Coming Issues

**Victoria, B. C.**—The city will commence negotiations shortly for the extension of its securities to the extent of $3,500,000, according to announcement made on July 7.

The money now standing to the credit of the city's local improvement sinking fund is not sufficient to pay at maturity the principal and interest of the various debentures issued to cover of local improvement works, and it has therefore been decided to borrow $3,500,000 upon the debentures already issued as extension securities.

According to a by-law prepared at the city hall and which has already been posted by a member of the council for submission at the next meeting of the Mayor and aldermen for first reading, the debentures to be insued will hear interest at the rate of 5½ per cent. per annum, and will be payable in twenty annual instalments.

**Port Arthur, Ont.**—In a letter to The Monetary Times, T. F. Milne, deputy treasurer, states that the $200,000 debentures recently issued for the erection of a public school, and referred to in these columns on June 30, are not being offered to the public, but were deposited in the city's sinking fund.

### Bond Sales

**Saskatchewan,**—The following is a list of debentures reported sold by the local Government Board from July 15 to 29, 1922.

School Districts: 10-years: Saginaw, $4,000, 7½ per cent., to C. C. Cross and Co.; Lynette, $3,800, 8 per cent., to Regina Brokerage Co.; Rosetown $24,000, 7 per cent., 20-years, to Geo. Moorhouse and Co.; Hamburg, $800, 8 per cent., to R. S. Fleury, Rosthern; Stalwart, $2,500, 7½ per cent., to C. C. Cross & Co.; Airedale $1,000, 7 per cent., to Mrs. B. Dearing, Senlac; Key West, $1,500, 8 per cent., to C. C. West Assiniboia.

Rural Telephones: 15-years: Eddy, $200, 8 per cent., to Mrs. J. Barlaw, Bulyea; Tadmore, $1,150, 7 per cent., to W. Patterson, Preeceville; Verwood, $2,200, 8 per cent., to Regina Brokerage Co.; Melby, $200, 7½ per cent., to Duck Lake Sinking Fund.

**Drummondville, Que.**—McLeod, Young, Weir & Co., have purchased $100,000, 6 per cent., 35-instalment debentures at a price of 99.47, the money costing the town about 6.04 per cent.

**Saltfleet Twp. Ont.**—An issue of $35,000, 5½ per cent., 20 and 25-instalment debentures has been purchased by W. L. McKinnon and Co., at a price of 97.78, which is equal to a cost basis of about 5.75 per cent. The following is a list of tenders: W. L. McKinnon & Co., 98.78; R. C. Mathews & Co., 97.142; Bell, Gouinlock & Co., 96.756; Wood, Gundy and Co., 96.58; Municipal Bankers Corp., 96.56; and C. H. Burgess & Co., 95.77.

**Vancouver, B.C.**—The Vancouver District Joint Sewerage and Drainage Board has sold $300,000, 5½ per cent., 40-year debentures to Wood, Gundy and Co., at a price of 97.09, the money costing the Board about 5.68 per cent. Tenders were originally called for $600,000, but it is understood that the other $300,000 has been financed by the banks. Bids were asked for bonds payable in Canada or the United States. The following is a list of tenders:

| | Can. Pay. | U. S. Pay. |
|---|---|---|
| Wood, Gundy & Co. ...... | 97.09 | |
| McLeod, Young, Weir & Co. | 96.63 | |

## ACADIA SUGAR REFINING CO.

In the Nova Scotia Supreme Court on August 4, Justice Mellish heard an application by L. A. Lovett, K.C., acting for James Imbrie, William M. Imbrie, Oswald C. Tripp, Charles G. West and David F. Wells, of New York, for an injunction to restrain the Acadia Sugar Refining Company, Limited, directorate from carrying out certain plans of organization of the concern.

W. A. Henry, K.C., appeared on behalf or the company directorate and opposed the application. He said the reorganization plan as referred to was not contained in the resolutions of the directorate and it was still open to them to propose any plan they deemed in the interest of the company. The company was a Scottish one, with headquarters in Glasgow and branch registry in Halifax. There were directors in Glasgow and Mr. Henry contended the courts here had no jurisdiction to prevent the directors in Scotland doing acts in the interest of the company. All documents of a contractual nature must be made in Glasgow and an injunction here would have no effect over directors in Scotland.

## FIRST GRAIN SHIPMENT

Claiming this year's record for an early shipment of grain, the Lake of the Woods Milling Company on August 3 received delivery at Keewatin of a car of new wheat. The grain, which came from Rosenfeld, Man., in the southern part of the province, graded No. 1 northern, of fine quality.

## QUEBEC'S FINANCIAL POSITION

The financial report of the Province of Quebec for the fiscal year ending June 30, 1922, was handed to Premier Taschereau on August 8, and shows a surplus of ordinary revenue over expenditure of $5,033,419. The report reads as follows:

Ordinary receipts and expenditures of the Province of Quebec for the year ending June 30, 1922:

Ordinary receipts, $21,609,396.

Ordinary expenditures, $16,575,976.

Surplus, $5,033,419.

Commenting upon this statement, Premier Taschereau said:

"These figures speak for themselves. No comment is necessary either by the Prime Minister or by the Government. As a matter of fact, I intimated some time ago that the surplus of the Province this year would exceed that of all the other Provinces for the last five years, and I was justified in my prediction. The Government intends to use this surplus for education, for the construction of highways, for public charity and for the other branches of development."

## BIG COAL SHIPMENT

Within the next week or 10 days 9,000 tons of British anthracite coal at least will be on its way across the Atlantic in Canadian Government Merchant Marine ships.

The S.S. "Canadian Conqueror" is to load in Britain some 4,000 tons within the next few days and the S.S. "Canadian Mariner" is scheduled already to carry 5,000 tons. It is possible that this tonnage will be increased before sailing date.

Other ships of the Canadian Government Merchant Marine trading to British ports will probably load British anthracite for domestic consumption in Canada when cargo space permits.

# Stock Markets

With a noticeable improvement in business conditions throughout the Dominion, the stock market seems to have been affected by these conditions, as, during the past week, there was a slight betterment in the tone of the market.

Reports from practically every city in Canada state that labor conditions show a vast improvement over the last six months or so, and a considerable betterment over the same period of last year. With bright prospects of a bumper crop the demand for farm workers continues to be very heavy, and in some localities the demand has not been able to be met. Other seasonal industries, such as lumbering and railroad construction are taking their quota of men, and with other branches of industry, such as iron and steel and various other manufacturing concerns, increasing the staffs, this will have the affect of lessening unemployment, which in turn will have its affect upon the stock market. With a bumper crop practically assured, the market should once again display its usual activity.

The outstanding feature of the market was the activity displayed by the paper securities, which have been fairly quiet for the past few weeks. Abitibi and Laurentide were among the most active and each showed a net gain in price over the previous week. A comparison of prices of the leading paper stocks for the week under review, as compared with the previous week, and the same week a year ago, is given below:—

| | Aug. 7. | July 31. | Aug. 10. |
|---|---|---|---|
| Abitibi | 58⅜ | 58 | 30 |
| Brompton | 32½ | 32½ | 29 |
| Howard Smith | 68 | 68½ | 68 |
| Laurentide | 89½ | 88¾ | 69 |
| Price Bros. | 40⅛ | 41¼ | 29¼ |
| Riordon | 9 | 10 | 3 |
| Shawinigan | 110 | 110 | 103¾ |
| Spanish River | 87½ | 89 | 52 |
| Wayagamack | 51½ | 54 | 32½ |

From the above comparison it will be seen that, although prices have shaded slightly from the previous week, yet there is a very noticeable improvement since last year, when the market was on the road to recovery after the serious setback at the beginning of the year and during the latter part of 1920.

The general industrial list, while not showing a decided advance, nevertheless showed a slight betterment when compared with the preceding week.

### Holt, Renfrew & Co.

At a special meeting of the shareholders in Montreal on August 1, an issue of $1,000,000 first mortgage bonds was authorized. Of this $600,000 will be issued to redeem outstanding first mortgage bonds amounting to $212,000 and to defray the cost of improvements. The motion obtained the necessary vote of two-thirds of the outstanding shares of the company.

The company has announced that the balance of the issue will be made only in case of further needs arising in the future. The issue authorized will, in addition to meeting the outstanding obligations mentioned, meet the cost of a cold-storage plant and factory, and improvements costing $300,000 to the retail stores in Quebec, Montreal, Toronto and Winnipeg. It will also provide additional capital.

### Avalon Telephone Co.

An issue of $115,000 6½ per cent. first mortgage twenty-year bonds has been made by the Avalon Telephone Company, Limited, of St. John's, Newfoundland, and is being offered privately by Royal Securities Corporation at 98 and interest, to yield about 6.70 per cent.

Avalon Telephone Company was incorporated in 1919, the company taking over the telephone system of St. John's and surrounding territory, which was formerly operated by the Anglo-American Telegraph Company. Franchises granted by Act of the Newfoundland Legislature give to the company the exclusive right for thirty years, dating from September 2nd, 1919, to operate in the electoral districts of Ferryland, St. John's East and West (except Bell Island), Harbor Main, Port de Grave, Carbonear and Bay de Verde—these districts comprising the most thickly settled part of Newfoundland.

# Deposits of Provincial Insurance Co.'s

**By A. E. Fisher**
**Superintendent of Insurance for Saskatchewan.**

(Report of the Committee on Deposits of Provincial Insurance Companies, at the Conference of Provincial Superintendent in Vancouver.)

I have the honour to submit for your consideration a further report of your committee named at the last conference to consider the question of deposits to be required from provincial insurance companies which extend their operations beyond the province in which the company was incorporated.

At our Quebec conference in 1921 your committee presented a report recommending a change in the present system of deposits required from provincial companies under the provincial insurance acts. In that report the deposit requirements of the various provinces were reviewed and the effect of our present deposit laws was shown in its relationship to the finances of the company and also in its relationship to the future of our provincial insurance departments. The report strongly recommended the system of centralization of deposits in the province in which the head office of the company was located, such deposit to be based on that required by the Insurance Act of Canada. Reasons for the adoption of this method were given in that report. It was deemed advisable to again consider this question as it has a most important bearing on the future success of our provincial companies.

Your committee, while wishing to make its report applicable to all companies, has nevertheless again taken one of our provincial companies of long standing as an example of the effect of the various laws which are now to be found in the various insurance acts of the provinces.

### Provincial Companies Handicapped

In Winnipeg is located the head office of the Western Life Assurance Company and the Western Empire Life Assurance Company, the former being a licensee of the Department of Ottawa while the latter operates in the Western provinces under provincial licenses. The Western Life has on deposit at Ottawa, according to the statement of the Insurance Department, the sum of $50,000, which covers its operations throughout the whole of Canada. At December 31, 1921, the Western Empire Life Assurance Company had on deposit with the Provincial governments securities to the value of $191,442 as follows:—Alberta, $20,000; British Columbia, $27,000; Saskatchewan, $42,020; and Manitoba, $102,423. The insurance in force of the Dominion licensee is practically $5,000,000 while the policies of the provincial licensee total $6,750,000. The deposit required from the provincial company is almost four times as large as that of the Dominion company. The superintendents can see at a glance the handicap under which the provincial company must be operating in having such a large percentage of its assets tied up in government deposits. The deposited securities are absolutely removed from any possibility of financing on the part of the company except in the case of unpaid claims, reinsurance or liquidation.

In preparing this report your committee figured out the relationship of the securities deposited by certain companies to the negotiable securities held by them. Reference is made only to those companies which operate in three or more provinces. One company has 51%, another 90%, another 20% and another 70%. A consideration of this condition will show conclusively that our present laws are seriously handicapping our provincial companies. Sooner or later they will be obliged to secure relief by leaving the provincial departments and securing licenses from the department at Ottawa.

### When Deposits Are Available

Deposits made with the insurance departments are specifically stated as being available for the settlement of unpaid claims, unearned premiums and in some cases the re-insurance of the contracts in force in the particular province, and are held on deposit for the benefit of the policyholders resident in the particular province where the deposit has been made. Some provinces go so far in their deposit laws as to require that the company before making a deposit in another province may be asked for deposits covering the value of its re-insurance risk in the province, unearned premiums, or, if a life company, the actuarial reserve on the contracts in force in that province. The right of a provincial company to operate extra-provincially has been established by decision of the Privy Council, but when this right is exercised by the company and the additional deposits are demanded by the insurance department of the home province, the policyholders in the other provinces are, in your committee's opinion, discriminated against in that the home province can call for the full reserve whereas the deposit in the other provinces would ordinarily only cover a percentage of the unearned premiums or reserve, as the case may be, on contracts in force in that particular province. Such a condition of affairs is unfair to policyholders in other provinces.

### Change in Ontario Law

In the 1922 revision of the Insurance Act of the Province of Ontario the following has been included, and in the introduction of these particular sections the Ontario Department has followed out the recommendation made by your committee at the Quebec conference:—

"37—(2) The provisions of sections 38 to 44 shall not apply to an insurer which has upon deposit with the Government of the Dominion of Canada or of any province of Canada a sum not less than $50,000 represented by approved securities acceptable to such government which, in relation to its whole Canadian business, is not less in amount than that required by the provisions of this Act in relation to the business of the insurer in Ontario.

"(4) Where it is made to appear that any such insurer, having made a deposit with the Minister, is carrying on its business of insurance under license of the Dominion of Canada, or has made a deposit of the amount required in the preceding sub-section with any other province of Canada, the insurer shall be entitled to withdraw the deposit with the Minister.

"44—(2) Where the deposit made with the Minister is by virtue of reciprocal legislation in another province or provinces held for the protection of persons resident in such other province or provinces as well as in Ontario, persons resident in such other provinces shall rank pari passu with those resident in Ontario in the administration of the securities."

Your committee respectfully urges this conference to approve of the advisability of each superintendent recommending to the government of his province the adoption of sections similar in intent to those sections referred to above which have been incorporated in the revised Ontario Insurance Act.

### Centralization of Deposits

Summarizing the main points in your committee's last report and that presented today, the centralization of deposits is recommended:

(1) It is in principle the same system as that adopted by the Insurance Department at Ottawa and that in the United States where New York State deposits cover American contracts.

(2) Our present laws framed years ago are placing a heavy handicap on the operations of our provincial companies.

(3) Under some of the Acts extra-provincial policyholders are unfavorably discriminated against when compared with those of the home province.

# Unlisted Securities

In their weekly comment on the unlisted securities market A. J. Pattison Jr. & Co., say we have passed through a dull week with little doing and price changes so few that they are hardly worth recording. The coal strike in the States, along with the Dominion Government taxes becoming operative, August first had, without a doubt, a great deal to do with slowing up trading and narrowing down the quotations and market.

Notice of the reduction in prices of crude oil and gasoline was reflected in the quotations on most of the oil stocks, there were off a little from the best prices of the previous week.

There was some buying of Home Bank and Sterling Bank with prices holding firm, present indications are, that, should the market broaden bank stocks will do better.

Mount Royal Hotel debentures and Durant Motors were traded in to some extent without any change in price worth nothing.

## SURPLUS IS DECEPTIVE

### Dr. Adam Shortt Finds Fault With Victoria's Present Policy

Much of Victoria's so-called surplus of assets over liabilities is fictitious, according to Dr. Adam Shortt, who has presented the city council with a report of his findings in respect to the city's financial situation. Dr. Shortt holds that the city should abandon its policy of accepting tax arrears at their full value as part of the city's assets and the proposal is one of the first of Dr. Shortt's recommendations that the council will deal with.

### Last Statement

"If we take the first table in the last annual report of Victoria, the statement of assets and liabilities, it must be very reassuring to the average citzen who does not worry himself about details, but who may have heard some disturbing rumors as to financial difficulties and increasing tax rates, to find that the city has a clear surplus of assets over liabilities to the comforting amount of $2,861,558," wrote Dr. Shortt. "As regards the table of liabilites, we find that, while there might be some discussion as to some items which ought or ought not to be included in that statement, yet every one of the factors given is a real plain hundred-cents-on-the-dollar obligation, which cannot be reduced by any process of manipulation. When we turn to the larger field of assets, however, we are soon met by entries which at once start very important questions and doubts. The first item of importance is the uncollected taxes, beginning with the general tax arrears of the current year, 1921, amounting to the substantial sum of $234,045, and the local improvement assessments of the same year amounting to $88,529, or together $322,574.

### Special Conditions

Now, in an Eastern municipality where the assessed value of the land is practically nowhere above its market value, and where the arrears of taxes are always well within the market value of the land securing them, it is quite legitimate accounting to enter the tax arrears as an asset at substantially their face value. But in the presence of the actual facts, as developed in the last ten years in Victoria, where market value before this year's reduction in assessment was about one-ninth of the assessed value, and even yet is between one-seventh and one-eighth of the assessed value, and where only a modest percentage of the properties put up for tax arrears will sell for the tax claims against them, it is the merest fiction to set down even the current year's tax arrears at the full value of the taxes.

"It is quite true that before these arrears pass into delinquent arrears and thus come up for the tax sale, a certain proportion of them will be paid. There was, however, a difference of only $1,200 between the tax arrears of 1920 and the delinquent taxes of 1921, on a total of $346,814. The largest proportion of collections will be made through the tax sales. The delinquent taxes in 1920 amounted to $428,978. Of these there passed to the city at the tax sale in 1921 property representing taxes to the amount of $322,278, showing that $106,700 worth had been either redeemed before the tax sale, or sold at it. A still further amount will be disposed of through subsequent private sales.

### Losses Certain

"Experience shows, however, that after the more desirable lots have been disposed of, the majority of the property still remains with the city, and as they represent those claims for taxes which rise, many of them, far above any immediate market value, every sale which takes place renders the remainder more and more certain to prove a loss to the city. Even the very good prospect of land values rising again in the future is not particularly reassuring as to the sale of a great many of the lots remaining in the possession of the city, and the longer the city holds them the greater the charges against them become. The policy which the city should have adopted, in view of the argument as to returning values for land, should have been held to hold the most readily saleable lands, once they came into the possession of the city.

"It is obvious that the charges against them would be the lightest to carry, and with returning values the city would have obtained a sufficient margin of profit on their sale to assist, to some extent, in offsetting the inevitable losses on those bearing the heaviest arrears and other charges."

---

## FISHERY PRODUCTS

The total value of the product of the fisheries of Canada in 1921 was $34,930,935, compared with $49,241,339, in 1920, a decrease of $14,310,404, or 29 per cent., according to a preliminary statement issued by the bureau of statistics. Decreases from 1921 are shown in average values of nearly all kinds of fish marketed fresh and prepared.

To Holders of Securities

Few investors can study all the factors that make investing safe and profitable.

Through our fully equipped Correspondence Department, we conduct a National Mail Investment Service that grows steadily in usefulness and volume.

Twelve years of mail service enable us to ensure all inquirers, without obligation, the personal attention of a staff of qualified experts.

**TWO THOUSAND LIFE UNDERWRITERS TO MEET IN TORONTO**

This great gathering of life men from all points in Canada and the United States, to convene in August, will be representative of the Grand Army of Life Insurance Agents who have placed nearly Fifty Billions of Life Insurance protection over Canadian and American homes. Life Insurance is the most useful commodity in the world because it represents food, clothing, shelter and education for those who without it might be hungry, naked, homeless, or ignoant. The Mutual of Canada aims to distribute this great commodity at net cost of the consumer, being among Canadian companies the only one organized on a purely mutual co-operative basis. Mutual benefits actually paid, in the aggregate amount of $37,000,000. So that the mutual has had substantial share in the beneficent work of the Canadian life companies.

Assurances in Force $235,000,000.

### EXCHANGE ON RAILWAY RATES

In accordance with the judgment and order of the Board of Railway Commissioners dated January 4, 1921, the rate of exchange in connection with shipments of freight between points in Canada and the United States from August 1 to August 14, inclusive, will be 11-16 of one per cent., and the surcharge of the traffic will be one per cent. No surcharge will be assessed on international freight business.

The Railway Commission on August 2 issued a corrected memorandum respecting exchange charges on freight and passenger business between Canada and United States as follows:

"The rate of exchange in connection with shipments of freight between points in Canada and the United States from August 1st to August 14th inclusive, will be 11-16 of one per cent., and the rate of surcharge on international passenger business will be based on one per cent. exchange during the same peirod. No surcharge will be assessed on international freight business."

## DEBENTURES FOR SALE

### TOWNSHIP OF NEPEAN

**POSITION WANTED**

Gentleman. single, several years thorough bank training credits, etc., desires position with Trust Company or Manufacturing Concern with chance of advancement. Available August. Box 459, Monetary Times, Toronto.

# The Montreal Commission

BY FREDERICK WRIGHT

On March 19, 1921, there came into existence the Island of Montreal Metropolitan Commission. In the creation of this commission the Quebec Legislature marked the beginning of a new epoch that will undoubtedly give, as it already has given, a new importance to the civic administration of the metropolitan area of Montreal. The charter itself is the foundation upon which can be built a system of local government which, while assuring the autonomy of each of the municipalities forming part of the commission, gives the greatest opportunity for efficient administration in the public services of the whole area under its control. What this means in the economic and social development of the largest and most important aggregation of human beings in the Dominion of Canada, is well illustrated in the reasons for the Metropolitan Commission coming into existence at all. The story and the principal reason for the commission is that of the financial necessities of certain small municipalities surrounding the City of Montreal, and the determination of certain other well administered municipalities to keep their local independence, giving an opportunity to the formulation of a plan of administration that would adequately meet the exigencies of the case—that is, the difficulties of the weaker and the demands of the stronger urban centres.

### Sixteen Months' Work

It is now sixteen months since the Commission was established and though much of the time has been given to getting its bearings it has given the strongest evidence for its existence. Through its investigations and aid the weaker member municipalities have not only been able to make a start to straighten out their financial troubles, but they look forward with more confidence to the future because their credit is gradually being re-established. On the other hand so well has the Commission been administered that the fear that the wealthier member municipalities would be called upon to help their weaker neighbors with large sums of money has been found to be something of a bogey. It is true that one or two of the municipalities must be financed temporally not only on the credit but at the actual expense of the other municipalities that form part of the Commission area, but not near to the extent of the first estimates.

### Membership

The Metropolitan Commission is composed of fourteen members representing sixteen municipalities—five cities and eleven towns—located on the Island of Montreal, and one member representing the Municipal Department of the Province. The proportion of representation is as follows:

City of Montreal—Eight members, including City Comptroller.
City of Verdun—One member.
City of Westmount—One member.
City of Outremount—One member.

City of Lachine—One member.
Towns of St. Pierre, Lasalle, Hampstead, St. Laurent, Mount Royal, Montreal West—One member.

Towns of Montreal North, St. Michel, Montreal East, Pte-aux-Trembles, Laval de Montreal—One member.

The representative of the municipal Department has no vote, but this if anything strengthens the influence of the man holding the position on the deliberations of the other members provided he is the right man. And the present representative (Gaspard de Serres) is the right man because of his strong personality and experience in municipal finance.

### Financial Affairs

All of the member municipalities are under the supervision of the Commission so far as their financial affairs are concerned, with the exception of the City of Montreal, which is independent of the commission other than contributing to its cost, and to the funds and credit necessary to place the weaker member municipalities on a sound financial basis. It is to protect the larger risk, which it proportionately carries—being based on taxable property—that the City of Montreal elects the majority of the members of the Commission. So far as possible it may be said that the Metropolitan Commission is fairly and proportionately representative of the municipalities under its control, but it is not this alone that has so far given to the commission so much success; probably the most successful municipal venture that has been attempted on this continent. Indeed so successful is the administration that municipal financers speak of the commission in terms of the highest praise, which is reflected in the ease in which it can float its bonds at the highest prices.

### Commission's Personnel

One would say that the principal factor in the success of the Commission is its personnel, both of the actual commission and of the staff. Not only is every member experienced in municipal affairs but almost every man who had anything to do with the promoting and drafting of the commission is either a member or an officer. And what these promoters did to assure the successful consummation of their scheme reflects the greatest credit on their sense of public duty. The commission scheme originated in the brain of Mayor Beaubien of Outremont, who realized that unless an alternative plan could be formulated for the administration of Greater Montreal, his resistance to the annexation of his own city to Montreal would be overcome. With the aid of his City Clerk (Mr. E. T. Sampson) who is an English trained municipal official was thoroughly conversant with the subject. Mr. Beaubien studied the administration of the London County Council, which is probably the most successful and most democratic form of government for a metropolitan area. After satisfying himself that the London system, with modifications to suit local conditions. could be made adaptable to Montreal, he sought and secured the co-operation of the Mayors of Westmount and Montreal West, two other municipalities then in danger of annexation, with the result that between them and their municipal clerks a plan was worked out which was afterwards embodied in the charter of the Metropolitan Commission.

### Experimental Work

The Commission realizes that its work is very much of an experiment, consequently the members are more concerned in laying sound foundations than in building up a superstructure that may afterwards fall down for the lack of proper supports. In this the commissioners have taken a wise course, but even so far as they have gone they have given sufficient evidence that the foundation is strong enough and sound enough to support a complete borough system for the metropolitan district of Montreal.

## DIVIDEND NOTICES

### THE CANADIAN BANK OF COMMERCE

### Dividend No. 142

Notice is hereby given that a dividend of Three per cent. upon the paid-up capital stock of this Bank has been declared for the quarter ending 31st August. 1922, payable at the Bank and its Branches, on and after Friday, 1st September next, to shareholders of record at the close of business on the 16th day of August, 1922.

By order of the Board.
JOHN AIRD,
General Manager.
Toronto, 14th July, 1922. 1000

### THE ROYAL BANK OF CANADA

### Dividend No. 140

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Friday, the first day of September next, to shareholders of record at the close of business on the 15th day of August.

By order of the Board.
C. E. NEILL,
General Manager.
Montreal, Que., July 18, 1922. 5

### In the Matter of THE GREAT WEST BANK OF CANADA

NOTICE is hereby given that sufficient capital stock has not been subscribed to enable the Promoters of the Great West Bank of Canada to obtain from the Treasury Board the necessary certificate to permit the Bank to commence business and the Provisional Directors have decided to wind up the affairs of the Bank and to return the monies received from subscribers less the reasonable expenses allowed by law.

ALL subscribers and others having claims against the Bank for monies subscribed or otherwise are requested to notify the Bank in care of the under-signed Solicitors on or before the first day of September next, stating the amount and nature of their claims.

NOTICE is further given that the Provisional Directors will after that date proceed to disburse the funds of the Bank to those entitled thereto.

J. K. McINNIS,
Provisional President,
The Great West Bank of Canada.
Balfour, Hoffman & Company,
Solicitors, etc.,
Darke Block,
Regina, Saskatchewan.

# Corporation Finance

**Porcupine Crown Mines, Ltd.**—A notice of a special meeting of shareholders has been sent out by the company to be held on August 10th, for the purpose of considering two by-laws to be submitted by the directors.

One by-law is to increase the capital of the company to $4,000,000. The other is to purchase the assets of the North Crown Mine by the cancellation of the debts due Porcupine Crown, and the issuing of 600,000 shares of stock to the North Crown.

**Illinois Traction Co.**—The annual report for year ended December 31, 1921, shows that the company enjoyed a better year than previously, both gross and net earnings being higher.

Net earnings for the year were $6,512,279, an increase over last year, when they stood at $5,854,228. Gross earnings from all sources for the year under review totalled $22,600,894. From the net operating earnings fixed charges, amounting to $3,522,380, were deducted, leaving the sum of $2,989,898 available for depreciation and dividend. This shows considerable improvement over the amount shown under this head a year ago, which was $1,475,199. Dividends on preferred stocks of the Illinois Traction Co. and its subsidiaries amounted to $1,317,815, which leaves a balance of $1,672,083. There was appropriated for depreciation $1,504,037, leaving a balance surplus for the year of $168,045. Surplus for the previous year at December 31, 1920, amounted to $1,245,457, from which $24,925 is deducted under the head of miscellaneous charges. There remains $1,220,531 to be added to the surplus for 1921, leaving a total surplus on the balance sheet for the year of $1,388,577.

The President, in his report to the shareholders, points out that the showing for the year may be regarded as highly satisfactory, gross and net earnings being the highest in the company's history. There has been a continuance of the recession from the high prices for labor and materials which reached their apex in the middle of 1920. Because of the stocks of material carried over from the high cost period, the full benefit of declining prices is not reflected in expenditures for this purpose, and on this account expenditures for materials and supplies show an increase of $330,225. On the other hand, wages are reduced $233,410. The President also states that notwithstanding an increased generation of electrical energy there is a net saving in the cost of steam coal amounting to $170,000.

**Nova Scotia Tramways & Power Co.**—For the first six months of this year the company has shown a decided improvement in its earning position, as compared with the same period last year. The following table shows the principal changes:

| Six months ended June 30 | 1922 | 1921 |
|---|---|---|
| Gross earnings | $735,543 | $757,628 |
| Operating expenses | 512,752 | 614,806 |
| Balance | 222,791 | 142,822 |
| Taxes | 59,535 | 63,127 |
| Net for interest, etc. | 163,256 | 79,695 |
| Int. and sink. fund | 103,570 | 102,076 |
| Surplus | 59,686 | x22,381 |

xDeficit.

**Acadia Sugar Refining Co.**—A reorganization, involving the reduction in capital of one million dollars and the provision of one million dollars working fund, was decided on at an extraordinary meeting of the shareholders following the annual general meeting in Halifax on July 26. The plan involves the surrender and cancellation by the shareholders of their present holdings and the subscription by them of mortgage debentures to the extent of twenty per cent. of their present holdings, the mortgage debentures not to exceed on million dollars. Shareholders will have until December 31 of this year to decide whether or not they will subscribe. Should they not subscribe, it was stated tonight, they would retain their holdings in the present company, but have no holdings in the new.

The new company, which will probably retain the present name without material change, will be incorporated either under the laws of the United Kingdom or Canada.

There was considerable spoken opposition to the reorganization scheme when it was submitted, but only one vote was recorded against it.

At the annual meeting Hon. George H. Murray, prime minister of Nova Scotia, and Geo. W. Hensley, Halifax, were appointed to the board of directors. The remaining members elected were: E. J. Longard, Halifax, chairman; D. R. Turnbull, Montreal; Hon. Thos. W. McGarry, Toronto; J. McG. Stewart, Halifax; J. R. Prentice, H. F. Stevenson and Andrew Henderson, all of Glasgow, Scotland.

It was stated at the annual meeting that the Acadia refinery at Halifax was operating almost at capacity with an output of one million pounds per day.

**Ames-Holden-McCready, Ltd.**—From one of the committees of bondholders it is learned that practically all the bondholders have agreed on a tentative plan of reorganization. The last meeting to take place was that of the Ames-Holden-McCready first mortgage bondholders and the situation was gone into very thoroughly with them, with the result that the majority were inclined to agree with the plan as being the best that could be worked out under the circumstances.

It is undertsood that this plan will contain some very drastic features, as far as the reorganization is concerned. It will likely necessitate the formation of a new company to take over all the present companies and in this event the common stock would be practically wiped out, although it is intended to give the holders some rights in the way of subscription, which would have advantageous results. In the case of preferred shareholders they are likely to be given common stock in the new company.

Following the assent that has been secured from the majority of large interests, it is thought a meeting of bondholders will be called at an early date, at which the general plan will be submitted to them.

A special general meeting of shareholders of the Ames-Holden-McCready Company, Limited, and a similar meeting of shareholders of Ames-Holden Tire Co. has been called for Thursday, August 10th, at noon, to consider the financial position of the companies and authorize proceedings under the Winding-up Act or the Bankruptcy Act and sale and disposal of the assets.

**Brazilian Traction, L. & P. Co.**—The earning position of the company continues to show an improvement each month, and during June two new high levels as regards earnings were created, both gross and net earnings showing a substantial improvement over any previous month in the past year. The following is the statement for the month of June with comparisons:

| Aggregate net earnings | Milreis<br>1922 | Milreis<br>1921 |
|---|---|---|
| Total gross earnings | 16,266,000 | 14,257,000 |
| Operating expenses | 5,819,000 | 6,454,000 |
| Net earnings | 10,447,000 | 7,803,000 |
| Aggregate gross earnings | | |
| from Jan. 1 | 92,515,000 | 80,199,000 |
| · from Jan. 1 | 56,655,000 | 40,826,000 |

x—Decrease.

**Southern Canada Power Co.**—Both gross and net earnings for the nine months ending June 30, 1922, show an increase over the same period of last year. The following are the gross and net earnings for the month of June and for the nine months ending June 30:

| | June, 1922 | 1921 |
|---|---|---|
| Gross earnings | $ 66,732 | $ 61,253 |
| Oper. expenses and purchased power | 31,472 | 32,041 |
| Net earnings | $ 35,259 | $ 29,212 |
| **Nine months ending June 30** | | |
| Gross earnings | $632,762 | $553,836 |
| Oper. expenses and purchased power | 277,260 | 279,658 |
| Net earnings | $355,501 | $274,178 |

## BANK ROBBERY

Four bank robbers motored into the village of MacGregor, Man., at 2.30 on the morning of August 1, forced their way into the branch of the Imperial Bank, attacked the safe with an explosive, and finally withdrew with $20 as the sole return for their night's work. They had been unable to break into the inner compartment of the vault, where the cash on hand was secured.

## CASE ON MOTOR UNION POLICY

### Interpretation of Clause Regarding Misrepresentation—Application of Statutory Conditions

The case of Rockmaker v. Motor Union Insurance Co. has recently been decided, being an action on a policy of insurance issued by the defendants on Rockmaker's automobile. Printed in ordinary type and color on the policy were "General Conditions," of which condition 2 was: "If there be any misrepresentation in or material omission from the proposal for this policy, this insurance shall be void." Condition 5 was: "This policy shall cease to be in force in the event of any sale, transfer or assignment of or any lien on the . . . automobile or any part of the interest in this policy, unless the company expressly consents thereto in writing." The policy also contained the following: "7. Assured warranted to be the sale and unconditional owner of insured automobile."

On 18th July, 1921, the automobile was stolen but it was found in a few hours; it had however, been burned, apparently by accident.

**Car Assigned as Security**

Rockmaker being indebted to one Garkovitch on 20th July, 1921, made an assignment to him of the automobile and "all her interest in the insurance upon the said car and all her claim in connection with the said insurance," but the assignment, although absolute in torm, was in fact only a security for the debt. Further, the car had been sold to Rockmaker under a lien agreement dated 7th August, 1920, subject to the condition that the title to the property should not pass until the full price had been paid. In May, 1921, Rockmaker, owing Garkovitch $300, borrowed $200 more and gave him a chattel mortgage on the automobile for $550.

In view of the wide language of sec. 194 of the Ontario Insurance Act it was considered applicable to this policy. The policy was therefore subject to the statutory conditions and to those only. Condition 2 covers only misrepsesentations which are material to the risk and here there was no evidence that the state of title or ownership was material to the risk. Nor was the chattel mortgage an assignment within the meaning of statutory condition 3. As to statutory conditions 6 (a) Rockmaker was the owner. There being no valid defence to the action, judgment was given for Rockmaker with costs.

## FINAL RUSH OF PAYMENTS

There was a considerable rush on July 31 to clean up pending business and thus avoid the tax on cheques, which came into effect on Tuesday. Hundreds of corporations paid salaries for the month of July. Civic employees were paid this afternoon and the city thereby saved between $150 and $200.

Two loopholes in the tax by which payment may be evaded have been pointed out. In the first place, it is suggested that the original maker of the cheque, who has already paid the tax, might hand over the cheque for payment. The recipient might then endorse the already tax-paid cheque and use it for payment, and this operation might be continued several times. Another point did not seem quite clear to bankers: "If the cheque was marked July 31st," stated one banker, "and handed in at some future date, my Interpertation is that it will be quite in order. But, on the other hand, we will not permit a cheque to be dated July 31st and presented in September for payment. It is a matter for the bank to decide whether the cheque is in order or not."

The majority of banks have decided to do away with the practice of issuing cheques already embossed with stamps. Those in use, however, will be received until the supply is exhausted. Many conceded that stock brokers had the most cause to grumble. One firm estimated that the new tax would increase their old tax generally by 5,000 per cent. Another firm stated that: "It is an infernal nuisance, but we have increased our commission accordingly and so the flood of our discontent has dwindled."

# Convention of Union of Canadian Municipalities

**Meeting Held in Winnipeg Last Week—S. E. Charlton, of Galt, Ont., Elected President—Ask More Relief for Unemployment from Governments — Fuel Situation Critical for Municipalities—Municipal Expenditures Must Be Reduced**

The annual convention of the Union of Canadian Municipalities was held in Winnipeg, August 8—10, delegates from most of the provinces being present. Dr. Rondeau of Westmount, Que., presided.

Seldom. if ever, had the assistance of the Union of Canadian Municipalities been invoked more extensively, or exercised with greater success, than during the past year, according to the report submitted by A. D. Shibley, secretary-treasurer. Reviewing the union's official activities during the year, Mr. Shibley mentioned, the application of the Bell Telephone Company for increased rates, the problem created by the flow of immigration to the cities where there was not work for all, and the reduction in the cheque tax, for which he gave the union credit, involving a saving in municipal funds of hundreds of thousands of dollars annually. The financial position of the union was said to be most satisfactory.

S. E. Charlton, Mayor of Galt, Ont., was elected president of the Union at the closing session. Other officers elected are: 1st vice-president, D. D. McDonald, Dauphin, Man.; 2nd vice-president, Y. A. Dufresne, Shawinigan; 3rd vice-president, F. H. Plant, Ottawa; 4th vice-president, A. Owen, Vancouver; secretary-treasurer, A. D. Shibley. The following were elected to the advisory board: Arthur Roberts, K.C., Bridgewater, N.S., G. D. Bouchard, St. Hyacinthe; W. D. Hardie, Lethbridge, Alta; W. D. Lighthall, K.C., Westmount Que.; Fred Cook, Ottawa; C. W. McClean, Sault Ste. Marie; C. W. Rhondeau, Westmount.

### Unemployment Debated

Problems of unemployment and old age pensions were dealt with at the morning session. A recommendation that the Federal Government assume full financial responsibility for the relief of unemployment and distress among ex-service men, and that the Provincial and Federal Governments contribute one-third each to the relief of unemployment other than that among ex-soldiers, was adopted, following a lengthy discussion.

Many delegates declared the municipalities were not getting fair treatment from the Governments, and the executive was instructed to urge the federal government to change the law so that municipalities could collect from provincial governments a share of the money expended in relief. Alderman Lepage of the city of Quebec said the city had spent over $150,000 for relief, of which $40,000 should have been paid by the provincial authorities and the federal government, but no settlement had yet been made.

The resolution on unemployment relief read as follows:

"Resolved that in the opinion of this conference the assistance rendered by the provincial and federal governments last winter was inadequate and failed to meet the requirements of many municipalities. It is therefore recommended that in order to relieve the municipalities of a burden too heavy for their financial resources that assistance for the coming winter be rendered along the following lines:

"That the federal government assume full financial responsibility for unemployment and distress amongst ex-service men.

"That the federal and provincial governments contribute one-third each to the relief of unemployment and distress amongst all others than ex-service men, but that all restrictions which prevent the municipalities from performing municipal works of a useful character be removed and that the practice of giving relief without equivalent service be discontinued wherever practicable.

"It is further resolved that both the provincial and federal governments be requested to invite representatives from all cities which had to deal in a fairly large way with unemployment last winter, to the forthcoming conference on unemployment to be held in Ottawa, Sept. 5."

### The Fuel Problem

In an address on the fuel situation, Fred Cook, of Ottawa, one of the past presidents of the association, said:—

"The coal mining situation is one which is likely to give the municipalities much concern. The strike of miners and railway men in the United States is full of omen to many sections of Canada. Even if speedily concluded, the outlook will still be serious. In Ontario and Quebec, particularly, we are chiefly dependent for our supplies of anthracite coal upon the United States. Possibly the same remark applies to the Prairie Provinces, but not being sufficiently familiar with the situation in this section of Canada. I do not venture to hazard a definite opinion. Some Canadians look forward to the day when the 'white coal' of this country will be developed so cheaply that we shall be independent of Pennsylvania.

"Authorities are agreed, however, that it will be a long time before electricity can be used economically as fuel. The demands for power and lighting are growing so rapidly in Canada that at the present rate of development of our water powers, there is little prospect of any 'white coal' being available for heating purposes. Besides, the initial charges for installation are very great. I know of only one residence which is heated by electricty. At existing rates the installation for this particular dwelling would cost at least $1,500, and possibly might run up to $2,000. For comfort and cleanliness, however, there is nothing to equal electricity for heating purposes. But, as I have implied, the day is far distant when we shall be able to take advantage of 'white coal' in our homes, except for the small heaters which take the chill off a room in the spring and fall.

### The Coming Winter

"If then we cannot utilize electricity for heating purposes, and we have to content ourselves with wood and coal, and possibly oil when an economic burner has been devised, the question naturally arises, 'what are the municipalities of Canada going to do in the event of a coal shortage during the coming winter Twenty years ago during the great coal strike in the United States. the City of Ottawa purchased 4,300 tons of Welsh anthracite. It cost the capital $12 a ton laid down, and was sold to the consumer at $8 a ton. On its coal and wood venture that winter a loss to the city of $20,000 was sustained, but it was worth it. Conditions are different to-day. Canadian coal dealers know the value of Welsh anthracite, and it is up to the municipalities to bring the strongest possible pressure to bear upon their local dealers to see that adequate supplies are obtained. The demand for Welsh coal has increased enormously during the past three or four weeks.

"It had been my intention to suggest that the municipalities get together with a view to co-operative effort, but every day has evidenced a change in the situation, and it is now a case of every municipality for itself. When drafting this paragraph I asked a friend of mine to obtain for me the price of the best Welsh anthracite and Trans-Atlantic freight charges. Within twenty-four hours he received a reply from one of the most reliable firms in England making a firm offer of 3,000 tons of large Welsh anthracite at 56/6 C. 1. F. laid down in Montreal. This is based upon an ocean freight rate of fifteen shillings, which in my judgment was too high, although unquestionably freight rates have gone up during the past few weeks. Allowing the customary 5% for depreciation and possibly another 5% for incidental charges, unloading, delivery, etc., I estimate that this coal can be sold to the Ottawa consumer at a less figure than is now charged for Pennsylvania anthracite and still allow a fair margin of profit to the dealer. After conference with Mayor Plant I placed the Liverpool offer in the hands of one of our Ottawa dealers, who promptly accepted it at the price quoted, with a request for 5,000 or 6,000 additional tons. The price of 56/6 represents in Canadian currency $12.72 per long ton, equivalent to $11.32 the short ton. Water freight charges from Montreal to Ottawa are $1.25 per short ton. There is no customs duty on anthracite coal, so that this coal can be laid down at Ottawa at $12.75 per short ton at the outside figure. Should the trans-Atlantic freight charges be less than fifteen shillings the Ottawa purchaser will, of course, get the benefit.

"Upon this question may I call the attention of the convention to the fact that the Government has a large Mercantile Marine, the vessels of which could be utilized in bringing Welsh coal to Canada. If municipalities can keep out of the coal business I believe it would be better for them, but something must be done to meet the situation. My suggestion is that the municipalities should call their local dealers together as was done in Toronto and Ottawa, and impress upon them the importance of guarding against a fuel famine, by utilizing as far as possible the sources of supply in the Home Land.

### Financial Problems

In dealing with financial problems as they particularly interest municipal governments, W. Sanford Evans said they must be considered with reference to other forms of finance. There was only one actual source from which all finances could be obtained and the difficulty was in having each different government, municipal, provincial or federal, take no more than a fair portion of that wealth which was required for the various administrations. There was a great difference between private and government financing. Private enterprises could only prepare its budget after it had decided what were its actual revenues while governments could lay down what amounted in some cases to drastic laws for the collection of revenue, prepare their budgets and then go and collect the necessary money. The more governments took from the single fund available the less there was left for private enterprises.

### Manitoba Overtaxed

Within the last few years, said Mr. Evans, the working capital of the world had been pretty well used up and until there was an increase in production there would not be sufficient goods to give all a reasonable amount of them. He then reviewed the financial situation in the world in general and dealing with conditions in Manitoba claimed that the people in this province contributed to the various governments last year a sum total of $57,000,000 while the actual selling value of all the cereals produced represented a sum of $40,000,000.

Municipal governments, he said, were faced with the problem as to what amount they could take out of the single fund and still leave sufficient for private enterprises. General improvement in business was impossible if governments appropriated practically all the people's savings, said the speaker.

Municipal budgets must come down, said Mr. Evans, demands on the ratepayers must be reduced. Municipalities must share the responsibility with other governments and not take to much of the common fund. Mr. Evans believed there should be a reconsideration of the methods of taxation and this he considered could be arrived at through a conference of the various taxing bodies to arrange that no undue burden of taxation would fall upon any class or individuals. He questioned whether the realty taxation was a fair one as there were under existing systems people who were paying in taxation much more than they were getting in revenue out of their holdings. Taxation he believed, should be based primarily on ability to pay.

### Borrowing Deprecated

Mr. Evans did not believe municipalities should be asked to collect taxes for any other governments, they should be relieved of that duty wherever it existed. As regards borrowing, the ideal, he said would be to be able to get along without having to borrow any at all, in any case very good cause and justification should be shown before any borrowing was allowed. Governments, including municipal administrations, he concluded, should avoid as much as possible piling up short term loans.

### Russian Municipalities

Municipal government in Soviet Russia, was the title of a most interesting paper by J. A. Beaudry, proprietor of "Le Prix Courant" of Montreal. Mr. Beaudry spoke from personal observations he had made during his recent stay in Russia where he had spent several months on a business mission. After reviewing the history of the various revolutions, the fall of the power of the czar, the development of the communistic idea and seizure of power by the Bolsheviki, dealing with every phase of the changes in Russia since the early years of the war in a most comprehensive manner and with a wealth of details he was able to obtain only through keen observation of conditions as they existed when he visited the land of the Soviets, Mr. Beaudry explained the development of the different forms of government in that country.

### Winnipeg Hydro

J. G. Glassco, general manager of the Winnipeg Hydro-electric system, addressed the meeting regarding that project. "Why was the municipal plant built?" asked Mr. Glassco in glancing over the history of the project. In 1904, he pointed out, the rates were double those of eastern cities. The city approached the street railway, urging a reduction, but was disappointed. Six months after the by-law authorizing the building of a municipal power plant was passed. the company voluntarily cut the rates in half. In 1904 municipal ownership was ridiculed by the moneyed interests, but the enterprise went ahead and the plant was actually in operation in 1912. It cut the rates from 10 cents to 3 and has saved the citizens $15,000,000, Mr. Glassco claimed. Twice as much energy was used by the people at the lower rates he showed. In referring to the factors contributing to the success of the project, the speaker held that tne council showed wisdom in placing engineers on the work and seeing that they were not molested. The best material was used and a rigid system of inspection was followed. The city had been criticized for this careful inspection, but it was well warranted. The wonderfully cheap site was one of the greatest assets. He dealt with the financial aspect of the enterprise, touching upon such matters as sinking fund and depreciation.

"In ten years we have obtained 80 per cent of the domestic business of the city and our share of the commercial,' Mr. Glassco stated, pointing out that the system had 46,000 customers. Winnipeg, he continued, was the only city of any size on the continent that had a surplus of energy during the war. There was 30,000 horse power to spare now, and as much more could be added by further development.

Charts were thrown on the screen to indicate the system's business. It was shown that commercial business fell off during the war, as Winnipeg had not great boom in war manufactures. An outlet for power was needed, and the domestic was the only solution. A showroom was built and an advertising campaign commenced, which resulted in a great increase of domestic heating and cooking by electricty. Today the money derived from this source alone was $250,000 a year.

The distribution of earnings showed the following: Commercial lighting, 24.6; domestic lighting, 31.3; commercial power, 23; domestic cooking and heating, 11.8; street lighting, 4.5; water, 1.5; municipal buildings, 3.3. In speaking of the sale of stoves, etc., Mr. Glassco pointed out that the object was not to profit on the appliance but to stimulate the use of electricity. He was looking for great strides in electrical cooking and heating.

The future of the plant was sure, he declared in closing, and the citizens looked upon it as their finest asset. There was no doubt that the low rates would remain in force for a long time. He made some reference to the future of the plant being influenced by the decision with regard to the street railway franchise but did not go into the question.

### Water Powers of Canada

Motion pictures loaned by the Dominion Exhibits and Publicity Bureau were shown depicting "Water Powers of Western Canada," along the Winnipeg river; and others showing the plant at Point du Bois and the new development at Slave Falls also proved of great interest to the audience.

### Immigration Problem

Robert J. C. Stead, author and poet, and director of publicity, department of immigration and colonization, discussed "Some Angles of the Immigration Question." He stated that Canada's immigration problems divided themselves into three main heads: 1, the creation of a desire on the part of people in other lands to migrate to Canada; 2. the selection of the acceptable, the rejection of the unsuitable, and the physical control of the movement of immigration; 3, the assimilation of the immigrant.

Speaking of what the Canadian department of immigration is doing, Mr. Stead took up the cudgels in its defence. "The work has this peculiarity," he said, "that it is work carried on exclusively outside of the Dominion, with the result that it does not come to the attention of Canadians in their daily contract, and many of them know very little about it. For example, I have been asked when the government proposed to resume its immigration activities, and at the very moment that question was asked our advertisements were appearing in no less than four thousand newspapers in the United States. If they had been appearing in Canadian papers the Canadian public would have known all about them, but it is not in Canada that we must advertise for our immigrants. As a matter of fact, there are many things about campaigns of this kind which cannot be shouted from the housetops, but because we fail to shout it must not be supposed that we are inactive."

## BANQUE PROVINCIALE'S STATEMENT

### Net Profits for Year Were $415,251—$100,000 Transferred to Reserve Making Total of $1,500,000

The 22nd annual statement of the Provincial Bank of Canada for the year ending 30th June last presented at the annual general meeting under the presidency of Honorable Sir H. Laporte and Tancrede Bienvenu as secretary shows net profits of $415,251, after provision for all bad and doubtful debts, and dividends at the rate of 9% have been paid to the shareholders amounting to the sum of $270,000. War tax on bank notes in circulation $29,329, and the sum of $25,000 was transferred to the Pension Fund (total to date $150,000) and the sum of $100,000 was also transferred to the Reserve Fund, the total of which is now $1,500,000, or 50% of the paid up capital, which is $3,000,000.

### Liquid Assets

Quick assets of $22,378,497, include over $9,400,000 in cash or bank deposits; $7,462,000 in federal, provincial and municipal securities, or other bonds and debentures; $5,429,000 as call loans on stocks and bonds. A feature of the Provincial Bank's report is therefore that its liquid assets are not only ample but in excess of the ordinary, constituting 63 per cent. of all its obligations to the public, which aggregate $35,337,000. The bank's commercial loans reached $14,217,000 and its loans to cities, towns, municipalities and school districts $1,756,000.

At the annual meeting on August 9 the president drew attention to the fact that the total amount of taxes, federal, provincial or municipal paid by the Provincial Bank of Canada during the last fiscal year reached the considerable sum of $69,470, or nearly $5,800 per month.

### Directors Re-elected

The directors were re-elected as follows: Hon. Sir H. Laporte. president; Messrs. W. F. Carsley and Tancrede Bienvenu, vice-presidents; G. M. Bosworth, Hon. N. Garneau, Messrs. Emilien Daoust and S. J. B. Rolland, directors.

The members of the Board of the Commissioners-Censors were also re-elected: Sir Alexandre Lacoste, president; Hon. N. Perodeau, vice-president; and J. Auguste Richard.

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the first period in August:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| August 7th .... .... .... .... .... | $3,285,000 | $3,673,000 |
| **Canadian National Railway** | | |
| August 7th .... .... .... .... .... | 2,181,198 | 2,384,012 |
| **Grand Trunk Railway** | | |
| August 7th .... .... .... .... .... | 2,300,131 | 2,146,136 |

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended August 11, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Aug. 11 | Aug. 4 | July 28 | July 21 |
|---|---|---|---|---|
| Ontario .... .... ........ | 8 | 20 | 19 | 21 |
| Quebec .... .... ............ | 28 | 28 | 14 | 33 |
| Manitoba .... .... ........ | 8 | 7 | 13 | 6 |
| Alberta .... .... .... .... | 4 | 4 | 3 | 1 |
| Saskatchewan .... .... | 3 | 1 | 1 | 2 |
| British Columbia .... | 5 | 7 | 6 | 1 |
| Nova Scotia .... ........ | 0 | 3 | 4 | 2 |
| New Brunswick | 1 | 0 | 0 | 0 |
| Prince Edward Is. | 1 | 0 | 0 | 0 |
| Newfoundland ........ | 1 | 1 | 3 | 0 |
| Total .... .... ............ | 59 | 72 | 63 | 67 |
| 1921 .... .... ............ | 36 | 39 | 53 | 41 |

## ALLEN'S OTTAWA THEATRE

Movables in Allen's Regent Theatre, Ottawa, were seized formally on August 3 by the City Hall bailiff. The Allen Company made an assignment recently and the city's action was to secure the equivalent of $1,080 business tax due for 1922. If the money is not paid the assets will be sold, it was stated.

# May Get Railway Head in United Statse

### Executives Are in Good Demand, and Number in Canada is Limited—Success of Canadian National Depends on Staff as Well as Chief—Train Men Decline Wheat Board Positions — The Government Loan and Taxation

(Special to The Monetary Times)

Ottawa, August 16.—Minister of Railways Kennedy is still playing the part of Diogenes looking for a man to manage the National Railways. Up until the other day he thought he had secured an American of standing; but at the last moment the prospective manager slipped through Mr. Kennedy's fingers, greatly to the latter's disappointment, to say nothing of the Government. Now much of the work of trying to persuade some one to take the job will have to be begun all over again.

As was indicated in these columns a few weeks ago, it is very difficult to get the kind of man wanted, for the very good reason that such men are not looking for positions. Practical railroaders of proven high executive ability are in such demand in the United States that they have no need for them to take on a risky job. If a disposition to change their residence is indicated, and more money will keep them where they are, they have no difficulty in getting it. The Government may yet have to take a promising man who has yet to make his name.

Some objection has been expressed to the Government going to the United States for a man. As a matter of fact the Government can hardly do otherwise. For one thing, it is practically compelled to look for a man outside of both the present Canadian National and Grand Trunk managements; for if a man from either were placed in charge, it would almost certainly produce a bad effect among those belonging to the other old organizations. If the Government roads are to be operated with any degree of success, it is absolutely necessary that a strong spirit of loyalty and of hearty co-operation be developed, and a general manager brought in from the outside would be much more likely to call forth these qualities than any other.

As Sir Joseph Flavelle has said, the task of making the Government roads a success is not one for a superman. It must be the work rather of a competent and loyal staff working hard for a number of years. The best railway executive in the world could not successfully direct a system with 22,000 miles of road if there were division within the forces behind him.

#### Volume of Traffic

The Grand Trunk is experiencing an increase in traffic, as compared with the returns for last year; but on the other hand the Canadian National proper has had such a drop in earnings that it is doubtful whether it will have as good year as in 1921. The crop reports from the prairies indicate that the yield of grain is heavier in the southern portions of those provinces than it is in the northern, which means that the C.P.R. will probably haul a larger percentage of grain this year than last.

The suggestion that in the reorganization of the Government railways the selling of certain mileage to the C.P.R. might well receive consideration, is in line with sound business principles; but it is doubtful whether it will be acted on. In spite of the best expert opinion to the contrary, some of the Government mileage will never pay, and might well be sold; but the advocates of Government ownership are either blind to this, or they prefer rather to adopt a dog-in-the-manger policy. But radical measures will have to be taken, if in the near future there is to be a marked improvement in the showing made by the Government system. The policy of waiting for increased immigration to create more traffic will not do. Much may be done through the cutting out of some of the mileage.

The Wheat Board fiasco is quite in line with what most persons here had expected. Such men as Messrs. Stewart and Riddell are convinced that a measure of wheat control that does not control flour will not do. When H. W. Wood looked over the situation in Winnipeg he evidently decided that to decline the proffered seat on the Board would be a better evidence of good judgment than acceptance would be.

Mr. Fielding's decision to retire the 1917 issues of bonds by a conversion issue for $178,000,000, has found such favor as to suggest that it was adopted after very thorough discussion with the banks. There seems to be little doubt that the Government will get the money it desires; for unless they should want their money very badly, those possessing the old issue could hardly expect to do better than the Government has offered, 5½ per cent. being an excellent return on a Dominion Government bond.

At the same time the fact that the United States Treasury has received no less than $130,000,000 of 4¾ per cent Victory bonds, out of a total subscription of $475,000,000 to its recent offering of 4¼ per cent. treasury notes, is evidence that it will cost Canada a great deal more for money than it will cost our neighbors. This is of special importance because of the fact that we are still maintaining a borrowing policy, with the prospect of another large Dominion loan before the close of the current fiscal year.

As against this it is worth while noting that the United States debt at August 31st, 1919, was $26,596,000, whereas at June 30th of this year it was $22,963,000, a reduction during that time of interest bearing obligations to the extent of $3,633,000,000, or at the rate of over $100,000,000 a month. The spectacle of Canada, a young country, where low taxation is desirable, thus continuing to go heavily into debt, while her great neighbor is paying off debt at the rate of $100,000,000 a month is not pleasant, for it means heavier taxation, which must be paid very largely by Canadian business. To meet American competition under these conditions will not be easy.

#### The Income Tax

Recently Lloyd George's statement at the London conference that the British taxpayer is paying £17 a year, or $85 in taxes, has been quoted against an average payment of about $45 by the Canadian taxpayer as proof that taxes in this country are much lighter than they are in the British Isles. It may be that in the latter they are somewhat heavier, but not nearly so much as is generally thought. For example the $45 paid by the Canadian represents only federal taxation, so that to it should be added about $10 per capita representing taxation in the provinces. Of course there would still be about $30 of a margin in favor of the Canadian; but it must also be taken into account that while, during the last two years the British Government has paid off $1,600,000,000 of debt, the Dominion Government has borrowed over $112,000,000, and has guaranteed railway loans for an even larger sum.

There is good reason for the opinion that taxation in this country rests more heavily on the average person than it does in Britain; for over there a higher rate of income tax is paid on unearned, than on earned income, whereas in Canada no difference is made in the rate. The result is that the greater part of the British income tax is undoubtedly paid by persons on incomes derived from investments, whereas in Canada, the greater part of this tax is paid out of incomes made up solely out of wages or salaries. On top of this it is expected that this year the average person in Canada will pay about $10 in sales taxes, whereas in Britain this tax does not exist. Taxes in Canada come from the masses, not the classes.

---

## FIDELITY INSURANCE CO. OF CANADA

Announcement is made of the formation of the Fidelity Insurance Company with power to write guarantee, burglary, accident, sickness, automobile, plate glass, forgery, fire, inland transportation and inland marine insurance, other lines will be added from time to time.

The management has chosen guarantee business to start with, as this is one of the rapidly growing lines and offers a huge field for development. The president is A. E. Kirkpatrick, the vice-president, Sidney W. Band and the secretary-treasurer, W. R. Kirkpatrick—all experienced men in the insurance world of Canada. The head office is in the Excelsior Life Building, Toronto.

The management state that they will give a large share of authority and policy-writing power to their agents.

The steady increase in the volume of guarantee business done in Canada during the last decade is best evidenced by figures taken from the Dominion Blue Books, which show that from a total of $564,096, written in 1912 the business has steadily increased to the sum of $1,338,409 in 1921—a growth of over 100%.

## EXPECT BONDHOLDERS WILL CONVERT

### New York Dealers are Favorably Impressed With Terms of New Loan—Coal Strikes May be Settled Soon.

(Special to The Monetary Times)

New York, August 16.—The announcement of the terms upon which the Canadian Minister of Finance was willing to convert the 1922 issue of Dominion Victory five and a halfs maturing on the first of December next into five or ten years bonds maturing in 1927 or 1932, created quite a good impression here and bond dealers seem to believe that the Minister will have no difficulty in persuading most of the American holders of the 1922 to convert their bonds. Most of them seem to believe that it will therefore not be necessary for the Dominion to pay many of the maturing bonds in cash when December first arrives. Holders of the 1922 issue cannot in face of the present market for Canadian gilt-edged issues in this country fail to see the attractiveness of the proposition that has been made them by the Canadian Minister of Finance.

Private advices to Canadian bankers here indicate that a settlement of the anthracite coal strike may be expected at any time. And while such a settlement will probably enable operators to resume shipments of hard coal to Canada upon a larger scale than at present, all reports are unanimous in expressing the opinion that there is to be a very serious shortage on hard coal especially for export during the coming fall and winter.

#### Grain Crop Moving

Grain dealers inform your correspondent that the Canadian wheat crop is beginning to move at last. As the Manitoba Free Press pointed out some days ago, business has been at a standstill so far as Western Canadian grain was concerned for some weeks past, mainly it is believed on account of the uncertainty produced in the market by the proposal to re-establish the Wheat Board. As the Winnipeg newspaper pointed out normally at this season of the year almost thirty per cent. of the Canadian crop had been sold; this year until within the past few days only a very small proportion of the crop had been sold in the customary way in the futures market. But now your correspondent is told by American grain men with large Canadian interests the tide seems to have turned and Canadian selling is beginning to be a factor in the market. Grain dealers who usually handle a large portion of the Canadian crop either from New York or through subsidiary Winnipeg offices now seem convinced that the proposed Wheat Board will not be operative this year and that they may buy Canadian grain without expecting interference with trading at a later date on the part of any new Government controlled agency.

#### Foreign Exchange Market

The lack of activity in the foreign exchange market, notably in the market for Canadian exchange, coupled with the shutting off of a large part of the cable service usually enjoyed by the foreign exchange banks, Canada and British, has materially curtailed the profits of many of the banks during recent weeks. Some of the foreign exchange bankers are beginning to feel that the days of large and spectacular profits in the exchange market are gone for good and that they cannot even with the best of cable services hope to reap the golden harvests of former years. So far as profits are concerned most of the foreign exchange bankers seem to be convinced that with the return of the day of small movements in the various exchanges, profits will be as difficult to gather in as they were the days before the war.

| New York .................. | 9/32 | 17/32 |

## NEW PLAN SUBMITTED TO SHAREHOLDERS

### Ames-Holden-McCready Reorganization Scheme Suggests Formation of New Seven Million Dollar Company

At a meeting of the shareholders of Ames-Holden-McCready, Ltd., on August 10, a plan to reorganize the company was submitted, although no vote was taken in this regard.

The meeting was adjourned until September 6 in order to allow those present to consider the plan. It is the desire of the board of directors to put the matter first before the bondholders for ratification. The first of these meetings for bondholders will be held on August 25 and they will be called upon to vote on the plan. The second bondholders meeting will be called for September 5 and immediately after that the stockholders will cast their votes.

#### Plan of Reorganization

The plan submitted was as follows:

Your committee submits that a new company be incorporated with an authorized capital consisting of twenty-three thousand preferred shares of the par value of $100 each (subject to increase by appropriate action of the shareholders and directors if, as and when deemed necessary) and of thirty thousand common shares of no nominal or par value. This company will in due course authorize and issue first mortgage six per cent. gold bonds amounting in the aggregate to $2,500,000.

These first mortgage bonds will be payable as to principal in twenty-five years from the 1st of September, 1922; they will bear interest at the rate of six per cent. per annum, payable half-yearly, and a sinking fund will be provided under which the company will pay to the trustee a sum of at least $50,000 per annum. This sinking fund will be operative from the 1st of September, 1924, so that the first payment will be made to the trustee on the 1st of September, 1925.

The moneys of the sinking fund are to be employed by the trustee for the purchase or redemption of bonds of the proposed issue. Provision will be made in the trust deed under which the bonds are to be issued and secured, whereby the holders of the first mortgage bonds will be entitled to nominate two representatives on the company's board of directors.

The preferred shares of the new company will be preferred as to capital and as to dividend over the non-par value shares. They will carry a cumulative dividend of seven per cent. per annum, but this dividend will be cumulative only as and from the 1st of September, 1925.

The common stock will be without nominal or par value, but for convenience in making the calculations hereinafter appearing it will be considered as of a nominal value of $100 per share. The same method is used in considering the common stock to be issued to bondholders, creditors and shareholders of Ames Holden Felt Company, Limited.

Against the transfer to the new company of the properties and assets of Ames Holden-McCready Limited, it is proposed that the committee be placed in possession or control of sufficient amounts of the first mortgage bonds and of the preferred and no-par value common shares of the new company in order to make a distribution of the same on the following basis:—

#### Bondholders' Share

(1) To the holders of the presently outstanding first mortgage bonds of Ames Holden-McCready Limited an equal principal amount of the first mortgage bonds of the new company, and in addition twenty per cent. of the par value of such bonds in the fully paid no-par value shares of the new company.

(2) To the holders of the six per cent. second mortgage debentures and to the holders of the seven per cent. ten-year second refunding mortgage bonds of Ames Holden-McCready Limited preferred shares of the new company of a par value equal to the principal amount of their debentures or bonds, and in addition forty per cent. of the par value of such bonds or debentures in the fully paid no-par value shares of the new company.

(3) To the holders of the preferred shares of Ames Holden-McCready Limited twenty-five per cent. of the par value of such shares in the fully paid no-par value shares of the new company.

Wherever these or any subsequent adjustments give rise to fractional rights, such rights must be adjusted by the parties in interest, and insofar as possible facilities will be provided for that purpose.

#### Felt Co. Bondholders

If the proposed merger is satisfactorily completed, any obligation of Ames Holden-McCready, Limited, with respect to its guarantee of the principal and interest of the bonds of Ames Holden Felt Company, Limited, will disappear. In order to be relieved from the guarantee of the principal and interest of the bonds of Ames Holden Tire Company Limited, the committee proposes to surrender to the bondholders of Ames Holden Tire Company, Limited, or to a committee or syndicate to be formed to effectively obtain the release and discharge of such guarantee, all present holdings of Ames Holden-McCready, Limited, in the common shares of Ames Holden Tire Company, Limited. The new company will assume payment of all existing indebtedness of both companies for loans or advances from any bank or banks and also the payment of amounts due for taxes or charges of a similar character. Arrangements have been made with such banks whereby they have agreed to accept part payment of existing loans in the three-year notes of the new company to an amount of $450,000, bearing interest at the rate of six per cent. per annum. The balance of any outstanding loans, together with the necessary future requirements of the new company, will be carried on usual banking terms and by the discounting of customers' paper.

On the taking of appropriate proceedings by the bondholders, shareholders and creditors of Ames Holden Felt Company, Limited, under which its properties and assets will be effectively transferred and delivered to the new company, it is proposed to deliver or cause to be delivered bonds and shares of the new company as follows:—

(1) To the holders of the first mortgage bonds of Ames Holden Felt Company, Limited, first mortgage bonds of the new company to the extent of sixty per cent. of the face value of their present holdings, and in addition forty per cent. of such face value in the preferred shares of the new company and twenty per cent. in the no-par value common shares of the new company.

(2) To the holders of the common shares of Ames Holden Felt Company, Limited, twenty per cent. of the par value of such shares in the no-par value common stock of the new company.

As it will be necessary to relieve the new company from any large fixed charges for a reasonable period of time, it is proposed that all first mortgage bonds of the new company, when delivered under the present plan, shall have detached therefrom the interest coupons representing the first two years' interest on the principal of the bonds. To cover such deferred interest and any interest which has accrued on the first mortgage bonds of either Ames Holden-McCready, Limited, or Ames Holden Felt Company, Limited, the new company will issue to the parties entitled thereto ten year six per cent. coupon notes, the interest on which will be payable half-yearly.

#### To Sell Bonds

To provide the new company with substantial working capital, it is proposed to sell $1,000,000 par value of the first mortgage bonds of the new company. Arrangements have been made for the sale of these bonds at ninety-five per cent. of their face value and subscribers will receive in addition one hundred per cent. of the amount of their subscription in the fully paid no-par value shares of the new company. It has been arranged that all holders of the preferred and common stock of either Ames Holden-McCready, Limited or of Ames Holden Felt Company Limited, shall have the right, valid up to a certain date, to subscribe for such new bonds in the proportion of their respective shareholdings on a date to be determined, and on the same terms and conditions as to price and bonus as hereinabove referred to. It is impossible at the present time to deal more definitely with this right to subscribe, but on the completion of the proposed merger the parties who have already agreed to subscribe for such bonds will cause effective notice to be given to all shareholders of the delay within which such proportionate rights may be exercised.

It is calculated that on the proposed basis any holder of preferred or common shares of either company will be entitled to subscribe for bonds of the new company to the extent of approximately $1,500 par value of bonds for each one hundred shares of stock now held.

#### How Plan Works Out

On the completion of the merger the plan now suggested will work out approximately as follows:—

First mortgage six per cent. twenty-five year sinking fund bonds of the new company:

| | |
|---|---|
| To Ames Holden-McCready, Limited, first mortgage bondholders | $1,256,960 |
| To Ames Holden Felt Company, Limited, second mortgage debenture holders and bondholders, 60% of $375,000 | 225,000 |
| To the parties who provide new cash to the amount of $950,000 | 1,000,000 |
| ..Total to be presently issued | $2,481,960 |

Seven per cent. preferred stock:

| | |
|---|---|
| Ames Holden-McCready, Limited, second mortgage debenture holders and bondholders | $1,385,800 |
| To Ames Holden-McCready, Limited, ordinary trade creditors or their assigns | 570,000 |
| To Ames Holden Felt Company trade creditors or their assigns | 42,000 |
| To Ames Holden Felt Company bondholders | 150,000 |
| | $2,147,800 |

Common stock of no par value:

| | |
|---|---|
| To Ames Holden-McCready, Limited, first mortgage bondholders, 20% of $1,256,900 | $ 251,400 |
| To Ames Holden-McCready, Limited, second mortgage debenture holders and bondholders, 40% of $1,385,800 | 554,320 |
| To Ames Holden-McCready preferred stockholders, 25% of $2,500,000 | 625,000 |
| To Ames Holden-McCready trade creditors or their assigns, 40% of $570,000 | 228,000 |
| To Ames Holden Felt Company bondholders, 26% of $375,000 | 75,000 |
| To Ames Holden Felt Company trade creditors or their assigns, 40% of $42,000 | 16,800 |
| To Ames Holden Felt Company holders of common stock, 20% of $125,000 | 25,000 |
| To purchasers of new bonds. 100% of $1,000,000 | 1,000,000 |
| | $2,775,520 |

Total bonded indebtedness and capital of new company:

| | |
|---|---|
| First mortgage six per cent bonds | $2,481,960 |
| Seven per cent. preferred stock | 2,147,800 |
| Common stock of no par value (but for purposes of plan calculated at $100 per share) | 2,775,520 |
| Approximately | $7,405,280 |

There will also be ten year six per cent. notes of the new company to represent the coupons to be detached from the first mortgage bonds to be issued by it and for the readjustment of accrued interest.

The new company will defray the expenses, obligations and liabilities incurred by the committee and by the depositary, and for that purpose may sell or dispose of any balance of its authorized preferred and common shares not allotted under the proposed plan.

The committee will exercise all powers of bondholders who may have deposited their bonds under the terms of the agreement of the 20th of April, 1922, and will vote in favor of such extraordinary resolutions as may be necessary at any bondholders' meeting to accomplish all or any of the above purposes.

Should the appointment of a liquidator become necessary for either or both of the companies interested, the committee will co-operate with other committees representing the bondholders and creditors of such companies to acquire at public auction or private sale the properties, assets and rights of such companies, and it is proposed that on the acquisition of such properties, assets and rights, the same be transferred and assigned to the proposed new company in such a manner as to effectively carry out the proposed plan on the basis above outlined, subject to such modification and adjustment as may in the opinion of your committee be reasonable or necessary under the circumstances created by any forced liquidation of the assets of both companies.

The foregoing plan is based upon the reports of the two companies as of the 31st December, 1921, but as it is proposed to adopt the plan as of the 1st September, 1922, the exact figures must necessarily be adjusted to meet the situation as of that date.

## THE GOVERNMENT LOAN

Holders of Victory loan bonds due next December cannot do better than take advantage of the conversion offer being made by the Government. True, the new bonds are only of short date, five or ten years, but at par with a bonus of one month's interest they compare favorably with the outstanding taxable bonds as listed on the exchange. The 5½ per cent. bonds due 1924 are now selling at around 99.50, and those due 1934 at around 100.25. Allowing for the interest bonus, the cost of the new bonds will be 99.54, or considerably below what it would cost to buy 1934 bonds at present prices.

The last Canadian loan was placed in New York at a satisfactory price. The minister is making his present financial operation entirely a domestic one by offering to exchange the maturing bonds for new bonds bearing the same rate of interest, running for either five years or ten years as the bondholder may prefer. A further inducement to the investor is that he receives a bonus of one month's interest. The terms offered are decidedly favorable to the investor and it is probable that a large part of the maturing loan will be renewed. Arrangements for the exchange of the bonds can be made at any branch of the chartered banks. Holders who do not wish to reinvest will be paid in cash on the 1st December.

In offering to renew the five and a-half per cent. Canadian Government bonds maturing December 1st at the same rate of interest as is carried by the maturing bonds, and allowing a bonus of one month's interest, the Minister of Finance is making a material concession to the Canadian investor, as this rate is higher than was paid on the recent Canadian loan in New York. The high class of the security, which is the very best that can be offered in Canada, and the liberal rate of interest should lead to large investment In these Dominion bonds.

## THE OUTPUT OF AUTOMOBILES

According to figures recently made public by the National Automobile Chamber of Commerce, the output of automobile vehicles in the United States in June exceeded all previous monthly records in the history of the American automotive industry. The June production, as reported by ninety concerns manufacturing passenger cars and eighty concerns manufacturing trucks, was 287,875 automobile vehicles of all kinds (not including motor cycles), of which 261,963 were passenger cars and 25,912 were motor trucks. These figures show an increase of 32,348 vehicles, or 12 per cent. over the production in May—namely, 255,527 vehicles, of which 231,724 were passenger cars and 23,803 were motor trucks—which was the largest of record for a single month up to that time.

During the second quarter of 1922 the automotive industry produced 763,000 automobile vehicles: and during the first half of the present year the output was 1,137,000 passenger cars and trucks. Upon the basis of these figures it seems reasonable to assume that the production of passenger cars and trucks during the entire calendar year 1922 will easily exceed 2,000,000, as compared with an output of 1,668 vehicles in 1921 and with 2,205,197 vehicles produced in 1920, the record full year for the industry.

The following table gives the production of automobile vehicles in the United States in each of the first six months of 1922, as reported by ninety passenger car and eightey motor truck manufacturers:

| 1922 | Passenger Cars | Trucks |
|---|---|---|
| January | 81,693 | 9,344 |
| February | 109,170 | 13,121 |
| March | 152,959 | 19,651 |
| April | 197,221 | 22,227 |
| May | 231,724 | 23,803 |
| June | 261,963 | 25,912 |

Coupled with the record-breaking production in June of 288,000 vehicles, which was 61 per cent. over June, 1921, there came an increasing demand from abroad. The Government figures for May show that 6,798 cars were exported, or 6 per cent. increase over April. The motor truck exports were 1,203, or 36 per cent. better than April. Total motor exports were more than three times those of May, 1921. These cars and trucks were shipped to sixty or seventy countries, and indicate a revival of interest in motor transportation in those sections. On July 1 there were more than 10,500,000 motor vehicles registered in the United Stats.

## GERMANY'S PAPER MONEY

The allied financial conference has failed to agree on the question of German reparations. Premier Lloyd George, it is reported, was unable to accept France's suggestion of "productive guarantees," without which that country refused to grant a moratorium to her debtors. It would seem, therefore, that the problem has not been much advanced towards a solution by the conference, though hopes are entertained that the British cabinet meeting "may alter the situation." France contends that Germany is able to pay if she would, that her professed poverty is largely assumed and that she has many ways of meeting her obligations if she was only willing to do so. In this view the British representatives are unable to concur, and Mr. Lloyd George points to the present state of German exchange as a proof of her impoverishment. Notwithstanding the fact that industry continues to boom in Germany, the mark continues to fall and now stands at a practically negligible value.

Exchange is a true barometer of a country's actual financial position. The apparent prosperity of Germany is an illusion, due to the enormous inflation of her currency. Maximilian Harden, the German editor, in a recent article referred to a strike by the printers engaged in producing the paper money which Issues in such tremendous quantities from German official presses. This strike, says Herr Harden, threatened to bring about a revolution, because it had the effect of putting a stop to the "publication" of money. The strike was settled, the paper money again began to be "published" and the crisis was passed—temporarily. The question Is how long this process than continue.

In an official German report, just published, an interesting comparison is made with present conditions and those prevailing in pre-war days. On Ocetober 31, 1913, there was in circulation 3,622 million marks in coins and 2,753 million marks in paper, a total of 6,375, millions. On March 31, 1922, coins in circulation totalled 535 millions and paper 139,616 millions, a total of 140,151 millions—an increase over 1913 of nearly 2,100 per cent. On June 7 Reichsbank notes in circulation had increased to 154,915 million marks, to which must be added another 9,540 millions of war loan bank notes. Copper and nickel coins have disappeared from circulation, since their metal value exceeds their face value. Token money is made of iron, zinc or aluminum at the present time. The smallest Reichsbank note is for ten marks, but the War Loan banks issue notes for 1 mark 50 pfennigs. No article, it is reported, can be bought for less than five marks, with the exception of newspapers. Notes are being used for the first time in denominations of 5,000,000 marks. According to the Journal of the Canadian Bankers' Assocation. "if it could be assumed that every five marks of German paper money had the same superficial area as one of our Dominion notes, the total paper in circulation would be sufficient to cover the whole of the old German empire more than sixty layers deep." This gives some idea of the reason why Germany can be very busy, and yet remain bankrupt.

## OUR STANDING IN OIL

Lest the tales of oil discoveries in Alberta should lead us to exaggerate this country's position as an oil producer, it is well to remember that practically nothing has been placed on the market from oil wells there, except stock certificates. The following summary of the world's crude oil production is contained in the following table prepared by the American Petroleum Society. Canada and Algeria are the only two producing countries which showed a decrease in 1921 as compared with 1920.

| Country | Year | Barrels |
|---|---|---|
| United States | 1921 | 470,000,000 |
| United States | 1920 | 443,000,000 |
| France | 1921 | 392,360 |
| France | 1920 | 388,700 |
| Algeria | 1921 | 3,205 |
| Algeria | 1920 | 3,916 |
| Trinidad | 1921 | 2,354,159 |
| Trinidad | 1920 | 2,083,027 |
| India | 1921 | 6,864,000 |
| India | 1920 | 6,336,000 |
| Egypt | 1921 | 1,181,477 |
| Egypt | 1920 | 1,042,000 |
| Canada | 1921 | 173,893 |
| Canada | 1920 | 196,937 |
| Japan | 1921 | 2,438,960 |
| Japan | 1920 | 2,376,994 |

## BIG RE-INSURANCE BUSINESS

One of the largest reinsurance deals involving over fifty millions of assurance has just been completed and the Sun Life Assurance Company of Canada received a remittance of nearly seven million dollars in connection with this business.

When the war broke out in 1914 American life assurance companies ceased to issue further policies in most parts of the world outside of tse United States and Canada. Their foreign agency organizations have thus largely disintegrated and to resume active operations now would mean the building up of entirely new organizations at a time when they are able to secure within the limits of their own country all the new business the law allows them to write.

On the other hand, the agency organizations of the Sun Life Assurance Company of Canada in the same countries are active and vigorous. During the past few months agreements have been made by two of the great New York companies by which the Sun Life re-assures most of their business outside of the United States, Canada and Europe. The policies thus transferred amount to about $50,000,000 and the proportion of the assets of the American companies which has been, or is being, handed over as belonging to these policies is about $24,000,000. The last of these arrangements has just been completed and the Sun Life has received a further remittance of $6,850,000.

These various agreements have all been formally approved, not merely by the companies, but by the Superintendents of Insurance for the State of New York and for the Dominion of Canada. They constitute of of the most important reassurance transactions ever completed between life companies of this continent.

### CANADA'S COAL PROBLEM

So far as this country is concerned, the fuel problem is not one of supply but of cost. Though we have no resources of the kind near our large centres of population, there are neighboring fields from which our supply may be drawn. Ordinarily Pennsylvania supplies the needs of the central problems, and it is only in exceptional times, such as the present strike period or the war-time shortage, that attention is seriously turned to the other possibilities. As the present strike is fairly general throughout the United States, no relief can be obtained elsewhere there, and as a matter of fact the second choice lies within the Dominion itself.

Our coal resources are located in British Columbia, Alberta, and Nova Scotia. British Columbia is self-contained in this respect, but her coal fields do not help the rest of Canada. Alberta can supply the middle west, and even Manitoba, but the element of freight becomes too large to enable it to compete with Pennsylvania coal in Ontario. It is therefore merely a question of cost. Similarily, the maritime provinces and perhaps Quebec can be economically supplied with Nova Scotia coal, but the distance to Montreal and to Ontario again is great. Though the Nova Scotia mines are now tied up by a strike, there is ordinarily nothing to prevent Ontario using either Alberta or Nova Scotia coal.

Another possibility has developed in British coal. The Welsh mines operate at low cost and with the present surplus of ocean tonnage, transportation is less expensive than it was a few years ago. Welsh coal comes near to competing with Pennslyvania coal, and since the present strike became serious, some of it has been brought in and is now being consumed.

In view of the numerous alternatives, the tying up of the mines across the border, though serious, is no cause for alarm. The country will be supplied even though it may cost a little more than usual.

### AN ESSENTIAL PART

"Are you sure that you have shown me all the principal parts of this car?" asked the fair purchaser.

"Yes, madam, all the main ones," replied the dealer.

"Well, then, where is the depreciation? Tom told me that was one of the biggest things about a car."

## *Personal*

MAJOR P. L. BROWNE, M.C., has been appointed sales manager of H. B. Robinson & Co., Limited, Montreal.

E. R. C. CLARKSON has been appointed vice-president of the Canada Permanent Mortgage Corporation, Toronto, in succession to the late R. S. Hudson.

WILLIAM STONE, president of Rolph, Clark, Stone, Limited, Toronto, has been appointed a director of the Canada Permanent Mortgage Corporation.

CHAS. W. TINLING, president of the National Drug & Chemical Company of Canada, Limited, has joined the Canadian board of directors of the London and Scottish Assurance Corporation, Limited, and of the Scottish Metropolitan Assurance Company, Limited. The Canadian directorate of both the Companies mentioned is now composed of: H. B. Mackenzie, general manager of the Royal Trust Company; E. C. Pratt, general manager of the Molsons Bank; Norman J. Dawes, president and managing director, National Breweries, Limtied, and Chas. W. Tinling, president, National Drug & Chemical Company of Canada, Limited.

ROBERT P. JELLETT has been appointed assistant general manager of the Royal Trust Company, Montreal.

ROLAND A. LEWIS has been appointed inspector of the Motor Union Insurance Company, Limited, and the United British Insurance Company, Limited. Mr. Lewis will commence his duties on September 1st and will be attached to the Toronto office of the above companies. Mr. Lewis received his initial training at the head office of the Legal Insurance Company in London, England, and later came to Canada to spend several years with the Dominion of Canada Guarantee and Accident Company. Mr. Lewis now relinquishes a position he has held for the past three years as inspector of manufacturing risks with the Candian Fire Underwriters' Association (Toronto office). In the surveying department of the Fire Branch of the Motor Union and the United British there are already Herbert Freeman and H. D. K. Martin, who, like Mr. Lewis, have both had experience with the Candian Fire Underwriters' Association.

H. H. REDMAN, foreign manager of the Prudential Insurance Company, of London, England, was recently looking over the ground with the possibility of an early entry of his Company on this side. Mr. Redman's period of insurance service started with the Liverpool, London & Globe, and prior to his present position he was with the Atlas in a similar capacity. The Prudential is one of the largest British companies, having assets exceeding six hundred million dollars.

L. C. DUNCALFE, accountant for Gordon and Gordon, attorneys, Regina, has been appointed manager of the Northern Trusts, Regina, as successor to George S. Gamble.

H. W. deGUERRE, formerly manager of the bond department of the Sterling Bank, has joined the firm of Stewart, Scully & Company, and will act in the capacity of secretary-treasurer. Mr. de Guerre was also with Turner, Spragge & Co., and the Canadian Bank of Commerce.

THE RIGHT HON. EARL HAIG has joined the board of directors of the Standard Life Assurance Company.

F. W. HUNT, advertising manager for the Massey-Harris Co., Ltd., Toronto, has tendered his resignation, and will open an office at 33 Richmond St. W., Toronto, as an advertising counsel.

## *Obituary*

JOHN HENRY GRASSETT HAGARTY, managing director of the St. Lawrence and Chicago Steam Navigation Co., and director of the Canada Permanent Mortgage Co., died on July 26th, at his home in Toronto, at the age of 77 years.

### THE WHEAT BOARD

(From the "Mail and Empire," Toronto)

The Wheat Board has proved the fiasco Mr. Meighen predicted it would be and which he now truly repeats it was meant to be. Instead of being the boon that the Wheat Board of 1919 was to the farmers, the Wheat Board of 1922 was a gold brick, and there was not much gift on it at that. We wonder at the farmers being for a moment taken in by it. Even the most superficial observer could see that there could be no ground for expecting from the King Government's Wheat Board benefits comparable to those derived from the Wheat Board established by the Union Government. The latter-named Wheat Board was successful because it was honestly and wisely conceived to satisfy existing conditions. The King Government's Board had no chance of being a success, for it was not honestly designed to satisfy exisiting conditions. It was intended to dupe the farmers,! upon whom it was also intended to throw the onus of its failure.

When Mr. Stewart and Dr. Riddell, the Commissioners of the former Board that served the farmers so well in the war time, were asked to serve on this Board they declined. They were wise. It would have been the height of folly for these two men to have put to hazard the fine reputation they so well earned on the former Board by accepting appointment to this Board. After they turned down the offer, Mr. H. W. Wood and Mr. Rice-Jones, both men of prominence in the Farmers' movement, were asked to accept office on the Board. Mr. Wood did not immediately decline. Indeed he kept the public waiting for some time before he made his final answer. That answer was in the negative. Mr. Rice-Jones appears to have made up his mind to the same effect more promptly. Then two other men identified with the grain trade, Mr. J. I. McFarland, President of the Alberta Pacific Elevator Company, and Mr. J. R. Murray, general manager of the United Grain Growers, in their turn declined the honor . So the King Government has given up the attempt to find men willing to take office on its Wheat Board. Consequently there is to be no Wheat Board this year. Farmers will have to sell their wheat in the open market without the guidance or protection of any Government agency whatever. Nor will the grievances against which the Western farmers have been loudly complaining since tthe abolition of the former Wheat Board be redressed, even investigated, for the Royal Commission that was appointed by the Meighen Government to look into farmers' complaints on that score ceased functioning soon after the King Government came into office.

This is what the farmers of the West get for the long labors of Parliament and its special committee on this subject and for the heavy expense of a special session of the Alberta Legislature and a special session of the Legislature of Saskatchewan. Mr. H. W. Wood of Alberta was enthusiastic, we might say militant, in his advocacy of a Wheat Board, and apparently regarded the bare bone that was handed to the farmers as a full meal. But when it came to the test of service on the new Board, this promoter of it, after much consideration, asked to be excused. We do not imagine that his stock will continue on the up-grade in the Alberta market, where he has been looked upon as a man who can make or unmake Provincial Ministers in Alberta by the stamp of his foot. We are not surprised that Mr. Rice-Jones and Mr. Murray declined the appointment. As officials of the United Grain Growers they could not be expected to fancy a Government Wheat Board which, if it were put in operation would make an end of the open market, thus throwing out of the wheat business the United Grain Growers and the other grain-trading corporations that joined with the United Grain Growers under Mr. Crerar to block the investigation the Royal Commission we have mentioned was appointed to make. Fortunately for the grain trade, and for Mr. Crerar's corporation, the new Wheat Board was so clearly a sham that even men who were most urgent for the setting up of such a board would not accept service upon it. The farmers have been buncoed. Mr. Meighen warned the Government and the public that the Board would prove useless to the farmers. The seeds of futility were carefully planted in the legislation constituting it.

Mr. Meighen's idea was that there should be a Government Wheat Board through whose agency every grower should be free to market his wheat without being deprived of the opportunities of the open market. That would have been of great value to the farmers as a remedy for the wheat-marketing grievances they have been complaining of. If not fairly treated by private dealers and by Mr. Crerar's corporation they could then go to the Wheat Board and get all they were fairly entitled to without arbitrary or unjust deductions. The question of marketing the wheat of Western Canada is one of tremendous moment to the farmers. Some kind of marketing aid they certainly ought to be able to get from the Government. But from that Government they have received a stone when they asked for bread.

**BUSINESS INSURANCE**

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

# The Use and Abuse of Matches

**By George F. Lewis, Deputy Fire Marshal of Ontario.**

(An address before the Fire Marshals' Convention, Vancouver, August 9)

With vision and patriotic enthusiasm we have drawn and adopted the plans to-day for the erection of a magnificent structure. Let us hope that history will record for good and the upbuilding of our country the action taken by this Convention for the safety, prosperity and happiness of mankind, in the beautiful city of Vancouver, on the western edge of our great and glorious country whose hills and valleys and fertile fields, vast forest areas and inland seas abound in untold riches. In whose mountain torrents are stored the potential of almost unlimited power, waiting to be harnessed to the wheels of industry, with additional billions of dollars worth of gold, silver, nickel, copper, iron, coal, gas, oil, etc. nestling in the bosom of Mother Earth, awaiting the pick and the drill. Whose renown and distinction on the field of battle, in science, art, the industries and agriculture has made her the brightest star in the Imperial Firmament.

Truly we have been blessed by a kind and bounteous Providence with a lavish heritage of abundant natural resources. Nature's gifts, however, have not been appreciated by her sons on this Continent, but have been wasted and destroyed by fire in a reckless and prodigal manner, tending to bring disaster and poverty among our people. Nine million people cannot afford to maintain an ash heap of forty-five million dollars a year, and that's not including the further enormous loss from forest fires.

### Loss of Water Powers

Callous and indifferent over the destruction of our natural resources and created wealth, the public seem to lose sight of the fact that the wiping out of large tracts of forest by fire also means the obliteration to a large extent of our water power, so that the permanency and utilization of this great asset is also jeopardized; threatening not only the development of our industries, but also transportation facilities, and the thousand and one other necessaries of life, which modern ingenuity has provided for our comfort, entertainment and pleasure.

Our bad example is spreading abroad where the fire waste in the principal European countries averages 33c. per capita as compared with our per capita loss last year of $5.22. I quote from a newspaper clipping under date of London, July 16th. 1922, as follows:

**"Wants 10,000 Pianos Burned in Bonfire."**

"The Federation of British Music Industries has been discussing the best means of starting a boom for British Musical Instruments. Joseph Riley of Birmingham thinks the best way would be to light a huge bonfire of old pianos. That, he says, would only be following the excellent example set by the music trade in America. "It would make the finest sort of a display advertisement," he adds, "for it would show the country that the old pianos with which we are overstocked are not worth having."

Mr. Joseph Riley of Birmingham evidently does not comprehend the economics of fire waste, and certainly does not appreciate the terrible scourge of fire on the peoples of the North American Continent.

### Preventive Agency

It is to prevent and lessen the terrible destruction of our country's substance that we are erecting a national structure of unique architecture, whose foundation stone is "service" and whose keystone is "co-operation." It's dome will reach from the Pacific to the Atlantic, and its portals will be ever open to receive in audience the people of Canada, for the work in which we are engaged is every persons business, and to make it successful we must have the public spirited support and endorsation of all. We need vision, inspiration and enthusiasm to build this structure, and it is gratifying to have the Provincial Fire Marshals and Insurance Superintendents, the Insurance Companies and many very influential business men, organizations and societies from all parts of the country associated in this undertaking; and devoting their splendid talents, time and efforts for the benefit of their fellow citizens, in a spirit of close friendship, bound by the strongest ties of brotherly feeling and inter-provincial good-will, for, as Emerson has said:—"Every great and commanding movement in the annals of the world is a triumph of enthusiasm."

Let me illustrate my thought by a story which I recently heard. A man walked into a great building that was being erected, and the first workman he noticed was a careless, indifferent kind of fellow, and going up beside him, asked, "What are you doing?" The answer came back, "I am working for so much an hour." The visitor strolled about the building, and addressed a second man who was intent on his work and did not appear to notice anything that was going on around him—he was a slave to his job. The question was put to him, "What are you doing" "I am carrying stone and brick to that mason on the wall," said he. A third man was approached, but he was of a different calibre, bright and cheerful, and singing as he worked. He looked as though his heart was in his work, and his job had real pleasure for him. The visitor again put the question, "What are you doing?" "I am carving stone, and helping to build this magnificent Cathedral," said he. He had the vision. We, too, must have a vision. We are helping to build a magnificent structure, to save the lives and property of our fellow citizens.

"For life is the mirror of king and slave,
Its what we are and do,
If you give the world the best you have,
The best will come back to you."

In these days of intense industrial, commercial and scientific activity we have hardly time to stop and think. As Alice in Wonderland puts it, "You have to keep running as hard as you can to stay where you are."

We must be not only thinkers, but planners and doers, executives in the broadest sense of the word, with full conception of the illimitable task which carries us into the problems and ramifications of engineering and scientific research, necessitating a comprehensive knowledge of the most advanced ideas and methods to which these branches of study may be applied, as well as chemistry, architecture, building construction, moving picture films, dust, hazards, spontaneous combustion, lightning, electricty with its latest development of radio, and not forgetting the important and far reaching questions of Fire Insurance and Finance, as connected with the intricacies of Fire Prevention, Fire Protection, and the cause of fire.

### Fire Marshal's Responsibility

This immense structure must be furnished, made attractive and popular, so that it will be well patronized, otherwise, our labor will be in vain. We must create, maintain and perpetpate public interest in our work. It is here that the responsibility of the Provincial Fire Marshal comes in. In functioning provincially with the true spirit of service and efficiency he will automatically function in a big national way, so that the cement of inter-provincial good-will, fellowship and co-operation will bind and make each province part of the national structure in the same manner as ordinary bricks and mortar are united into one common mass.

We should be inspired and greatly benefited by the discussion and exchange of ideas at this conference; and while the problems that present themselves to each Provincial Fire Marshal must be solved according to their own peculiar conditions, still, we should take advantage of the interchange of ideas and suggestions by applying them in a practical and constructive way in actual practice. We must at the same time try to eradicate the careless and indifferent habits of our citizens which are eating away the vitals of our Nation's assets through preventable fires.

At a gathering such as this we can only scratch the surface, in a general way, of some of the many phases of Fire Prevention, the proper discussion of any one of which might, with benefit, take up an entire session.

### The Lightning Rod

There is nothing perfect in this world, and most things, even though they may be of great public worth and convenience, are nevertheless sadly lacking in efficiency. However, one of the most efficient things we know of in the prevention of destructive fire is the good lightning rod when properly installed, for experience has shown that it is then more than 99% efficient.

Rules and Regulations prescribing standardiation of equipment and methods of installation have been promulgated under the Ontario Lightning Rod Act, and these constitute what is practically a text-book on the most advanced methods of this scientific work. Copies of the Act and the Regulations may be had for the asking.

### Over-Insurance

Another matter of paramount importance in our work is that of over-insurance. It is a somewhat complex question and one on which much may be said pro and con, but like many another modern business condition created through the usual legitimate channels of Trade and Commerce, over-insurance is taken advantage of by those who are criminally inclined. Many persons blame the Insurance companies for permitting over-insurance, but it is a hard matter to control. I feel that over-insurance and its concomitant evil results is largely the fault of unscrupulous insurance agents whose only desire would appear to be that of pocketing the largest amount of commission possible. These are the harmful pernicious barnacles of the insurance world who are impeding National progress, and making criminals out of many an honest person, who, with the temptation of 200% and 300% over-insurance see easy money in a fire, but who, at the same time, do not stop to think what disastrous and far reaching results that fire may have. These selfish and indifferent insurance agents, are, I am glad to say, largely in the minority, and I believe that the day is approaching when the wide-awake, aggressive and efficient insurance man who is giving service to his client and service to his company will eradicate this pest of good society.

### Use and Abuse of Matches

I have been requested to speak on "Matches—Their Use and Abuse." but, following the lines of most preachers, have not referred to my text. "Matches" is a big subject in itself, and as a previous address has been printed, I am going to present you with copies of the booklet, and simply give you demonstrations of some bad and good matches that are sold in Canada, showing the dangers from poorly made matches, and especially from those in which the stick retains its after-glow.

Briefly, let me give you some idea of the enormity of the match business. The great match making machines that produce the simple little match in such vast quantities, and so uniformly perfect are a marvel of mechanical ingenuity. They may be said to somewhat resemble huge printing presses, and like them, have achieved their present state of efficiency by patient research work and innumerable inventions made during the years of evolution. Instead of paper being fed from rolls, as in a printing press, blocks of carefully selected lumber, cut the length of a match, pass into the maws of the giant, automatic machines where the first operation cuts them into splints which are punched into small holes in the steel plates known as the match chain, about 3/10" apart. The machine when thus filled contains one million sticks, and it takes an hour for the complete rotation.

Many ingenious inventions have been introduced for making the wooden splints. The square ones, which have always proved to be the best, are cut very simply by two sets of knives acting transversely to each other. The round ones, which have the fault of weakness, are cut by a perforated steel plate.

In the first treatment the stick receives an acid bath to prevent afterglow. This is one of the most important phases or inventions of modern match making. From a Fire Prevention standpoint I feel strongly that every match that is made should be impregnated with chemical salts to prevent the dangers of after-glow, which no doubt is the cause of many fires when the burning match is carelessly thrown among inflammable material.

The splints are next dipped in hot parrafin wax, the object of which is to continue the ignition of the head into the stick of the match.

The stick next gets its base head or inert bulb, of potash composition, and continues on its way for about 15 minutes while being partially dried out, until it reaches the next station, where the non-poisonous phosphorous tip is applied without which the match would not ignite. To make the composition of uniform and proper consistency, huge mechanical grinders and stirrers are used. Having acquired heads they continue around the machine and reach the end of their journey with the head about half dried.

World-Wide Banking

Do you engage in Foreign Trade? Then this Bank can be of great assistance to you.

Through the co-operation of correspondent Banks in all foreign countries, we are enabled to offer complete facilities for the prompt and accurate transaction of business the world over.

Let us furnish you with particulars regarding any foreign markets you are interested in.

Are You Master of Your Business

or is your business master of you?

Many business men have entrusted to this Corporation the care of their *personal* property, collection of interest, dividends, rents, investment of funds. Relieved of these duties, they have now more time to spend with their families and for necessary recreation. They have become in a real sense the masters and not the slaves of business life.

Can we furnish you with a similar service? It is fully described in our Booklet *"Your Financial Agent."* Send to-day for a copy.

THE
TORONTO GENERAL TRUSTS
CORPORATION

Ottawa Branch - - - - - - Cor. Elgin and Sparks Streets

The fact of the matches not being fully dried is a provision made for safety in handling.

The endless travelling chain now bristling with finished matches reaches its starting point and the tiny sticks are punched out of the holes automatically and drop on a carrier belt, passing in front of expert packers, or are packed automatically by machinery.

The subsequent operations of wrapping, packing and shipping, including the printing and making of boxes and cartons, are speedy and for the most part automatic.

### Huge Consumption

It is estimated that fifteen hundred cases of matches are consumed daily in Canada, each case containing seventy thousand matches, or, a grand total of one hundred and five million used by the men, women and children of the Dominion every day of the year, which means that each one of these individuals would scratch more than twelve matches during the twenty-four hours.

Thus we get some conception of the distribution of these little fellows with attractive and well moulded heads, whose only joy in life is to get into a scrape. When irritated or scratched, the weak ones with frail bodies are unable to withstand the concussion, and frequently the heads fly off or the sticks break in two, causing fire and disaster.

Among the hundred million there is a class known as "Safety" matches, numbering about one in ten, whose popularity and numbers are growing steadily as the people become better acquainted with their superiority and advantages.

The head of the safety match which is so strongly advocated for general use, is made of chlorate of potash which furnishes oxygen for burning; and amorphous phosphorous, the fire producing ingredient, is painted on the side of the box.

The term "sesqui" or "sesqui-sulphide" refer to phosphorous sesqui-sulphide, the modern non poisonous igniting ingredient of matches. This material and chlorate of potash are the principal ingredients used for the heads of both white and black matches with glue as a binder. On the strike anywhere match the tip contains both sesqui and chlorate of potash. The sesqui is the igniting material, and the chlorate of potash furnishes the oxygen for its ignition. Under the "White Phosphorous Matches Act" none but non-poisonous matches are now permitted to be made or used in Canada.

As a result of considerable preliminary missionary work a conference was held in Ottawa on Tuesday March 21st, 1922 at which were present H. W. Chamberlain representing the Canadian Wholesale Merchants Assn.; B. G. Crabtree, President Retail Merchants Assn.; G. F. Lewis, Cecy. Ontario Fire Prevention League; F. R. Perrott, Dominion Assn. Retail Merchants; J. G. Smith, Dominion Fire Prevention Assn.; A. H. Wood, E. B. Eddy Co. Match Manufacturers; A. G. Woodruff, Vice President, Canadian Match Co. for the purpose of considering proposed legislation to standardize and regulate the manufacture, importation, storage, sale and distribution of matches throughout the Dominion. A draft of the proposed Act was agreed upon in principle, and a sub-committee consisting of Messrs. Smith and Lewis was appointed to whip it into shape for submission to the Government. This work resulted in a bill B5. being passed by the Senate of Canada, "An Act respecting matches" which, after providing for penalties for breach of the Act, and prohibiting the use of dangerous or unsafe matches and the storage and manufacture of matches in unsafe or dangerous factories or warehouses, provides that regulations may be made by the Governor-in-Council.

1. (a) to prescribe what matches shall be deemed to be safe matches, and to prescribe the composition, quality and character of such matches and to prescribe the method and manner in which such matches shall be manufactured, handled, packed and stored, and any matches which do not conform to such regulations as to composition, quality or character and as to the method and manner in which they are manufactured, handled, packed and stored shall be deemed to be dangerous or unsafe matches;

(b) to establish and prescribe tests and other examinations which inspectors shall make to determine whether matches conform in all respects to the requirements of the regulations relating to safe matches, and the manner of making such tests and examinations, and to provide for the taking by inspectors of samples of matches required for examination and testing;

(c) to prescribe the precautions which shall be taken to render factories safe and to regulate the establishment, location, construction and maintenance of such factories and warehouses, and to provide for their regular inspection, and any factory or warehouse for which a certificate of inspection has not been issued shall be deemed to be dangerous or unsafe;

(d) to provide for inquiries into fires caused by matches;

(e) to prescribe the duties of inspectors and other officers charged with the administration of this Act and regulations;

(f) to permit matches to be stored in limited quantities in premises which have not been inspected as required by the regulations;

(g) to prescribe the certificates and permits to be issued pursuant to this Act;

(h) to make any other regulations to enable the Minister to administer this Act effectively;

(i) to prescribe penalties of fine and imprisonment for breach of any of such regulations.

2. All regulations made under this Act shall be published in the Canada Gazette, and upon being so published shall have the same force and effect as if they formed part of this Act.

The Act further provides for the appointment of officers to carry out its provisions and other details including the appointment of a person to make enquiries into fires caused by matches, and otherwise provides for its proper administration under the Minister of Finance, or such Minister as the Governor-in-Council may designate to administer same.

### A Prolific Cause of Fire.

The most prolific cause of preventable fires in all walks of life is unquestionably the careless user of matches. Wherever there is human life there are matches. There is a fascination about fire, and especially about the burning of a match for the smallest child. A child uses matches carelessly because they are placed where he or she can readily get them and because children see these matches constantly handled in a careless fashion by their parents.

It is well to form the habit of striking a match away from you, and not towards you; so that if the head flies off, or the stick breaks it will not have a chance to set fire to you clothing.

The box should always be closed before lighting a match on it, and if matches are stuck in a box holder the heads should not be exposed, but turned down, otherwise the flame may set fire to the whole box.

One of the most frequent forms of involuntary incendiarism known is the way thoughtless individuals, generally smokers, throw away matches without taking the simple precaution of blowing them out, and assuring themselves that thev are extinguished—a matter of a second or two, although they were perfectly willing to spend 15 seconds time in igniting the match and lighting the tobacco. This careless practice is universally prevalent throughout the country.

There is one safe way to dispose of every lighted match. Break it in two before throwing it away. If simple, precautionary measures such as this were taken by those building fires in our forest areas and seeing that the fires are quenched and well wetted down before leaving the spot, millions of feet of lumber would be saved annually in our great British Columbia forests.

### Match is Made to Burn.'

The day will come when people will not be permitted to be careless with matches, or blind to the ethics of Fire Prevention, but before we can change their careless habits, we must make up our minds to keep everlastingly active in an aggressive campaign of education so that when they light a match they will be careful to blow it out, and see that it is out before it is thrown away—if throw it away they must—instead of depositing it, as it should be, in a receptacle where it can do no harm even if it continues to burn. As matches are designed and made to produce fire, they must always be considered as a more or less dangerous commodity.

A match that is not capable of producing fire is useless as a match, and as a commodity would have no sale. People must be taught to use matches, gasoline, electricity, and other dangerous materials that are sources of fire hazard, in an intelligent manner, which, if used with judgment and proper care, are harmless.

Records continue to accomulate relative to the careless acts of the public regarding disposition o flighted matches and smoking materials, but particularly cigarettes, a form of torch that, due to the treatment of the tobacco used never goes out, but is invariably entirely consumed, often resulting in communicating fire to the surface with which it is in contact.

Approximately 15 per cent. of our annual fire waste in Ontario is due to carelessness with matches, children playing with matches and careless smokers.

Almost daily fires occur in awnings of buildings due to cigarettes being thrown out of windows by careless smokers, before they had been extinguished.

The subject of careless smoking in general is so important that the National Fire Protection Association, an organization of international membership, has recently appointed a sub-committee to attack this problem in an attempt to reduce the annual waste of over 18 million dollars from this idiotic form of carelessness.

## MANITOBA'S NEW ADMINISTRATION

### Premier Bracken announces Cabinet, Reducing Number From Seven to Six—F. M. Black is Provincial Treasurer.

In taking over the premiership of the province of Manitoba on August 8, and in introducing to the province the first United Farmer Cabinet to hold office, Hon. John Bracken issued a statement in which he said that it would be the aim of himself and his colleagues to administer the public affairs on a basis of economy and business-like efficiency. Their purpose, he said, would be to make the well-being of the whole people their constant objective, and the platforms of the United Farmers of Manitoba and the Progressive party would be the chart by which they would be guided.

### The New Cabinet

The Bracken Cabinet is as follows:

Prime Minister and Minister of Education—John Bracken.

Provincial Treasurer—F. M. Black.

Attorney-General—R. W. Craig, K.C., member for Winnipeg City.

Minister of Agriculture—Neil Cameron, member for Minnedosa.

Minister of Public Works—W. R. Clubb, member for Morris.

Provincial Secretary—D. L. McLeod, member for Arthur.

The Cabinet is reduced in number from seven to six, by the inclusion in the Prime Minister's duties of the portfolio of Education.

Mr. Black will have the Public Telephone Department under his charge. The Immigration Department will come under the jurisdiction of Mr. Cameron, and matters concerning public health under Mr. McLeod.

It was announced that P. A. Talbot, member for La Verandrye, was the choice of the Government for Speaker of the Legislature.

Two of the new Cabinet Ministers are not members of the Legislature. Mr. Bracken is expected to seek election in The Pas, and Mr. Black, Provincial Treasurer, who now is Treasurer of the United Grain Growers, Limited, in Rupert's Land, the elections having been deferred in both of these constituencies. Mr. Black is a stranger to active politics and to public life.

## ONTARIO FIREMEN'S ASSOCIATION

At the 2-st Annual Convention of the Ontario Firemen's Association, held in Oshawa, August 7-8, Treasurer T. Hastings, of Merritton, stated that one of the objects was to secure a small percentage of the insurance carried by foreign companies, and moved that the Law and Legislation Committee of the association interview the Drury Government in this connection. A. Hillmer, of Oakville, seconded this motion, stating that the brigades which helped to protect the risks of these companies should get a slight "rake-off" for their work. With some more funds the association would then be able to go out and organize the country better and bring new towns into the association.

John Waugh, in his Presidential address, recommended that greater efforts be put forward for a bigger display of fire apparatus at each year's convention, and Treasurer Hastings upheld this suggestion. The President's address was noteworty for the many suggestions advanced, one of which was that all hose couplings should be standardized so that one town might be able to render the maximum of assistance to another in case of fire.

# To Holders of Five Year 5½ per cent Canada's Victory Bonds

**Issued in 1917 and Maturing 1st December, 1922.**

## CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Wheat Cutting Started in West

## Rains Benefit Crops in Manitoba, But Some Sections Are Damaged by Hail—Wheat Cutting General in Saskatchewan—Drouth Continues in Northern Alberta, but Average Crop for Province Expected

Stating that wheat cutting has already started, and that it will be general in a week in many localities, another favorable crop report for the week ending August 7 was issued by the agricultural department of the Canadian Pacific Railway. In Manitoba there have been showers in many parts of the Province, which are beneficial to late grains and fodder crops. Cutting is becoming general in southern districts, and will be general throughout the Province by the end of the week. Considerable damage was done by hail which passed over Macdonald, Portage la Prairie and and Fannystelle districts on July 31, but hopes are entertained that much of the damaged crop will revive.

Heavy rains throughout Saskatchewan, particularly in the Moose Jaw-Regina districts, and local showers in Saskatoon and territory west have improved conditions, and crops are now filling. Southern sections still indicate good crops. Wheat-cutting will be general this week.

### Alberta and British Columbia

Harvesting has commenced in Alberta, and the crop is ripening fast. Conditions in the southern districts still continue good, and an average crop may be expected throughout the Province.

No rains have been reported along the Edmonton, Dunvegan and British Columbia Railway, but the crops are standing the drouth better than was expected. All grains are maturing rapidly, but the yields will be light. Rains would greatly assist pastures and probably save some crops that now look almost like failure.

Despite the excessive heat and drouth in British Columbia, all tree fruits are doing well. Vegetables are moving freely, but the potato crop will be light owing to dry weather.

### Canadian National Report

Hot, dry weather has prevailed during last week over the territory traversed by the Canadian National Railway lines in the three Prairie Provinces, according to a crop report for that period, and there is a general complaint that wheat is maturing too rapidly for proper filling, the result being depreciating of prospective yields in some sections. This is particularly true of considerable area north and west of Saskatchewan River and extending north to St. Walburg, Sask., and west to the Red Deer River and Edmonton and north of Edmonton in Alberta. In this area, there has been little rain fall all season and the recent hot weather has aggravated conditions so that there are localities where crops will not be more than 50 to 60 per cent. of normal, yet, on the other hand, there are a lot of districts that will give a yield of eight to fifteen bushels an acre. Rain would help late-sown grains, but not the early-sown, which is now all headed out and ripening fast, much of it on very short straw.

Favorable conditions still prevail in Manitoba and southereastern and eastern Saskatchewan, and there has been an improvement in the country between Regina and Saskatoon where there have been rains.

Wheat harvest is now on and will be general everywhere before the end of the week. Rye and barley yields are heavy in most districts, threshing reports showing that rye is giving returns up to 35 bushels to the acre. Where crops are best there are estimates ranging from 20 to 40 bushels per acre for wheat, and 60 to 80 for oats.

### Conditions At End of July

The Dominion Bureau of Statistics reports the receipt of the following telegrams on the condition of crops in Canada at the end of July.

Prince Edward Island.—From the Dominion Experimental Farm at Charlottetown. August 1: "All crops are promising due to beneficial showers in July. Hay crop was heavy and well saved. Cereals most promising. Fruits and potatoes above average. Roots and corn fair. Pastures good."

Nova Scotia.—From the Dominion Experimental Farms: Kentville. August 1: "Rainfall much greater than normal, consequently haying operations greatly delayed; timothy above average; clover generally poor; hay generally an average crop. Grain very good, but lodged in places. Root crops and corn good; potatoes exceptionally good; pastures good." Amherst. August 1: "Weather for July very unsettled. Splendid growing weather. Hay making very slow; slightly above average: wheat, oats, sunflowers, roots, potatoes, corn, good; barley fair; small fruits fair; pastures excellent."

New Brunswick.—From the Dominion Experimental Farm. Fredericton. July 31: "Crops except intervals largely recovered from June flood. Hay good; unsettled weather makes curing difficult; potatoes fair, missed badly in some districts; roots doing well; grain good, extra heavy star; early variety apples good, late varieties below average; bush fruits good; pastures good; stock thrifty."

### Quebec and Ontario

Quebec.—From the Quebec Bureau of Statistics. July 31: "On the whole the hay harvest is well advanced throughout the province, and the yield will be at least double that of last year. July has been too dry and cold for the pastures, and therefore, instead of increasing, the milk yield has fallen off during the month. The general appearance of cereals is most encouraging. Potatoes, fruits, corn, tobacco and flax also promise a higher yield. Hoed crops and vegetables have been considerably injured by cutworms. Caterpillars and grasshoppers have caused slight damage to trees and cereals, but only in certain districts. To sum up, the farmers believe that the coming harvest will prove to be the best since 1918."

Ontario.—From the Ontario Department of Agriculture. July 31: "Red clover, alfalfa and alsike made good hay crops. Fall wheat harvested full average yield of good quality. Rye good crop. Barley now cutting doing well. Oats promise generous yield, but some rust and smut. Potatoes yielding well; other roots promising. Corn in average condition. Pastures good all summer."

### Western Provinces

Manitoba:—From the Manitoba Department of Agriculture. August 1: "Crop progressed well during July and outlook good. Liberal July rains. Weather mostly cool. Slight frost with damage in spots on July 7. No serious rust reports but considerable wheat stem sawfly. Good fall rye crop cut. Wheat harvest generally will begin August 10; some districts a week earlier. Area completely hailed June 23 has 15 inches growth and may ripen partial crop." From the Dominion Experimental Farms, Brandon, July 31: "July has been a very favourable month. Rain has been sufficient and temperature moderate. Some fields of early wheat are light having headed during dry weather of June. All late crops are very heavy and no injury from rust as yet. Saw-fly very prevalent but is not preventing wheat from filling. Wheat cutting will commence next week." Morden, August 1: "Cutting of oats and barley general by the last day of the month. Some wheat is cut. All crops promise to yield considerably above average. Corn and sunflowers are thriving. Roots are doing well. Apples and plums will give good harvest. Pastures are fair."

Saskatchewan.—From the Department of Agriculture, July 28: "The month of July has been one of much anxiety with regard to the climatic conditions and the crop in general. Drought has continued mainly in the central, west central and northwestern districts, and it is feared a low average yield will result in these districts. In cutting areas good filling weather has been gencal. Showers frequent and a very optimistic outlook is general. Rye cutting is nearing completion and is a good crop."

Alberta.—From the Department of Agriculture. July 29: "Crops in Alberta are approaching harvest with fairly good prospects. In province as a whole the wheat crop is uneven. On new breaking and summer fallow yields of 30 to 40 bushels per acre of wheat are expected. On stubble ploughing for both fall and spring wheat the yield over three quarters of the province will be light. Oat crop generally is short; much of this is being cut for hay. Southwestern area will have best crops since 1915, and some districts will yield as high as 40 bushels of wheat. Rye yields will be heavy; alfalfa fair. Central and northern parts have suffered from dry weather, but rain now would improve green feed and hay. Loss from grasshoppers 2 to 3 per cent over province."

British Columbia.—From the Department of Agriculture, July 31: "Practically no rain has fallen during the months of June and July. Hay in most sections light crop. Oats nearly all harvested; yield considerably reduced owing to drought. Wheat cutting well under way; only medium crop expected. Grasshoppers have caused considerable damage to crops in the dry belts; apple crop promises 85 p.c. of last year's yield, which was the largest on record. Other tree fruits excellent crop. Rain badly needed for all root crops."

---

## CONDITION OF FRUITS AND VEGETABLES

### Prospects for Lighter Crops in West, But Output in Ontario and Quebec Should Be Heavier

An estimate of the fruit and vegetable crops of the Dominion issued by the department of agriculture follows:

### British Columbia

Apples—75 per cent. of the crop of last year, or 793,120 barrels (2,379,360 boxes). Wealthy, Wagner, light; Delicious, Jonathan, heavy.

Pears—75 per cent. of last year, or 1,575 tons.

Peaches—Equal to last year, or 1,315 tons.

Plums and prunes—85 per cent. of last year, 2,720 tons.

Apricots—100 per cent. of last year, or 632 tons.

Onions—965 acres. Onion maggot doing considerable damage.

Potatoes—Slight increase in acreage of last year, or 16,500 acres—decreased yields due to drought.

### Alberta

Potatoes—85 per cent. of the acreage of last year, or 43,670 acres. Fair condition.

### Saskatchewan

Potatoes—94 per cent. of the acreage of last year, or 56,621 acres. Fair condition.

### Manitoba

Potatoes—98 per cent. of the acreage of last year, or 37,300 acres. Fair condition.

### Ontario

Apples—30 per cent. larger crop than last year, or 1,150,850 barrels. Spy, Greening, Baldwin light; scab developing rapidly.

Pears—90 per cent. of full crop; 20 per cent. heavier than 1921.

Peaches and plums—Full crop; 40 per cent. heavier than 1921.

Onions—Full crop from 30 per cent. increase in acreage over last year, or 1,807 acres.

Potatoes—162,000 acres; early planting yielding heavy crop.

### Quebec

Apples—75 per cent. in excess of 1921, or 61,600 barrels. Early varieties heavy.

Potatoes—235,000 acres; good crop expected.

### New Brunswick

Apples—25 per cent. in excess of 1921, or 41,250 barrels.

Potatoes—74,000 acres; conditions good, but misses numerous.

### Prince Edward Island

Potatoes—35,400 acres; early potato acreage considerably increased over last year.

### Nova Scotia

Apples—75 per cent. of the crop of 1921, or 1,527,000 barrels; fruit sizing well and generally clean.

Potatoes—38,400 acres; conditions excellent.

---

## BANK LOANS WITHOUT SECURITY

Through the solicitations of A. Kennedy, inspector of schools for the Weyburn School District in Saskatchewan, a number of Canadian banks have agreed to undertake loans without security or endorsation, to members of the Boys' and Girls' clubs who wish to purchase and raise thoroughbred stock or poultry. Already, according to Mr. Kennedy, there are over 4,000 branches of these banks ready to assist young people in this movement, which is intended to stimulate mixed farming in the west and offset the tendency of growing wheat on all lands under cultivation.

In Saskatchewan alone there are over 300 of these Boys' and Girls' clubs encouraging the care and study of good livestock and poultry and dealing with every phase of farming. The movement begain in 1916, when 10 rural education associations were organized in the Weyburn inspectorate, the unit or organization being the rural municipality—18 miles square and corresponding to the township in all phases of administration.

# Recent Fires

Fire losses in Canada during the week ended Aug. 16th, are estimated by The Monetary Times at $188,455, compared with $369,100, the previous week. The details are as follows:—

**Ayton, Ont.** Aug. 8th. Ayton Bakery. Loss $2,000, insurance, $1,000.

**Barona, Alta.** Aug. 12th. Postoffice, a residence and two places of business. Loss, $26,000.

**Britannia Heights, Ont.** Aug. 16th. Agricultural machinery and live stock on the farm of Reeve W. F. Bell. Loss $18,000.

**Campbellville, Ont.** Aug. 12th. Farm building belonging to Matthew Harris, Nassagaweya township. Loss $10,000, partly covered by insurance.

**Chatham, Ont.** Aug. 9th. Barn, granary, hay barn and silo. Loss $5,000.

Aug. 15th. Plant of the Pike Pumping Works.

Aug. 12th. Farm of Jos. Brady, 12th concession Raleigh.

**Elgin, Ont.** Aug. 16th. Barn and outbuildings belonging to Rev. Father O'Hanlon. Cause, spontaneous combustion.

**Esquesing, Ont.** Aug. 8th. Barn on the farm of ex-warden J. Elliott. Cause, spark. Loss $20,000, partly covered by insurance.

**Fort William, Ont.** Aug. 7th. Sellers and Jones' garage, Leith street. Loss $20,000.

**Hamilton, Ont.** Aug. 15th. Store conducted by Frank Litvack, 973 Barton street. Loss $4,000, covered by insurance.

**Ingersoll, Ont.** Aug. 12th. Barn on the farm of John Shelton, West Oxford.

**Lake Saskatoon,** Alta. Aug. 6th. Livery and feed barn owned by Geo. Finch. Loss $5,000.

**Milliken, Ont.** Aug. 13th. Barns on the farm of James Gibson.

**Moncton, N. B.** Aug. 12th. Ideal Bakery, warehouse and the residence of Miles Cameron on St. George street. Loss $2,000.

**Montreal, Que.** Aug. 8th. West wing of the St. Jean de Dieu Hospital, Longue Pointe. Loss $20,000.

Aug. 14th. Premises of M. Boosamra, 48 Notre Dame street west.

**Pembroke, Ont.** Aug. 15th. A. B. Miller's junk yard.

**Perth, Ont.** Aug. 14th. Outbuildings owned by Mrs. George Widermaire, in Drummond township. Loss $1,500.

**Pitt Meadows, B. C.** Aug. 8th. Home of M. Eyemoto. Loss $3,955, insurance, $1,550.

**Pointe-a-Pic, Que.** Aug. 11th. Cottage occupied by Jos. Sirous. Loss $6,000.

**Portneuf, Que.** July 26th. Warehouses belonging to the Montreal Paper, Limited. Loss $25,000, partly covered by insurance.

**Shawbridge, Que.** Aug. 15th. Jewish Boys' Orphanage. 12 fatalities.

**Thorold, Ont.** July 25th. Three houses near the Ontario Paper Mills. Loss $7,000.

**Toronto, Ont.** Aug. 15th. Residence of Max Cohl, 166 High Park Avenue. Cause, electric iron. Loss $1,500.

Aug. 12th. Residence of Mr. Biggar, 77 Charles street. Loss $1,000.

**Transcona, Man.** Aug. 9th. Two business places and two homes. Loss $10,500.

**Wellington, Ont.** Aug. 14th. Barn on the farm of Leslie Smith.

**Woodroffe, Ont.** July 27th. Dancing pavilion on the Britannia line.

### MISTAKE IN SALE OF ASSETS

In the case of Dominion Bank v. Marshall, recently decided by the Supreme Court of Canada, it was held that where a sale of the assets of a company is directed to satisfy a claim for money advanced to the company and the purchaser believes that he is purchasing all the property of the company but through a mistake on the part of the solicitor preparing the particulars of sale, a certain lot is not included, although belonging to the company, the purchaser under the sale may rescind the purchase on the ground of mistake but the Court will not rectify the mistake by ordering a conveyance of the lot to the purchasers.

# Annual Reports

### EAGLE STAR & BRITISH DOMINIONS INS. CO., LIMITED.

The 1921 report of the Eagle Star and British Dominions Insurance Co., Limited, submitted at the annual meeting in London on May 18th., shows total assets of £20,098,258 compared with £19,665,902 at the end of 1920. The principal assets are:—agents' balances £884,741; British Government Securities £670,380; Foreign £525,956; cost of businesses acquired plus extraordinary expenses $475,240; railway and other stocks and shares £446,591. Funds held on life insurance account total £14,612,969 and in addition to the funds required on fire, general and marine accounts, there is a reserve of £2,000,000 over and above the paid-up capital of £1,047,896.

The Company entered the Canadian Field in 1915, the chief agent here being J. H. Riddell, Toronto. The lines written here are fire, automobile, explosion and hail.

### NORWICH UNION FIRE INSURANCE SOCIETY LTD.

With one hundred and twenty-three years of general experience, forty-one of which have included Canadian experience, the Norwich Union Fire Insurance Society Ltd., surmounted the obstacles presented by the difficulties which characterized the insurance business last year, with comparative ease. The company does business in all parts of the world and is therefore able to maintain steady progress. Total assets now amount to nearly $30,000,000, the greater portion of which is invested in government bonds and securities. Net premuims on fire insurance transacted exceeded $10,000,000, while accident insurance premiums totalled $6,892,775 and marine insurance premiums amounted to $2,189,530. These figures give some indications of the magnitude of the company's operation.

The Canadian branch has made steady progress since its establishment in 1880. Net fire insurance premiums written in Canada last year amounted to $1,097,237 and losses totalled $543,159. The net amount of fire insurance at risk on December 31, 1921, in Canada was $137,171,404. Total net premiums written in Canada by the company on all classes of insurance carried amounted to $1,516,463.

# Insurance Licenses and Agency Notes

The Alliance Assurance Company, Limited, has been licensed to transact in British Columbia the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, and insurance against loss or damage by robbery in addition to accident, automobile, burglary, guarantee, hail, plate-glass, and sickness insurance for which it has already been licensed.

The Phoenix Insurance Company has been licensed to transact in Canada the business of Sprinkler Leakage insurance, in addition to the classes for which it is already licensed.

A Dominion license has been granted the Equitable Fire & Marine Insurance Company authorizing it to transact the business of Sprinkler Leakage insurance, in addition to the classes for which it is already licensed.

The Connecticut Fire Insurance Company has been granted a Dominion license authorizing it to transact the business of Spirnkler Leakage insurance, in addition to the classes for which it is already licensed.

The Metropolitan Life Insurance Company has been licensed to transact the business of Accident Insurance and Sickness Insurance in Canada, in addition to Life Insurance for which it is already licensed.

A Dominion license has been granted the New Hampshire Fire Insurance Company authorizing it to transact in Canada the business of Sprinkler Leakage insurance, in addition to the class for which it is already licensed.

A license has been granted the Westchester Fire Insurance Company authorizing it to transact in Canada the business of Sprinkler Leakage insurance, in addition to the classes for which it is already licensed.

The Union Insurance Society of Canton, Limited, has been granted a license authorizing it to transact in Manitoba the business of Inland Marine Insurance in addition to the lines for which it is already licensed.

### PROVINCIAL INSURANCE SUPTS.

#### Annual Conference Held Last Week in Vancouver In Conjunction With Fire Marshals' Meeting

The fifth annual conference of provincial insurance superintendents was held in Vancouver and Victoria, August 9-12. The Association of Canadian Fire Marshals, the personnel of which is largely the same, had charge of the first day's program.

#### Fire Marshals' Officers

Fire Marshal H. P. Heaton of Ontario was unanimously elected President of the Association of Canadian Fire Marshals. Fire Marshal J. Thomas of British Columbia was elected Vice-President, and Deputy Fire Marshal George F. Lewis of Ontario was appointed Secretary-Treasurer. A resolution was adopted petitioning the Dominion Government to give Provincial Fire Marshals authority to administer Section 515-A, Chapter 146, of the Criminal Code. Under the present system this section is administered by the Fire Commissioner at Ottawa, and considerable delay, it was claimed, was caused by having to send officials to Ottawa to present cases under the section. It was also strongly recommended that Provincial Departments of Education include in their school curriculum a course of study in fire prevention. Adoption of a suitable text-hook dealing with this subject was also advocated.

A draft of the proposed personal liability for fire bill was read and endorsed at the annual meeting of the Fire Marshals. This Act, which will come into force sixty days after receiving royal assent, will be adopted by every province of the Dominion. The purpose of the Act is to enable fire departments to recover the cost of extinguishing fires from persons who through criminal negligence are responsible.

Charles Heath, Winnipeg, who occupied the chair, moved that fire prevention week be held in the spring in the future, or at least one month earlier than at present.

Canada's consumption of matches averaged twelve a head of population a day, and 15 per cent. of Canada's fire loss was due to careless use of matches, declared George F. Lewis, deputy fire marshal for Ontario.

Opposition to a Federal Act passed unnoticed, it is claimed, in the dying moments of the last session of Parliament, the effect of which is to give the Dominion Government indirect control of insurance agents, a power, it is claimed, which the British North America Act assigns to the Provincial Legislatures, was voiced by V. Evan Gray, Superintendent of Insurance for Ontario, at the Conference of Superintendents of Insurance of Canada. Mr. Gray urged that the Provinces act co-operatively either to have the clause repealed or to attack it in the courts as a trespass of Provincial rights.

Charles Heath, Superintendent of Insurance for Manitoba, urged the advisability of uniformity of legislation and regulations regarding report forms in the various Provinces.

J. D. deB. Farris, K.C., former attorney-general of B.C., who formerly administered the insurance branch of the government, delivered the inaugural address. Mr. Farris spoke in the absence of Hon. A. M. Manson. He dealt chiefly with the common aim of the government and the insurance companies in preserving life and preventing the damage of property as far as possible. Special mention was made of the precautionary measures adopted by the government to prevent loss from fire by the appointment of fire marshals. The speaker was of the opinion that not enough care was being exercised in relation to human life. The speaker drew attention to the spending of money in the west, stating that a person who did not have a mortgage on his property was almost considered behind the times. Independent thrift and saving are the foundation for independent spending, suggested Mr. Farris.

### GREAT WEST BANK QUITS

Announcement is made in an advertisement signed by J. K. McInnis of Regina, provisional president, that the promoters of the "Great West Bank of Canada" have decided to wind up the affairs of the proposed bank and return money received from subscribers, "less the reasonable expenses allowed by law." It is stated that sufficient capital was not subscribed to enable the promoters to secure from the Treasury Board the necessary certificate which would allow them to commence business.

Baril) Montreal, $49,900; Dominion Iron Foundry, Ltd., (Eudore Tousignant) Montreal, $49,900.

## *New Industries*

The city of Belleville, Ont., has secured its tenth industry in eighteen months. The late stacquisition is the Bassick Manufacturing Co., with head office at Bridgeport, Conn. The company is one of the largest makers of castors and furniture hardware in the world, with five manufacturing branches in the United States.

E. W. Bassick, president of the company, bought the plant of the Wood Manufacturing Company. The Bassick Manufacturing Company of Chicago, which has been the promoter and manufacturer of the alcmite products, established a small branch in Belleville a little over a year ago to try out the possibilities of manufacturing in Canada. The business has been most successful from the start, and this later enlargement has been the fruit of that favorable experience. A charter was secured for the original company in Canada, known as Alemite Products, Limited. This company will be merged into a new incorporation that will be known as the Bassick Alemite Company of Canada. The new company expects to manufacture every line that is made in the Bassick plants in the United States.

Another American industry has located a branch at Hamilton, Ont., according to C. W. Kirpatrick, industrial commissioner. The Security Fountain Pen Co., the main office and works of which are at Chicago, has secured space in the city and will manufacture and assemble parts of the pen in the city.

The Manufacturers' Chemical Co. have located their plant at Smith's Falls, Ont., where they will commence the manufacture of various kinds of dyes which were formerly

## RESUMES TRADE WITH GERMANY

### Dominion Iron & Steel Co. Signs Large Contracts for Iron Ore.

Lord Morris, former Premier of Newfoundland, who is now in New York on his way back to England, stated that iron ore is going out of Newfoundland and German money coming in. He is at present a member of the executive of the British Empire Exhibition to be held in London in 1924.

Questioned regarding the restoration of trade with Germany, he said: "The Dominion Iron and Steel Company, and the Nova Scotia Steel Company, who own the iron mines on Belle Island, Newfoundland, have entered into large contracts with Germany to supply it with the product of these mines. Shipload after shipload is now daily leaving Newfoundland for German ports. Contracts have been made for upwards of 700,000 tons for this season."

He also confirmed reports of the flourishing condition of the paper and pulp indnstry in Newfoundland.

"One of the largest pulp and paper mills in the world was established at Grand Falls in 1905 by Lord Northcliffe and his associates." he said. "The paper upon which newspapers and magazines are now printed in London is mostly obtained from the forests of Newfoundland. Spruce is used entirely. They can cut within their concession at the present rate for a hundred years without exhausting their supply, even if the forests did not reproduce themselves; but the spruce forests do not reproduce themselves for pulp purposes in less than twenty years.

"Another large concern, known as the Humber Proposition, on the Humber river, is now being considered by the owners of the property and by Englih capitalists and engineers. It is said the water powers on this property, as well as the timber, promises to produce a development quite equal to the finest mills in the world."

Conditions in Newfoundland and in Canada are hopeful, Lord Morris declared. "Canada has turned the corner," he said. "and is meeting with a considerable measure of success in solving the political and fiscal problems resulting from the war."

## GRAIN COMPANY QUITS

The Anglo-Canadian Grain Company. formerly the Saskatoon Grain Company decided on August 11 to go into liquidation, according to a report from Winnipeg. Charles H. Thornton, manager of the firm has been appointed receiver. The decision to liquidate was reached by the unanimous consent of the directors. The company operated a private wire system throughout the West, having branches at Regina. Saskatoon and Edmonton. They were members of the Winnipeg grain exchange.

The ownership of the Anglo-Canadian Grain Company was formerly held in England by Ellis and Co., who were obliged to go into liquidation last February because of defalcation on the part of its treasurer Bevan. This made it impossible for Ellis and Co. to make good the balance of their stock subscription.

The action of the directors was induced by the fact that present assets are sufficient to cover all liabilities aud as overhead expenses were very heavy, they thought it

# Slight Increase in Prices

### July Index Number of Wholesale Prices Stands at 225.3 Compared with 224.3 for June—Fuel is Up 24 Points — Comparison With Preceding Years

During the month of July there was a slight revision upward in the index number of commodities as compiled by the Department of Labor. The index number during the month stood at 225.3 as compared with 224.3 in June and 238.6 in July of last year. The 1922 figures shows a considerable reduction from 1920, but is ninety points higher than the 1913 figure.

The largest increase during the month was that of fuel, which is up by 24 points from the previous month. This is due to the continuation of the coal strike in the United States. Several other commodities show an increase, including dairy products, fish, textiles, metals and implements and building materials.

With the supply of fresh fruit becoming plentiful the index number for that commodity shows a substantial decline of about nine points. Several of the other commodities show a slight decline from the previous month. Details of the July statement with comparisons, are given herewith:—

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES
for July, 1922, June 1922, July, 1921, 1920, and 1913
(Average prices 1890-1899—100)

INDEX NUMBERS

## PROVINCE TO AID IRON INDUSTRY

### B.C. Govt. States Basis of Assistance to Coast Range Steel Co.

Following a meeting of the British Columbia government on August 4 with members of the cabinet and H. J. Landahl, promoter of the Coast Range Steel Co. Ltd., incorporated with a capital of $15,000,000, the announcement was made that provided that the Dominion Government and the Imperial Trades Facilities Committee will come forward with equal guarantees, the provincial government will, through legislation and in other ways, assist in the plan put forward by the Coast Range Steel Co. to establish the iron and steel manufacturing in British Columbia.

### Imperial Aid

Assurances have been given the provincial government that the British Government through its Imperial Facilities Committee, has agreed to finance one-third of the cost of the project and that the Dominion Government has signified its willingness to do likewise. With the provincial government coming in on like basis, Mr. Landahl has explained to the cabinet, the inauguration of the great project will be assured. He stated that the three largest steel companies in Great Britain are interested in the establishment of the plant in British Columbia, these being the Vickers, Limited; Simon Carves, Limited; and Wellman Smith Owen Engineering Corporation. If the necessary guarantees are forthcoming from the province, Mr. Landahl stated, the Coast Range Steel Co. will go ahead with the proposed plan of development and erect blow furnaces, blast furnaces and open electric furnaces, build open hearth steel mills and ultimately produce an output of 100 tons of steel per day.

Negotiations have been under way with the provincial cabinet for some time. The Coast Range Steel Company, Limited, was incorporated over a year ago. The cabinet has been informed that British capital is waiting the settlement of the preliminary arrangement when some six millions sterling will be available. It is estimated that $12,000,000 will be invested in establishing the plant, etc., in British Columbia. The guarantee asked from the province is for one third of that amount, or approximately $4,000,000.

### Government's Policy

Following the conference, Premier Oliver issued the following statement setting forth the attitude of the provincial government towards the company's application for assistance

"That the government would be prepared at the next session to submit legislation which would make the iron ore bodies in the province available for use either on a percentage tonnage or royalty basis; that the present legislation providing for a bounty on pig iron produced in British Columbia would be repealed;

"That the government would promote legislation authorizing a guarantee of the company's bonds to the extent of one-third the amount required to establish an iron smelting plant for the production of pig iron in British Columbia. This guarantee would be conditioned upon each of the Dominion Government and the Imperial Trades Facilities Committee guaranteeing the other two-thirds of the capital required.

"Further conditioned upon a thorough investigation covering raw material, plans, specifications, locations, contracts, conduct, management, financing of the company and probabilities of success satisfactory to the government.

"The government of the province to have security for its guarantee ranking equal with the security of the Dominion and the Facilities Commission, the same being a first mortgage upon all the assets of the company.

### Additional Aid

"Further conditioned that the authorized capital, the subscribed capital and the paid-up capital shares of the company to be satisfactory to the government, the understanding being that if the operation of the blast furnace to be established was fully satisfactory, the before mentioned guarantees would be extended to include the establishment of a steel-producing plant, and also rolling mills, the whole of the guarantee of the province, which would be proportionately divided according to the work undertaken, not to exceed £800,000 sterling, or its equivalent in Canadian dollars.

"The Minister of Mines was authorized to confer with the Dominion authorities and with the Facilities Committee of the Imperial Board of Trade and to employ such expert officers as would be found necessary to investigate thoroughly every detail of the proposal, the government being determined that as far as humanly possible both the government and the investing public should be fully protected."

Under the provisions of the British Empire Facilities Act there is available the sum of £800,000 from the British Government which will be secured by first debentures, and a like amount from the Dominion secured by debentures is stated to be forthcoming.

The share capital of the Coast Range Steel Company, Limited, is divided into 150,000 shares of a par value of $100 each. Following the organization of the company, Mr. Landahl agreed to turn over a number of iron properties, as well as options he possesses upon other similar properties, to the company, receiving therefor 149,992 shares of the company's stock.

## RED RIVER COAL DEPOSITS

A party of explorers, including Professor W. G. Worcester, provincial ceramic engineer, and Professor C. J. McKenzie, of Saskatchewan University, and W. G. Hastings of the bureau of labor, left Prince Albert on August 12 for Red Deer Lake to investigate sources of origin of coal deposits found on the banks of the Red river.

## EXCHANGE ON RAILWAY RATES

Ottawa, Aug. 14.—The constant betterment of the Canadian dollar in United States exchange markets is shown by a bulletin issued on August 14 by the Board of Railway Commissioners as follows: "In accordance with the judgment and order of the board, dated January 14, 1921 the rate of exchange in connection with shipments of freight between points in Canada and the United States from August 14 to August 31, inclusive, will be three-thirty-seconds of one per cent., and there will be no surcharge collected on international business either freight or passenger.

MEETING YOU HALF WAY

If business conditions make you unable to buy needed insurance protection, we will meet you half way. We will furnish the protection and bring the premiums within your reach.

| Age | 7 Year Term |
|---|---|
| 20 | $34.10 |
| 25 | 36.55 |
| 30 | 40.35 |
| 35 | 46.35 |
| 40 | 55.75 |
| 45 | 70.35 |
| 50 | 93.10 |
| 55 | 128.35 |

The Table gives rates for $5,000 policies payable at Death before the expiry of 7 years.

This is temporary protection only. **But before expiry policy is convertible into regular Life or Endowment insurance without medical re-examination.**

New policy issued at rates at attained age, or at old age and dating if difference in premiums is paid.

Temporary Protection at Cheapest Rates. Option to Convert to Regular Plan When Your Finances Permit.

# *Municipal Finance*

**Elizabethtown Twp., Ont.**—The tax rate for 1922 has been struck at 11 mills on the dollar.

**Moose Jaw, Sask.**—The annual report for the year ended December 31, 1921, shows a noticeable improvement over the previous year's report, with the net debt being lower, the sinking fund having a surplus and various other improvements in the city's finances.

The gross assessment during the year was $28,084,852 and after exemptions, etc., the net assessment was $22,538,522. This is an increase over 1920 when the net assessment was $21,395,773.

For the first time since 1916 the gross debt has shown a decrease from preceeding years. During 1921 the total gross debt amounted to $6,024,673, as compared with $6,092,901 in 1920, or a decrease of $68,228. The 1920 figures are the highest since 1905, the first figures shown in the report.

The net debt of the city has decreased $144,024 during the year, or from $5,114,514 in 1920 to $4,970,490 in 1921.

The sinking fund is in a healthy condition, there being a total surplus of $100,014, as compared with a surplus of $98,059 in 1920. The amount required to be in the sinking fund is $999,909, and the actual investments are $1,054,183, leaving a surplus of $54,273. There is also an amount of $45,740 from contributions due but unpaid at the end of the year, making a total surplus of $100,014.

During the year the borrowing power of the city showed a decline of about $100,000 from the previous year, or from $339,981 to $224,666. The borrowing power of the city is limited to $4,507,704 and as the net debt is $4,283,038 the city is limited to borrow only $224,666.

Tax collections during the year fell off slightly from the 1920 total. Current taxes paid amounted to $780,007, out of a total levy of $1,116,043, and tax arrears paid were $152,860, making total collections of $932,868. During 1920 current taxes paid amounted to $772,024, out of a levy of $1,041,985, and arrears paid were $155,154, making a total of $927,178. The percentage of current taxes paid to levy was 70.00, as compared with 74.10 per cent., in 1920.

Unpaid taxes at the end of the year totalled $768,328, of which $324,086 was 1921 taxes, and the remainder, $444,214, is 1914-1920 unpaid taxes. The net amount of tax arrears is $630,320.

The balance sheet shows a surplus of $2,298,514, made up of "capital including local improvements—deferred assessments per contra," $1,906,843, and "revenue, available as a reserve for uncollectible taxes," $391,671. Current liabilities at the end of the year totalled $1,203,096, as compared with $983,252 at the end of the previous year. Total assets are placed at $8,476,991.

The revenue account shows excess revenue of $30,027 over expenditures for the year, total revenue being $1,312,331, and expenditures totalling $1,282,303.

The operation of the utilities shows an improvement over the previous year, although there was still a deficit at the end of the year in the waterworks department. The electric light department had a net surplus of $12,388, as compared with a surplus of $8,196 in 1920. The waterworks department had a deficit of $3,242, as against a deficit of $20,609 at the end of the previous year.

**North Battleford, Sask.**—The secretary-treasurer of North Battleford School District has issued the statement that moneys are available for the payment of the balance (75 per cent.) of the January, 1921, coupons, with accrued interest.

**Montreal, Que.**—A synopsis of the city's receipts and disbursements for last year was given out by the city treasurer on August 11, and which showed that there was a surplus of $519,037 at the end of the year.

Total receipts during the year amounted to $39,039,048, which was made up by the following items: balance on hand at January 1, 1921, $729,953; general revenue, $22,539,582, from which is deducted $57,636 for refunds and receipts from foreign bankers, $2,106.

Disbursements for the year comprised the following: administration account on revenue, $23,331,270; loans and special exependiture, $15,164,85; disbursed to foreign bankers, $23,881, forming a total of $38,520,011.

## SINGLE TAX BLAMED FOR ECONOMIC ILLS

### Dr. Adam Shortt Says It Created Sentiment for Reckless Expenditure Beyond Means of Citizens to Pay For

In his report on the city of Victoria's economic situation, Dr. Adam Shortt devotes much of his report to a criticism of the single tax system in effect in that city for years, and which Dr. Shortt holds largely responsible for Victoria's present financial condition.

Dr. Shortt voices the contention that the single tax produced neither the prosperity of the 1910-1913 boom nor the reaction that followed, but it was responsible for a spirit of ignorant optimism with reference to the indefinite continuation of the boom and the consequent recklessness with reference to the incurring of civic debts far beyond the capacity of the land-holding citizens to meet even the annual interest charges and other indispensable civic requirements, not to mention the still heavier charges for local improvements.

Dr. Shortt in his report says:

"Had the war broken out in 1912, instead of two years later, notwithstanding the demonstrable blunders in the financial administration of the city councils from 1909 to 1911, and especially in the latter year, it might have been possible to persuade the unsophisticated in economic matters that the unfortunate consequences of the civic policies of those years were in some way due to the war, just as many of them were persuaded that the growing prosperity of the boom period was due to the progressive introduction of the single tax system.

"Unfortunately for this attempt, however, the war did not hreak out until the latter half of 1914, and its first effect was beneficial, in giving immediate relief to a rapidly increasing wave of economic reaction and unemployment, which threatened very serious consequences for the following winter. The reaction during 1913 and 1914 had nothing whatever to do with the war, but occurred in the very teeth of that assurance of gradually increasing prosperity which the single tax was guaranteed to produce.

"As a matter of fact, of course, the single tax produced neither the prosperity of the boom, nor the reaction thereafter. What it was chiefly responsible for was the spirit of ignorant optimism with reference to the indefinite continuation of the prosperity of the boom, and the consequent recklessness with reference to the incurring of civic debts throughout the Western municipalities, far beyond the capacity of the land-holding citizens to meet even the annual interest charges and other indispensable civic requirements, not to mention the still heavier charges of local improvements.

"On the other hand, what the war did, during its operation at least, was not to reduce the capacity of the citizens to meet their normal civic obligations, but, by preventing the enforcement of tax collections, on an inadequate basis of taxation, to permit of the continuation of such an incompetent system by concealing its defects and permitting the accumulation of tax arrears until the close of the war. The tax sales since held have demonstrated beyond question the utter incapacity of the system of land taxes to meet the normal civic requirements, and have thus precipitated a financial crisis which, without any original occasion for it, has placed the city of Victoria, in common with many other Western cities, in a financial position which will require very unpalatable but entirely unavoidable sacrifices on the part of the citizens to dispose of, and thus restore the city to a safe and sane condition of civic finance.

### Economic Reasons

"There are very special economic reasons why land is not a sound basis for exclusive taxation or a readily available basis for financial securities. As a single basis for taxation it lacks that very essential requirement, continuous ability to pay, as also the next most essential element, fairness and equality in the treatment of taxpaying citizens.

"On the other hand, at certain periods and under special conditions of the land market as during a period of civic expansion, commonly known as a boom period, nothing is more appropriate for adequate taxation, or more equitable when properly taxed than the exceptional profits on the purchase and sale of lands. But these periods of exceptional profit are, as a matter of repeated experience, of short duration, and therefore, the process of taxation must also be capable of rapid and effective operation. After such a speculative period the reaction destroys all profits on land transfers, and the land loses the essential tax quality of ability to pay. But the single tax on land as a basis for annual levies is entirely unsuited to deal with those special bursts of large speculative profits, succeeded by rapidly receding values and stagnation in the land market.

"As illustrated in the city of Victoria itself, during the height of the boom in land values, when the city ought to have shared in the land speculation to the extent of many millions, the civic authorities were congratulating themselves and the citizens on being able to keep the rate down to twenty mills on the dollar on an assessment far below existing market rates. They obtained revenue in the face of an expenditure of staggering proportions, which increased the city's debt 115 per cent. in two years. Then, when the ability to pay had practically vanished, the rate of taxation was nearly doubled, even on a highly inflated assessment, which was fully three times the market value of the land. And yet, as we have seen, relying on the single tax doctrines, these blunders were committed with a clear conscience.

### No Mystery About It

"But there is nothing mysterious or exceptional in these facts. They simply reflect the ordinary economic processes which invariably operate, in the case of land, in all parts of the world where there is a free market for it. The basal facts in the case are:

"(a) The supply of land in any given locality, as in a city or town, while not a fixed amount, is a definitely limited quantity at any given period. Hence, when the competition for it becomes keen, since the supply cannot be increased, it tends to rise rapidly in value, and this very rise in value stimulates the desire to purchase on the part of the speculators who have no personal use for the land, but simply seek to make a profit on the turnover while the special demand lasts.

"(b) Since land, unlike most other forms of wealth, even the most permanent buildings, is never consumed, it therefore never diminishes in quantity. When the period of special demand and speculative inflation of values is over, the total amount remains to glut the limited market which succeeds, and as it cannot be transferred or disposed of in any other market, the result is that land almost ceases to have any present value, such value as remains to it being contingent on what prospect there may be of a subsequent period of expansion, with, in the background, a possible recurrence of another boom."

## GUARANTEE OF DEBT TO BANK

### Indemnity Bond Did Not Protect Guarantee Of Edmonton Portland Cement Company

The Appellate Division of the Supreme Court of Alberta has recently decided the case of McDougall v. Gariepy, which was an action to recover under a bond of indemnity given to McDougall by Gariepy to indemnify McDougall under a guarantee to the bank.

By an agreement in writing, McDougall with ten other persons jointly and severally guaranteed to and agreed with the Imperial Bank that its customer Edmonton Portland Cement Co., would pay to the Bank all moneys which might at any time be due to the bank according to the terms of the agreement. This was a continuing guarantee and limited to $100,000 each. The bank gave McDougall notice that it required him to pay the $100,000 with interest pursuant to the guarantee and some time afterwards, McDougall obtained from Gariepy a bond "to share to "the extent of one third with him (McDougall) in any amount for which he may be found ultimately liable to the bank "under the terms of the guarantee" not exceeding $40,000. McDougall paid his indebtedness to the bank, the sum paid being placed in a special account, and not to the company's indebtedness to the bank.

The Court held, Justices Beck and Hyndman dissenting, that the payment made by McDougall to the bank being placed in a special account was in no way an adjustment of accounts between the bank and McDougall as guarantor, and it being impossible to determine the ultimate liability until the company's account with the bank was closed. McDougall was not entitled to recover from Gariepy under the indemnity bond.

Bond Prices Are Advancing

Investors who buy high-grade Government, Municipal and Corporation Bonds will benefit by the appreciation in value which financial authorities predict.

We would appreciate an opportunity of suggesting for your consideration, securities which combine all the features of a sound investment.

## CHARTERED ACCOUNTANTS' CONVENTION

### Held Last Week in Halifax—B. R. Masecar Elected President and A. E. Cox, Vice President

The twentieth annual meeting of the Dominion Association of Chartered Accountants was opened in Halifax on August 8. The members of the Association, comprising representatives from British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Quebec, New Brunswick, and Nova Scotia were welcomed by Hon. E. H. Armstrong on behalf of the Province, and by Mayor Murphy on behalf of the City. Following the opening sessions the delegates held a luncheon at the Halifax Hotel. Dr. Clarence MacKinnon delivered an address on general topics. At two thirty o'clock the delegates attended a business session, at which James Hutchison, one of the independent auditors of the Bank of Montreal, delivered an address on bank audits.

At the conclusion of the meeting the following officers were elected:—President.—B. R. Masecar, Saskatoon. Vice-President.— Arthur E. Cox, St. John, N. B. Sec. Treas.—Thomas Lax, Saskatoon. It was decided to hold next year's session at Saskatoon.

## BIG NEWFOUNDLAND PROJECT

### Great Lakes Newfoundland Atlantic Company, Ltd., Has Capital of Ten Million

In 1914 a company known as the Newfoundland Railway and Train Ferry Syndicate, Limited, registered in England and represented by H. B. Thompson, made a proposition to the Newfoundland Government for the construction of a railway from Rantem Bay, Trinity, to Little Southern Harbor, Placentia Bay, with the intention of operating a train ferry service to Louisburg, Cape Breton. The scheme also embraced the construction of a railway from Humbermouth, Bay of Islands, to Southwest Arm, Green Bay, with a branch line to White Bay, and having a train ferry service from Bay of Islands to Gaspe, Quebec.

Under certain conditions many concessions were granted the company by the Newfoundland Government. Nothing, however, came of the proposal. Recently the Great Lakes Newfoundland Atlantic Company, Limited, was incorporated at St. John's, with a capitalization of ten million dollars, with the object of acquiring the assets of the original syndicate, and it is stated that Mr. Thompson is still identified with it.

The incorporators of the new company are W. J. Wallace, J. O. O'Neill Conroy, and John Fenelon, B.A. It is probable that the capital, divided into 100,000 $100 shares will be placed on the New York market. Surveyors are at work locating sites for terminals and railway gradings.

With the next meeting of the House, it is learned, the company will place its proposition before the Legislature, and at the same time ask reasonable concessions and exemptions from the Colony to allow it to carry out its plans.

# Government and Municipal Bonds

Considering the condition of the government and municipal bond market, which has been brought about by the usual summer quietness, prices have remained steady and in some cases have shown a slight advance. Taking every thing into consideration, the condition of the bond market at this time of the year has shown a noticeable improvement over the same period last year.

Although the list of offerings shows a decline from last week, this can be expected at this time of the year as many municipal treasurers are away on vacations, and as the construction season is coming to an end, the list will no doubt be rather small for the next month or so.

The prospect of future financing is considerably brighter with the province of Alberta arranging for a refunding issue of five millions some time during September or October. The city of Victoria is also making arrangements for a refunding issue amounting to $3,500,000. Two Quebec cities have also to make refunding arrangements, Montreal having a small issue coming due about September, and Outremont an issue of $1,500,000 coming due about November 1.

Bond sales during the week, while not large were fairly numerous, most of the issues being sold in Ontario. Keen bidding characterized most of the issues, there being very little variation in the offers and some high prices were received.

### Tenders Invited

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders Close |
|---|---|---|
| Three Rivers, Que. ... | $850,000 | Aug. 21 |
| Prince Edward Island . | 175,000 | Aug. 25 |
| Barton Twp., Ont. ... | 120,000 | Aug. 21 |
| Peel County, Ont. .... | 80,000 | Sept. 1 |
| Weston, Ont. ........ | 25,000 | Aug. 21 |
| La Sarre, Que. ...... | 10,000 | Aug. 20 |
| Stewiacke, N.S. ...... | 12,000 | ...... |

**Stewiacke, N.S.**—Tenders will be received for the purchase of $12,000, 5½ per cent., 20-year debentures. No definite date has been set to receive tenders. C. L. Power, town clerk.

**La Sarre, Que.**—Tenders will be received up to eleven o'clock a.m. August 20, 1922 for the purchase of $10,000, 6 per cent., 20-installment school debentures, dated October 1, and payable at La Sarre and Quebec. Jules Lavigne, secretary-treasurer of school commission.

### Coming Issues

**Kitchener, Ont.**—The by-law for the issuing of $70,000 debentures for extentions to the street railway was passed by the ratepayers on July 29.

**Windsor, Ont.**—Two debenture by-laws were passed by the council on July 31. They were as follows: $142,193, 5 per cent., 20-years for water works; and $63,709, 5½ per cent., 20-years for road purposes.

**Oak Bay, B. C.**—The ratepayers will shortly be asked to vote on a $10,000 debenture by-law for the purchase of a park.

**Ontario Co. Ont.**—Three debenture by-laws totalling $75,000 were passed by the council on August 4.

**West Vancouver Dist. B.C.**—Tenders for the $36,100, 5½ per cent., 20-year school debentures were rejected by the council and the bonds are being offered locally at 94.22. Only one offer for the bonds was received that being from the Royal Financial Corp., who offered 84.02.

**Fort Erie, Ont.**—On August 15 the ratepayers will vote on a $40,000 debenture by-law for school purposes.

**St. Lambert, Que.**—At a meeting of the council on August 7 a by-law for the expenditure of $935,000 was read for the thrd time and adopted.

**Dundas, Ont.**—At a meeting of the council on August 4 three debenture by-laws were given second readings. They were as follows: $208,000, 5½ per cent., 30-years for sewers; $50,000, 5½ per cent., 30-years for drains; and $127,000, 5½ per cent., 20-years for pavements.

**Levis, Que.**—The city will spend $60,000 for local improvements.

**London, Ont.**—On August 4 the council passed several by-laws totalling $39,000 for school purposes.

**Whitemouth R.M. Man.**—On August 28 the ratepayers will vote on a by-law for the issuing of $2,500 debentures for school purposes.

**Ottawa, Ont.**—On July 31 the council passed a by-law for the issuing of $125,000 debentures for local improvements.

**Bienville, Que.**—The provincial government will be asked to approve the borrowing of $20,000 for the construction of a school.

**Ottawa, Ont.**—At a meeting of the Ottawa Hydro-Electric Commission on July 29, it was stated that the commission has the authority to sell bonds to the extent of $280,000 in connection with the erection of the new substation and the buying of cable. It was decided that the financng of these for the present would be done by borrowing money from the bank. It is expected that by March next only $175,000 will be expended and that the commission may get through with the work planned at considerable less expenditure than the $280,000 it is authorized to get by debenture sale. By March the exact sum needed will probably be known and then, if the market is favorable, just enough debentures will be sold to cover the total expenditure.

**Provost, Alta.**—Ratepayers will be asked to vote on a $10,000 debenture by-law for additions to school building.

### Bond Sales

**St. Anne R. M. Man.**—An issue of $15,000, 6 per cent., 30-year debentures fully guaranteed by the provincial government has been sold to Emery and Anderson at a price of 102, the money costing the municipality about 5.89 per cent. The following is a list of tenders: Emery and Anderson, 102; Strange, Snowden & Co., 101.07; Allan, Killim & McKay, 99.75; W. L. McKinnon & Co., 99.50; Bond & Debenture Corp., 99.

**Scarborough Twp., Ont.**—An issue of bonds totalling $311,000 was awarded to R. A. Daly & Co., at a price of 99.42, the money costing the township about 5.66 per cent. The issue was made up as follows: $245,000, 5½ per cent., 30-instalments; $60,000, 6 per cent., 30-instalments; and $60,000, 6 per cent., 10-instalments. Bidding for this issue was keen with eleven bids being received and very little variation in the offers. The following is a list of tenders:—R. A. Daly & Co., 99.42; W. L. McKinnon & Co., 98.77; Wood, Gundy & Co., 98.44; Dominion Securities Corp., 98.37; A. E. Ames & Co., 98.34; Gairdner, Clarke & Co., 98.119; McLeod, Young, Weir & Co., 98.11; C. H. Burgess & Co., 97.752; A. Jarvis & Co., 97.06; National City Co., 96.72; Canada Bond Corp., 97.57 for the $245,000 issue; 102.50 for the $60,000, 30-instalments; and 99.60 for the $60,000, 10-instalments.

**Trafalgar Twp., Ont.**—W. L. McKinnon & Co. have purchased $45,000, 5½ per cent., 20-year debentures at a price of 98.44, the money costing the township about 5.62 per cent. The following is a list of tenders:—W. L. McKinnon & Co., 98.44; R. A. Daly & Co., 97.91; Bell, Gouinlock & Co., 97.87; R. C. Matthews & Co., 97.85; MacNeill, Graham & Co., 97.736; C. H. Burgess and Co., 97.71; Canada Corp., 97.66; A. E. Ames & Co., 97.58; McLeod, Young, Weir & Co., 97.38; Gairdner, Clarke & Co., 97.37; Dominion Securities Corp., 97.25; Wood, Gundy & Co., 96.81.

**Weston, Ont.**—An issue of $115,000, 6 per cent., 30-instalment school debentures was awarded to Dominion Securities Corp., at a price of 102.259, the money costing the town about 5.79 per cent. The following is a list of bids: Dominion Securities Corp., 102.259; Canada Bond Corp., 101.875; C. H. Burgess & Co., 101.54; Wood, Gundy & Co., 101.42; Municipal Bankers Corp., 100.60; R. C. Matthews & Co., 99.35.

**Wiarton, Ont.**—R. C. Matthews & Co. have purchased $10,000, 6 per cent., 20-instalment debentures at a price of 99.18, the money costing the town about 6.10 per cent.

**Kincardine, Ont.**—An issue of $43,000, 5½ per cent., 20-instalment debentures has been purchased by R. C. Matthews & Co. at a price of 97.16, the money costing the town approximately 5.85 per cent. The following is a list of bids: R. C. Matthews & Co., 97.16; C. H. Burgess & Co., 96.79; Wood, Gundy & Co., 96.65; Dyment, Anderson & Co., 96.37; A. Jarvis & Co., 95.91; Gairdner, Clarke & Co., 95.77; Dominion Securities Corp., 95.23; Canada Bond Corp., 95.23; A. E. Ames & Co., 95.20; McLeod, Young, Weir & Co., 94.67.

Newmarket, Ont.—Bell, Gouinlock and Co. were awarded $60,000, 25-instalment, 6 per cent. debentures at a price of 101.51, the money costing the town about 5.84 per cent. The following is a list of tenders: Bell, Gouinlock & Co., 101.51; Canada Bond Corp., 101.222; W. L. McKinnon & Co., 101.06; Dominion Securities Corp., 100.865; A. E. Ames & Co., 100.80; R. C. Matthews & Co., 100.32; Gairdner, Clarke & Co., 100.27; Wood, Gundy & Co., 100.21; McLeod, Young, Weir & Co., 100.15; C. H. Burgess & Co., 99.26; and McNeill, Graham & Co., 99.07.

**North Bay, Ont.**—Wood, Gundy & Co., have purchased $47,000, 5½ per cent., 20-instalment school debentures at a price of 95.48, the money costing the town about 6.06 per cent.

**Toronto Twp. Ont.**—An issue of $40,000, 5½ per cent., 30-year bonds was purchased by the Canada Bond Corp., at a price of 97.53, the money costing the township about 5.67 per cent. The following is a list of tenders: Canada Bond Corp., 97.53; W. L. McKinnon & Co., 97.39; R. C. Matthews & Co., 97.298; C. H. Burgess & Co., 97.13; Dominion Securities Corp., 97.08; Bell Gouinlock & Co., 97.03; McNeil, Graham & Co., 96.93; Aird, McLeod & Co., 96.91; Wood, Gundy & Co., 96.86, and A. E. Ames & Co., 96.13.

### COBALT ORE SHIPMENTS

The following were the shipments of ore from Cobalt Station for the week ending August 4th:— Mining Corp. of Canada, 298,924; Nipissing Mining Co., 431,838; total, 730,762.

The following were the shipments of ore from the Cobalt Station for the week ending August 11th:— Nipissing Mine, 713,605; Mining Corporation, 408,507; total, 1,122,112. The total since January 1st is 3,915,207 pounds or 1,957.6 tons.

### NICKEL CO. RESUME OPERATIONS

On August 14 operations on a small scale were commenced at the plant of the British-American Nickel Corp., at Deschenes.

Work has been in a state of suspension for a considerable period, and it is only lately that conditions have warranted the resumption of activities. As yet, however, there is only a very small part of the plant in use, but it is expected that later operations will commence in earnest.

### LOGGING CAMPS

British Columbia logging camps will operate for a longer period this year than has been the case for many years, according to G. G. Johnson, president of the B.C. Loggers' Association. This is due to the fact that so many camps have lost time this summer through danger of fires.

The news will be welcomed by many hundreds of woodsmen, who have been out of work this year during the season when they usually made their year's stake.

"Many camps now shut down on account of fire hazard are preparing to resume operations at an early date, said Mr. Johnson.

### INCREASED COAL OUTPUT

The British Empire Steel Corporation is steadily increasing its coal production under the stimulus of strike conditions in the United States mines. July production of the company was 424,156 tons, an increase of 34,481 tons over the same month a year ago. Output for June this year was 382,661 tons and for May, about 308,000 tons.

### CHEAPER LUMBER

According to a report from Nelson, B.C. the Mountain Lumber Manufacturers' Association announced a reduction of fifty cents per thousand feet in the delivered prices of all principal grades of lumber in order that the benefit derived from lower lumber freight rates to prairie points may be passed on to buyers and consumers of lumber. Rate reductions were effective August 1, and will average about fifty cent per thousand feet.

### WILLIAM GRAY AND CO.

William Gray and Company, chartered accountants, have moved from 1107 McArthur Building to 302-3 Northern Life Bldg., Winnipeg.

We have just issued a list of bonds which, being unsold balances of larger issues, are offered at unusually attractive prices. Copy gladly mailed upon request.

**Write for this List**

Interest returns range upwards of 5½%, and bonds may be purchased in a wide variety of denominations, thereby permitting investment of odd amounts.

# Stock Markets

The chief feature of the stock market during the past week was the bullish demonstration in the paper stocks, more particularly noticed on the Montreal than on the Toronto Exchange.

This movement in the paper securities has been accumulating for some time owing to the prospects of increasing prices for the Canadian export business, which is largely with the United States, and also owing to the increasing consumption of paper across the border with the result that the paper mills in Canada have been working to capacity. There is a probability that paper prices will be higher next year, and should they be so, there is a possibility that the dividend rate will be increased in some cases, or the replacement of discontinued distributions as the case may be.

Next to the paper stocks, textile issues were another feature of the week's trading with Dominion Textile advancing four points in one day to a new high of 175. Wabasso was also an active member scoring an advance of 3½ points on August 14 to a price of 79½. Canada Cottons was also active with a slight advance in price.

Although the Montreal market pursued an active campaign during the week, practically the very opposite occured on the Toronto Exchange, where the market proceeded along the customary conservative lines of midsummer quietness. The Toronto market as a whole remained decidely firm and several important advances were recorded. As the New York market has been unsettled as a result of the continuation of the railroad strike, no reason is obvious as to the bullish condition of the Montreal market.

A matter of considerable gratification to the market, and more particularly to the Montreal Exchange was the unofficial announcement that the call money market in Montreal had developed an easier tone and that not only banks but trust companies and private sources were offering funds. Complaints have been made that there was a scarcity of money with which to operate the market.

Taking the general industrial list as a whole there was a marked improvement over the previous week's prices.

### Holt, Renfrew Bond Issue

Harris, Forbes & Co., are offering $600,000, 6½ per cent., first mortgage sinking fund bonds, series "A", of Holt, Renfrew & Co., at a price of 98.50 and interest to yield about 6.67 per cent.

The authorized capital of the company is $1,000,000 common stock, all of which has been issued, and $1,000,000 7 per cent. cumulative preferred stock, all of which has been issued. The funded debt is an authorized issue of $1,000,000, 6½ per cent., first mortgage sinking

The bonds are dated August 1, 1922 and are due August 1, 1937. They are callable as a whole, but not in part except for the sinking fund, on sixty days' notice, on August 1, 1927 at 105 and interest, and on any subsequent interest date at premiums decreasing ¼ per cent., each six months. Bonds are in denominations of $1,000 and $500, with principal and interest payable at Quebec, Montreal, Toronto or Winnipeg.

The business of the company was originally established in Quebec in 1837 and is the largest fur manufacturers in Canada. The company has stores in Quebec, Montreal, Toronto and Winnipeg which carry other lines of merchandise.

The annual statement for the year ended January 22, 1922 shows that earnings have been well maintained, being only slightly lower than the previous year. Earnings for the year amounted to $164,063 as compared with $171,592 for the previous year. The profit and loss balance was $197,077, as against $183,135.

### To List Bonds in New York

Steps have been taken to list the bonds of Canada Steamship Lines, Limited, on the bond section of the New York market. This is expected to give the issue a much broader market than at present exists.

### Preferred Shares Listed

On August 9, three million dollars of preferred stock of the Winnipeg Electric Railway Co., was listed on the Toronto Stock Exchange.

## PROGRESS OF UTILITY ENTERPRISES

### Plants in Canada Number 1,887, Which Installed Horsepower of 2,697,822—Gross and Net Earnings Increased Last Year

In a pamphlet on Canadian public utilities, Nesbitt, Thomson and Co., Montreal, deal with the general growth of these enterprises and with the earnings of some of the leading companies. The pamphlet says in part:—

"The phrase 'Public Utilities' covers fully the services rendered to the public by companies operating water powers, street railways, light, power, telephone, gas, etc. The peculiar services rendered by these companies, giving twenty-four hour service three hundred and sixty-five days in the year, and requiring a large capital expenditure in relation to the turnover, make it necessary for them to have practical monopolies wherveer they operate.

"Monopolies have never been popular with the public, more especially one of an essential commodity. In the past many companies failing to realize the importance of this fact made no effort to overcome this natural handicap by rendering efficient service and giving consideration to their customers' needs. As a result of such short sighted policies the public became antagonistic to the utilities, and when, during the war, operating costs rose steadily and applications were made to the public for increased rates, particularly by street railways, such applications were not looked on with favor and consequently caused hardships to many companes.

### Public Commissioners

"This resulted in the formation in most places of 'Public Utility Commissions,' which, acting under the rule that an investor is entitled to a reasonable return upon his money, appraised the properties of many utilities and adjusted their rates to more satisfactory bases. Fortunately for all concerned, we have now entered into a time of better understanding. Both the public and the companies appear to have had a change of heart, for we find at present strenuous efforts on the part of the companies to render efficient service and also an appreciation by the public of such services.

"The prosperity of the country depends to a large entent upon the prosperity of our public utilities. It is, therefore, necessary to the welfare of the country that our utilities be encouraged and be afforded the means to expand from year to year to provide for the future growth of this country."

### Water Powers

The following table is given, showing the developments of Canadian water powers:

| Year | New plants No. | New plants Installed H.P. | Additions to old plants No. | Additions to old plants H.P. Installed | Accumulative totals estimated. No. | Accumulative totals estimated. H.P. Installed |
|---|---|---|---|---|---|---|
| Prior to 1912 | 1563 | 1,282,405 | .... | ............ | 1563 | 1,282,405 |
| 1912 | 57 | 80,172 | 19 | 40,191 | 1620 | 1,402,768 |
| 1913 | 55 | 115,491 | 24 | 112,290 | 1675 | 1,630,549 |
| 1914 | 57 | 157,087 | 23 | 75,013 | 1732 | 1,862,649 |
| 1915 | 30 | 131,007 | 18 | 17,864 | 1762 | 2,011,520 |
| 1916 | 22 | 19,894 | 20 | 96,507 | 1784 | 2,127,921 |
| 1817 | 35 | 22,897 | 22 | 39,965 | 1819 | 2,190,783 |
| 1918 | 32 | 8,409 | 25 | 65,066 | 1851 | 2,264,258 |
| 1919 | 16 | 10,440 | 22 | 91,419 | 1867 | 2,366,117 |
| 1920 | 7 | 31.800 | .... | ............ | 1874 | 2,397,917 |
| 1921 | 13 | 196,275 | 10 | 103,630 | 1887 | 2,697,822 |
|  | 1887 | 2,055,877 | 183 | 641,945 | 1887 | 2,697,822 |

### Companies' Earnings

"The record of growth of Canadian power companies reveals steady progress both in the amount of power developed and in the customers served. In 1910 there was only slightly over 1,000,000 H.P. developed in Canada. At the present time there is installed a total of 2,763,000 H. P. Accompanying and resulting from this increase has been the great expansion of the manufacturing trade of Canada. The total installation for the Dominion averages 315 H.P. per thousand population, a figure which places Canada second only to Norway in the per capita utilization of water power among the countries of the world."

The following comparative statement of earnings of some of the best known Canadian companies is given:

| Name | 1920 Gross | 1920 Net | 1921 Gross | 1921 Net |
|---|---|---|---|---|
| B.C. Electric Railway | £609,362 | £412,327 | £622,902 | £421,277 |
| Calgary Power Co., Ltd. | $ 291,041 | $ 236,118 | $ 303,724 | $ 239,040 |
| Dominion Power and Trans. Co. | 3,803,723 | 1,031,847 | 3,758,947 | 912,659 |
| Kaministiquia Power | 449,173 | 302,695 | 455,627 | 304,465 |
| Laurentide Power Co. | 1,040,887 | 866,792 | 1,237,561 | 1,037,020 |
| Laurentian Power Co. | 220,588 | 164,488 | 221,061 | 171,356 |
| Montreal L., H. & Power Co. | 12,748,409 | 4,882,956 | 13,289,964 | 5,411,034 |
| North. Ont. L. & P. | 909,427 | 605,940 | 778,118 | 495,442 |
| N. S. Tram. & Power Co. | 1,461,039 | 87,629 | 1,446,639 | 181,638 |
| Ottawa Power | 1,459,308 | 390,419 | 1,652,051 | 543,377 |
| Southern Can. Power | 689,742 | 323,775 | 753,959 | 378,621 |

| Winnipeg Electric | 5,310,400 | 1,311,739 | 5,579,430 | 1,238,640 |
| Totals | $33,757,848 | $13,221,170 | $35,115,035 | $14,262,520 |

# *Unlisted Securities Market*

The weekly report issued on the unlisted market by A. J. Pattison Jr. & Co. states that trading reached a fair volume without causing any great change in prices. The buying power of the rural communities continues to show a steady increase week by week, the inquiries being almost entirely for proven investments. Industrial Bonds were in more demand than for many months past and in most cases fractional improvements were recorded. The general trend appears to be toward considerably higher figures for the dividend paying issues which will bring them more nearly into line with the present Bond yields.

Cockshutt Plow Preferred under steady inquiry moved up to 44-46 without bringing any volume of stock and held firm at these figures with considerable demand unfilled at the close. Howard Smith Paper 7's advanced to 95-96½ while Spanish River 8's sold at 102 up ½ from last week. Mattagami Debentures at 43-43½ show a gain of 3 points following the general improvement in the pulp and paper issues. Western Power Company 5's were asked for at 78 with none offered. Durant Motor were quite active at the slightly narrower figures of 9½-10½. Famous Players Preferred closed 56½ bid up 1½ points from last week. Canadian Westinghouse continues to advance each week, moving up 2 points to 115-118 without changing hands. Trust & Guarantee eased slightly to 67-71½. Whalen Preferred at 25-26 and the Debentures at 63½-66½ remain unchanged. Dunlop Tire Preferred sold off to 80-81 with but little interest evident either way.

## HURON AND ERIE MORTGAGE

For many years frequent trips to Western Canada have been made by directors of the Huron and Erie Mortgage Corporation for the purpose of inspecting properties upon which the institution holds mortgage loans and also for getting a close-up view of general conditions in the Provinces of Manitoba, Saskatchewan and Alberta. Hume Cronyn, vice-president and general manager, and Directors Geo. T. Brown and H. E. Gates, left London on August 12 for Winnipeg.

The Huron and Erie Mortgage Corporation has branches in Western Canada at Winnipeg, Regina and Edmonton.

East Kootenay Power Co.
Limited

*7% First Mortgage Bonds*

Company operates in the rich zinc, lead, and coal field of British Colombia.

A valuable contract was recently closed with Consolidated Mining and Smelting Co.

Now supplying power to the cities of Cranbrook and Fernie, B.C., and a number of Coal Companies.

Earnings from these contracts alone will show substantial amount earned on common stock after payment of bond interest.

Price to yield about 7¼%, with a bonus of common stock.

A most desirable long-term security.

## EMPLOYMENT INCREASES

### June Report is Higher Than Any Period in 1921

As has been anticipated, the curve of employment based upon employers' reports continued to rise during June and at the end of the month had attained a slightly higher level than at any period in 1921, according to reports received by the Employment Service of Canada.

The percentage gain recorded during the month, however, was considerably smaller than that registered in May, when there was a 6 per cent., increase in personnel over April. The expansion would have been considerably more pronounced had not the closing of several large railway car shops in Quebec and Ontario during the last week in the month released over 9.500 employees, most of whom, however, would be reinstated early in July.

Reports were tabulated for the month ending June 30 from 6,365 concerns, with an aggregate payroll of 749,943 persons, of whom 738,462 wer actually working on the date indicated, as compared with 725,340 employees on May 31. The index number therefore, stood at 91.1 as compared with 89.2 on May 31 and with 87.6 on June 30, 1921. The movement during the same month of last year had been upward also, but the net gains were not quite so large as during the month under review. The most noteworthy expansion during June was reported in the construction and transportation industries. The general tendency in the manufacturing industries, excluding iron and steel, was decidedly favorable, there being further marked additions to staffs in saw mills, supplemented by increases on a smaller scale in canneries, rubber and other factories. Employment in the railway car shops, as mentioned before, declined largely, though temporarily, and there were extensive seasonal contractions in logging.

### Manufacturers

Employment in the manufacturing group as a whole declined slightly on account of the temporary losses in the railway car shops. Apart from these contractions the general tendency in the manufacturing industries was upward. Sawmills continued to increase their staffs extensively and gains on a smaller scale occurred in rolling mills, dairies, boot and shoe factories, canneries, rubber, tobacco, brick, glass, cement, electric current and tin can works. Between-season dullness in the garment trades caused employment in the textile industries to fall off to some extent and musical instrument plant were not so busy as in May. The movement in the manufacturing group during June of last year was distinctly downward and the situation less favourable than for the month under review.

### In Trade Unions

According to reports received from 1,437 trade unions representing 151,564 members, the employment situation at the end of June showed further improvement, the index number raising from 9.13* on May 31 to 94.7 on June 30 as compared with 86.8 for the corresponding month of last year. This increase in activity caused the curve in the accompanying chart to attain a higher level than at any time since September, 1920, and to be slightly over 2 points higher than in October, 1921, which marked the peak indicated for last year. The improvement during June was of a general character, being reported in practically all groups. The most marked increae in employment, however, occurred in manufacturing, where the garment trades especially, were considerably busier.

* Revised figures.

## QUEBEC FIRE PROTECTION

Damages caused by fire in a number of municipalities through the destruction of churches or from uncertain causes as in that of Laurierville, where some fifty houses were wiped out, has resulted in an increase in the demand for subsidies given for fire protection according to P. J. Jobin, Inspector of Public Establishments in Quebec Province. This year demands are flowing in for protection so that the $40,000, which was voted for subsidies will be exhausted before long. Last year only $25,000 was expended, as the municipalities were rather indifferent, Mr. Jobin said. "The fact that 30 p.c. of the organizing fire protection and the buying of fire apparatus in rural districts is paid by the Government will greatly help in reducing the losses this year," said Mr. Jobin. He also referred to the fact that churches were being more protected than in the past, in many cases watchmen being engaged to protect them.

## DIVIDEND NOTICES

## IMPERIAL OIL, LIMITED

### Dividend

NOTICE is hereby given that a Dividend of seventy-five cents (75c.) per share in Canadian funds has been declared by the directors of the Imperial Oil, Limited, and that the same will be payable in respect of shares specified in any Share Warrant of the Company within three days after the Coupon Serial Number Thirteen of such Share Warrant has been presented and delivered to:

The Royal Bank of Canada,
Toronto, Ontario,

or at the office of:

Imperial Oil, Limited,
56, Church Street,
Toronto, Ontario,

such presentation and delivery to be made on or after the first day of September, 1922.

Payment to shareholders of record and fully paid up at the close of business on the 15th day of August, 1922, (and whose shares are represented by Share Certificates) will be made on or after the 1st day of September, 1922.

The books of the Company for the transfer of shares will be closed from the close of business on the 15th day of August, 1922, to the close of business on the 1st day of September, 1922.

BY ORDER OF THE BOARD.

E. V. A. KENNEDY.
Secretary.

56, Church Street,
Toronto, Ontario. 17
August 11th, 1922.

## NEW INDUSTRIES

On August 8 the ratepayers of Goderich, Ont., passed a by-law authorizing the sale of a factory to the Artcraft Furniture Co. The company will start operations immediately and will employ some 50 people in the manufacture of children's carriages and wicker work.

## SOAPSTONE DEPOSIT

What promises to be an important and valuable source of soapstone has lately been investigated by H. S. Spence, of the Mines Branch, Department of Mines. The deposit occurs one mile west of Wabigoon, on the Canadian Pacific Railway, near Dryden, Ont., and is about 500 yards from the railway. There is very little overburden, and the outcrops indicate a large body of soapstone.

The stone may be termed soapstone, though, beyond being soft enough to cut readily with an ordinary saw, it bears little resemblance to what is usually classed as soapstone. It is a dark, greenish-gray rock, composed largely of talc, and is very similar in appearance and in composition to the so-called "alberene stone" of Virginia, which is extensively used for switchboard panels, laboratory equipment and laundry tubs, and for lining furnaces and digestors, etc.

The Wabigoon deposit is the most promising, from an economic standpoint, of any of the soapstone occurrences as yet found in Canada; there appears to be a large tonnage available, the location is ideal for quarrying, and close proximity to the railway provides satisfactory transportation facilities.

## GREENOCK WOOD RAIWAY

The Greenock Wood Railway, in Bruce County, Ont., owned and operated by Cargill, Ltd., is reported to have been sold, together with all equipment, and the rails and ties may be torn up and shipped away in the near future.
